The following projector manual has not been modified or altered in any way.
Portable Projector

The projector’s model name indicated on the projector’s label is NP610, NP510, NP410, NP405, NP310, NP305, NP510W, NP410W, NP610S, NP510WS, NP610G, NP510G, NP410G, NP405G, NP310G, NP305G, NP510WG, NP410WG, NP610SG, and NP510WSG respectively. All the models are referred to as NP610, NP510, NP410, NP405, NP310, NP305, NP510W, NP410W, NP610S, and NP510WSG through- out the user’s manual except some of the specification pages.

The NP405 and NP305 are not distributed in North America.
• IBM is a trademark or registered trademark of International Business Machines Corporation.
• Macintosh, Mac OS X and PowerBook are trademarks of Apple Inc. registered in the U.S. and other countries.
• Microsoft, Windows, Windows Vista, Internet Explorer, .NET Framework and PowerPoint are either a registered trademark or trademark of Microsoft Corporation in the United States and/or other countries.
• MicroSaver is a registered trademark of Kensington Computer Products Group, a division of ACCO Brands.
• Virtual Remote Tool uses WinI2C/DDC library, © Nicomsoft Ltd.
• Other product and company names mentioned in this user's manual may be the trademarks or registered trademarks of their respective holders.

NOTES
(1) The contents of this user's manual may not be reprinted in part or whole without permission.
(2) The contents of this user's manual are subject to change without notice.
(3) Great care has been taken in the preparation of this user’s manual; however, should you notice any questionable points, errors or omissions, please contact us.
(4) Notwithstanding article (3), NEC will not be responsible for any claims on loss of profit or other matters deemed to result from using the Projector.
Important Information

Safety Cautions

Precautions
Please read this manual carefully before using your NEC NP610, NP510, NP410, NP405, NP310, NP305, NP510W, NP410W, NP610S, and NP510WS projector and keep the manual handy for future reference.

CAUTION

To turn off main power, be sure to remove the plug from power outlet. The power outlet socket should be installed as near to the equipment as possible, and should be easily accessible.

CAUTION

TO PREVENT SHOCK, DO NOT OPEN THE CABINET. THERE ARE HIGH-VOLTAGE COMPONENTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

This symbol warns the user that uninsulated voltage within the unit may be sufficient to cause electrical shock. Therefore, it is dangerous to make any kind of contact with any part inside of the unit.

This symbol alerts the user that important information concerning the operation and maintenance of this unit has been provided. The information should be read carefully to avoid problems.

WARNING: TO PREVENT FIRE OR SHOCK, DO NOT EXPOSE THIS UNIT TO RAIN OR MOISTURE. DO NOT USE THIS UNIT’S PLUG WITH AN EXTENSION CORD OR IN AN OUTLET UNLESS ALL THE PRONGS CAN BE FULLY INSERTED.

DOC Compliance Notice (for Canada only)

This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations.

Machine Noise Information Regulation - 3. GPSGV,
The highest sound pressure level is less than 70 dB (A) in accordance with EN ISO 7779.

CAUTION

Avoid displaying stationary images for a prolonged period of time. Doing so can result in these images being temporarily sustained on the surface of the LCD panel. If this should happen, continue to use your projector. The static background from previous images will disappear.

Disposing of your used product

EU-wide legislation as implemented in each Member State requires that used electrical and electronic products carrying the mark (left) must be disposed of separately from normal household waste. This includes projectors and their electrical accessories or lamps. When you dispose of such products, please follow the guidance of your local authority and/or ask the shop where you purchased the product. After collecting the used products, they are reused and recycled in a proper way. This effort will help us reduce the wastes as well as the negative impact such as mercury contained in a lamp to the human health and the environment at the minimum level. The mark on the electrical and electronic products only applies to the current European Union Member States.
**Important Information**

**WARNING TO CALIFORNIA RESIDENTS:**
Handling the cables supplied with this product will expose you to lead, a chemical known to the State of California to cause birth defects or other reproductive harm. *WASH HANDS AFTER HANDLING.*

**RF Interference (for USA only)**

**WARNING**
The Federal Communications Commission does not allow any modifications or changes to the unit EXCEPT those specified by NEC Display Solutions of America, Inc. in this manual. Failure to comply with this government regulation could void your right to operate this equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.
If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio / TV technician for help.

For UK only: In UK, a BS approved power cable with moulded plug has a Black (five Amps) fuse installed for use with this equipment. If a power cable is not supplied with this equipment please contact your supplier.

**Important Safeguards**
These safety instructions are to ensure the long life of your projector and to prevent fire and shock. Please read them carefully and heed all warnings.

**Installation**

- Do not place the projector in the following conditions:
  - on an unstable cart, stand, or table.
  - near water, baths, or damp rooms.
  - in direct sunlight, near heaters, or heat radiating appliances.
  - in a dusty, smoky or steamy environment.
  - on a sheet of paper or cloth, rugs or carpets.

- If you wish to have the projector installed on the ceiling:
  - Do not attempt to install the projector yourself.
  - The projector must be installed by qualified technicians in order to ensure proper operation and reduce the risk of bodily injury.
  - In addition, the ceiling must be strong enough to support the projector and the installation must be in accordance with any local building codes.
  - Please consult your dealer for more information.
Important Information

Fire and Shock Precautions

- Ensure that there is sufficient ventilation and that vents are unobstructed to prevent the build-up of heat inside your projector. Allow at least 4 inches (10cm) of space between your projector and a wall.
- Do not try to touch the ventilation outlet on the left front (when seen from the front) as it can become heated while the projector is turned on and immediately after the projector is turned off.
- Prevent foreign objects such as paper clips and bits of paper from falling into your projector. Do not attempt to retrieve any objects that might fall into your projector. Do not insert any metal objects such as a wire or screwdriver into your projector. If something should fall into your projector, disconnect it immediately and have the object removed by a qualified service personnel.
- Do not place any objects on top of the projector.
- Do not touch the power plug during a thunderstorm. Doing so can cause electrical shock or fire.
- The projector is designed to operate on a power supply of 100-240V AC 50/60 Hz (NP610/NP510/NP410/NP405/ NP310/NP305/NP510W/NP410W/NP610S/NP510WS) or 200-240V AC 50/60 Hz (NP610G/NP510G/NP410G/ NP405G/NP310G/NP305G/NP510WG/ NP410WG/NP610SG/NP510WSG). Ensure that your power supply fits this requirement before attempting to use your projector.
- Do not look into the lens while the projector is on. Serious damage to your eyes could result.
- Keep any items such as magnifying glass out of the light path of the projector. The light being projected from the lens is extensive, therefore any kind of abnormal objects that can redirect light coming out of the lens, can cause unpredictable outcome such as fire or injury to the eyes.
- Do not place any objects, which are easily affected by heat, in front of a projector exhaust vent. Doing so could lead to the object melting or getting your hands burned from the heat that is emitted from the exhaust.

Place the projector in a horizontal position

The tilt angle of the projector should not exceed 10 degrees, nor should the projector be installed in any way other than the desktop and ceiling mount, otherwise lamp life could decrease dramatically.

WARNING

- Do not cover the lens with the lens cap or equivalent while the projector is on. Doing so can lead to melting of the cap due to the heat emitted from the light output.
- Do not place any objects, which are easily affected by heat, in front of the projector lens. Doing so could lead to the object melting from the heat that is emitted from the light output.

No!
Important Information

• Handle the power cable carefully. A damaged or frayed power cable can cause electric shock or fire.
  - Do not use any power cables than the supplied one.
  - Do not bend or tug the power cable excessively.
  - Do not place the power cable under the projector, or any heavy object.
  - Do not cover the power cable with other soft materials such as rugs.
  - Do not heat the power cable.
  - Do not handle the power plug with wet hands.

• Turn off the projector, unplug the power cable and have the projector serviced by a qualified service personnel under the following conditions:
  - When the power cable or plug is damaged or frayed.
  - If liquid has been spilled into the projector, or if it has been exposed to rain or water.
  - If the projector does not operate normally when you follow the instructions described in this user's manual.
  - If the projector has been dropped or the cabinet has been damaged.
  - If the projector exhibits a distinct change in performance, indicating a need for service.

• Disconnect the power cable and any other cables before carrying the projector.

• Turn off the projector and unplug the power cable before cleaning the cabinet or replacing the lamp.

• Turn off the projector and unplug the power cable if the projector is not to be used for an extended period of time.

• When using a LAN cable (only models with the RJ-45 LAN port):
  For safety, do not connect to the connector for peripheral device wiring that might have excessive voltage.

CAUTION

• Do not use the tilt-foot for purposes other than originally intended. Misuses such as gripping the tilt-foot or hanging on the wall can cause damage to the projector.

• Do not send the projector in the soft case by parcel delivery service or cargo shipment. The projector inside the soft case could be damaged.

• Select [HIGH] in Fan mode if you continue to use the projector for consecutive days. (From the menu, select [SETUP] → [OPTIONS(1)] → [FAN MODE] → [HIGH].)

• Do not try to touch the ventilation outlet on the left front (when seen from the front) as it can become heated while the projector is turned on and immediately after the projector is turned off.

• Do not turn off the AC power for 60 seconds after the lamp is turned on and while the POWER indicator is blinking green. Doing so could cause premature lamp failure.

Remote Control Precautions

• Handle the remote control carefully.

• If the remote control gets wet, wipe it dry immediately.

• Avoid excessive heat and humidity.

• Do not heat, take apart, or throw batteries into fire.

• If you will not be using the remote control for a long time, remove the batteries.

• Ensure that you have the batteries’ polarity (+/-) aligned correctly.

• Do not use new and old batteries together, or use different types of batteries together.

• Dispose of used batteries according to your local regulations.
Note for US Residents
The lamp in this product contains mercury. Please dispose according to Local, State or Federal Laws.

Lamp Replacement
- To replace the lamp, follow all instructions provided on page 84.
- Be sure to replace the lamp when the message [THE LAMP HAS REACHED THE END OF ITS USABLE LIFE. PLEASE REPLACE THE LAMP.] appears. If you continue to use the lamp after the lamp has reached the end of its usable life, the lamp bulb may shatter, and pieces of glass may be scattered in the lamp case. Do not touch them as the pieces of glass may cause injury. If this happens, contact your dealer for lamp replacement.

A Lamp Characteristic
The projector has a high-pressure mercury lamp as a light source. A lamp has a characteristic that its brightness gradually decreases with age. Also repeatedly turning the lamp on and off will increase the possibility of its lower brightness.

CAUTION:
- DO NOT TOUCH THE LAMP immediately after it has been used. It will be extremely hot. Turn the projector off and then disconnect the power cable. Allow at least one hour for the lamp to cool before handling.
- When removing the lamp from a ceiling-mounted projector, make sure that no one is under the projector. Glass fragments could fall if the lamp has been burned out.

About High Altitude mode
- Set [FAN MODE] to [HIGH ALTITUDE] when using the projector at altitudes approximately 5500 feet/1600 meters or higher.
  Using the projector at altitudes approximately 5500 feet/1600 meters or higher without setting to [HIGH ALTITUDE] can cause the projector to overheat and the protector could shut down. If this happens, wait a couple minutes and turn on the projector.
- Using the projector at altitudes less than approximately 5500 feet/1600 meters and setting to [HIGH ALTITUDE] can cause the lamp to overcool, causing the image to flicker. Switch [FAN MODE] to [AUTO].
- Using the projector at altitudes approximately 5500 feet/1600 meters or higher can shorten the life of optical components such as the lamp.

About Copyright of original projected pictures:
Please note that using this projector for the purpose of commercial gain or the attraction of public attention in a venue such as a coffee shop or hotel and employing compression or expansion of the screen image with the following functions may raise concern about the infringement of copyrights which are protected by copyright law. [ASPECT RATIO], [KEYSTONE], Magnifying feature and other similar features.

1. Introduction

What’s in the Box?
Make sure your box contains everything listed. If any pieces are missing, contact your dealer. Please save the original box and packing materials if you ever need to ship your projector.

- Projector
- Lens cap (24FU0691)
- Soft case (24BS7582)
- Power cable (US: 7N080235) (EU: 7N080021)
- VGA signal cable (7N520073/7N520052)
- NEC Projector CD-ROM
  User’s manual (PDF) and the utility software “Virtual Remote Tool” (7N951361)
- Remote control (7N900901)
- Batteries (AAA × 2)
- DVI to VGA adapter (7N960234)
  The NP405 and NP305 do not come with the DVI to VGA adapter.

• Quick Setup Guide (7N8P9721)

Unless otherwise described in the user’s manual, the drawings for the projector cabinet show examples of the NP610.
1. Introduction

Introduction to the Projector

This section introduces you to your new projector and describes the features and controls.

Congratulations on Your Purchase of the Projector

This projector is one of the very best projectors available today. The projector enables you to project precise images up to 300 inches (110 inches on NP610S; 104 inches on NP510WS) across (measured diagonally) from your PC or Macintosh computer (desktop or notebook), VCR, DVD player, or document camera. You can use the projector on a tabletop or cart, you can use the projector to project images from behind the screen, and the projector can be permanently mounted on a ceiling*1. The remote control can be used wirelessly.

*1 Do not attempt to mount the projector on a ceiling yourself.

The projector must be installed by qualified technicians in order to ensure proper operation and reduce the risk of bodily injury.

In addition, the ceiling must be strong enough to support the projector and the installation must be in accordance with any local building codes. Please consult your dealer for more information.

Features you’ll enjoy:

• Quick start & Quick Power Off

Less than 4 seconds* after turning on the power, the projector is ready to display PC or video images.

* The quick start time is only when [STANDBY MODE] is set to [NORMAL] in the on-screen message.

The projector can be put away immediately after the projector is powered down. No cool down period is required after the projector is turned off from the remote control or cabinet control panel.

• Direct Power Off

The projector has a feature called “Direct Power Off”. This feature allows the projector to be turned off (even when projecting an image) by using the Main Power Switch or disconnecting the AC power supply.

To turn off the AC power supply when the projector is powered on, use a power strip equipped with a switch and a breaker.

• Less than 1W in standby condition with energy saving technology

Selecting [POWER-SAVING] for [STANDBY MODE] from the menu can put the projector in power-saving mode that consumes only 0.6W (100-130V AC)/0.7W (200-240V AC).

• Carbon Meter

This feature will show energy-saving effect in terms of CO2 emission reduction (kg) when the projector’s [ECO MODE] is set to [ON].

The amount of CO2 emission reduction will be displayed in the confirmation message at the time of power-off and in the INFO of the on-screen menu.

• 7W built-in speaker for an integrated audio solution

Powerful 7 watt speaker provides volume need for large rooms.

• Virtual Remote function

The Virtual Remote function allows power On/Off and source selection of the projector from your PC by using the supplied VGA signal cable. The utility software “Virtual Remote Tool” exclusively for the projector is required to be installed from the accompanying NEC Projector CD-ROM onto your computer.

An accompanying NEC Projector CD-ROM includes the utility software “Virtual Remote Tool” exclusively for the projector and user’s manuals in PDF format.

• Short throw distances (NP610S/NP510WS)

Short focal lenses provide for a larger image using a shorter throw distance when compared to a typical projector lens.
1. Introduction

- **A variety of input ports and a comprehensive array of system control interfaces**
  This projector supports input signals on the following ports: DVI-I connector (DVI-I 29 Pin) with HDCP compatible, 15pin D-Sub, composite and S-video.

