OWNER'S MANUAL

Projector

About the Owner's Manual

Please read the owner's manual thoroughly to ensure correct usage of the projector and its features.
After reading, store the owner's manual in a safe place for future reference.

Features

1. Dress up Design
2. Designed for tough environment
3. Side change lamp
4. Side change filter
5. Quick power off
6. Advanced Anti-theft features
7. Five auto features (Auto Search, Auto Sync, Auto Ceiling, Auto Keystone and Auto Filter Alert)
8. Seven display modes (Natural, Cinema, Daylight, Green board, White Board, Black Board and User)
9. Built-in 8W speaker
10. Logo capture
11. Image freeze function
12. Digital zoom adjustment
13. Built-in interactive smart function.
14. Extreme Short Throw Distance.

Contents of Your Box

Please make sure that following items are included in the box. If any items are missing, contact your dealer please..

1. Projector

2. Computer cable

3. Power cord
4. Quick Start Guide
5. Owner's Manual CD
6. Remote control
7. USB Cable
8. Interactive Kit
Safety Instructions

The projector is designed and tested to meet the latest standards for safety of information technology equipment. However, to ensure safe use of this product, it is important that you follow the instructions mentioned in this manual and marked on the product.

⚠ **WARNING**   This symbol indicates information that, if ignored, could possibly result in personal injury or even death.

⚠ **CAUTION**   This symbol indicates information that, if ignored, could result in personal injury or physical damage.

Typical Symbols

This symbol indicates an additional warning (including cautions). An illustration is provided to clarify the contents (for example: the illustration to the left indicates danger of electrical shock).

This symbol indicates a prohibited action. The contents will be clearly indicated in an illustration or description near the symbol (for example: the symbol to the left indicates that disassembly is prohibited).

This symbol indicates a compulsory action. The contents will be clearly indicated in an illustration or description near the symbol (for example: the symbol to the left shows that the power plug should be disconnected from the power outlet).

⚠ WARNING

If a problem should occur

If smoke or strange odors arise, continued use could result in fire or electrical shock. In such case, immediately turn off the power switch and then disconnect the power plug from the power outlet. After making sure that the smoke or odor has stopped, contact your dealer for repairs. Never attempt to make repairs yourself because this is dangerous.

Do not use this projector if there is no image or sound, or if the sound is distorted. Continued use could result in fire or electrical shock. In such case, immediately turn off the power switch; disconnect the power plug from the power outlet and contact your dealer.

If water would enter the inside of this projector, immediately turn off the power switch, disconnect the power plug from the power outlet and contact your dealer.

Do not install on an unstable surface.

Do not install this projector on an unstable surface such as a wobbly stand or incline because this could result in the projector falling and causing injury.

Do not open the cabinet.

Never open the cabinet. There is high voltage inside which can cause electrical shock. Contact your dealer for internal inspection, adjustment and repair.

Do not modify.

Do not modify this projector because this could result in fire or electrical shock.

Do not place the projector upon either side to project an image.

NO SIDEWARD

Do not point the projector down to project an image.

NO DOWNWARD

Do not use in the bathroom or near water site.

Do not expose this unit to rain or use near water… for example, in the bathroom, a wet basement, near a swimming pool, etc…

Do not insert objects into the Projector.

Do not insert metal objects through the ventilation openings, etc., of this projector or drop such objects inside because this could result in fire or electrical shock.

If a foreign object should enter this projector, immediately turn off the power switch, disconnect the power plug from the power outlet and contact your dealer.

Continued use could result in fire or electrical shock. Use special caution in household and where children are present.

⚠ WARNING

Do not look through the lens when the lamp is on.
Never look through the lens when the lamp is on. The powerful light could
adversely affect vision. Use special caution in households where children are
present.

Avoid shock or impact on the projector.
If the projector should fall, resulting in damage to the cabinet, immediately
turn off the power switch, disconnect the power plug from the power outlet
and contact your dealer.
Continued use could result in fire or electrical shock.

**Do not place this projector in a container containing liquid. Do not place flower
vases, flowerpots, cups, cosmetics, liquids such as water, etc., on top of this projector.**

Do not use any power cable except those supplied with the projector.
The use of any other power cable could result in fire or electrical shock.

Do not shine the laser beam onto yourself or other.
The laser pointer function of projector remote control emits class II laser beam.
Do not look directly into the laser beam outlet or direct the laser beam at other people.
Vision can be impaired if the laser beam enters the eyes. Especially pay attention if
children are present.

