**Multimedia Projector**

User's Manual

Thank you for purchasing this projector.

⚠ **WARNING** ►Before using this product, please read all manuals for this product . After reading them, store them in a safe place for future reference.

About this manual

Various symbols are used in this manual. The meanings of these symbols are described below.

⚠ **WARNING**

This symbol indicates information that, if ignored, could possibly result in personal injury or even death due to incorrect handling.

⚠ **CAUTION**

This symbol indicates information that, if ignored, could possibly result in personal injury or physical damage due to incorrect handing.

Contents

Projector features

1. Design with 3LCD optical system, provide you：Bright image, natural color, smooth video playback and gentle for your eyes.
2. Design with high efficiency dust air filter and Auto Filter Alert. (See P30)
3. Easy to maintain design function (See P32~35)
4. Security PIN Lock function. (See P29)
5. Progressive scans accommodating for High-definition 1080i form.
6. Auto V keystone function, +/- 30 degrees.
7. Auto brightness control.
8. Auto ceiling function.
9. Support DVI ,YPbPr ,Composite Video and S-Video signal. (See P8)
10. Hiding-Style Handle to carry the projector easily. (See P11)

Preparations

Contents of package(Before Use)

Your projector should come with the items shown there. Contact immediately your dealer if anything is missing.

(3)Battery (for Remote Control use)
(1)Projector and Lens Cap   (2)Remote control   (4)User's Manual (CD)
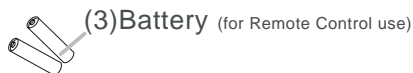

(5)Quick Start Guide   (6)Power Cable   (7)VGA Cable   (7)USB Cable

---

NOTE   ► Keep the original packing materials, for future reshipment.
Be sure to use the original packing materials when moving the projector.

5

Setting up

Install the projector according to the environment and manner the projector will be used in.

Arrangement

The distance between the projector and screen determines the actual image size.Refer to this table, in case of 4:3 aspect ratios. The value (M) shown in the table are calculated for a full size screen.

Screen

Lens center

Side view

On a horizontal surface   **Suspended from the ceiling**

D Screen size (diagonal)
M Projection distance
H Screen height

Screen size (inch)	M Distance (m)		M Distance (feet)	
	Tele	Wide	Tele	Wide
40	1.50	1.24	4.91	4.06
60	2.23	1.85	7.32	6.06
70	2.60	2.15	8.52	7.05
80	2.97	2.45	9.73	8.05
100	3.70	3.06	12.14	10.04
200	7.37	6.10	24.18	20.01
300	11.04	9.14	36.22	29.97

NOTE ► Allowing the proper amount of space on the top, sides, and rear of the projector cabinet is critical for proper air circulation and cooling of the unit. When in against at wall, leave about 20cm (7.9in.) between the projector and the wall.

Setting up

⚠**WARNING**

• Place the projector in a stable horizontal position.
If the projector falls or is knocked over it could cause injury and/or damage to the projector. Using a damaged projector could then result in fire and/or electric shock.

(1) Do not place the projector on an unstable, slanted or vibrational surface such as a wobbly or inclined stand.

(2) Do not place the projector on its side, front or rear position.

(3) Consult with your dealer before a special installation such as suspending from a ceiling.

• Place the projector in a cool place, and ensure that there is sufficient ventilation. The high temperature of the projector could cause fire, burns and /or malfunction of the projector.

(1) Do not stop-up, block or otherwise cover the projector's vents.Keep a space of 20 cm or more between the sides of the projector and other objects such as walls.

(2) Do not place the projector on metallic thing or anything weak in heat.

(3) Do not place the projector on carpet, cushions or bedding.

(4) Do not place the projector in direct sunlight or near hot objects such as heaters.

(5) Do not place anything near the projector lens or vents, or on top of the projector.

(6) Do not place anything that may be sucked into or stick to the vents on the left of the projector. This projector has some intake vents also on the left.