- **AUTO POWER ON and AUTO POWER OFF features**
  The AUTO POWER ON(AC), AUTO POWER ON(COM1), AUTO POWER OFF, and OFF TIMER features eliminate the need to always use the POWER button on the remote control or projector cabinet.

- **Preventing unauthorized use of the projector**
  Enhanced smart security settings for keyword protection, cabinet control panel lock, security slot, and security chain opening to help prevent unauthorized access, adjustments and theft deterrence.

- **The optional remote control (NP02RC) allows you to assign a CONTROL ID to the projector**
  Multiple projectors can be operated separately and independently with the same single remote control by assigning an ID number to each projector.

- **Integrated RJ-45 connector for wired networking capability (except NP405/NP305)**
  An RJ-45 connector is equipped as standard feature.

- **Auto vertical keystone correction**
  Auto Keystone feature allows the projector to detect its tilt and correct vertical distortion automatically.

- **LCD projector with high resolution and high brightness**
  High resolution display - up to UXGA compatible, XGA (NP610/NP510/NP410/NP405/NP310/NP305/NP610S)/WXGA (NP510W/NP410W/NP510WS) native resolution.

- **Six picture preset modes for user adjustable picture and color settings**
  Each picture preset mode can be customized and memorized according to your preference.

- **PC Control Port**
  You can control the projector with a PC or control system using the PC Control port.

- **Optional remote mouse receiver**
  You can use the supplied wireless remote control and the optional remote mouse receiver to operate your PC mouse from across the room. The optional remote mouse receiver (NP01MR) supports almost any PC using a USB connection.

**About this user’s manual**

The fastest way to get started is to take your time and do everything right the first time. Take a few minutes now to review the user’s manual. This may save you time later on. At the beginning of each section of the manual you’ll find an overview. If the section doesn’t apply, you can skip it.
### Comparative Table of Main Features

For further details on the specifications, see page 90.

*1 Effective pixels are more than 99.99%.

*2 This is the light output value (lumens) when the [PRESET] mode is set to [HIGH-BRIGHT]. If any other mode is selected as the [PRESET] mode, the light output value may drop slightly.

*3 Compliance with ISO21118-2005

---

**TIP:** The model name is located on the cabinet.

---

- **Focus Lever** (→ page 33)
- **Remote sensor** (→ page 10)
- **Lens**
- **Lens Cap**
- **Controls** (→ page 7)
- **Security chain opening**
  
  Attach an anti-theft device.
  The security chain opening accepts security wires or chains up to 0.18 inch/4.6 mm in diameter.
- **Built-in Security Slot** (* *)
- **Ventilation (inlet) / Filter Cover** (→ page 81)

* This security slot supports the MicroSaver® Security System.
1. Introduction

AC Input
Connect the supplied power cable’s two-pin plug here, and plug the other end into an active wall outlet. (→ page 25)

Main Power Switch
When you plug the supplied power cable into an active wall outlet and turn on the Main Power, the POWER indicator turns orange and the projector is in standby mode. (→ page 26, 38)

Terminal Panel (→ page 8)

Ventilation (inlet) / Filter Cover (→ page 81)

Monaural Speaker (7W)

Ventilation (outlet)
Heated air is exhausted from here.

Spacer (black rubber)
To fine-adjust the height of the rear foot, remove the spacer and rotate the rear foot to the desired height.

Rear Foot (→ page 31)

Lamp Cover (→ page 85)

Rear
1. Introduction

22. FREEZE Button  
    (→ page 40)

* The PAGE UP/DOWN, MOUSE L-CLICK and MOUSE R-CLICK buttons work only when the optional remote mouse receiver is connected with your computer.
Remote Control Precautions

- Handle the remote control carefully.
- If the remote control gets wet, wipe it dry immediately.
- Avoid excessive heat and humidity.
- Do not heat, take apart, or throw batteries into fire.
- If you will not be using the remote control for a long time, remove the batteries.
- Ensure that you have the batteries’ polarity (+/−) aligned correctly.
- Do not use new and old batteries together, or use different types of batteries together.
- Dispose of used batteries according to your local regulations.

Operating Range for Wireless Remote Control

- The infrared signal operates by line-of-sight up to a distance of about 22 feet/7 m and within a 60-degree angle of the remote sensor on the projector cabinet.
- The projector will not respond if there are objects between the remote control and the sensor, or if strong light falls on the sensor. Weak batteries will also prevent the remote control from properly operating the projector.
2. Installation and Connections

This section describes how to set up your projector and how to connect video and audio sources. Your projector is simple to set up and use. But before you get started, you must first:

1. Set up a screen and the projector.
2. Connect your computer or video equipment to the projector.  
   → page 17, 19, 20, 21, 22, 23, 24
3. Connect the supplied power cable.  
   → page 25

**NOTE:** Ensure that the power cable and any other cables are disconnected before moving the projector. When moving the projector or when it is not in use, cover the lens with the lens cap.

### Setting Up the Screen and the Projector

#### Selecting a Location

**NOTE:** Throw distances vary depending on the model.

[NP610/NP510/NP410/NP405/NP310/NP305]

The further your projector is from the screen or wall, the larger the image. The minimum size the image can be is approximately 21" (0.53 m) measured diagonally when the projector is roughly 30 inches (0.8 m) from the wall or screen. The largest the image can be is 300" (7.6 m) when the projector is about 407 inches (10.3 m) from the wall or screen.

**TIP:**
- The distances are indicated by intermediate values between tele and wide. Use as a rule of thumb.
- The Zoom lever adjusts the image size by up to +/−10%.
- For more details on throw distance, see page 15.

To the wall outlet.
The further your projector is from the screen or wall, the larger the image. The minimum size the image can be is approximately 21" (0.53 m) measured diagonally when the projector is roughly 31 inches (0.8 m) from the wall or screen. The largest the image can be is 300" (7.6 m) when the projector is about 431 inches (11.0 m) from the wall or screen.

TIP:
- The distances are indicated by intermediate values between tele and wide. Use as a rule of thumb.
- The Zoom lever adjusts the image size by up to +/-10%.
- For more details on throw distance, see page 15.
2. Installation and Connections

[NP610S]
The further your projector is from the screen or wall, the larger the image. The minimum size the image can be is approximately 60" (1.52 m) measured diagonally when the projector is roughly 35 inches (0.9 m) from the wall or screen. The largest the image can be is 110" (2.8 m) when the projector is about 66 inches (1.7 m) from the wall or screen.

**TIP:**
- Digital Zoom can result in a blurry image due to the electronic zoom.
- The Digital Zoom function adjusts the image size by up to −20%. (→ page 32)
- For more details on throw distance, see page 16.
2. Installation and Connections

[NP510WS]
The further your projector is from the screen or wall, the larger the image. The minimum size the image can be is approximately 57" (1.45 m) measured diagonally when the projector is roughly 36 inches (0.9 m) from the wall or screen. The largest the image can be is 104" (2.6 m) when the projector is about 66 inches (1.7 m) from the wall or screen.

TIP:
- Digital Zoom can result in a blurry image due to the electronic zoom.
- The Digital Zoom function adjusts the image size by up to −20%. (→ page 32)
- For more details on throw distance, see page 16.
### Throw Distance and Screen Size

The following shows the proper relative positions of the projector and screen. Refer to the table to determine the position of installation.

**[NP610S]**

**[NP510WS]**

**WARNING**

* Installing your projector on the ceiling must be done by a qualified technician. Contact your NEC dealer for more information.
* Do not attempt to install the projector yourself.
* Only use your projector on a solid, level surface. If the projector falls to the ground, you can be injured and the projector severely damaged.
* Do not use the projector where temperatures vary greatly. The projector must be used at temperatures between 41°F (5°C) and 104°F (40°C) (Eco mode selected automatically at 95°F to 104°F/35°C to 40°C).
* Do not expose the projector to moisture, dust, or smoke. This will harm the screen image.
* Ensure that you have adequate ventilation around your projector so heat can dissipate. Do not cover the vents on the side or the front of the projector.

**Reflecting the Image**

Using a mirror to reflect your projector’s image enables you to enjoy a much larger image when a smaller space is required. Contact your NEC dealer if you need a mirror system. If you’re using a mirror system and your image is inverted, use the MENU and ▲▼▲▼ buttons on your projector cabinet or your remote control to correct the orientation. (→ page 72)
2. Installation and Connections

Making Connections

NOTE: When using with a notebook PC, be sure to connect the projector and notebook PC while the projector is in standby mode and before turning on the power to the notebook PC.

In most cases the output signal from the notebook PC is not turned on unless connected to the projector before being powered up.

* If the screen goes blank while using your remote control, it may be the result of the computer’s screen-saver or power management software.

Enabling the computer’s external display

Displaying an image on the notebook PC’s screen does not necessarily mean it outputs a signal to the projector. When using a PC compatible laptop, a combination of function keys will enable/disable the external display.

Usually, the combination of the “Fn” key along with one of the 12 function keys gets the external display to come on or off. For example, NEC laptops use Fn + F3, while Dell laptops use Fn + F8 key combinations to toggle through external display selections.

Connecting Your PC or Macintosh Computer

NOTE: Signals supported by Plug & Play (DDC2)

</tr>
</tbody>
</table>

NOTE: For older Macintosh, use a commercially available pin adapter (not supplied) to connect to your Mac’s video port.
2. Installation and Connections

- Select the source name for its appropriate input connector after turning on the projector.

| [NP610/NP510/NP410/NP310/NP510W/NP410W/NP610S/NP510WS] |
|---------------------------------|-----------------|------------------|
| Input connector                 | SOURCE button on the projector cabinet | Button on the remote control |
| COMPUTER 1 IN                   | ![COMPUTER1]     | (COMPUTER 1)     |
| COMPUTER 2(DVI-I)IN             | ![COMPUTER 2(DIGITAL)] or ![COMPUTER 2(ANALOG)] | (COMPUTER 2) |

| [NP405/NP305]                  |
|--------------------------------|-----------------|------------------|
| Input connector                 | SOURCE button on the projector cabinet | Button on the remote control |
| COMPUTER 1 IN                   | ![COMPUTER 1] | (COMPUTER 1)     |
| COMPUTER 2 IN                   | ![COMPUTER 2]   | (COMPUTER 2)     |

**NOTE:** The projector is not compatible with video decoded outputs of the NEC ISS-6020 switcher.

**NOTE:** An image may not be displayed correctly when a Video or S-Video source is played back via a commercially available scan converter. This is because the projector will process a video signal as a computer signal at the default setting. In that case, do the following.

* When an image is displayed with the lower and upper black portion of the screen or a dark image is not displayed correctly:
  - Project an image to fill the screen and then press the AUTO ADJ. button on the remote control or the projector cabinet.
When Viewing a DVI Digital Signal (except NP405 and NP305)

To project a DVI digital signal, be sure to connect the PC and the projector using a DVI cable (not supplied) before turning on your PC or projector. Turn on the projector first and select Computer 2 (Digital) from the source menu before turning on your PC.

Failure to do so may not activate the digital output of the graphics card resulting in no picture being displayed. Should this happen, restart your PC.

Do not disconnect the DVI cable while the projector is running. If the signal cable has been disconnected and then re-connected, an image may not be correctly displayed. Should this happen, restart your PC.

NOTE:

• Use a DVI cable or the one compliant with the DOWG (Digital Display Working Group) DVI (Digital Visual Interface) revision 1.0 standard. The DVI cable should be within 5 m (196") long. Both single and dual types of DVI cable can be used.

• The DVI (DIGITAL) connector accepts VGA (640 x 480), SVGA (800 x 600), 1152 x 864, XGA (1024 x 768), WXGA (1280 x 800 @ up to 60Hz), and SXGA (1280 x 1024 @ up to 60Hz).
Using Two Analog COMPUTER Inputs Simultaneously

If you need to use two analog COMPUTER inputs simultaneously, connect a VGA signal cable as shown below.

**NOTE:** When the DVI to VGA adapter is not to be used for an extended period of time, remove it from the projector. Failure to do so may cause damage to the connector of the projector.
Connecting an External Monitor

You can connect a separate, external monitor to your projector to simultaneously view on a monitor the computer analog image you’re projecting.

NOTE:
• Daisy chain connection is not possible.
• When audio equipment is connected, the projector speaker is disabled.
Connecting Your DVD Player with Component Output

A component signal will be automatically displayed. If not, from the menu, select [SETUP] → [OPTIONS(1)] → [SIGNAL SELECT] → [COMPUTER1], and then place a check mark in the Component radio button.

• Select the source name for its appropriate input connector after turning on the projector.

<td>(S-VIDEO)</td>
</tr>
</tbody>
</table>

NOTE: The AUDIO IN L and R jacks (RCA) are shared between the Video and S-Video inputs.

NOTE: Refer to your VCR owner’s manual for more information about your equipment’s video output requirements.

NOTE: An image may not be displayed correctly when a Video or S-Video source is played back in fast-forward or fast-rewind via a scan converter.
2. Installation and Connections

Connecting to a Network (except NP405 and NP305)

The projector comes standard with a LAN port (RJ-45) which provides a LAN connection using a LAN cable. Using a LAN cable allows you to specify the Network Settings and the Alert Mail Settings for the projector over a LAN. To use a LAN connection, you are required to assign an IP address to the projector on the [PROJECTOR NETWORK SETTINGS] screen of the web browser on your computer. For setting, see page 48, 49, 50.

Example of LAN connection

Example of wired LAN connection
2. Installation and Connections

Connecting the Supplied Power Cable
Connect the supplied power cable to the projector.
First connect the supplied power cable's two-pin plug to the AC IN of the projector, and then connect the other plug of the supplied power cable in the wall outlet.

\[\text{To wall outlet \leftarrow} \]

Make sure that the prongs are fully inserted into both the AC IN and the wall outlet.

\[\text{CAUTION:}\]
Do not try to touch the ventilation outlet on the left front (when seen from the front) as it can become heated while the projector is turned on and immediately after the projector is turned off.
3. Projecting an Image (Basic Operation)

This section describes how to turn on the projector and to project a picture onto the screen.

1. Turning on the Projector

NOTE:
- The projector has two power switches: a main power switch and a (POWER) button (POWER ON and OFF on the remote control).
- When plugging in or unplugging the supplied power cable, make sure that the main power switch is pushed to the off ( ) position. Failure to do so may cause damage to the projector.

1. Remove the lens cap
   - Do not remove the lens cap by pulling on the string. Doing so can cause mechanical damage to the part around the lens.

2. To turn on the main power to the projector, press the Main Power switch to the on position ( ).
   The projector will go into standby mode. When in standby mode, the POWER indicator will light orange and the STATUS indicator will light green when [NORMAL] is selected for [STANDBY MODE].
   See the Power Indicator section.(→ page 87)
3. Projecting an Image (Basic Operation)

3. Press the \((\text{POWER})\) button on the projector cabinet or the POWER ON button on the remote control for 1 second.

The POWER indicator will turn to green and the projector will become ready to use.

**NOTE:** When the projector is turned on, it may take some time before the lamp light becomes bright.

**TIP:**
- When the STATUS indicator lights orange, it means that the [CONTROL PANEL LOCK] is turned on. (→ page 72)
- When the message “Projector is locked! Enter your password.” is displayed, it means that the [SECURITY] is turned on. (→ page 43)

After you turn on your projector, ensure that the computer or video source is turned on and that your lens cap is removed.