**High temperatures are generated when the lamp is lit; so do not place objects in
front of the lens.**

Allowing the proper amount of space on the top, sides, and rear of the projector cabinet is
critical for proper air circulation and cooling of the unit.
The dimension shown here indicate the minimum space required. If the projector is to
be built into a compartment or similarly enclosed, these minimum distances must be
maintained.

Side and Top   Rear

0.7' (20 cm)

3' (1 m)   1.5 (50 cm)   1.5' (50 cm)
⚠ CAUTION

Placing heavy objects on top of this projector could result in loss of balance or falling and cause personal injury or damage the projector.

Do not block the ventilation openings.

Do not block the ventilation openings of this projector.
Blocking ventilation could lead to internal overheating which could result in fire.

Do not place this projector on its side during use or push it into a small, poorly ventilated location.

Do not place this projector on a carpet or bedding or cover it with a tablecloth, etc.

Care and maintenance.
For safety purposes, disconnect the power plug from the power outlet before starting the care and maintenance of this projector.

Battery usage.
Replace the batteries with the same type only.
Do not mix old and new batteries; this could result in fire or personal injury due to battery cracking or leakage.

Make sure the plus and minus terminals are correctly aligned when loading the batteries.
Incorrect loading could result in personal injury or contamination of the surroundings due to battery cracking or leakage.

Have the projector interior cleaned regularly.

Contact your dealer to arrange for the service.
Accumulations of dust inside the projector can result in fire or malfunction if not cleaned for an extended period.
Ask your dealer for details about internal cleaning.

Safety Labels

Safety labels are used on or within the projector to alert you to items or areas requiring your attention.

11

Arrangement

1. Before installation, make sure that the projector is turned off and the power cord is disconnected.
2. Do not set up and move the projector, while it is hot.
3. The distance between the projector and screen determines the actual image size. Refer to the table below to determine the screen size at a given distance.

Note: The dimensions in the table below are approximate.

Screen size (diagonal)		Distance (m)		Distance (feet)	
inch	m	Tele	Wide	Tele	Wide
40	1.0	0.95	0.77	3.13	2.53
60	1.5	1.45	1.18	4.74	3.88
70	1.8	1.69	1.39	5.55	4.56
80	2.0	1.94	1.59	6.36	5.23
100	2.5	2.43	2.01	7.98	6.58
150	3.8	3.67	3.03	12.03	9.95
200	5.1	4.90	4.06	16.07	13.32
250	6.4	6.13	5.09	20.12	16.69
300	7.6	7.37	6.12	24.16	20.06
When installed against a wall, leave about 20cm (7.9in.) between the projector and the wall.

Outlet
Turning On The Power

1. Make sure that power cord is firmly and correctly connected to the projector.

2. The green Power indicator blinks slowly.

3. Remove the lens cover.

4. Press POWER button on the control panel or the remote control to turn on the projector.

5. Rotate the zoom ring to adjust the screen size.

6. Rotate the focus ring to adjust the focus.

⚠ WARNING

★ A strong light is emitted when the projector's power is on. Do not look into the lens of the projector or look inside of the projector through any of the projector's openings.

1.

2.

Power off?
Please press

POWER

key again to power off.
3.~4.
5.
Turning Off The Power

1. Press the POWER button on the control panel or the remote control. The "power off" confirmation message will appear.

2. Press the POWER button again while the message is shown on the screen.

3. When the projector enters "Standby" mode, the green Power indicator blinks slowly.

4. The projector cannot be turned on while red "Lamp indicator" is blinking slowly in cooling mode.

5. If you don't use the projector for a long time, remove power cord.

⚠ WARNING

★ Do not touch around the lamp cover and the exhaust vents during use or just after use, since it is too hot.

⚠ CAUTION

★ Do not turn off the AC power for 60 seconds after the lamp is turned on. Doing so could cause premature lamp failure.

Setting Up The Projector

The projector supports the following four different projection methods.

1. Front projection
3. Rear ceiling projection
2. Rear projection
4. Front ceiling projection
The projector can be installed pitched by any angle (360 degree) without any setting in fan mode. As for rolling it must be within 10 degree.

Special installation is required in order to suspend the projector from the ceiling. Please ask your dealer for details.

14

Ceiling Mounted Installation Guide

Attach ceiling mount at four-suspension bracket fixing points when suspending from a ceiling. Special installation is required in order to suspend the projector from the ceiling. Please ask your dealer for details.