• Avoid placing the projector in smoky, humid or dusty place.

• Do not place the projector anyplace where it may get wet. Getting the projector wet or inserting liquid into the projector could cause fire, electric shock and/or malfunction of the projector.

(1) Do not place the projector in a bathroom or the outdoors.

(2) Do not place anything containing liquid near the projector.

⚠**CAUTION**

Placing the projector in such places could cause fire, electric shock and/or malfunction of the projector.

(1) Do not place the projector near humidifiers, smoking spaces or a kitchen.

(2) Position the projector to prevent light from directly hitting the projector's remote sensor.

Connection

Connecting Devices

Be sure to read the manuals for devices before connecting them to the projector.
Please refer to the following illustrations to connect them.

PC

VGA out DVI out Audio out RGB in RS-232C USB *LANS (Optional Function)* Audio out VGA out RGB in

Speaker *VCD/DVD Player*

Audio in

S-video out Video out Audio out (L)&(R) Y Pb/Cb Pr/Cr Audio out (L)&(R)
NOTE ► Service Port is available for the dealers only.

Setting up

Connecting your devices(Continue)

NOTE ►Be sure to read the manuals for devices before connecting them to the projector, and make sure that all the devices are suitable to be connected with this product. Before connecting to a PC, check the signal level, the signal timing, and the resolution.
- Some signal may need an adapter to input this projector.
- Some PCs have multiple screen display modes that may include some signals which are not supported by this projector.
-The best display performance will be achieved if the resolutions of the input signal and the projector panel are identical.
►While connecting, make sure that the shape of the cable's connector fits the port to connect with. And be sure to tighten the screws on connectors with screws.
►When connecting a laptop PC to the projector, be sure to activate the PC's external monitor(RGB) output. (Set the laptop PC to CRT display or to simultaneous LCD and CRT display.) For details on how this is done, please refer to the instruction manual of the corresponding laptop PC.
►In some cases, this projector may not display a proper picture or display any picture on screen. For example, automatic adjustment may not function correctly with some input signals. An input signal of composite sync may confuse this projector, so the projector may not display a proper picture.

⚠**WARNING** ►Do not disassemble or modify the projector and accessories.
►Be careful not to damage the cables, and do not use damaged cables.
⚠**CAUTION** ►Turn off all devices and unplug their power cords prior to connecting them to projector. Connecting a live device to the projector may generate extremely loud noises or other abnormalities that may result in malfunction or damage to the device and the projector.
►Use appropriate accessory or otherwise designed cables. Ask your dealer about non-accessory cables which may have other length or equipped with a core. For cables with a core only at one end, connect the end with the core to the projector.
►Make sure that devices are connected to the correct ports. An incorrect connection may result in malfunction or damage to the device and the projector.

Setting up

Connecting power supply

1. Connect the connector of the power cord to the AC inlet of the projector.

2. Firmly plug the power cable's plug into the outlet. The POWER indicator will begin blinking in green. The projector work on stand by mode.

POWER indicator

AC inlet

Outlet

power cable
⚠**WARNING**
- ►Please use extra caution when connecting the power cord, as incorrect or faulty connections may result in fire and/or electrical shock.
- ►Only use the power cord that came with the projector. If it is damaged, contact your dealer soon.
- ►Only plug the power cord into an outlet rated for use with the power cord's specified voltage range. The power outlet should be close to the projector and easily accessible. Remove the power cord for complete separation.
- ►Never modify the power cord.

Using the Security Anchor

The product was designed security anchor and PIN LOCK functions ()to help prevent unauthorized removal projector.
Security Anchor

⚠**WARNING**
- ►Do not use the security anchor to prevent the projector from falling down or held, since it is not designed for it.

NOTE ►The security anchor is not comprehensive theft prevention measures. It is intended to be used as supplemental theft prevention measure.

Setting up

Using the Hiding-Styled Handle
Refer to the picture operation direction to
pull the handle.