**NOTE:** When no signal is available, the NEC logo, blue (default), or black screen will be displayed. When the projector displays the NEC logo, a blue or black screen, the projector will automatically switch to [ECO MODE]. The projector will return ECO MODE to its previous setting once an active signal is connected.
3. Projecting an Image (Basic Operation)

Note on Startup screen (Menu Language Select screen)
When you first turn on the projector, you will get the Startup menu. This menu gives you the opportunity to select one of the 21 menu languages.

To select a menu language, follow these steps:

1. **Use the ▲, ▼, ◀ or ► button to select one of the 21 languages from the menu.**

![Menu Language Select screen]

2. **Press the ENTER button to execute the selection.**

After this has been done, you can proceed to the menu operation. If you want, you can select the menu language later. (→ [LANGUAGE] on page 58 and 70)

**NOTE:** Immediately after turning on the projector, screen flicker may occur. This is normal. Wait 3 to 5 minutes until the lamp lighting is stabilized.

**NOTE:** If you turn on the projector immediately after the lamp is turned off, the fans run without displaying an image for some time and then the projector will display the image.

**CAUTION:**
The projector cannot be turned off for 60 seconds after the lamp is turned on and while the POWER indicator is blinking green. Doing so could cause premature lamp failure.

When the [ECO MODE] is set to [ON], the LAMP indicator will light green.

If one of the following things happens, the projector will not turn on.

- If the internal temperature of the projector is too high, the projector detects abnormal high temperature. In this condition the projector will not turn on to protect the internal system. If this happens, wait for the projector’s internal components to cool down.
- When the lamp reaches its end of usable life, the projector will not turn on. If this happens, replace the lamp.
- If the lamp fails to light, and if the STATUS indicator flashes on and off in a cycle of six times, wait a full minute and then turn on the power.

**NOTE:** Turning the Main Power Switch Off then Back On
Allow a minimum of 1 second between turning off the main power switch and turning it back on again. The same will be applied when a power strip equipped with a switch and a breaker is used. Failing to do so could result in no power to the projector. (There will be no stand-by LED) Should this happen, unplug the power cable and plug it in again. Turn on the main power switch.
2 Selecting a Source
Selecting the computer or video source

NOTE: Turn on the computer or video source equipment connected to the projector.

Selecting from Source List
Press and quickly release the SOURCE button on the projector cabinet to display the Source list. Each time the SOURCE button is pressed, the input source will change as follows: “COMPUTER1”, “COMPUTER2(DIGITAL/ANALOG)”, “COMPUTER2” (on the NP405 and NP305 only), “VIDEO”, “S-VIDEO”. To display the selected source, allow 1 second to elapse.

Detecting the Signal Automatically
Press and hold the SOURCE button for a minimum of 2 seconds, the projector will search for the next available input source. Each time you press and hold the SOURCE button for a minimum of 2 seconds, the input source will change as follows:

COMPUTER1 → COMPUTER2(DIGITAL) → COMPUTER2(ANALOG) → VIDEO → S-VIDEO → COMPUTER1 → ...

TIP: If no input signal is present, the input will be skipped.

Using the Remote Control
Press any one of the COMPUTER 1/2, VIDEO, and S-VIDEO buttons.

TIP: The COMPUTER 2 button on the remote control toggles the Computer 2 source between [COMPUTER2(DIGITAL)] and [COMPUTER2(ANALOG)] (except on the NP405 and NP305).

Selecting Default Source
You can set a source as the default source so that it will be displayed each time the projector is turned on.

1. Press the MENU button.
   The menu will be displayed.
2. Press the ► button twice to select [SETUP] and press the ▼ button or the ENTER button to select [GENERAL].
3. Press the ► button three times to select [OPTIONS(2)].
4. Press the ▼ button six times to select [DEFAULT SOURCE SELECT] and press the ENTER button.
   The [DEFAULT SOURCE SELECT] screen will be displayed.
   (→ page 77)
5. Select a source as the default source, and press the ENTER button.
6. Press the EXIT button a few times to close the menu.
7. Restart the projector.
   The source you selected in step 5 will be projected.

TIP: When the projector is in Standby mode, applying a computer signal from a computer connected to the COMPUTER 1 IN input will power on the projector and simultaneously project the computer’s image.
   ([AUTO POWER ON(COMP1)] → page 77)
3. Projecting an Image (Basic Operation)

**Adjusting the Picture Size and Position**

Use the adjustable tilt foot, the zoom function or the focus ring to adjust the picture size and position.

*In this chapter drawings and cables are omitted for clarity.*

- Adjusting the throw angle (the height of an image)
  [Tilt foot] (→ page 31)

- Adjusting the left and right tilt of an image
  [Rear foot] (→ page 31)

- Finely adjusting the size of an image
  [Zoom function] (→ page 32)

- Adjusting the focus
  [Focus ring] (→ page 33)

- Adjusting the keystone correction [KEYSTONE]* (→ page 34)

* Keystone correction can be also performed automatically. (→ page 36)
Adjust the Tilt Foot

1. Lift the front edge of the projector.

**CAUTION:**
Do not try to touch the ventilation outlet during Tilt Foot adjustment as it can become heated while the projector is turned on and after it is turned off.

2. Push up and hold the Adjustable Tilt Foot Lever on the front of the projector to extend the adjustable tilt foot.

3. Lower the front of the projector to the desired height.

4. Release the Adjustable Tilt Foot Lever to lock the Adjustable tilt foot.

   The tilt foot can be extended up to 1.5 inch/38 mm.
   
   There is approximately 10 degrees (up) of adjustment for the front of the projector.
   
   Rotate the rear foot to the desired height in order to square the image on the projection surface.

**CAUTION:**

- Do not use the tilt-foot for purposes other than originally intended. Misuses such as using the tilt foot to carry or hang (from the wall or ceiling) the projector can cause damage to the projector.

Adjusting the left and right tilt of an image [Rear foot]

1. Remove the spacer (black rubber) from the rear foot.
   
   Keep the spacer for future use.

2. Rotate the rear foot.
   
   The rear foot can be extended up to 0.4 inch/10 mm. Rotating the rear foot allows the projector to be placed horizontally.

**NOTE:**

- Do not extend the rear foot beyond its height limit (0.4 inch/10 mm). Doing so may cause the rear foot to come out of the projector.
- After using the projector, attach the spacer to the rear foot.
3. Projecting an Image (Basic Operation)

Zoom

[NP610/NP510/NP410/NP405/NP310/NP305/NP510W/NP410W]
Use the ZOOM lever to adjust the image size on the screen.

[NP610S/NP510WS]
The image size can be adjusted electronically from the menu. To do so, follow the steps below.

Adjusting from the menu

1. **Press the MENU button.**
   The menu will be displayed.

2. **Press the ▶ button to select [SETUP] and press the ENTER button.**
   The [GENERAL] tab will be highlighted.

3. **Press the ▼ button.**
   The [DIGITAL ZOOM] will be highlighted.
3. Projecting an Image (Basic Operation)

4. Use the ◄ or ► button to adjust the image size.

5. After completing adjustment, press the EXIT button three times.
   The menu will be closed.

Focus

[NP610/NP510/NP410/NP405/NP310/NP305/NP510W/NP410W]
Use the FOCUS ring to obtain the best focus.

[NP610S/NP510WS]
Use the FOCUS lever to obtain the best focus.
Correcting Keystone Distortion

If the screen is tilted vertically, keystone distortion becomes large. Proceed with the following steps to correct keystone distortion.

NOTE:
• The Keystone correction can cause an image to be slightly blurred because the correction is made electronically.
• The Keystone correction range can be made narrower, depending on a signal or its aspect ratio selection.

Adjusting with buttons on the cabinet
1. Press the ▲ or ▼ button with no menus displayed.
   The keystone bar will be displayed.

2. Use the ▲ or ▼ to correct the keystone distortion.
   The keystone bar will be closed after a period of time.

3. Press the ENTER button.
   The keystone bar will be closed.

NOTE: When the menu is displayed, the above operation is not available. When the menu is displayed, press the MENU button to close the menu and start the Keystone correction. From the menu, select [SETUP] → [GENERAL] → [KEYSTONE]. The changes can be saved with [KEYSTONE SAVE]. (→ page 36, 68)
3. Projecting an Image (Basic Operation)

Adjusting from the menu

1. Press the MENU button.

   The menu will be displayed.

2. Press the ▶ button to select [SETUP] and press the ENTER button.

   The [GENERAL] screen will be displayed.

3. Press the ▼ button to select [KEYSTONE].

4. Press the ◀ or ▶ button.

   Adjust so that the image is rectangular.

5. After completing adjustment, press the EXIT button three times.

   The menu will be closed.

NOTE: The Keystone correction can cause an image to be slightly blurred because the correction is made electronically.

TIP: The changes can be saved with [KEYSTONE SAVE]. (→ page 36, 68)
3. Projecting an Image (Basic Operation)

Adjusting with the Auto Keystone Function
The Auto Keystone correction feature will correct the vertical distortion of a projected image on the screen. No special operation required. Just put the projector on a flat surface.

TIP: Even when the menu setting for [AUTO KEYSTONE] is turned on, [KEYSTONE] can be adjusted manually.

To turn on [AUTO KEYSTONE], proceed the following steps.

1. **Press the MENU button**
   The menu will be displayed.

2. **Press the ▲ button to select [SETUP] and press the ENTER button.**
   The [GENERAL] screen will be highlighted.

3. **Press the ▼ button.**
   The [AUTO KEYSTONE] will be highlighted.

   ![Menu Screen]

   4. **Press the ENTER button to display the [AUTO KEYSTONE] screen.**

      5. **Press the ▲ or ▼ button to select [ON] and press the ENTER button.**

      6. **Press the MENU button.**
   The menu will be closed.

**NOTE:**
- The maximum range of vertical keystone correction is +/-30 degrees on the NP610/NP510/NP410/NP405/NP310/NP305/NP510W/NP410W and +/-20 degrees on the NP610S/NP510WS.
- The maximum range of keystone correction may be lower depending on the signal or aspect ratio selection.
- The range of keystone correction is not the maximum tilt angle of projector.
- The Auto Keystone correction will take effect in 2 seconds after changing the projection angle during projection.
- The left and right (horizontal) keystone correction is not available.
- Place the projector so that the lens surface is parallel to the screen.
- The rear feet of the projector can be adjusted to level the projector.
- Using keystone correction can cause the image to be slightly blurred because the correction is made electronically.

**TIP:** If you have one of the following conditions, the projector’s Auto Keystone may not be performed correctly.
- The screen is tilted
- The room temperature is too high or too low
- The optical zoom is maximized or minimized.
Optimizing Computer Signal Automatically

Adjusting the Image Using Auto Adjust

Optimizing a computer image automatically.
Press the AUTO ADJ. button to optimize a computer image automatically.
This adjustment may be necessary when you connect your computer for the first time.

![Poor picture]

![Normal picture]

**NOTE:**
Some signals may take time to display or may not be displayed correctly.
- The Auto Adjust function does not work for component, video, and DVI digital signals.
- If the Auto Adjust operation cannot optimize the computer signal, try to adjust [HORIZONTAL], [VERTICAL], [CLOCK], and [PHASE] manually. (→ page 64, 65)

Turning Up or Down Volume

Sound level from the speaker can be adjusted.

![Increase volume][Decrease volume]

**TIP:** When no menus appear, the ◀ and ▶ buttons on the projector cabinet work as a volume control.
7 Turning off the Projector

To turn off the projector:

1. **First, press the (POWER) button on the projector cabinet or the POWER OFF button on the remote control.**

   The [POWER OFF / ARE YOU SURE? / CARBON SAVINGS- SESSION 0.000[g-CO2]] message will appear.

2. **Secondly, press the ENTER button or press the (POWER) or the POWER OFF button again.**

   The lamp will turn off and the projector will go into standby mode. When in standby mode, the POWER indicator will light orange and the STATUS indicator will light green when [NORMAL] is selected for [STANDBY MODE].

   Immediately after turning on the projector and displaying an image, you cannot turn off the projector for 60 seconds.

3. **Finally, turn off the Main Power switch.**

   The POWER indicator will go out.

   **NOTE:** Do not turn off the main power within 10 seconds of making adjustment or setting changes and closing the menu. Doing so can cause loss of adjustments and settings.

---

**CAUTION:**

Parts of the projector will become heated during operation. Use caution when picking up the projector immediately after it has been operating.

**CAUTION:**

The projector cannot be turned off for 60 seconds after the lamp is turned on and while the POWER indicator is blinking green. Doing so could cause premature lamp failure.
### 3. Projecting an Image (Basic Operation)

#### 8 After Use

Preparation: Make sure that the projector is turned off.

1. **Unplug the power cable.**

2. **Disconnect any other cables.**

3. **Retract adjustable tilt foot if extended.**

4. **Cover the lens with the lens cap.**

5. **Put the projector and accessories in the supplied soft case.**

   Place the projector in the soft case with the lens facing upward as shown below. This is to prevent the lens from damage.

   **NOTE:** The NP610S, the NP510WS, the NP405, and the NP305 do not come with a soft case.

---

**NOTE:** When placing the projector in the soft case, retract the tilt foot and the rear feet. Failure to do so may case damage to the projector.

---

**CAUTION:**

Use caution when putting the projector in the soft case immediately after the projector has been operating. The projector cabinet is hot.
4. Convenient Features

1. Turning off the Image and Sound
Press the AV-MUTE button to turn off the image and sound for a short period of time. Press again to restore the image and sound.

NOTE:
• Even though the image is turned off, the menu still remains on the screen.
• Sound from the AUDIO OUT jack (Stereo mini) can be turned off.

2. Freezing a Picture
Press the FREEZE button to freeze a picture. Press again to resume motion.

NOTE: The image is frozen but the original video is still playing back.

3. Enlarging a Picture
You can enlarge the picture up to four times.

NOTE: The maximum magnification may be less than four times depending on the signal.

To do so:

1. Press the MAGNIFY (+) button to magnify the picture.
   
   To move the magnified image, use the ▲,▼,◄ or ► button.
2. Press the ▲▼► button.
The area of the magnified image will be moved.

3. Press the MAGNIFY (–) button.
Each time the MAGNIFY (–) button is pressed, the image is reduced.

NOTE:
• The image will be enlarged or reduced at the center of the screen.
• Displaying the menu will cancel the current magnification.

4 Changing Eco Mode
This feature enables you to select two brightness modes of the lamp:
OFF and ON modes. The lamp life can be extended by turning on the [ECO MODE].

<table>
<thead>
<tr>
<th>[ECO MODE]</th>
<th>Description</th>
<th>Status of LAMP indicator</th>
</tr>
</thead>
<tbody>
<tr>
<td>[OFF]</td>
<td>This is the default setting (100% Brightness).</td>
<td>Off ○ LAMP ○ STATUS</td>
</tr>
<tr>
<td>[ON]</td>
<td>Select this mode to increase the lamp life (approx. 70% Brightness on NP610/NP510W/NP410W/ NP610S/NP510WS and approx. 80% Brightness on NP510/NP410/NP405/NP310/NP305).</td>
<td>Steady Green light ○ LAMP ○ STATUS</td>
</tr>
</tbody>
</table>

To turn on the [ECO MODE], do the following:
1. Press the ECO MODE button on the remote control to display [ECO MODE] screen.
2. Use the ▲ or ▼ button to select [ON].
3. Press the ENTER button.
   To change from [ON] to [OFF], Go back to Step 2 and select [OFF]. Repeat Step 3.