MAX M4x8 mm For Mounting
Security Anchor

The product is equipped with security anchor and PIN LOCK (See page 33 for detials) functions to help prevent unauthorized removal of the projector.

⚠**WARNING**

►Do not grasp the security anchor to carry projector, since it is not designed for it.
►The security anchor is not for comprehensive theft prevention measures. It is intended to be used as supplemental theft prevention measure.

Adjusting The Projector's Elevation

Use the adjustable foot at the front of the projector to set the image height.

1 Holding the projector, push the foot adjust buttons to loosen the front adjustable foot.

2 Position the front side of the projector to the desired height.

3 Release the foot adjust buttons in order to lock the front adjustable feet.

4 Please make sure that the front adjustable feet are locked.

5 Please rotate the adjustable feet when fine adjustment of tilt is needed.

⚠ **CAUTION**

* The adjustment range of front adjustable foot is 0 to 8.5 degrees.
* When the foot is adjusted, it may cause the shape of the projected image to become distorted. Use the keystone correction function to correct this distortion.

16
How To Connect

Laptop or desktop computer
Before starting, make sure that the projector and computer are both turned off.

Connect the computer

Connect the computer cable from the computer to the projector's RGB IN or DVI-I IN.
Connect a computer cable from the MONITOR OUT to an external monitor to view the
signal on RGB IN or DVI-I IN. Tighten the screw on all connectors.

How To Connect

Laptop or desktop computer

Connect the audio cable if necessary

1. Please connect the audio cable to the AUDIO IN 1 if the computer cable is connected to the projector's RGB IN.

2. Please connect the audio cable to the AUDIO IN 2 if the computer cable is connected to the projector's DVI-I IN.

3. Please connect the audio cable to the AUDIO IN 3 if the video cables are connected to the VEDIO / S-VIDEO / Component port of the projector.

☞ If the selected video image is not displayed after the projector is turned on and the correct video source has been selected, please check whether the video source device is turned on and operating correctly. Also check whether the signal cables have been connected correctly.

☞ Many laptop computers may need to change the setting for monitor output when connecting to the projector. Usually a key combination like Fn + F3 or CRT/LCD key turns the external display on / off. Locate a function key labeled CRT/LCD or a function key with a monitor symbol on the laptop. Press Fn and the labeled function key simultaneously. Refer to your laptop's documentation to find out your laptop's key combination.

Remote Control Batteries Installation

1. Remove the battery cover.

2. Load the batteries.
   Make sure the poles are correctly oriented.

3. Close the battery cover.
⚠ **Caution**

► Avoid excessive heat and humidity.

► Do not drop the remote control.

► If the remote control will not be used for an extended period, remove the batteries.

► Do not expose the remote control to water or moisture. This could result in malfunction.

► Replace the battery when remote control operation becomes sluggish or unresponsive.

► Do not place the remote control close to the exhaust ventilation opening of the projector, because the exhaust air is hot.

► Do not use batteries of different types at the same time.

► Do not mix a new battery with used one. Make sure the plus and negative terminals are correctly aligned when loading batteries.

► Dispose of batteries in accordance with environmental laws of your area.

► Do not disassemble the remote control. If the remote control needs service, please contact your dealer.

MAC ADDR.		For LAN control module, "MAC ADDR." will be shown in "SECURITY" Menu. MAC address stands for unique Media Access Control address of LAN control module and displays with six groups of two hexadecimal digits.
CLOSED CAPTION	OFF(Default) C.C1 C.C2 C.C3 C.C4 T1 T2 T3 T4	The Closed Caption function intimates the sound effects, dialogue, and narration in the content of the television program or video source. Caption (C.C1~C.C4) : Display closed caption Text (T1~T4) : Display text data, which is for additional information such as news reports or a TV program guide. **NOTE** : This function is available only in Video / S-Video source.

Auto Filter Alert

Auto Filter Alert in SECURITY category shows the air filter use time and alerts user to change filter. When the operating time reaches the set time, a warning message will appear on the screen to remind user of filter cleaning /replacing.

Filter Replace...

Filter has been used for more than 500 hours.
NOTE
► Please reset the Filter time only when you replace the filter.

PIN Key In Operation

When the projector is turned on and the PIN LOCK PROTECTION is set to [ON], the image will show as on the right side.