Hiding-Styled Handle
NOTE ►This handle is designed to carry the projector for short distance only.
►Please do not add other goods to the projector, it would be damaged.

Remote control

Putting batteries

Please set the batteries to the remote control before using it. If the remote control starts to malfunction, try to replace the batteries. If you will not use the remote control for long period, remove the batteries from the remote control and store them in a safe place.
1. Remove the battery cover.
   Slide back and remove the battery cover in the direction of the arrow.
2. Insert the batteries.
   Align and insert the two AAA batteries according to their plus and minus terminals.

3. Close the battery cover.
   Replace the battery cover in the direction of the arrow and snap it back into place.

⚠**WARNING**   About the Battery
►Always handle the batteries with care and use them only as directed.
Improper use may result in battery explosion, cracking or leakage, which could result in fire, injury and/or pollution of the surrounding environment.
►Be sure to use only the batteries with the mentioned specification.
►Do not use batteries of different types at the same time.
►Do not mix a new battery with used one. Make sure the plus and minus terminals are correctly aligned when loading a battery.
►Keep a battery away from children and pets.
►Do not recharge, short circuit, solder or disassemble a battery.
►Do not allow a battery in a fire or water.
►Keep batteries in a dark, cool and dry place. If you observe a leakage of a battery, wipe out and then replace a battery. If it adhere your body or clothes, rinse well with water immediately.
►Dispose of batteries in accord with environmental laws.

Remote control

About the remote control signal

1. The remote control works with the projector's remote sensor. This projector have 2 remote sensors on the front and back.

2. The sensor senses the signal within the following range when the sensor is active:30 degrees (15 degrees to the left and right of the sensor) within 7 meters about.

remote sensor

15°
15°
NOTE ► Laser pointer of the remote control is used in place of a finger or rod. Never look directly into the laser beam outlet or point the laser beam at other people.

Using as a simple PC mouse & keyboard

The enclosed remote control works as a simple mouse and keyboard of the PC, when the projector's USB port connects with the PC's mouse port via a mouse cable.(SEE P4)
⚠**CAUTION** ►Improper use of the simple mouse & keyboard function could damage your equipment. While using this function, please connect this product only to a PC.

13

Power on/off

Turning on the power

1. Make sure that the POWER indicator turns in steady green and the lens cover is removed.

2. Press the STANDBY/ON button on the projector or the remote control.

3. The projection lamp will light up, the LAMP indicator will not light in red and the POWER indicator will begin light in green.

To display the picture, select an input signal according to the section "Selecting an input signal" ().

Lens cover

Turning off the power

1. Press the ON/STAND BY button on the projector or the remote control. The message [Power off. Please press key again to power off.] will appear on the screen for about 5 seconds. Press again and the projector lamp will go off, the POWER indicator will begin light in green and the LAMP indicator will begin blinking in red.

2. The LAMP indicator will stop blinking and light in red. And then the POWER indicator begin blinking in green when the lamp cooling is complete. Unplug the power cable.

Attach the lens cap. Do not turn the projector on immediately after turning off. Turning projector on again too soon could shorten the lifetime of some consumable parts of the projector.
⚠**WARNING**►A strong light is emitted when the projector's power is on. Do not look into the lens of the projector or look inside of the projector through any of the projector's openings.
►Do not touch around the lamp cover and the exhaust vents during use or just after use, since it is too hot.
►Remove the power cord for complete separation.

14

Operating

Adjusting the volume

1. Press the VOLUME button on the remote control. A dialog will appear on the screen to aid you in adjusting the volume.

2. Use the +/- cursor buttons to adjust the volume. To close the dialog and complete the operation, press the MENU button and the menu will disappear after a few seconds.
Adjusting the mute

1. Press the MUTE button on the remote control. A dialog will appear on the screen indicating that you have muted the sound.