NOTE:
• The [ECO MODE] can be changed by using the menu.
  Select [SETUP] → [GENERAL] → [ECO MODE].
• The lamp life remaining and lamp hours used can be checked in [USAGE TIME]. Select [INFO.] → [USAGE TIME].
• The projector is always in [ON] for 90 seconds after the lamp is turned on and while the POWER indicator is blinking green. The lamp condition will not be affected even when [ECO MODE] is changed.
• After a lapse of 1 minute from when the projector displays a blue, black or logo screen, [ECO MODE] will automatically switch to [ON]. The projector will return to the [OFF] once a signal is accepted.
• If the projector is overheated in [OFF] mode, there may be a case where the [ECO MODE] automatically changes to [ON] mode to protect the projector. When the projector is in [ON] mode, the picture brightness decreases. When the projector comes back to normal temperature, the [ECO MODE] returns to [OFF] mode.

Thermometer symbol [ ] indicates the [ECO MODE] is automatically set to [ON] mode because the internal temperature is too high.
4. Convenient Features

Checking Energy-Saving Effect [CARBON METER]

This feature will show energy-saving effect in terms of CO2 emission reduction (kg) when the projector’s [ECO MODE] is set to [ON]. This feature is called as [CARBON METER].

There are two messages: [TOTAL CARBON SAVINGS] and [CARBON SAVINGS-SESSION]. The [TOTAL CARBON SAVINGS] message shows the total amount of CO2 emission reduction from the time of shipment up to now. You can check the information on [USAGE TIME] from [INFO.] of the menu. (→ page 78)

The [CARBON SAVINGS-SESSION] message shows the amount of CO2 emission reduction between the time of changing to ECO MODE immediately after the time of power-on and the time of power-off. The [CARBON SAVINGS-SESSION] message will be displayed in the [POWER OFF/ ARE YOU SURE?] message at the time of power-off.

TIP:
- The formula as shown below is used to calculate the amount of CO2 emission reduction.
  
  \[
  \text{Amount of CO2 emission reduction} = \text{Power consumption in OFF for ECO MODE} - \text{Power consumption in ON for ECO MODE} \times \text{CO2 conversion factor.}^* 
  \]

  * Calculation for amount of CO2 emission reduction is based on an OECD publication “CO2 Emissions from Fuel Combustion, 2008 Edition”.

- This formula will not apply to the power consumption which is not affected by whether [ECO MODE] is turned on or off.
6 Preventing the Unauthorized Use of the Projector [SECURITY]
A keyword can be set for your projector using the Menu to avoid operation by an unauthorized user. When a keyword is set, turning on the projector will display the Keyword input screen. Unless the correct keyword is entered, the projector cannot project an image.

- The [SECURITY] setting cannot be cancelled by using the [RESET] of the menu.

To enable the Security function:

1. **Press the MENU button.**
   The menu will be displayed.

2. **Press the ► button twice to select [SETUP] and press the ▼ button or the ENTER button to select [GENERAL].**

3. **Press the ► button to select [INSTALLATION].**

4. **Press the ▼ button three times to select [SECURITY] and press the ENTER button.**

   ![Menu Screen]

   The OFF/ON menu will be displayed.

5. **Press the ▼ button to select [ON] and press the ENTER button.**

   ![Menu Screen]

   The [SECURITY KEYWORD] screen will be displayed.

6. **Type in a combination of the four ▲▼◄► buttons and press the ENTER button.**

   ![Keyword Input Screen]

   The [CONFIRM KEYWORD] screen will be displayed.
7. Type in the same combination of ▲▼◄► buttons and press the ENTER button.

The confirmation screen will be displayed.

8. Select [YES] and press the ENTER button.

The SECURITY function has been enabled.

To turn on the projector when [SECURITY] is enabled:

1. Press and hold the POWER button for about 1 second.
   The projector will be turned on and display a message to the effect that the projector is locked.

2. Press the MENU button.

3. Type in the correct keyword and press the ENTER button. The projector will display an image.

NOTE: The security disable mode is maintained until the main power is turned off or unplugging the power cable.
4. Convenient Features

To disable the SECURITY function:

1. Press the MENU button.
   The menu will be displayed.

2. Select [SETUP] → [INSTALLATION] → [SECURITY] and press the ENTER button.

   ![Security Menu]

   The OFF/ON menu will be displayed.

3. Select [OFF] and press the ENTER button.

   ![Security OFF/ON]

   The KEYWORD CONFIRMATION screen will be displayed.

4. Type in your keyword and press the ENTER button.
   When the correct keyword is entered, the SECURITY function will be disabled.

   NOTE: If you forget your keyword, contact your dealer. Your dealer will provide you with your keyword in exchange for your request code. Your request code is displayed in the Keyword Confirmation screen. In this example [K992-45L8-JNGJ-4XU9-1YAT-EEA2] is a request code.
Using the Optional Remote Mouse Receiver (NP01MR)

The optional remote mouse receiver enables you to operate your computer’s mouse functions from the remote control. It is a great convenience for clicking through your computer-generated presentations.

Connecting the remote mouse receiver to your computer

If you wish to use the remote mouse function, connect the mouse receiver and computer. The mouse receiver can be connected directly to the computer’s USB port (type A).

NOTE: Depending on the type of connection or OS installed on your computer, you may have to restart your computer or change your computer settings.

When operating a computer via the remote mouse receiver

When connecting using the USB terminal

For PC, the mouse receiver can only be used with a Windows 98/Me/XP*, Windows 2000, Windows Vista, or Mac OS X 10.0.0 or later operating system.

* NOTE: In SP1 or older version of Windows XP, if the mouse cursor will not move correctly, do the following: Clear the Enhance pointer precision check box underneath the mouse speed slider in the Mouse Properties dialog box [Pointer Options tab].

NOTE: The PAGE UP and DOWN buttons do not work with PowerPoint for Macintosh.

NOTE: Wait at least 5 seconds after disconnecting the mouse receiver before reconnecting it and vice versa. The computer may not identify the mouse receiver if it is repeatedly connected and disconnected in rapid intervals.
4. Convenient Features

Operating your computer’s mouse from the remote control
You can operate your computer’s mouse from the remote control.

PAGE UP/DOWN Button: scrolls the viewing area of the window or to move to the previous or next slide in PowerPoint on your computer.

▲▼◀▶ Buttons: moves the mouse cursor on your computer.

MOUSE L-CLICK Button: works as the mouse left button.

MOUSE R-CLICK Button: works as the mouse right button.

NOTE:
• When you operate the computer using the ▲▼◀▶ or ▶ button with the menu displayed, both the menu and the mouse pointer will be affected. Close the menu and perform the mouse operation.
• The PAGE UP and DOWN buttons do not work with PowerPoint for Macintosh.

About Drag Mode:
By pressing the MOUSE L-CLICK or R-CLICK button for 2 or 3 seconds then releasing, the drag mode is set and the drag operation can be performed simply by pressing the ▲▼◀▶ button. To drop the item, press the MOUSE L-CLICK (or R-CLICK) button. To cancel it, press the MOUSE R-CLICK (or L-CLICK) button.

TIP: You can change the Pointer speed on the Mouse Properties dialog box on the Windows. For more information, see the user documentation or online help supplied with your computer.
Network Setting by Using an HTTP Browser (except NP405 and NP305)

Overview
Connecting the projector to a network allows the Alert Mail setting (→ page 50) and the projector control from a computer via the network.

To perform the projector control from a web browser, you must have an exclusive application installed on your computer.

The IP address and subnet mask of the projector can be set on the Network Setting screen of the web browser by using an HTTP server function. Please be sure to use “Microsoft Internet Explorer 6.0” or a higher version for the web browser. (This device uses “JavaScript” and “Cookies” and the browser should be set to accept these functions. The setting method will vary depending on the version of browser. Please refer to the help files and the other information provided in your software.)

Access is gained to the HTTP server function by starting the Web browser on the computer via the network connected to the projector and enter the following URL.

- Network Setting
  http://<the projector’s IP address>/index.html
- Alert Mail Setting
  http://<the projector’s IP address>/lanconfig.html

TIP:
- The default IP address is “192.168.0.10”.
- The exclusive application can be downloaded from our website.

NOTE:
- If the PROJECTOR NETWORK SETTINGS screen does not appear in the web browser, press the Ctrl+F5 keys to refresh your web browser (or clear the cache).
- The display’s or button’s response can be slowed down or operation may not be accepted depending the settings of your network. Should this happen, consult your network administrator.
- The projector may not respond if its buttons are repeatedly pressed in rapid intervals. Should this happen, wait a moment and repeat. If you still can’t get any response, turn off and back on the projector.

Preparation Before Use
Connect the projector to a commercially available LAN cable before engaging in browser operations. (→ page 24)

Operation with a browser that uses a proxy server may not be possible depending on the type of proxy server and the setting method. Although the type of proxy server will be a factor, it is possible that items that have actually been set will not be displayed depending on the effectiveness of the cache, and the contents set from the browser may not be reflected in operation. It is recommended that a proxy server not be used unless it is unavoidable.

Handling of the Address for Operation via a Browser
Regarding the actual address that is entered for the address or entered to the URL column when operation of the projector is via a browser, the host name can be used as it is when the host name corresponding to the IP address of the projector has been registered to the domain name server by a network administrator, or the host name corresponding to the IP address of the projector has been set in the “HOSTS” file of the computer being used.

Example 1: When the host name of the projector has been set to “pj.nec.co.jp”, access is gained to the network setting by specifying
  http://pj.nec.co.jp/index.html
  for the address or the entry column of the URL.

Example 2: When the IP address of the projector is “192.168.73.1”, access is gained to the mail alert settings by specifying
  http://192.168.73.1/index.html
  for the address or the entry column of the URL.
4. Convenient Features

Network Settings

FIRMWARE VERSION: 1.00 MODEL: NP10, 10.11

DHCP: Enabling this option automatically assigns an IP address to the projector from your DHCP server. Disabling this option allows you to register the IP address or subnet mask number obtained from your network administrator.

_TIP:_ You can check the IP address in the menu when [ENABLE] is selected for [DHCP]. To do so, from the menu, select [INFO.] → [WIRED LAN].

IP ADDRESS: Set your IP address of the network connected to the projector when [DISABLE] is selected for [DHCP].

_TIP:_ You can check your specified IP address in the menu. To do so, from the menu, select [INFO.] → [WIRED LAN].

SUBNET MASK: Set your subnet mask number of the network connected to the projector when [DISABLE] is selected for [DHCP].

DEFAULT GATEWAY: Set your default gateway of the network connected to the projector when [DISABLE] is selected for [DHCP].

DNS (PRIMARY): Set your primary DNS settings of the network connected to the projector.

DNS (SECONDARY): Set your secondary DNS settings of the network connected to the projector.

UPDATE: Reflect your settings.

_NOTE:_ Close the browser after clicking [UPDATE]. The projector will automatically update your settings.

_TIP:_ Selecting [NETWORK SETTINGS] for [RESET] from the projector’s menu allows you to return the following items to the factory default.

[DHCP]: DISABLE
[IP ADDRESS]: 192.168.0.10
[SUBNET MASK]: 255.255.255.0
[DEFAULT GATEWAY]: 192.168.0.1

* [DNS(PRIMARY)] and [DNS(SECONDARY)] will remain unchanged.
4. Convenient Features

Alert Mail Setting
http://<the projector’s IP address>/lanconfig.html

This option notifies your computer of an error message via e-mail when using wired LAN. An error message notification will be sent when the projector lamp has reached the end of its usable life or an error occurs in the projector.

HOST NAME .......................... Type in the hostname of the network connected to the projector. Up to 60 alphanumeric characters can be used. If the host name is unknown, type in a string of characters representing the projector. Example: Projector 1

DOMAIN NAME .......................... Type in the domain name of the network connected to the projector. Up to 60 alphanumeric characters can be used. If the domain name is unknown, type in the right side of @ in the sender’s address. Example: nec.com

ALERT MAIL .......................... Checking [ENABLE] will turn on the Alert Mail feature.
Checking [DISABLE] will turn off the Alert Mail feature.

SENDER’S ADDRESS .................... Type in the senders address. Up to 60 alphanumeric and symbols characters can be used.

SMTP SERVER NAME ..................... Type in the SMTP server name to be connected to the projector. Up to 60 alphanumeric characters can be used.

RECIPIENT’S ADDRESS 1 to 3 .... Type in your recipient’s address. Up to 60 alphanumeric and symbols characters can be used.

APPLY .................................. Click this button to reflect the above settings

EXECUTE ........................... Click this button to send a test mail to check if your settings are correct.

STATUS ............................. A reply to a test mail will be displayed.

NOTE:
- If you execute a test, you may not receive an Alert mail. Should this happen, check if the network settings are correct.
- If you entered an incorrect address in a test, you may not receive an Alert mail. Should this happen, check if the Recipient’s Address is correct

TIP: The Alert Mail settings will not be affected even when [RESET] is done from the menu.
Using the VGA Signal Cable to Operate the Projector

(Virtual Remote)

Using the utility software “Virtual Remote Tool” included on the companion NEC Projector CD-ROM, Virtual Remote screen (or toolbar) can be displayed on your computer screen. This will help you perform operations such as projector’s power on or off and signal selection via the VGA signal cable.

Virtual Remote screen

This section provides an outline of preparation for use of Virtual Remote Tool.

For information on how to use Virtual Remote Tool, see Help of Virtual Remote Tool. (→ page 55)

Step 1: Install Virtual Remote Tool on the computer. (→ page 51, 52)
Step 2: Connect the projector to the computer. (→ page 53)
Step 3: Start Virtual Remote Tool. (→ page 54)

NOTE:
• When [COMPUTER 1] is selected from your source selection, the Virtual Remote screen or the toolbar will be displayed as well as your computer screen.
• Use the supplied VGA signal cable to connect the COMPUTER 1 IN connector directly with the monitor output connector of the computer to use Virtual Remote Tool.
  Using a switcher or other cables than the supplied VGA signal cable may cause failure in signal communication.
  VGA cable connector:
  Pin Nos. 12 and 15 are required for DDC/CI.
• Virtual Remote Tool may not work depending on your computer’s specifications and version of graphic adapters or drivers.

TIP:
• The projector’s COMPUTER 1 IN connector supports DDC/CI (Display Data Channel Command Interface). DDC/CI is a standard interface for bidirectional communication between display/projector and computer.
• For update information on Virtual Remote Tool, visit our website: http://www.nec-display.com/dl/en/index.html

Step 1: Install Virtual Remote Tool on the computer

Supported OS
Virtual Remote Tool will run on the following operating systems.

*1: Supports 32-bit version.
*2: To run Virtual Remote Tool, “Microsoft .NET Framework Version 2.0 or later” is required. The Microsoft .NET Framework Version 2.0 or later is available from Microsoft’s web page. Install the Microsoft .NET Framework Version 2.0 or later on your computer. Windows 2000 Professional supports Microsoft .NET Framework Version 2.0 only.
Install Virtual Remote Tool

Preparation:
Exit all running programs before installing Virtual Remote Tool. If another program is running, the installation may not be completed. To install Virtual Remote Tool, the Windows user account must have [Administrator] privilege (Windows Vista and Windows 2000) or [Computer Administrator] privilege (Windows XP).