1. Press the MENU button on the projector or remote control. Enter PIN code by keypad or remote control.

2. How to enter a PIN code?
   You can use control panel or remote control.
Refer to photo below to enter a sequence of PIN code by control panel or remote control buttons.

(1) Press ◄ button: Select the [1]

(2) Press ▲ button: Select the [2]

(3) Press ► button: Select the [3]

(4) Press ▼ button: Select the [Enter] to move to next row.(4~6,7~9, <~OK)

(5) Press <- (backspace) item:
   In case you enter a wrong digit, select <- to delete the wrong digit you entered.

(6) Press OK item:
   Once all four digits of the PIN are entered, select OK to confirm.

NOTE

(1) Please enter: 0000 for first-time use.
(2) If the PIN is incorrect, a "Enter new code" message will be shown. Please try again. If the PIN code input is incorrect for three times, a warning message will show up and the projector will shut itself down in 30 seconds.
(3) If you have no idea about the PIN, please contact your dealer for help.

LAN

Procedure to utilize this function

❶ Register the projector(s) to be controlled only for the first time.
  "Auto Search" finds and lists up the projectors in the network.
  Assign Projector name and Group name for ease.

❷ Save the setting as a Project file.
  By opening the Project file the setting can be recovered easily from next time.

❸ Monitor the status of registered projectors up to 255 units.
  Status of Power, Temperature and System and Input selection, used hours of Lamp
  and Filter can be monitored.
  For used hours the limit for alert can be set.

❹ Control registered projector one by one.
  By using "Link" of Network Control Software each projector can be controlled.

NOTE

To monitor and control the projector(including stand-by mode), the following
conditions are needed to be ready:

(1) Projector is powered on or in stand-by mode.
(2) Projector is connected to network.
(3) LED light of the projector network port shows normal. (Green light on, Orange
    twinkling)

Before Using Network Control Software

❶ Copy and paste the "Network Control Software" folder in the CD-ROM of the Owner's Manual to the PC.

❷ Create and put the short-cut icon for "Network Control.exe" on the desktop.

❸ Confirm that AC is supplied to the projector and the projector and the PC are connected to each other with LAN cable (through the network).

Activate Network Control Software

❶ Execute the Network Control Software.
❷ Monitor window below appears.

<Graph 1>
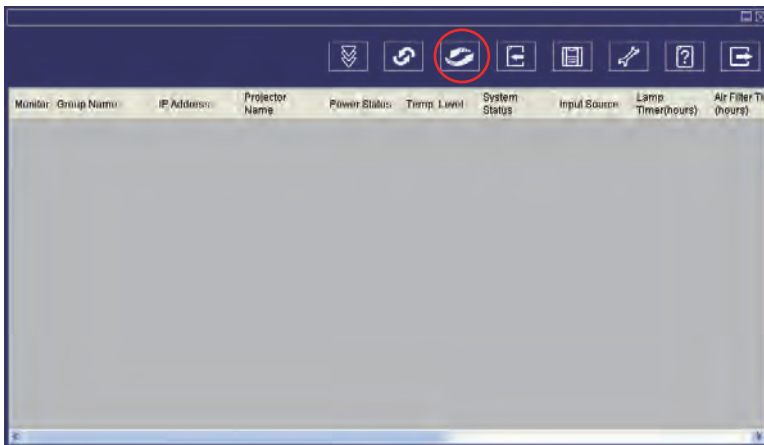

Projector Auto Search.

❶ Click the 🔄 (Projector search), then the Search Window below appears.

<Graph 2>
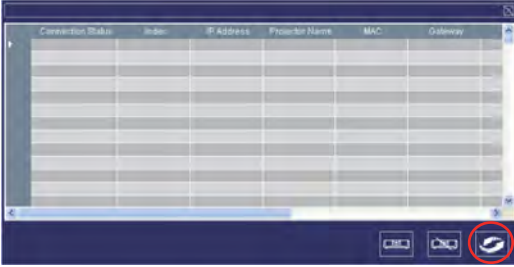

NOTE

If the security warning window appears, please select "Unblock" to allow the
Network Control software to work.

---

❷ Click 🔄 (search again), then the target projectors will be listed as follows.

<Graph 3>
Modify The Projector Setting

❶ If you need to modify the projector's setting, please move mouse cursor to the table on the left and press button on the column. The contents of the setting will appear on the right side table.
< Graph 5 > : Register Table.