2. If you do not do anything, the dialog will automatically disappear after a few seconds.

3. Press the MUTE button will bring the sound back to the level before muting.

Selecting an input signal

1. To select a new input,press the PC button on the projector or remote control. Each time you press the button, the projector switches its input port as below.

$$\rightarrow \text{COMPUTER IN1} \rightarrow \text{COMPUTER IN2} \rightarrow$$
$$\text{DVI} \leftarrow$$
2. If press the Video button on the remote control.Each time you press the button, the projector switches its input port as below.

$$\rightarrow \text{YPbPr} \rightarrow \text{COMPOSITE VIDEO} \rightarrow$$
$$\leftarrow \text{S-VIDEO} \leftarrow$$

15
Selecting an input signal (continued)

3. If press AUTO button on the projector. Each time you press the button, the projector's image is in Blank mode. Automatically adjusts the setting to match the current input.

Searching an input signal

1. Please Press the MENU button on the projector or remote control.

2. After you can use the ▶ cursor button to chiose [ON] in the AUTO SEARCH item of the SETTING menu.

The projector will start to check its input ports in order to find any input signals. When an input is found, the projector will stop searching and display the image. If no signal is found, the projector will return to the source before searching and the projector switches its input port as below.
```
┌→ COMPUTER IN1 → COMPUTER IN2 → DVI → YPbPr ┐
└────────────── S-VIDEO ← COMPOSITE VIDEO ←──┘
```

Selecting an aspect ratio

1. Press the MENU button on the projector or remote control.

2. After you can select the RESIZE item of the ADVANCED menu. And use the ◀ / ▶ cursor buttons to adjust the aspect ratio.

For a PC signal
4:3 → 16:9
↑_____|

For a video signal (s-video signal or component video signal)
4:3 → 16:9
↑_____|

For no signal
4:3 (fixed)

The RESIZE item does not work when no proper signal is inputted.
The NORMAL mode keeps the original aspect ratio setting.
Performing the automatic adjustment initializes the aspect ratio setting.
16

Operating

Adjusting the image position

When the place to put the projector is slightly uneven to the left or right, use the feet to place the projector horizontally. Using the feet can also tilt the projector in order to project at a suitable angle to the screen.
This projector has 2 feet and 2 knobs.
A foot is adjustable while pulling up the knob on the same side as it.

1. Holding the projector, pull the knobs up to loose the feet.

2. Position the front side of the projector to the desired height.

3. Release the knobs in order to lock the feet.

4. After making sure that the feet are locked, put the projector gently.

Holding the projector,press the adjustable knobs to extend the both feet.
⚠**CAUTION** ▶Do not handle the knobs without holding the projector,since the projector may drop down.

Adjusting the zoom and focus

1. Use the focus ring to focus the picture.

2. Use the zoom ring to adjust the screen size.

RING DOOR ZOOM RING FOCUS RING

17
Operating

Correcting the keystone distortions

1. Please Press the MENU button on the projector or remote control.

2. After you can use the ◄/► cursor button to select the KEYSTONE V item of the SETTING menu and press the ◄/► button for keystone adjustment.

(1) The KEYSTONE V item will displays a dialog for keystone correction.

(2) To close the dialog and complete this operation, press the MENU button again. The dialog will automatically disappear after a few seconds if you do not do anything.

(3) The adjustable range of this correction will vary among inputs. For some input, this function may not work well.

(4) When the zoom adjustment is set to the TELE (telephoto focus), the automatic keystone distortion correction may be excessive. This function should be used when the zoom adjustment is set to the full WIDE (wide-angle focus) whenever possible.
Press [Left] and [Right] buttons to correct keystone distortion.

18
Operating

Stilling the screen

1.Press the Still button on the remote control.
The [Still] indication will appear on the screen and the
projector will go into the Still mode.

To exit the still mode and restore the screen to normal, press
the still button again.

If the projector continues projecting a still image for a long time,
the LCD panel might possibly be burned in. Do not leave the
projector in the Still mode for too long.