1 Insert the accompanying NEC Projector CD-ROM into your CD-ROM drive.
   The folders in NEC Projector CD-ROM will be displayed. If the folders are not displayed, right-click the CD/DVD drive icon in Windows’ “Computer” (or “My Computer”) and select “Open”.

2 Double-click “software” and then “Virtual Remote Tool”.
   The “setup.exe” icon will be displayed.

3 Double-click the “setup.exe” icon.
   The Installer will start and the Wizard screen will appear.

4 Click “Next”.
   “END USER LICENSE AGREEMENT” screen will be displayed.

5 If you agree, click “I accept the terms in the license agreement” and then click “Next”.
   Follow the instructions on the installer screens to complete the installation.

After the installation is completed, the shortcut icon for Virtual Remote Tool will be placed on the desktop.
4. Convenient Features

TIP:

Uninstalling Virtual Remote Tool

Preparation:
Exit Virtual Remote Tool before uninstalling. To uninstall Virtual Remote Tool, the Windows user account must have “Administrator” privilege (Windows Vista and Windows 2000) or “Computer Administrator” privilege (Windows XP).

• For Windows Vista
  1 Click “Start” and then “Control Panel”.
    The Control Panel window will be displayed.
  2 Click “Uninstall a program” under “Programs”.
    The “Programs and Features” window will be displayed.
  3 Select Virtual Remote Tool and click it.
  4 Click “Uninstall/Change” or “Uninstall”.
    • When the “User Account Control” window is displayed, click “Continue”.
    Follow the instructions on the screens to complete the uninstallation.

• For Windows XP/2000
  1 Click “Start” and then “Control Panel”.
    The Control Panel window will be displayed.
  2 Double-click “Add / Remove Programs”.
    The Add / Remove Programs window will be displayed.
    • On Windows 2000, double-click “Uninstall a program”
  3 Click Virtual Remote Tool from the list and then click “Remove”.
    Follow the instructions on the screens to complete the uninstallation.

Step 2: Connect the projector to the computer

1 Use the supplied VGA signal cable to connect the COMPUTER 1 IN connector of the projector directly with the monitor output connector of the computer.

2 Connect the supplied power cable to the AC IN of the projector and the wall outlet, and then press the Main Power switch to turn on the main power.
   The projector is in the standby condition.

TIP:
• When Virtual Remote Tool starts for the first time, “Easy Setup” window will be displayed to navigate your connections.
4. Convenient Features

Step 3: Start Virtual Remote Tool

1. Double-click the shortcut icon on the Windows Desktop.

When Virtual Remote Tool starts for the first time, “Easy Setup” window will be displayed.

Follow the instructions on the screens

When “Easy Setup” is completed, the Virtual Remote Tool screen will be displayed.

TIP:
- The Virtual Remote Tool screen (or Toolbar) can be displayed without displaying “Easy Setup” window. To do so, click to place a check mark for “Do not use Easy Setup next time” on the screen at Step 6 in “Easy Setup”.
4. Convenient Features

Exiting Virtual Remote Tool

1. **Click the Virtual Remote Tool icon** on the Taskbar.
   The pop-up menu will be displayed.

2. **Click “Exit”.**
   The Virtual Remote Tool will be closed.

Viewing the help file of Virtual Remote Tool

- **Displaying the help file using the taskbar**
  1. **Click the Virtual Remote Tool icon** on the taskbar when Virtual Remote Tool is running.
     The pop-up menu will be displayed.

2. **Click “Help”.**
   The Help screen will be displayed.

- **Displaying the help file using the Start Menu.**
  1. **Click “Start”. “All programs” or “Programs”. “NEC Projector User Supportware”. “Virtual Remote Tool”**, and then **“Virtual Remote Tool Help”** in this order.
     The Help screen will be displayed.
5. Using On-Screen Menu

1 Using the Menus

NOTE: The on-screen menu may not be displayed correctly while interlaced motion video image is projected.

1. Press the MENU button on the remote control or the projector cabinet to display the menu.

![Menu Screenshot]

NOTE: The commands such as ENTER, EXIT, ▲▼, ◄► in the bottom show available buttons for your operation.

2. Press the ◄► buttons on the remote control or the projector cabinet to display the submenu.

3. Press the ENTER button on the remote control or the projector cabinet to highlight the top item or the first tab.

4. Use the ▲▼ buttons on the remote control or the projector cabinet to select the item you want to adjust or set.
   You can use the ◄► buttons on the remote control or the projector cabinet to select the tab you want.

5. Press the ENTER button on the remote control or the projector cabinet to display the submenu window.

6. Adjust the level or turn the selected item on or off by using the ▲▼◄► buttons on the remote control or the projector cabinet.
   Changes are stored until adjusted again.

7. Repeat steps 2 - 6 to adjust an additional item, or press the EXIT button on the remote control or the projector cabinet to quit the menu display.

NOTE: When a menu or message is displayed, several lines of information may be lost, depending on the signal or settings.

8. Press the MENU button to close the menu.
   To return to the previous menu, press the EXIT button.
Menu windows or dialog boxes typically have the following elements:

Highlight ....................... Indicates the selected menu or item.
Solid triangle .................. Indicates further choices are available. A highlighted triangle indicates the item is active.
Tab .............................. Indicates a group of features in a dialog box. Selecting on any tab brings its page to the front.
Radio button ................... Use this round button to select an option in a dialog box.
Source .......................... Indicates the currently selected source.
Off Timer remaining time .... Indicates the remaining countdown time when the [OFF TIMER] is preset.
Slide bar ....................... Indicates settings or the direction of adjustment.
Key Lock symbol .............. Indicates the [CONTROL PANEL LOCK] is enabled.
Thermometer symbol .......... Indicates the [ECO MODE] is forcibly set to [ON] mode because the internal temperature is too high.
High Altitude symbol ........ Indicates the [FAN MODE] is set to [HIGH ALTITUDE] mode.
5. Using On-Screen Menu

[PRESET]
This function allows you to select optimized settings for your projected image.
You can adjust neutral tint for yellow, cyan or magenta.
There are six factory presets optimized for various types of images. You can also use [DETAIL SETTINGS] to set user adjustable settings to customize each gamma or color.
Your settings can be stored in [PRESET 1] to [PRESET 6].
- HIGH-BRIGHT...... Recommended for use in a brightly lit room.
- PRESENTATION ..... Recommended for making a presentation using a PowerPoint file.
- VIDEO.................. Recommended for typical TV program viewing.
- MOVIE ................. Recommended for movies.
- GRAPHIC .............. Recommended for graphics.
- sRGB .................. Standard color values

[DETAIL SETTINGS]

[NP410/NP310]
5. Using On-Screen Menu

[GENERAL]

Storing Your Customized Settings [REFERENCE]
This function allows you to store your customized settings in [PRESET 1] to [PRESET 6]. First, select a base preset mode from [REFERENCE], then set [GAMMA CORRECTION] and [COLOR TEMPERATURE].

- HIGH-BRIGHT ........ Recommended for use in a brightly lit room.
- PRESENTATION .... Recommended for making a presentation using a PowerPoint file.
- VIDEO ...................... Recommended for typical TV program viewing.
- MOVIE ................. Recommended for movies.
- GRAPHIC ................. Recommended for graphics.
- sRGB ..................... Standard color values.

Selecting Gamma Correction Mode [GAMMA CORRECTION]
Each mode is recommended for:

- DYNAMIC .............. Creates a high-contrast picture.
- NATURAL ............... Natural reproduction of the picture.
- BLACK DETAIL ....... Emphasizes detail in dark areas of the picture.

Adjusting Color Temperature [COLOR TEMPERATURE]
This option allows you to select the color temperature of your choice.

*NOTE: When [PRESENTATION] or [HIGH-BRIGHT] is selected in [REFERENCE], this function is not available.*

Adjusting Brightness and Contrast [DYNAMIC CONTRAST] (NP410 and NP310)
This function allows you to adjust the contrast ratio optically using the built-in iris. To increase the contrast ratio, select [ON].

Selecting Still Image Mode or Movie Mode [IMAGE MODE]
This function allows you to select the still image mode or the movie mode.

- STILL .................... This mode is for a still image.
- MOVIE ................. This mode is for a movie.

*NOTE: This function is available only when [HIGH-BRIGHT] is selected for [REFERENCE].*

Adjusting White Balance [WHITE BALANCE]
This allows you to adjust the white balance. Contrast for each color (RGB) to adjust the white level of the screen; Brightness for each color (RGB) is used to adjust the black level of the screen.

[CONTRAST]
Adjusts the intensity of the image according to the incoming signal.

[BRIGHTNESS]
Adjusts the brightness level or the back raster intensity.

[SHARPNESS]
Controls the detail of the image.

[COLOR]
Increases or decreases the color saturation level.
5. Using On-Screen Menu

[HUE]
Varies the color level from +/- green to +/- blue. The red level is used as reference.

<table>
<thead>
<tr>

<td>Yes</td>
<td>Yes</td>
</tr>
</tbody>
</table>

Yes = Adjustable, No = Not adjustable, Yes* = depending on the signal

**NOTE:** The NP405 and NP305 do not support “Computer (RGB DIGITAL)” signal.

[RESET]
The settings and adjustments for [CONTRAST], [BRIGHTNESS], [SHARPNESS], [COLOR], [HUE], and [REFERENCE] within [PRESET] will be returned to the factory settings.
The settings and adjustments under [DETAIL SETTINGS] within the [PRESET] screen that are not currently selected will not be reset.
5. Using On-Screen Menu

[IMAGE OPTIONS]

Adjusting Clock and Phase [CLOCK/PHASE]
This allows you to manually adjust CLOCK and PHASE.

CLOCK .................. Use this item to fine tune the computer image or to remove any vertical banding that might appear. This function adjusts the clock frequencies that eliminate the horizontal banding in the image. This adjustment may be necessary when you connect your computer for the first time.

PHASE .................. Use this item to adjust the clock phase or to reduce video noise, dot interference or cross talk. (This is evident when part of your image appears to be shimmering.) Use [PHASE] only after the [CLOCK] is complete.
5. Using On-Screen Menu

Adjusting Horizontal/Vertical Position [HORIZONTAL/VERTICAL]

Adjusts the image location horizontally and vertically.

- An image can be distorted during the adjustment of [CLOCK] and [PHASE]. This is not malfunction.
- The adjustments for [CLOCK], [PHASE], [HORIZONTAL], and [VERTICAL] will be stored in memory for the current signal. The next time you project the signal with the same resolution, horizontal and vertical frequency, its adjustments will be called up and applied.

To delete adjustments stored in memory, from the menu, you select [RESET] → [CURRENT SIGNAL] or [ALL DATA] and reset the adjustments.

Selecting Overscan Percentage [OVERSCAN]

Select overscan percentage (0%, 5% and 10%) for signal.

NOTE:
- The [0%] cannot be selected when VIDEO and S-VIDEO signals are used.
- [OVERSCAN] is not available when [NATIVE] is selected for [ASPECT RATIO].
Selecting Aspect Ratio [ASPECT RATIO]

The term “aspect ratio” refers to the ratio of width to height of a projected image.
The projector automatically determines the incoming signal and displays it in its appropriate aspect ratio.
• This table shows typical resolutions and aspect ratios that most computers support.

<table>

</tr>
</tbody>
</table>

Options | Function
AUTO    | The projector will automatically determine the incoming signal and display it in its aspect ratio. (→ next page)
The projector may erroneously determine the aspect ratio depending on its signal. If this occurs, select the appropriate aspect ratio from the following.

4:3      | The image is displayed in 4:3 aspect ratio.
16:9     | The image is displayed in 16:9 aspect ratio.
15:9     | The image is displayed in 15:9 aspect ratio.
16:10    | The image is displayed in 16:10 aspect ratio.
WIDE ZOOM (NP610/NP510/NP410/NP405/NP310/NP305/NP610S) | The image is stretched left and right. Parts of the displayed image are cropped at the left and right edges and therefore not visible.
LETTERBOX (NP510W/NP410W/NP510WS) | The image of a letterbox signal is stretched equally in the horizontal and vertical directions to fit the screen. Parts of the displayed image are cropped at the top and bottom edges and therefore not visible.
NATIVE  | The projector displays the current image in its true resolution when the incoming computer signal has a lower resolution than the projector’s native resolution.

[Example 1] When the incoming signal with the resolution of 800 x 600 is displayed on the NP610/NP510/NP410/NP405/NP310/NP305/NP610S:

[Example 2] When the incoming signal with the resolution of 800 x 600 is displayed on the NP510W/NP410W/NP510WS:

NOTE:
• When a non-computer signal is displayed, the [NATIVE] is not available.
• When a signal with a higher resolution than the projector’s native resolution is displayed, [NATIVE] is not available.
5. Using On-Screen Menu

Sample image when the appropriate aspect ratio is automatically determined

NP610/NP510/NP410/NP405/NP310/NP305/NP610S

[Computer signal]

<table>
<thead>
<tr>

<th>4:3</th>
<th>Letterbox</th>
<th>Squeeze</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sample image when the aspect ratio is automatically determined</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

NOTE: To display a letterbox signal properly, select [LETTERBOX].
NOTE: To display a squeezed signal properly, select [16:9].

TIP:
- Image position can be adjusted vertically using [POSITION] when the [16:9], [15:9], or [16:10] aspect ratios are selected.
- The term “letterbox” refers to a more landscape-oriented image when compared to a 4:3 image, which is the standard aspect ratio for a video source. The letterbox signal has aspect ratios with the vista size “1.85:1” or cinema scope size “2.35:1” for movie film.
- The term “squeeze” refers to the compressed image of which aspect ratio is converted from 16:9 to 4:3.

Adjusting the Vertical Position of Image [POSITION] (not available on NP510W/NP410W/NP510WS)

(only when [16:9], [15:9], or [16:10] is selected for [ASPECT RATIO])

When [16:9], [15:9], or [16:10] is selected in [ASPECT RATIO], the image is displayed with black borders on the top and bottom. You can adjust the vertical position from the top to the bottom of the black area.
5. Using On-Screen Menu

Menu Descriptions & Functions [SETUP]

[GENERAL]

[NP610/NP510/NP410/NP405/NP310/NP305/NP510W/NP410W]

Using Digital Zoom [DIGITAL ZOOM] (NP610S/NP510WS)
This feature allows you to electronically fine adjust the image size on the screen.
Use ◀ or ▶ button to large or reduce the projected image.

TIP:
To adjust the projected image size roughly, move the projector away or closer to the screen. (→ page 30). To fine adjust the zoom, use the [DIGITAL ZOOM] function.

Enabling Auto Keystone [AUTO KEYSTONE]
This feature allows the projector to detect its tilt and correct vertical distortion automatically.
To turn on the AUTO KEYSTONE feature, select [ON]. To adjust the KEYSTONE feature manually, select [OFF].

Correcting Vertical Keystone Distortion Manually [KEYSTONE]
You can correct vertical distortion manually. (→ page 34)

TIP: When this option is highlighted, pressing the ENTER button will display its slide bar for adjustment.

Saving Vertical Keystone Correction [KEYSTONE SAVE]
This option enables you to save your current keystone settings.

OFF ...................... Does not save current keystone correction settings. It will return your keystone correction settings to “zero”.
ON ....................... Saves current keystone correction settings

Saving your change once affects all sources. The changes are saved when the projector is turned off.