Note

When DHCP setting is changed, in order to make the change effective AC power to the projector needs to be disconnected and reconnected.

❷ After changing the projector setting, you can save the data by clicking 🗒 button or cancel by clicking 🗒 button.

Item	Description
Projector name	Show the Host name. (16 characters at most in ASCII.)
IP Address	Show the IP Address.
Mask	Show the Subnet Mask.
Gateway	Show the Gateway.
MAC	Show up the MAC Address. (The default value can not be modified.)
DHCP	Capture IP address from network Server automatically.

< Table 1 > : Setting Windows.

❸ Click 🖳 (register projector), then the projectors will be shown in the Monitor Window as shown below.
<Graph > Monitor window

Sorting the projectors

❹ Projector can be sorted easily by clicking the monitor window title (Group Name) or (Projector Name).

<Graph >

❺ After registering, you can click ⧨ button (Data single capture) in the tool bar or click 🔄 button (Start Auto Scan) to update the status.

NOTE

While Auto Scan is running to update the status, the scroll bar for the window is grayed out and the hidden column can not be shown. Therefore before starting Auto Scan place the column in the window by using drag-drop or scroll bar in advance.

Meaning of Status Icons

The following table can be displayed by pressing " 🔲 " Help button.

41

Delete

❶ Select the registered projector in monitor window. Click mouse right key and select "Delete" to erase the registered projector data.
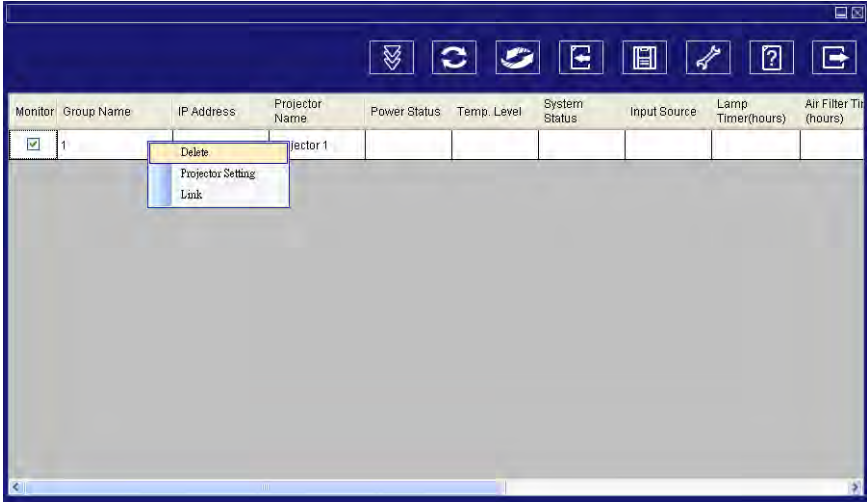

< Graph 6 > : Register Table.
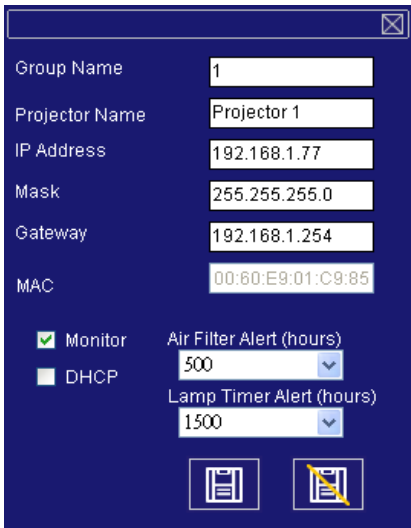

Projector Setting (Setting for individual projector)

❶ Select the registered projector in monitor window. Click mouse right key and select "projector setting" to modify the registered projector data. After finishing the setting, you can save by clicking ▤ button or cancel by clicking ▤ button.
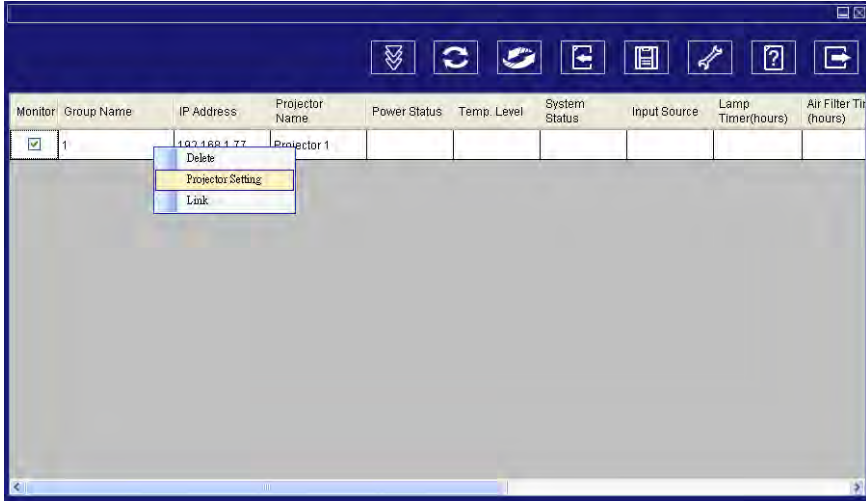