Still
Temporarily blanking the screen

1.Press the Blank button on the projector or remote control.
The [Blank] indication will appear on the
screen and the projector will go into the
Blank mode.

To exit from the blank screen and return to
the input signal screen, press the BLANK
button again.

If the projector is left in Blank mode for more
than 15 minutes, the projector will
automatically shut off the lamp and begin
to cool-down mode.

BLANK BUTTON
NOTE ►The sound is not connected with the blank screen function. If
necessary, set the volume or mute first.

Operating

Using the menu function

This projector has the following categories:
ADVANCED, AUDIO, INPUT, PICTURE, PRESENTATION,SETTING and
SECURITY. ADVANCED MENU consists of functions often used, and the
other menus are classified into each purpose. Each of these menus is operated
using the same methods. The basic operations of these menus are as follows.

1. Press the MENU button on the remote control
   or the projector.The MENU button on the
   projector works as the cursor buttons.

2. Use the ▲/▼ cursor buttons to select an
   category to operate.

3. Use the ◄/► cursor buttons to operate the
   category.Then press the ► cursor button,
   or the ENTER button to select an item. The
   lower layer menu of the selected item
   will appear.

4. Some functions cannot be performed
   when a certain input port is selected,
   or when a certain input signal is
   displayed.
5. **Reset all**
   After you select [Reset all] on the menu, the following confirmation message
   will appear on the screen. Press the MENU button or ignore the message to
   exit the [Reset All] function without changing any settings.

> **Reset all?**
> **Please, press reset key to return default setting.**
> reset all   Yes ▷
>   No ▷

If select to reset all, press [Yes].

(3) Press ► button : Select the [3] .
(4) Press ▼ button : Select the [Enter] move to next row.
(5) Press (backspace) item :
   In case to entered a wrong digit, select to delete the wrong digit you entered.
(6) Press item :
   Once all four digits of the PIN been entered, select to confirm.

NOTE ►If the PIN is correct, projector will show normal image.
►If the PIN is incorrect, a "Enter new code" message will be showing. Please try again.
►If the PIN been input incorrectly three times, a warning message will show up and the projector will shut itself down after 20 seconds.
►If you lost the PIN completely, contact your dealer for help.

Lamp

A lamp has finite product life. Reserving is recommended.

Replacing the lamp

1. Turn the projector off, and unplug the power cord. Allow the projector to cool for at least 45 minutes.

2. If the projector is mounted on a ceiling, contact your local dealer to replace the lamp.

In case of replacement by yourself,

3. Remove the Lamp door.(marked by arrow)

4. Loosen 2 screws of the lamp holder.
Grasp the handle on the top of the lamp
and pull the lamp straight up out of the projector.

5. Insert the new lamp, and retighten firmly the
2 screws of the lamp holder and lock the
Lamp Door.(marked by arrow)

3

Lamp Door

screws　　**The Handle**　　4

5

Lamp Door
⚠**CAUTION** ►Do not touch any inside of the projector, while the lamp is taken out.
⚠**WARNING** ►Do not touch the bulb. Touching the bulb will greatly decrease the life of the lamp and could cause the bulb to explode.

NOTE ►Please reset the lamp time only when you have replaced the lamp, for a suitable indication about the lamp.

Maintenance

Lamp Warning

⚠ **HIGH VOLTAGE**   ⚠ **HIGH TEMPERATURE**   ⚠ **HIGH PRESSURE**

WARNING
The projector uses a high-pressure mercury lamp. The explosion of lamp with a loud bang or burn out could possibly cause injury or a fire.When the bulb bursts, it is possible for shards of glass to fly into the lamp housing; and for gas containing mercury to escape from the projector's vent holes.If the lamp has broken, do not check the inside of the projector. Please ventilate the room immediately. Do not touch or bring your face close to the broken pieces since it might get into your eyes or mouth. In case of injury, seek medical advice immediately.