NOTE: When [AUTO KEYSTONE] is set to [ON], [KEYSTONE SAVE] is not available. Next time you turn on the power, the AUTO KEYSTONE function will work and the data stored with [KEYSTONE SAVE] will be invalid.
Using the Wall Color Correction [WALL COLOR]

This function allows for quick adaptive color correction in applications where the screen material is not white.

**NOTE:** Selecting [WHITEBOARD] reduces lamp brightness.

**Setting Eco Mode [ECO MODE]**

This feature turns on or off the ECO mode. The lamp life can be extended by selecting [ON]. Selecting [ON] also decreases fan noise when compared to [OFF] mode.

<table>
<thead>
<tr>
<th>ECO MODE</th>
<th>Description</th>
<th>Status of LAMP indicator</th>
</tr>
</thead>
<tbody>
<tr>
<td>OFF</td>
<td>This is the Default setting (100% Brightness).</td>
<td>Off</td>
</tr>
<tr>
<td>ON</td>
<td>Select this mode to increase the lamp life (approx. 70% Brightness on NP610/NP510W/NP410W/NP610S/NP510WS and approx. 80% Brightness on NP510/NP410/NP405/NP310/NP305).</td>
<td>Steady Green light</td>
</tr>
</tbody>
</table>

**NOTE:**
- The [LAMP LIFE REMAINING] and [LAMP HOURS USED] can be checked in [USAGE TIME]. Select [INFO.] → [USAGE TIME].
  (→ page 78)
- The projector is always in [ON] for 90 seconds after the lamp is turned on and while the POWER indicator is blinking green. The lamp condition will not be affected even when [ECO MODE] is changed.
- If there is no signal for about one minute, the projector will display a blue, black or logo background (depending on setting) and go into [ON]. The projector will return to the [OFF] mode once a signal is accepted.
- If the projector becomes overheated in [OFF] mode because of use in a high-temperature room, there may be a case where the [ECO MODE] automatically changes to [ON] mode to protect the projector. This mode is called “forced ECO mode”. When the projector is in [ON] mode, the picture brightness decreases. The LAMP indicator’s steady light indicates the projector is in [ON] mode. When the projector comes back to normal temperature, the [ECO MODE] returns to [OFF] mode. Thermometer symbol [🌡] indicates the [ECO MODE] is automatically set to [ON] mode because the internal temperature is too high.
5. Using On-Screen Menu

Setting Closed Caption [CLOSED CAPTION]
This option sets several closed caption modes that allow text to be superimposed on the projected image of Video or S-Video.

OFF ................. This exits the closed caption mode.
CAPTION 1-4 ........ Text is superimposed.
TEXT 1-4............. Text is displayed.

NOTE:
• The closed caption is not available under the following conditions:
  - when messages or menus are displayed.
  - when an image is magnified, frozen, or muted.
• Doing the following may cause portions of superimposed text or closed caption to be truncated.
  If this occurs, try to change correction amount or selection to place the superimposed text or closed caption within the screen.
  - Using the [DIGITAL ZOOM] or [KEYSTONE] function to correct the image excessively
  - Selecting [16:10] or [16:9] from [ASPECT RATIO]
  - Using the [POSITION] (not available on NP510W/NP410W/NP510WS)

Selecting Menu Language [LANGUAGE]
You can choose one of 21 languages for on-screen instructions.

NOTE: Your setting will not be affected even when [RESET] is done from the menu.

[MENU]

Selecting Menu Color [COLOR SELECT]
You can choose between two options for menu color: COLOR and MONOCHROME.

Turning On / Off Source Display [SOURCE DISPLAY]
This option turns on or off input name display such as COMPUTER 1, COMPUTER2(DIGITAL), COMPUTER 2(ANALOG), VIDEO, S-VIDEO and No Input to be displayed on the top right of the screen.
On NP405/NP305, the input name will be displayed as COMPUTER 1, COMPUTER2, VIDEO, and S-VIDEO.

Turning ON/OFF Control ID [ID DISPLAY]
(Available only when the optional remote control NP02RC is used)

ID DISPLAY ............ This option turns on or off the ID number which is displayed when the ID SET button on the remote control is pressed.
5. Using On-Screen Menu

Turning On / Off Eco Message [ECO MESSAGE]
This option turns on or off the following messages when the projector is turned on.

The Eco Message prompts the user to save energy. When [OFF] is selected for [ECO MODE], you will get a message to prompt you to select [ON] for [ECO MODE].

When [ON] is selected for [ECO MODE]

![Carbon Meter]

To close the message, press any one of the buttons. The message will disappear if no button operation is done for 30 seconds.

When [OFF] is selected for [ECO MODE]

![Carbon Meter]

Pressing the ENTER button will display the [ECO MODE] screen. (→ page 69)
To close the message, press the EXIT button.

Selecting Menu Display Time [DISPLAY TIME]
This option allows you to select how long the projector waits after the last touch of a button to turn off the menu. The preset choices are [MANUAL], [AUTO 5 SEC], [AUTO 15 SEC], and [AUTO 45 SEC]. The [AUTO 45 SEC] is the factory preset.

Selecting a Color or Logo for Background [BACKGROUND]
Use this feature to display a blue/black screen or logo when no signal is available. The default background is [BLUE].

NOTE: Your setting will not be affected even when [RESET] is done from the menu.

Selecting Interval Time for Filter Message [FILTER MESSAGE]
This option allows you to select the time preference between displaying the message for cleaning the filters. Clean the filter when you get the message “PLEASE CLEAN FILTER.” (→ page 81)
Five options are available: OFF, 100[H], 200[H], 500[H], 1000[H]
The default setting is 500[H].

NOTE: Your setting will not be affected even when [RESET] is done from the menu.
5. Using On-Screen Menu

[INSTALLATION]

Selecting Projector Orientation [ORIENTATION]
This reorients your image for your type of projection. The options are: desktop front projection, ceiling rear projection, desktop rear projection, and ceiling front projection.

Disabling the Cabinet Buttons [CONTROL PANEL LOCK]
This option turns on or off the CONTROL PANEL LOCK function.

NOTE:
• This CONTROL PANEL LOCK does not affect the remote control functions.
• When the control panel is locked, pressing and holding the EXIT button on the projector cabinet for about 10 seconds will change the setting to [OFF].

TIP: When the [CONTROL PANEL LOCK] is turned on, a key lock icon [ ] will be displayed at the bottom right of the menu.

Enabling Security [SECURITY]
This feature turns on or off the SECURITY function. Unless the correct keyword is entered, the projector cannot project an image. (→ page 43)

NOTE: Your setting will not be affected even when [RESET] is done from the menu.
Selecting Communication Speed [COMMUNICATION SPEED]
This feature sets the baud rate of the PC Control port (D-Sub 9P). It supports data rates from 4800 to 19200 bps. The default is 19200 bps. Select the appropriate baud rate for your equipment to be connected (depending on the equipment, a lower baud rate may be recommended for long cable runs).

NOTE: Your selected communication speed will not be affected even when [RESET] is done from the menu.

Setting ID to the Projector [CONTROL ID]
(Available only when the optional remote control NP02RC is used)
You can operate multiple projectors separately and independently with the single remote control that has the CONTROL ID function. If you assign the same ID to all the projectors, you can conveniently operate all the projectors together using the single remote control. To do so, you have to assign an ID number to each projector.

CONTROL ID NUMBER ............Select a number from 1 to 254 you wish to assign to your projector.
CONTROL ID......................Select [OFF] to turn off the CONTROL ID setting and select [ON] to turn on the CONTROL ID setting.

NOTE:
• Selecting [ON] for [CONTROL ID] will make the remote control supplied with the projector inoperable. The buttons on the projector cabinet can be used. Neither can you operate the projector by using the optional remote control NP01RC that does not have the CONTROL ID function.
• Your setting will not be affected even when [RESET] is done from the menu.
• Pressing and holding the ENTER button on the projector cabinet for 10 seconds will display the menu for canceling the Control ID.

Assigning or Changing the Control ID
1. Turn on the projector.
2. Press the ID SET button on the remote control (NP02RC).
   The CONTROL ID screen will be displayed.

   If the projector can be operated with the current remote control ID, the [ACTIVE] will be displayed. If the projector cannot be operated with the current remote control ID, the [INACTIVE] will be displayed. To operate the inactive projector, assign the control ID used for the projector by using the following procedure (Step 3).

3. Press one of numeric keypad buttons while pressing and holding the ID SET button on the remote control (NP02RC).
   Example:
   To assign “3”, press the “3” button on the remote control.
   No ID means that all the projectors can be operated together with a single remote control. To set “No ID”, enter “000” or press the CLEAR button.

   TIP: The range of IDs is from 1 to 254.

4. Release the ID SET button.
   The updated CONTROL ID screen will be displayed.

NOTE: The IDs can be cleared in a few days after the batteries are run down or removed.
5. Using On-Screen Menu

[OPTIONS(1)]

**Setting Auto Adjust [AUTO ADJUST]**

This feature sets the Auto Adjust mode so that the computer signal can be automatically or manually adjusted for noise and stability. You can automatically make adjustment in two ways: [NORMAL] and [FINE].

- **OFF** ................. The computer signal will not be automatically adjusted. You can manually optimize the computer signal.
- **NORMAL** ............. Default setting. The computer signal will be automatically adjusted. Normally select this option.
- **FINE** ................. Select this option if fine adjustment is needed. It takes more time to switch to the source than when [NORMAL] is selected.

**Selecting Fan Mode [FAN MODE]**

This option allows you to select three modes for fan speed: Auto mode, High speed mode, and High Altitude mode.

- **AUTO** ................. The built-in fans automatically run at a variable speed according to the internal temperature.
- **HIGH** ................. The built-in fans run at high speed.
- **HIGH ALTITUDE** ...... The built-in fans run at a high speed. Select this option when using the projector at altitudes approximately 5500 feet/1600 meters or higher.

When you wish to cool down the temperature inside the projector quickly, select [HIGH].

**NOTE:**

- It is recommended that you select High speed mode if you use the projector non-stop for consecutive days.
- Set [FAN MODE] to [HIGH ALTITUDE] when using the projector at altitudes approximately 5500 feet/1600 meters or higher.
- Using the projector at altitudes approximately 5500 feet/1600 meters or higher without setting to [HIGH ALTITUDE] can cause the projector to overheat and the protector could shut down. If this happens, wait a couple minutes and turn on the projector.
- Using the projector at altitudes less than approximately 5500 feet/1600 meters and setting to [HIGH ALTITUDE] can cause the lamp to overcool, causing the image to flicker. Switch [FAN MODE] to [AUTO].
- Using the projector at altitudes approximately 5500 feet/1600 meters or higher can shorten the life of optical components such as the lamp.
- Your setting will not be affected even when [RESET] is done from the menu.
5. Using On-Screen Menu

Selecting Signal Format [SIGNAL SELECT]

[COMPUTER1], [COMPUTER2(ANALOG)], [COMPUTER2 on NP405/NP305]  
Allows you to choose [COMPUTER1], or [COMPUTER2(ANALOG)] for an RGB source such as a computer, or [COMPONENT] for a component video source such as a DVD player. Normally select [RGB/COMPONENT] and the projector automatically detects a component signal. However there may be some component signals that the projector is unable to detect. If this is the case, select [COMPONENT].

[VIDEO & S-VIDEO System Select]  
This feature enables you to select composite video standards automatically or manually. Normally select [AUTO] and the projector will automatically detect the video standard. In the case where the projector has difficulty detecting the video standard, select the appropriate video standard from the menu. This must be done for VIDEO and S-VIDEO respectively.

Enabling or Disabling WXGA Mode [WXGA MODE]  
Selecting [ON] will give priority to a WXGA (1280 x 768) signal in recognizing an input signal. When [WXGA MODE] is set to [ON], an XGA (1024 x 768) signal may not be recognized on NP610, NP510, NP410, NP405, NP310, NP305, or NP610S. In this case, select [OFF].

Enabling the deinterlace [DEINTERLACE]  
Turns on or off the deinterlace function for a telecine signal.

  OFF ........................ Select this option if there is any jitter or artifacts in video.
  ON .......................... Default standard setting.

NOTE: This feature is not available for RGB, 480p, 576p and HDTV signals.

Enabling Key Sound and Error Sound [BEEP]  
This feature turns on or off the button sound or alarm when the following operations are performed.

- Displaying the main menu
- Switching sources
- Resetting data by using [RESET]
- Pressing POWER ON or POWER OFF button
5. Using On-Screen Menu

[OPTIONS(2)]

Using Off Timer [OFF TIMER]

1. Select your desired time between 30 minutes and 16 hours: OFF, 0:30, 1:00, 2:00, 4:00, 8:00, 12:00, 16:00.
2. Press the ENTER button on the remote control.
3. The remaining time starts counting down.
4. The projector will turn off after the countdown is complete.

NOTE:
• To cancel the preset time, set [OFF] for the preset time or turn off the power.
• When the remaining time reaches 3 minutes before the projector is turned off, the [THE PROJECTOR WILL TURN OFF WITHIN 3 MINUTES] message will be displayed on the bottom of the screen.

Selecting Power-saving in [STANDBY MODE]

The projector has two standby modes: [NORMAL] and [POWER-SAVING]. The POWER-SAVING mode is the mode that allows you to put the projector in the power-saving condition which consumes less power than the NORMAL mode. The projector is preset for NORMAL mode at the factory.

NORMAL.............. Power indicator: Orange light/STATUS indicator: Green light
POWER-SAVING..... Power indicator: Red light/STATUS indicator: Off

The following connectors, buttons or functions will not work during this mode.
- PC CONTROL port, MONITOR OUT connector, and AUDIO OUT connector
- LAN and Mail Alert functions
- Buttons other than POWER button on the cabinet
- Buttons other than POWER ON button on the remote control
- Virtual Remote function

NOTE:
• When [CONTROL PANEL LOCK], [CONTROL ID], or [AUTO POWER ON(COMP1)] is turned on, the [STANDBY MODE] setting is not available.
• Your setting will not be affected even when [RESET] is done from the menu.

Enabling Auto Power On [AUTO POWER ON(AC)]

Turns the projector on automatically when the power cable is inserted into an active power outlet. This eliminates the need to always use the POWER button on the remote control or projector cabinet.
5. Using On-Screen Menu

Turning On the Projector By Applying Computer Signal [AUTO POWER ON(COMP1)]

When the projector is in Standby mode, applying a computer signal from a computer connected to the COMPUTER1 IN input will power on the projector and simultaneously project the computer's image. This functionality eliminates the need to always use the POWER button on the remote control or the projector cabinet to power on the projector.

To use this function, first connect a computer to the projector and the projector to an active AC input.

NOTE:
• Disconnecting a computer signal from the computer will not power off the projector. We recommend using this function in combination of the AUTO POWER OFF function.
• This function will not be available under the following conditions:
  - when a component signal is applied to the COMPUTER1 IN connector
  - when a Sync on Green RGB signal or composite sync signal is applied
• To enable the AUTO POWER ON (COMP1) after turning off the projector, wait 3 seconds and input a computer signal. If a computer signal is still present when the projector is turned off, the AUTO POWER ON (COMP1) will not work and the projector remains in standby mode.

Enabling Power Management [AUTO POWER OFF]

When this option is selected you can enable the projector to automatically turn off (at the selected time: 5min., 10min., 20min., 30min.) if there is no signal received by any input or if no operation is performed.