< Graph 7 > : Register table.

< Graph 8 > :Setting table.

43

System Setting (Setting for all projectors)

❷ Click ✎ button (system setting) to modify system alert setting.

Saving the setting
< Graph 9 >

<Graph 10>

Note:

Alert setting in System Setting vs Projector Setting

Whenever the "▦" Save button is pressed in System Setting, the value becomes effective for all the projectors registered.

After this if the value in Projector Setting is changed and saved, the value becomes effective only for the projector.

44

System Setting

Monitor

Item	Description
Lamp Timer	Read lamp use time from projector.
Air Filter Alert	Read Air Filter Timer from projector.
System Status/ Tempeture Level	Read System Status and Temperature from projector in Power On status.
Input Source	Read Input Source Selection from projector in Power ON status.

< Table 2 >

Default Setting

Item	Description
Lamp Timer Alert (Hr.)	Default Setting Includes 1000/1500/2000/3000 Hours. When Lamp Timer reaches alert target, window will show lamp timer in red color to remind user to replace the lamp.
Air Filter Alert (Hr.)	Default setting includes 500/1000/1500/2000/2500 Hours. When Filter Timer reaches alert target, window will show filter timer in red color to remind user to replace the filter.
Auto Scan Timer (minutes)	Auto Detect setting. Default setting includes 1/3/5/10 minutes; user can set the optimal default listed in Table 4.

< Table 3 >

Auto Scan Timer

| Projector Number (Sets)	Timer Interval (Minutes)
1~25	1/3/5/10
26~50	3/5/10
51~100	5/10
101~255	10<

* The maximum quantity of projector monitored is 255.

< Table 4 >

45

Saving the Project File

Save the Configuration above as Project File by clicking the save button in the Tool bar in the Monitor window before closing Network Control Software.

If it is not saved, all the configuration above will be lost.

From next time after starting this Network Control Software the configuration can be recovered easily by opening the Project File.
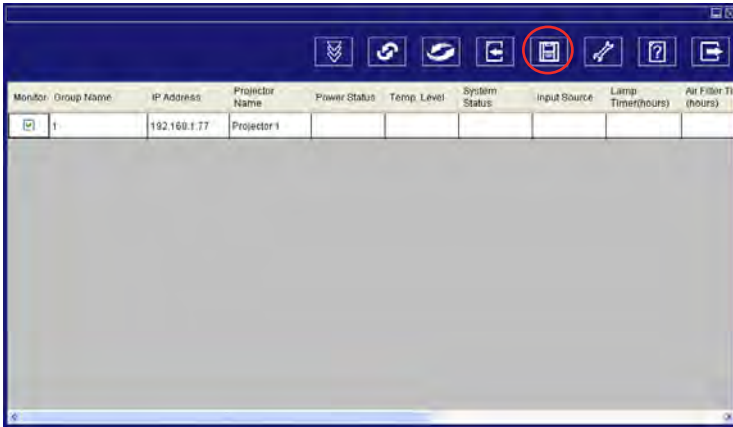

Link(Controlling Projector)

❸ Select the registered projector in monitor window. Click mouse right key and select "Link" to show the control panel table and the projector connecting status.
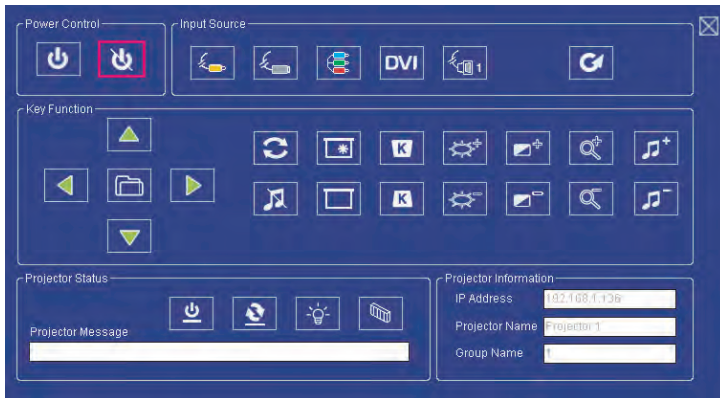