DISPOSAL OF A LAMP
Dispose of a lamp in accordance with the local recycling laws.
Do not put it to your trash.
Recycling Lamp's laws of the USA, go to www.lamprecycle.org.
Recycling Product's laws of the USA, go to www.eiae.org.
Recycling Product's laws of Canada, go to www.epsc.ca.
For more information about recycling laws, please contact local government agency or dealer.

CAUTION HOT
Before replacing the Lamp part, pay attention to the following items:
1. The Lamp is optional part. Contact the dealer for replacement lamp.
2. The lamp becomes very hot when in use. Turn the power off and disconnect the power cord.
3. Wait 1 Hour before replacing the Lamp.
4. Do not use old lamp part.
Maintenance

Air Filiter

Please check and clean the air filter periodically. When the dialog have warning message prompts you to clean the air filter, comply with it as soon as possible. Replace the air filter when it is damaged or too soiled.

Replacing the air filter

When the used time reaches the filter counter time,the projector will display message such as" Filter Replace.Filter has been used more than 100 hours."
If the filter is difficult to clean or if it is deteriorating, also ask the dealer to replace the filter.

1.Turn the projector off, and unplug the powercord. Allow the projector to sufficiently cool down.

2.Remove the filter cover from the right of projector.

3.Pull out the air filter.

4.Install the new air filter.

5.And then put the filter cover back on.

6.After please select the Reset filter timer item of the Security menu and display a dialog.

Reset Filter Timer?
Select "No" to exit.

Lamp Reset   Yes ▷
                  No ▷

NOTE
►If the internal temperature become too high because of filter blocked, the projector may turn off itself to prevent the internal heat level rising.

35

Maintenance

Other care

Inside of the projector
In order to ensure the safe use of your projector, please have it maintained inspected by your dealer about once every year.

Caring for the lens
If the lens is flawed, soiled or fogged, it could cause deterioration of display quality. After making sure that the projector is cool adequately, lightly wipe the lens with a commercially available lens-cleaning wipe. Do not touch the lens directly with your hand. Please handle with care.

> **NOTE** ►After making sure that the projector is cool adequately, lightly wipe the lens with a commercially available lens-cleaning wipe. Do not touch the lens directly with your hand.

⚠**WARNING** ►Before maintenance, make sure the power cable is not plugged in, and then allow the projector to cool sufficiently. The care in a high temperature state of the projector could cause a burn and/or malfunction to the projector.
►Never try to maintain the inside of the projector by your self.
►Avoid wetting the projector or inserting liquids in the projector. It could result in a fire, an electric shock, and/or malfunction to the projector
►Do not put anything containing water, cleaners or chemicals near the projector.
►Do not use aerosols or sprays.

⚠**CAUTION** ►Please take right care of the projector according to the following. Incorrect care could cause not only an injury but adverse influence such as discoloration, peeling paint, etc.
►Do not use cleaners or chemicals other than those specified in this manual.
►Do not polish or wipe with hard objects.

Troubleshooting

Regarding the indicator lamps

When operation of the LAMP and POWER indicators differs from usual, check and cope with it according to the following table. If the problem cannot be resolved contact your dealer.

POWER indicator	LAMP indicator	Conditions	Description
Blinking In Green	**off**	**Stand by mode**	Projector is ready to be turned on (normal)
Lighting *In Green*	**off**	**On mode**	Projector is on and operating normally
Lighting In **Green**	*Blinking In Red* (Slow)	**Cool down mode**	Projector is in cool-down mode and will not respond to user input (normal)
Lighting In **Green**	*Blinking In Red* (Fast)	**Fan fault mode**	The projector has detected a problem with an Slowinternal fan, the lamp will shut off automatically, contact your dealer
Blinking In Green (Fast)	Lighting In **Red**	**Lamp cover open**	The lamp cover is open or there is a problem with the lamp. If the lamp door is closed and replacing the lamp does not correct the issue, contact your dealer.
Blinking In Green (Fast)	*Blinking In Red* (Fast)	**High temperature**	The projector has overheated and shut itself down. Correct the overtemp condition immediately. 1. Check that the ventilation slots are freefrom obstructions 2. Check the cleanliness of the air filter.
Blinking In Green (Fast)	*Blinking In Red* (Fast)	**Lamp temperature**	The lamp does not light., come back "stand by mode", and turn on the power button.