Selecting Default Source [DEFAULT SOURCE SELECT]

You can set the projector to default to any one of its inputs each time the projector is turned on.

LAST ......................... Sets the projector to default to the previous or last active input each time the projector is turned on.

AUTO ............................ Searches for an active source in order of COMPUTER1 → COMPUTER 2(DIGITAL) → COMPUTER2 (ANALOG) → VIDEO → S-VIDEO → COMPUTER1 and displays the first found source.

COMPUTER1 ...................... Displays the computer signal from the COMPUTER 1 IN connector every time the projector is turned on.

COMPUTER2(DIGITAL) ...... Displays the DVI digital from the COMPUTER 2 IN connector every time the projector is turned on. (Not available on NP405/NP305)

COMPUTER2(ANALOG) ..... Displays the computer signal from the COMPUTER 2 IN connector every time the projector is turned on. (“COMPUTER2” on NP405/NP305)

VIDEO .......................... Displays the Video source from the VIDEO IN connector every time the projector is turned on.

S-VIDEO ......................... Displays the Video source from the S-VIDEO IN connector every time the projector is turned on.
5. Using On-Screen Menu

7 Menu Descriptions & Functions [INFO.]
Displays the status of the current signal and lamp usage. This item has four pages (three pages on NP405 and NP305). The information included is as follows:

TIP: Pressing the HELP button on the remote control will show the [INFO.] menu items.

[USAGE TIME]

[LAMP LIFE REMAINING] (%)*
[LAMP HOURS USED] (H)
[FILTER HOURS USED] (H)
[TOTAL CARBON SAVINGS] (kg-CO2)

* The progress indicator shows the percentage of remaining bulb life.

The value informs you of the amount of lamp usage. When the remaining lamp time reaches 0, the LAMP LIFE REMAINING bar indicator changes from 0% to 100 Hours and starts counting down.

If the remaining lamp time reaches 0 hours, the projector will not turn on regardless of whether the ECO MODE is set to OFF or ON.

• The message to the effect that the lamp or the filters should be replaced will be displayed for one minute when the projector is turned on and when the POWER button on the projector or the remote control is pressed.

To dismiss this message, press any button on the projector or the remote control.

#### [CONTROL ID] (when [CONTROL ID] is set)
5. Using On-Screen Menu

Menu Descriptions & Functions [RESET]

Using [RESET]

Returning to Factory Default [RESET]
The RESET feature allows you to change adjustments and settings to the factory preset for a (all) source(s) except the following:

[CURRENT SIGNAL]
Resets the adjustments for the current signal to the factory preset levels.
The items that can be reset are: [PRESET], [CONTRAST], [BRIGHTNESS], [COLOR], [HUE], [SHARPNESS], [ASPECT RATIO], [HORIZONTAL], [VERTICAL], [CLOCK], [PHASE], and [OVERSCAN].

[ALL DATA]
Reset all the adjustments and settings for all the signals to the factory preset.
All items can be reset EXCEPT [LANGUAGE], [BACKGROUND], [FILTER MESSAGE], [SECURITY], [COMMUNICATION SPEED], [CONTROL ID], [STANDBY MODE], [FAN MODE], [LAMP LIFE REMAINING], [LAMP HOURS USED], [FILTER HOURS USED], [TOTAL CARBON SAVINGS], and [NETWORK SETTINGS].
To reset the lamp usage time, see “Clearing Lamp Hour Meter [CLEAR LAMP HOURS]” below.

Clearing Networking Settings [NETWORK SETTINGS] (Not available on NP405/NP305)
Returns [DHCP], [IP ADDRESS], [SUBNET MASK], and [GATEWAY] to the default settings.

Clearing Lamp Hour Meter [CLEAR LAMP HOURS]
Resets the lamp clock back to zero. Selecting this option displays submenu for a confirmation. Select [YES] and press the ENTER button.

NOTE: Elapsed time of the lamp use will not be affected even when [RESET] is done from the menu.

NOTE: The projector will turn off and go into standby mode when you continue to use the projector for another 100 hours after the lamp has reached the end of its life. In this condition you cannot clear the lamp hour meter on the menu. If this happens, press the HELP button on the remote control for 10 seconds to reset the lamp clock back to zero. Do this only after replacing the lamp.

Clearing the Filter Usage Hours [CLEAR FILTER HOURS]
Resets the filter usage back to zero. Selecting this option displays submenu for a confirmation. Select [YES] and press the ENTER button.

NOTE: Elapsed time of the filter use will not be affected even when [RESET] is done from the menu.
6. Maintenance

This section describes the simple maintenance procedures you should follow to clean the filters and replace the lamp.

1 Cleaning or Replacing the Filters

The air-filter sponge keeps dust and dirt from getting inside the projector and should be frequently cleaned. If the filter is dirty or clogged, your projector may overheat.

NOTE: The message for filter cleaning will be displayed for one minute after the projector is turned on or off. To cancel the message, press any button on the projector cabinet or the remote control.

CAUTION
- Turn off the projector, turn off the main power switch and unplug the projector before replacing the filters.
- Only clean the outside of the filter cover with a vacuum cleaner.
- Do not attempt to operate the projector without the filter cover.

To clean the air-filter:
Vacuum the filter-through the filter cover.

To replace the filter (sponge):
1. Remove the filter cover (2 locations) by pushing up on the catch of the cover until you feel it detach.

2. Replace two filters.
   (1) Gently peel off the filter (sponge) and clean the filter cover.
   (2) Attach the new filter to the filter cover.
3. **Reinstall the new filter cover (2 locations).**
   - Insert the filter cover until you feel click.

4. **Clear the filter hours used.**
To reset the filter usage time, from the menu, select [RESET] \(\rightarrow\) [CLEAR FILTER HOURS].
(\(\rightarrow\) page 80 for resetting the filter usage time.)

**NOTE:** Do not wash the filter with soap and water. Soap and water will damage the filter membrane. Before replacing the filter, remove dust and dirt from the projector cabinet. Keep out dust and dirt during filter replacement.

**NOTE:** When you replace the lamp, it is also wise to replace the filter. The filter comes in the same package with your replacement lamp.
6. Maintenance

2 Cleaning the Cabinet and the Lens

1. Turn off the projector before cleaning.
2. Clean the cabinet periodically with a damp cloth. If heavily soiled, use a mild detergent. Never use strong detergents or solvents such as alcohol or thinner.

Note on Cleaning the Lens (NP610/NP510/NP410/NP405/NP310/NP305/NP510W/NP410W)
Use a blower or lens paper to clean the lens, and be careful not to scratch or mar the lens.

Note on Cleaning the Lens (NP610S/NP510WS)
The NP610S and NP510WS have a plastic lens. Use a commercially available plastic lens cleaner.

NOTE:
• Do not scratch or mar the lens surface as a plastic lens is easily scratched.
• Never use alcohol or glass lens cleaner as doing so will cause damage to the lens surface.
3 Replacing the Lamp

When the lamp reaches the end of its life, the LAMP indicator in the cabinet will blink red. Even though the lamp may still be working, replace the lamp to maintain the optimal projector performance. After replacing the lamp, be sure to clear the lamp hour meter. (→ page 80)

⚠ CAUTION

- DO NOT TOUCH THE LAMP immediately after it has been used. It will be extremely hot. Turn the projector off, turn off the main power switch and then disconnect the power cable. Allow at least one hour for the lamp to cool before handling.
- DO NOT REMOVE ANY SCREWS except one lamp cover screw and two lamp housing screws. You could receive an electric shock.
- Do not break the glass on the lamp housing.
  Keep finger prints off the glass surface on the lamp housing. Leaving finger prints on the glass surface might cause an unwanted shadow and poor picture quality.
- The projector will turn off and go into standby mode when you continue to use the projector for another 100 hours after the lamp has reached the end of its life. If this happens, be sure to replace the lamp. If you continue to use the lamp after the lamp reaches the end of its life, the lamp bulb may shatter, and pieces of glass may be scattered in the lamp case. Do not touch them as the pieces of glass may cause injury. If this happens, contact your NEC dealer for lamp replacement.

*NOTE: This message will be displayed under the following conditions:
- for one minute after the projector has been powered on
- when the (POWER) button on the projector cabinet or the POWER OFF button on the remote control is pressed

To turn off the message, press any button on the projector cabinet or the remote control.

To replace the lamp:
Optional lamp and tools needed for replacement:
- Replacement lamp:
  NP07LP (NP610/NP510W/NP410W/NP610S/NP510WS)
  NP14LP (NP510/NP410/NP405/NP310/NP305)
1. Remove the lamp cover.
   (1) Loosen the lamp cover screw
   • The lamp cover screw is not removable.
   (2) Push and slide the lamp cover off.

2. Remove the lamp housing.
   (1) Loosen the two screws securing the lamp housing until the phillips screwdriver goes into a freewheeling condition.
   • The two screws are not removable.
   • There is an interlock on this case to prevent the risk of electrical shock. Do not attempt to circumvent this interlock.
   (2) Remove the lamp housing by holding it.

CAUTION:
Make sure that the lamp housing is cool enough to before removing it.
6. Maintenance

3. **Install a new lamp housing.**
   (1) Insert a new lamp housing until the lamp housing is plugged into the socket.
   
   **CAUTION**
   Do not use a lamp other than the NEC replacement lamp NP07LP (NP610/NP510W/NP410W/NP610S/NP510WS)/NP14LP (NP510/NP410/NP405/NP310/NP305). Order this from your NEC dealer.
   
   (2) Push the top center of the lamp housing to secure it.
   (3) Secure it in place with the two screws.
   • Be sure to tighten the screws.

4. **Reattach the lamp cover.**
   (1) Slide the lamp cover back until it snaps into place.
   (2) Tighten the screw to secure the lamp cover.
   • Be sure to tighten the screw.

5. **Connect the supplied power cable, turn on the Main Power switch and turn on the projector.**

6. **Finally, select the menu → [RESET] → [CLEAR LAMP HOURS] to reset the lamp usage hours.**

   **NOTE:** When you continue to use the projector for another 100 hours after the lamp has reached the end of its life, the projector cannot turn on and the menu is not displayed. If this happens, press the HELP button on the remote control for 10 seconds to reset the lamp clock back to zero. When the lamp time clock is reset to zero, the LAMP indicator goes out.
7. Appendix

1. Troubleshooting

This section helps you resolve problems you may encounter while setting up or using the projector.

Over-Temperature Protection

If the temperature inside the projector rises too high, the over-temperature protector will automatically turn off the lamp with the STATUS indicator blinking (2-cycle On and Off.) Should this happen, do the following:

- Unplug the power cable after the cooling fans stop.
- Move the projector to a cooler location if the room where you are presenting is particularly too warm.
- Clean the ventilation holes if they are clogged with dust.
- Wait about 60 minutes until the inside of the projector becomes cool enough.
# Common Problems & Solutions

(→ “Power/Status/Lamp Indicator” on page 87.)

<table>
<thead>
<tr>
<th>Problem</th>
<th>Check These Items</th>
</tr>
</thead>
</table>
| Does not turn on or shut down | • Check that the power cable is plugged in and that the power button on the projector cabinet or the remote control is on. (→ pages 25, 26, 27)  
• Ensure that the lamp cover is installed correctly. (→ page 86)  
• Check to see if the projector has overheated. If there is insufficient ventilation around the projector or if the room where you are presenting is particularly warm, move the projector to a cooler location.  
• Check to see if you continue to use the projector for another 100 hours after the lamp has reached the end of its life. If so, replace the lamp. After replacing the lamp, reset the lamp hours used. (→ page 80)  
• The lamp may fail to light. Wait a full minute and then turn on the power again.  
• Set [FAN MODE] to [HIGH ALTITUDE] when using the projector at altitudes approximately 5500 feet/1600 meters or higher. Using the projector at altitudes approximately 5500 feet/1600 meters or higher without setting to [HIGH ALTITUDE] can cause the projector to overheat and the projector could shut down. If this happens, wait a couple minutes and turn on the projector. (→ page 74)  
• If you turn on the projector immediately after the lamp is turned off, the fans run without displaying an image for some time and then the projector will display the image. Wait for a moment. |
| Will turn off | • Ensure that the [OFF TIMER] or [AUTO POWER OFF] is off. (→ page 76, 77) |
| No picture | • Use the COMPUTER1, the COMPUTER2, the VIDEO or the S-VIDEO button on the remote control to select your source (Computer, Video or S-Video). (→ page 29) If there is still no picture, press the button again.  
• Ensure your cables are connected properly.  
• Use menus to adjust the brightness and contrast. (→ page 62)  
• Remove the lens cap.  
• Reset the settings or adjustments to factory preset levels using the [RESET] in the Menu. (→ page 80)  
• Enter your registered keyword if the Security function is enabled. (→ page 43)  
• Be sure to connect the projector and notebook PC while the projector is in standby mode and before turning on the power to the notebook PC. In most cases the output signal from the notebook PC is not turned on unless connected to the projector before being powered up.  
• If the screen goes blank while using your remote control, it may be the result of the computer’s screen-saver or power management software.  
• See also the next page. |
| Picture suddenly becomes dark | • Check if the projector is in the Forced ECO mode because of too high ambient temperature. If this is the case, lower the internal temperature of the projector by selecting [HIGH] for [FAN MODE]. (→ page 74) |
| Color tone or hue is unusual | • Check if an appropriate color is selected in [WALL COLOR]. If so, select an appropriate option. (→ page 69)  
• Adjust [HUE] in [PICTURE]. (→ page 63) |
| Image isn’t square to the screen | • Reposition the projector to improve its angle to the screen. (→ page 30)  
• Use the Keystone correction function to correct the trapezoid distortion. (→ page 34) |
| Picture is blurred | • Adjust the focus. (→ page 33)  
• Reposition the projector to improve its angle to the screen. (→ page 30)  
• Ensure that the distance between the projector and screen is within the adjustment range of the lens. (→ page 15, 16)  
• Condensation may form on the lens if the projector is cold, brought into a warm place and is then turned on. Should this happen, let the projector stand until there is no condensation on the lens. |
| Flicker appears on screen | • Set [FAN MODE] to other than [HIGH ALTITUDE] mode when using the projector at altitudes approximately 5500 feet/1600 meters or lower. Using the projector at altitudes less than approximately 5500 feet/1600 meters and setting to [HIGH ALTITUDE] can cause the lamp to overcool, causing the image to flicker. Switch [FAN MODE] to [AUTO]. (→ page 74) |
| Image is scrolling vertically, horizontally or both | • Check the computer’s resolution and frequency. Make sure that the resolution you are trying to display is supported by the projector. (→ page 97)  
• Adjust the computer image manually with the Horizontal/Vertical in the [IMAGE OPTIONS]. (→ page 65) |
| Remote control does not work | • Install new batteries. (→ page 10)  
• Make sure there are no obstacles between you and the projector.  
• Stand within 22 feet (7 m) of the projector. (→ page 10) |
| Indicator is lit or blinking | • See the POWER/STATUS/LAMP Indicator. (→ page 87) |
| Cross color in RGB mode | • Press the AUTO ADJ. button on the projector cabinet or the remote control. (→ page 37)  
• Adjust the computer image manually with [CLOCK]/[PHASE] in [IMAGE OPTIONS] in the menu. (→ page 64) |

For more information contact your dealer.
If there is no picture, or the picture is not displayed correctly.