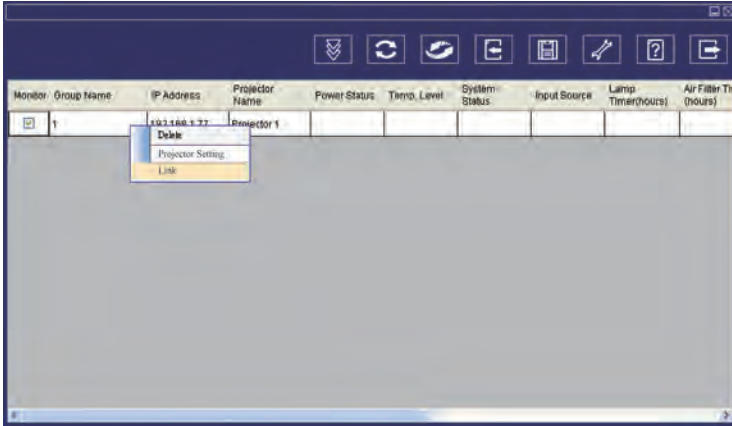

< Graph 12 > : The control panel table

Filter

Keep the air filters clean by cleaning them periodically.
By using Filter Counter the projector can remind you of the timing.
There are 2 types of air filters in this projector, one is black sponge attached just back side of the filter cover and the other is the filter assembly called Anti-dust filter(consists of a white folded cloth and black frame).

How to clean or replace the filters

Turn off the projector, and unplug the power cord. Wait to allow the projector to cool down sufficiently.

1. Push up 2 white stoppers of the Filter cover and remove it from the side of projector as shown below.

2. Remove the Anti- dust filter from the Filter cover by pushing and sliding it as shown below. (There is >ABS< sign on the top the black frame of the Anti-dust filter.)

3. Clean the filters with a vacuum cleaner except for the back side of the sponge, because the vacuum cleaner may suck it. Brush the sponge gently by a brush.
    (Do not clean the filters with water.)
    *If the Anti-dust filter is too dirty to clean, please replace it with new one.
     The part number of the Anti-dust filter is "13340233".

51
4. Install the Anti-dust filter to the filter cover.

   (a) Place the Filter cover so as the sponge filter faces you.

      (There is >PC< sign on the top middle of the Filter cover.)

   (b) Place the Anti-dust filter on it so as the 4 white hooks show up through the openings in the corners.

      (There is >ABS< sign on the top of the black frame.)

   (c) Slide down the Anti-dust filter so that the two black hooks of the Anti-dust filter go into the slots on the bottom of the Filter cover.

      (you shall hear a "click" sound)

      Make sure that all of 4 white hooks of the Filter cover are well hooked on the frame.

5. Insert the projected parts of the Filter cover to the side of the projector first and then close the Filter cover by pushing 2 white stoppers. Make sure that the Filter cover is well closed.

6. Reset the Filter Timer.(P.34)
Lamp

Please turn off the projector and unplug the AC power cord. And then, let the projector cool down at least 60 minutes.

Replacing New Lamp(Part Number:23040021)

1. Remove the lamp door.
2. Loosen 2 screws of the lamp holder. Hold the handle on the top of the lamp, pull out the lamp straight off the projector.
3. Insert new lamp, lock the lamp door firmly with 2 screws.
4. Put the lamp door on.
5. Please reset the lamp timer after replacing lamp. (P.32)

When changing lamp, it is recommended that you change the filer at the same time.

Reset Lamp Timer ?

Please, Select No/Yes to return default settings.

Lamp Reset   No

Yes
⚠ WARNING

The projector uses a high-pressure mercury lamp.

The explosion of lamp with a loud bang or burn out could possibly cause injury or a fire. When the bulb bursts, it is possible for shards of glass to fly into the lamp housing; and for gas containing mercury to escape from the projector's vent holes.

If the lamp has broken, do not check the inside of the projector. Please ventilate the room immediately.