⚠**WARNING** ►Never use the projector if abnormal operations such as smoke, strange odor, excessive sound, damaged casing or elements or cables, penetration of liquids or foreign matter, etc. should occur. In such cases, immediately disconnect the power plug from the power outlet. After making sure that the smoke or odor has stopped, contact your dealer.

NOTE ► When the interior portion has become overheated, for safety purposes, the projector is automatically shut down, and the indicator lamps may also be turned off. In such a case, disconnect the power cord, and wait at least 45 minutes. After the projector has sufficiently cooled down, please make confirmation of the attachment state of the lamp and lamp cover before turn the power on again.

Troubleshooting

Mistaken for machine defects

About the phenomenon confused with a machine defect, check and cope with it according to the following table.

Phenomenon	Cases not involving a machine defect	Reference page
Power does not turn on.	Correctly confirm the power cord.	
	The main power source has been interrupted during operation such as by a power outage (blackout), etc. Please disconnect the power plug from the power outlet, and allow the projector to cool down at least 45 minutes, then turn the power on again.	14
	Either there is no lamp and/or lamp cover, or either of these has not been properly fixed. Please turn the power off and disconnect the power plug from the power outlet, and allow the projector to cool down at least 45 minutes. After the projector has sufficiently cooled down, please make confirmation of the attachment state of the lamp and lamp cover, and then turn the power on again.	14
Neither sounds nor pictures are outputted. (No video / audio)	**The signal cables are not correctly connected.** Correctly connect the connection cables.	8
	Signal source does not correctly work. Correctly set up the signal source device by referring to the manual of the source device.	–
	The input changeover settings are mismatched. Select the input signal, and correct the settings.	15
Sound does not come out.	**The signal cables are not correctly connected.** Correctly connect the audio cables.	8
	The MUTE function is set to on. Restore the sound pressing the MUTE or VOLUME button on the remote control.	15
	The volume is adjusted to an extremely low level. Adjust the volume to a higher level using the menu function or the remote control.	15
No pictures are displayed.	**The lens cover is not removed.** Remove the lens cover.	14
	The signal cables are not correctly connected. Correctly connect the connection cables.	8

Mistaken for machine defects (continued)

Phenomenon	Cases not involving a machine defect	Reference page
No pictures are displayed. (continued)	**The brightness is adjusted to an extremely low level.** Adjust BRIGHTNESS to a higher level using the menu function or the remote control.	21
	The computer cannot detect the projector as a plug and play monitor. Make sure that the computer can detect a plug and play monitor using another plug and play monitor.	–
	The BLANK screen is displayed. Press the BLANK button on the remote control.	19
Video screen display freezes.	**The Still function is set to on.** Press the Still button to restore the screen to normal.	19
Pictures appear dark.	**The lamp is approaching the end of its product lifetime.** Replace the lamp.	33
Pictures appear blurry.	**The focus is not properly adjusted.** Adjust the focus using the focus ring.	17
	The lens is dirty or misty. Clean the lens referring to the section "Caring for the lens".	–
No remote function	**No battery** Before use the remote control, please check battery of remote controller.	12
	Remote signal be obstructed Remove obstacle between projector and remote controller	13
Colors are pale	**Color density and color matching are not correctly adjusted.** Adjust the RGB setting.	–
	Color lose. Caused by poor VGA cable connection.	–

NOTE ► Although bright spots or dark spots may appear on the screen, this is a unique characteristic of liquid crystal displays, and it does not constitute or imply a machine defect.