- Power on process for the projector and the PC.
  Be sure to connect the projector and notebook PC while the projector is in standby mode and before turning on the power to the notebook PC.
  In most cases the output signal from the notebook PC is not turned on unless connected to the projector before being powered up.

  NOTE: You can check the horizontal frequency of the current signal in the projector’s menu under Information. If it reads “0kHz”, this means there is no signal being output from the computer. (→ page 79 or go to next step)

- Enabling the computer’s external display.
  Displaying an image on the notebook PC’s screen does not necessarily mean it outputs a signal to the projector. When using a PC compatible laptop, a combination of function keys will enable/disable the external display. Usually, the combination of the “Fn” key along with one of the 12 function keys gets the external display to come on or off. For example, NEC laptops use Fn + F3, while Dell laptops use Fn + F8 key combinations to toggle through external display selections.

- Non-standard signal output from the computer
  If the output signal from a notebook PC is not an industry standard, the projected image may not be displayed correctly. Should this happen, deactivate the notebook PC’s LCD screen when the projector display is in use. Each notebook PC has a different way of deactivate/reactivate the local LCD screens as described in the previous step. Refer to your computer’s documentation for detailed information.

- Image displayed is incorrect when using a Macintosh
  When using a Macintosh with the projector, set the DIPswitch of the Mac adapter (not supplied with the projector) according to your resolution. After setting, restart your Macintosh for the changes to take affect.
  For setting display modes other than those supported by your Macintosh and the projector, changing the DIP switch on a Mac adapter may bounce an image slightly or may display nothing. Should this happen, set the DIP switch to the 13” fixed mode and then restart your Macintosh. After that, restore the DIP switches to a displayable mode and then restart the Macintosh again.

  NOTE: A Video Adapter cable manufactured by Apple Computer is needed for a PowerBook which does not have a mini D-Sub 15-pin connector.

- Mirroring on a PowerBook
  * When using the projector with a Macintosh PowerBook, output may not be set to 1024 x 768 unless “mirroring” is off on your PowerBook. Refer to owner’s manual supplied with your Macintosh computer for mirroring.

- Folders or icons are hidden on the Macintosh screen
  Folders or icons may not be seen on the screen. Should this happen, select [View] → [Arrange] from the Apple menu and arrange icons.

*4 What is HDCP/HDCP technology?

HDCP is an acronym for High-bandwidth Digital Content Protection. High-bandwidth Digital Content Protection (HDCP) is a system for preventing illegal copying of video data sent over a Digital Visual Interface (DVI).

If you are unable to view material via the DVI input, this does not necessarily mean the projector is not functioning properly. With the implementation of HDCP, there may be cases in which certain content is protected with HDCP and might not be displayed due to the decision/intention of the HDCP community (Digital Content Protection, LLC).

*5 An image with higher or lower resolution than the projector’s native resolution (NP610/NP510/NP410/NP405/NP310/NP305: 1024 x 768 / NP510W/NP410W: 1280 x 800) will be displayed with Advanced AccuBlend.

### Electrical

**Inputs**
- 1 RGB/Component (D-Sub 15 P), 1 RGB (Digital/Analog, DVI-I 29 P, HDCP*4 supported), 1 S-Video (DIN 4 P), 1 Video (RCA), 1 (L/R) RCA Audio, 2 Stereo Mini Audio

**Outputs**
- 1 RGB (D-Sub 15 P), 1 Stereo Mini Audio

**PC Control**
- 1 PC Control Port (D-Sub 9P)

**Wired LAN Port**
- RJ-45

**External Control**
- RS232, IR, Wired LAN

**Color Reproduction**
- 16.7 million colors simultaneously, Full color

**Compatible Signals*5**
- Digital: VGA/SVGA/XGA/WXGA/SXGA

**Video Bandwidth**
- RGB: 80 MHz (Max.)

**Horizontal Resolution**
- 540 TV lines: NTSC/NTSC4.43/PAL-PAL-N PAL-M/PAL60 300 TV lines: SECAM

**Scan Rate**
- Horizontal: 15 kHz to 100 kHz (RGB: 24 kHz or over) Vertical: 50 Hz to 120 Hz

**Sync Compatibility**
- Separate Sync / Composite Sync / Sync on G

**Built-in Speaker**
- 7W (monaural)

**Power Requirement**

**Input Current**

| Model Number | NP610S: 3.8–1.5A | NP610SG: 1.8A | NP510WS: 3.8–1.5A | NP510WSG: 1.8A |

**Power Consumption**
- 312W (100-130V AC)/294W (200-240V AC) in OFF for ECO MODE/237W (100-130V AC)/228W (200-240V AC) in ON for ECO MODE/10W in NORMAL Mode for STANDBY Mode/0.6W (100-130V AC)/0.7W (200-240V AC) in POWER-SAVING Mode for STANDBY MODE

*4 What is HDCP/HDCP technology?

HDCP is an acronym for High-bandwidth Digital Content Protection. High bandwidth Digital Content Protection (HDCP) is a system for preventing illegal copying of video data sent over a Digital Visual Interface (DVI).

If you are unable to view material via the DVI input, this does not necessarily mean the projector is not functioning properly. With the implementation of HDCP, there may be cases in which certain content is protected with HDCP and might not be displayed due to the decision/intention of the HDCP community (Digital Content Protection, LLC).

*5 An image with higher or lower resolution than the projector's native resolution (NP610S: 1024 × 768 / NP510WS: 1280 × 800) will be displayed with Advanced AccuBlend.

NOTE: Contact your local dealer for a full list of the PC Control Codes if needed.

Cable Connection

Communication Protocol

- Baud rate: 19200 bps
- Data length: 8 bits
- Parity: No parity
- Stop bit: One bit
- X on/off: None
- Communications procedure: Full duplex

NOTE: Depending on the equipment, a lower baud rate may be recommended for long cable runs.

PC Control Connector (D-SUB 9P)

NOTE 1: Pins 1, 4, 6 and 9 are no used.

NOTE 2: Jumper “Request to Send” and “Clear to Send” together on both ends of the cable to simplify cable connection.

NOTE 3: For long cable runs it is recommended to set communication speed within projector menus to 9600 bps.
### Troubleshooting Check List

Before contacting your dealer or service personnel, check the following list to be sure repairs are needed also by referring to the “Troubleshooting” section in your user’s manual. This checklist below will help us solve your problem more efficiently.

* Print this page and the next page for your check.

#### Frequency of occurrence

| □ always | □ sometimes (How often?______________________) | □ other (__________________) |

#### Power

- No power (POWER indicator does not light green) See also “Status Indicator (STATUS)”.
- Power cable’s plug is fully inserted into the wall outlet.
- Main power switch is pressed to the ON position.
- Lamp cover is installed correctly.
- Lamp Hours Used (lamp operation hours) was cleared after lamp replacement.
- No power even though you press and hold the POWER button for 1 second.

#### Video and Audio

- No image is displayed from your PC or video equipment to the projector.
- Still no image even though you connect the projector to the PC first, then start the PC.
- Enabling your notebook PC’s signal output to the projector.
  - *A combination of function keys will enable/disable the external display. Usually, the combination of the “Fn” key along with one of the 12 function keys turns the external display on or off.*
- No image (blue or black background, no display).
- Still no image even though you press the AUTO ADJUST button.
- Still no image even though you carry out [RESET] in the projector’s menu.
- Signal cable’s plug is fully inserted into the input connector.
  - A message appears on the screen.
  
  (______________________________________)
- The source connected to the projector is active and available.
- Still no image even though you adjust the brightness and/or the contrast.
- Input source’s resolution and frequency are supported by the projector.
- No image is too dark.
- Remains unchanged even though you adjust the brightness and/or the contrast.
- Image appears to be trapezoidal (unchanged even though you carry out the [KEYSTONE] adjustment).
- Parts of the image are lost.
- Still unchanged even though you press the AUTO ADJUST button.
- Still unchanged even though you carry out [RESET] in the projector’s menu.
- Image is shifted in the vertical or horizontal direction.
- Horizontal and vertical positions are correctly adjusted on a computer signal.
- Input source’s resolution and frequency are supported by the projector.
- Some pixels are lost.
- Image is flickering.
- Still unchanged even though you press the AUTO ADJUST button.
- Still unchanged even though you carry out [RESET] in the projector’s menu.
- Image shows flickering or color drift on a computer signal.
- Still unchanged even though you change [FAN MODE] from [HIGH ALTITUDE] to [AUTO].
- Image appears blurry or out of focus.
- Still unchanged even though you checked the signal’s resolution on PC and changed it to projector’s native resolution.
- Still unchanged even though you adjusted the focus.
- No sound.
- Audio cable is correctly connected to the audio input of the projector.
- Still unchanged even though you adjusted the volume level.
- AUDIO OUT is connected to your audio equipment (only models with the AUDIO OUT connector).
- Buttons on the projector cabinet do not work (only models with the [CONTROL PANEL LOCK] function)
  - [CONTROL PANEL LOCK] is not turned on or is disabled in the menu.
  - Still unchanged even though you press and hold the EXIT button for a minimum of 10 seconds.

#### Other

- Remote control does not work.
  - No obstacles between the sensor of the projector and the remote control.
  - Projector is placed near a fluorescent light that can disturb the infrared remote controls.
  - Batteries are new and are not reversed in installation.
In the space below please describe your problem in detail.

Information on application and environment where your projector is used

8 TravelCare Guide

TravelCare - a service for international travelers

This product is eligible for “TravelCare”, NEC’s unique international warranty. Please note that TravelCare coverage differs in part from coverage under the warranty included with the product.

Services offered with TravelCare

This warranty allows customers to receive service on their product at the NEC and NEC-designated service stations in the countries listed herein when temporarily traveling internationally for business or pleasure. For details on services offered by the different service stations, please refer to the “List of TravelCare Outlets” below.

1 Repair services

The product will be repaired and delivered within 10 business days, not including shipping time. During the term of warranty, the cost of maintenance parts, labor costs for repairs and shipping costs within the service station’s coverage area are covered by the warranty.

2 Replacement product rental service

If the customer desires, he or she can rent a replacement product while the original product is being repaired. Fee: US$200 for 12 days. This fee must be paid at the local service station in cash or credit card. The US$200 rental fee is non-refundable even if the customer rents it less than 12 days before returning. The replacement product will be delivered within 3 business days. If the customer did not return the replacement product within 12 days, the customer will be charged the price of the unit. If the customer returned the replacement product in a faulty or damaged condition, the repair cost will be charged to the customer. Note that this service is not offered in all countries and regions. Please refer to the “List of TravelCare Outlets”. In addition, this replacement product rental service is not offered after the product’s warranty has expired.

Term of warranty

1. Upon presentation of the warranty or receipt received upon purchase:
   a. Valid for the term indicated on the warranty or the normal term of warranty for the country of purchase.
   b. When only the product is brought in:
      Valid for a period of within 14 months of the date of manufacture indicated by the serial number attached to the product.

2. When a product whose term of warranty is expired is brought in:
   Repairs will be offered for a fee. In this case the customer is not eligible for the replacement product rental service.

3. In the following cases, repairs may be charged, even if the product’s warranty is still in effect:
   1) If the term of warranty, model name, serial number and name of the store of purchase are not indicated on the warranty or have been altered.
   2) Problems or damage caused by dropping or shocks during shipment or movement by the customer or by improper handling by the customers.
   3) Problems or damage caused by improper usage or unwarrantable alterations or repairs by the customer.
   4) Problems or damage caused by fire, salt damage, gas damage, earthquakes, lightning damage, storm or flood damage or other natural disasters or such external factors as dust, cigarette smoke, abnormal voltage, etc.
   5) Problems or damage caused by use in hot or humid places, in vehicles, boats or ships, etc.
   6) Problems or damage caused by expendable supplies or devices connected to the product other than those designated by NEC.
   7) Problems caused by natural consumption, wear or deterioration of parts under normal usage conditions.
   8) Problems or damage to lamps and other expendable supplies, included parts or optional parts.
   9) Other conditions stipulated in the warranty included with the product also apply.

NOTE: The product can be used overseas with voltages indicated in the rating label on the product by using a power cable suited for the standards and power source voltage of the country in which the product is being used.

List of TravelCare Outlets

This list applies as of July 1, 2009. For the most up-to-date information, please refer to the websites of the service stations in the various countries on the List of TravelCare Outlets or to the NEC website at http://www.nec-display.com/global/index.html

5. Loan Service Charges and Conditions:
Upon acceptance of this NEC Projector, Customer agrees to assume liability for this loan unit.

The current cost of use of this loan unit is US$200 for 12 calendar days.
If Customer does not return the unit within the 12 calendar days, Customer will be charged the next highest cost up to and including the full list price to Credit Cards, which price will be informed by NEC Authorized Service Stations. Please see the attached listing of contacts for each country to arrange for pickup of the loan unit.

If you return to their country of origin with the loan unit, you will be charged additional freight to return the unit to the loaning country.

Thank you for your understanding of this program.

Condition of your TravelCare Service Program
Enduser is requested to understand following condition of TravelCare Service Program and complete the necessary information on the application sheet.

1. Service Options:
There are 3 types of [Service] available. Enduser has to understand following condition and is required to fill in the Application Sheet.

1) Repair and Return:
The ‘Faulty unit’ is sent or collected from the customer. It is repaired and returned within 10 days to the customer, excluding transport time.
There may have a case, repair and return can’t be done by NEC Authorized Service Station, because of shortage of spare parts due to same model is not sold in the territory.

2) Repair and Return with Loan: (This service is limited to some Service Stations)
This service is offered to the Enduser, who cannot wait until their unit is repaired.
The customer can borrow a unit for US$200 up to 12 days. Customer then sends in inoperable unit to nearest NEC Authorized Service Station for service. In order to prevent collection problem, Enduser is required to fill in Application Sheet.
Enduser needs to confirm the availability of the Service to NEC Authorized Service Stations.

3) Loan Only:
For this service, NEC Authorized Service Station supplies the customer with a loan unit for US$200 up to 12 days. Customer keeps the inoperable unit and when customer returns home, customer arranges to have the projector serviced in the home country.

2. Warranty Exclusions:
This program does not apply if the Projector’s serial number has been defaced, modified or removed.
If, in the judgement of NEC Authorized Service Station or its agent the defects or failures result from any cause other than fair wear and tear or NEC neglect, or fault including the following without limitation:

1) Accidents, transportation, neglect, misuse, abuse, water, dust, smoke or default of or by the Customer its employees or agents or any third party;
2) Failure or fluctuation of electrical power, electrical circuitry, air conditioning, humidity control or other environmental conditions such as use it in smoking area;
3) Any fault in the attachments or associated products or components (whether or not supplied by NEC or its agents which do not form part of the Product covered by this warranty);
4) Any act of God, fire, flood, war, act of violence or any similar occurrence;
5) Any attempt by any person other than any person authorized by NEC to adjust, modify, repair, install or service the product.
6) Any Cross-border charges such as, duty, insurance, tax etc.

3. Charges for Warranty Exclusions and Out of Warranty Case:
In case faulty unit is under warranty exclusions case or under Out of Warranty period, NEC Authorized Service Station will inform estimation of actual service cost to the Enduser with reason.

4. Dead on Arrival (DOA):
Enduser must take this issue up with their original supplier in the country of purchase.
NEC Authorized Service Station will repair the DOA unit as a Warranty repair, but will not exchange DOA unit with new units.