Do not touch or bring your face close to the broken pieces since it might get into your eyes or mouth. In case of injury, seek medical advice immediately.

Disposal of a Lamp

Dispose of a lamp in accordance with the local recycling laws.

Do not put it to your trash.

Recycling Lamp's laws of the USA, go to www.lamprecycle.org.

Recycling Product's laws of USA, go to www.eiae.org.

Recycling Product's laws of Canada, go to www.epsc.ca.

For more information about recycling laws, please contact local government agency or dealer.

CAUTION HOT

Before replacing the Lamp unit, pay attention to the following items:

1. The Lamp is optional part. Contact the dealer for replacement lamp.
2. The lamp becomes very hot when in use. Turn the power off and disconnect the power cord.
3. Wait for 1 Hour before replacing the lamp.
4. Do not use old lamp unit.

Additional

-In order to ensure the safe use of your projector, please contact your dealer to inspect about once a year.

-Before maintenance, make sure the power cable is unplugged, allow the projector to cool sufficiently. The high temperature state of the projector could cause a burn in and/ or malfunction to the projector.

-Never try to maintain the inside of the projector by yourself.

Indicator

The power and lamp indicators show the status of the projector. Before requesting repair, check the projector status using the chart below. If the problem cannot be resolved, contact your dealer.

In normal status~~~

POWER	LAMP	CONDITIONS	DESCRIPTION
Blinking In *Green*	Off	Stand by mode	Projector is ready to be turned on.
Lighting In *Green*	Off	On mode	Projector is on and operating.
Lighting In *Green*	Blinking In *Red* (Slow)	Cool down mode	Projector is in cool down mode and will not respond to user input.
Lighting In *Green*	Blinking In *Red* (Fast)	Cool down mode	When the projector is turned on in 5 minutes after it was turned off.

In abnormal status~~~

POWER	LAMP	CONDITIONS	DESCRIPTION
Blinking In *Green*	Blinking In *Red* (Fast)	Fan fault mode	The projector has detected a problem of a slow internal fan speed. The lamp will shut off automatically. Contact your dealer.
Blinking In *Green*	Lighting In *Red*	Lamp cover open	The lamp cover is open or there is a problem with the lamp. If the lamp door is closed and replacing the lamp does not correct the issue, contact your dealer.
Blinking In *Green* (Fast)	Blinking In *Red* (Fast)	High temperature	The projector has overheated and shut itself down. Correct the over temperature condition immediately. 1. Check that the ventilation slots are free from obstructions. 2. Check the cleanliness of the air filter.
Blinking In *Green* (Slow)	Blinking In *Red* (Slow)	Lamp fail	The lamp does not light. Come back to "stand by mode", and press the power button.

Error For Machine Defects

The following problems may be confused with a machine defect. Check and follow the table. If it couldn't be improved, contact your dealer**.**

Symptom	Cause / Remedy
Projector power does not turn on	**The power cord is disconnected.** Plug the power cord into an AC outlet.
	Intending to turn on the projector again during the cool down mode. Wait until the cool down mode has completed.
	There is no lamp and/or lamp cover is not firmly closed. Please turn off the power and disconnect the power plug from the power outlet. Check if the lamp is installed or the lamp cover is firmly closed and turn on the power again.
	Power cord has impaired. When you touch the power cord, the indicator goes on then off, please remove the power cord and connect it again. If the situation is repeated, remove the power cord and contact your dealer.
No Image	**The input is not connected correctly.** Select the appropriate input source.
	No signal input. Connect correctly.
	The lens cover is attached to the lens. Remove the lens cover.
Colors are pale	**Color density and color matching are not adjusted correctly.** Adjust the RGB setting.
	Color lose. Caused by poor VGA cable connection.
Abnormal brightness & contrast	**Brightness and contrast are not adjusted correctly.** Adjust the brightness and contrast setting.
	The lamp is near the end of its service life. Replace with a new lamp.
Image is blurred	**The projection lens is not focused.** Adjust the focus using the focus ring.
	The lens is dirty or misty. Clean the lens.

Error For Machine Defects

Symptom	Cause / Remedy
No audio	**The projector is not connected correctly.** Check audio cable if connect correctly.
	The volume is set to minimum. Adjust the volume.
	Mute is turned on. Press the MUTE button.
Remote control is not working	**No battery.** Before using the remote control, please check the battery of remote control.
	Remote signal is obstructed. Remove the obstacle between projector and remote control.
