The following projector manual has not been modified or altered in any way.

Projector

CP-D10

User's Manual (detailed) Operating Guide

Thank you for purchasing this projector.

⚠ WARNING ▶ Before using this product, please read all manuals for this product. Be sure to read “**Safety Guide**” first. After reading them, store them in a safe place for future reference.

About this manual

Various symbols are used in this manual. The meanings of these symbols are described below.

⚠ WARNING This symbol indicates information that, if ignored, could possibly result in personal injury or even death due to incorrect handling.

⚠ CAUTION This symbol indicates information that, if ignored, could possibly result in personal injury or physical damage due to incorrect handling.

NOTICE This entry notices of fear of causing trouble.

 Please refer to the pages written following this symbol.

NOTE • The information in this manual is subject to change without notice.
• The manufacturer assumes no responsibility for any errors that may appear in this manual.
• The reproduction, transfer or copy of all or any part of this document is not permitted without express written consent.

Projector features

The projector provides you with the broad use by the following features.

- ✓ The unique optics system produces a large projected image in a short distance, which provides you with various ways of use.
- ✓ The double layer filter system is expected to function longer and offers you less maintenance frequency.

Preparations

Checking the contents of package

Your projector should come with the items shown below. Check that all the items are included. Require of your dealer immediately if any items are missing.

- (1) Remote control with two AA batteries
- (2) Power cord
- (3) Computer cable
- (4) Lens cover and Strap
- (5) User's manuals (Book x1, CD x1)
- (6) Security label

NOTE • Keep the original packing materials, for future reshipment. Be sure to use the original packing materials when moving the projector. Use special caution for the lens.

Fastening the lens cover

To avoid losing the cover, please fasten the lens cover to the projector using the included strap.

1. Fasten the strap to the strap hole as shown in the figure for step 1. Please note that the knot on the strap is used to fasten it to the lens cover in step 2 below.
2. Put the strap end into the slit of the lens cover with the knot on the side of the lens. Make sure that the strap is inserted to the end of the slit.

⚠ CAUTION ► Do not hang the lens cover in front of the lens when the projector is mounted upside down such as when mounted on the ceiling. Otherwise, the lens cover may block the light from the projector or hit the lens, which may cause damage to it. When mounting the projector upside down, hang the lens cover on the side of the projector or place it on the projector. For instance, wrap the strap around the elevator foot to hang the lens cover (refer to the figure).

Part names

Projector

- (1) Lamp cover (📖53)
The lamp unit is inside.
- (2) Focus ring (📖18)
- (3) Control panel (📖5)
- (4) Elevator buttons (x 2) (📖18)
- (5) Elevator feet (x 2) (📖18)
- (6) Remote sensor (📖12)
- (7) Lens (📖56)
- (8) Intake vents
- (9) Filter cover (📖55)
The air filter and intake vent are inside.
- (10) Speaker (📖36)
- (11) Exhaust vent
- (12) **AC IN** (AC inlet) (📖11)
- (13) Rear panel (📖5)
- (14) Security bar (📖11)
- (15) Security slot (📖11)
- (16) Strap hole (📖3)

⚠ WARNING ►HOT! : Do not touch around the lamp cover and the exhaust vent during use or just after use, since it is too hot.

► Do not look into the lens or vent while the lamp is on, since the strong light is not good for your eyes.

► Do not handle the elevator buttons without holding the projector, since the projector may drop down.

⚠ CAUTION ► Maintain normal ventilation to prevent the projector from heating up. Do not cover, block or plug up the vents. Do not place anything that can stick or be sucked to the vents, around the intake vents. Clean the air filter periodically.

► Do not use the security bar and slot to prevent the projector from falling down, since it is not designed for it.

Control panel

(1) **STANDBY/ON** button (📖 14)

(2) **INPUT** button (📖 15, 22)

(3) **MENU** button (📖 22)

It consists of four cursor buttons.

(4) **POWER** indicator (📖 11, 14, 59)

(5) **TEMP** indicator (📖 59)

(6) **LAMP** indicator (📖 59)

Rear panel (📖 9)

(1) **AUDIO IN1** port

(2) **AUDIO IN2** port

(3) **COMPUTER IN1** port

(4) **COMPUTER IN2** port

(5) **MONITOR OUT** port

(6) Shutdown switch (📖 61)

(7) **CONTROL** port

(8) **VIDEO** port

(9) **S-VIDEO** port

(10) **AUDIO IN3 (R, L)** ports

(11) **AUDIO OUT (R, L)** ports

⚠ CAUTION ► Use the shutdown switch only when the projector is not turned off by normal procedure, since pushing this switch stops operation of the projector without cooling it down.

Remote control

- (1) **VIDEO** button (📖16)
- (2) **COMPUTER** button (📖16)
- (3) **SEARCH** button (📖17)
- (4) **STANDBY/ON** button (📖14)
- (5) **ASPECT** button (📖17)
- (6) **AUTO** button (📖19)
- (7) **BLANK** button (📖21)
- (8) **MAGNIFY - ON** button (📖20)
- (9) **MAGNIFY - OFF** button (📖13, 20)
- (10) **MY SOURCE/DOC.CAMERA** button (📖16, 44)
- (11) **VOLUME -** button (📖13, 15)
- (12) **PAGE UP** button *
- (13) **PAGE DOWN** button *
- (14) **VOLUME +** button (📖15)
- (15) **MUTE** button (📖15)
- (16) **FREEZE** button (📖21)
- (17) **MY BUTTON - 1** button (📖44)
- (18) **MY BUTTON - 2** button (📖44)
- (19) **KEYSTONE** button (📖20)
- (20) **POSITION** button (📖19, 23)
- (21) **MENU** button (📖22)
- (22) **▲/▼/◀/▶** cursor buttons (📖22)
- (23) **ENTER** button (📖22)
- (24) **ESC** button (📖22)
- (25) **RESET** button (📖22)
- (26) **Battery cover** (📖12)

Back of
the remote control

NOTE • Any button marked with “*” is not supported on this projector (📖58).

Setting up

Install the projector according to the environment and manner the projector will be used in.

Arrangement

Refer to the illustrations and tables below to determine screen size and projection distance.

The values shown in the table are calculated for a full size screen: 1024 x 768

- Ⓐ Screen size (diagonal) Ⓑ Projection distance ($\pm 8\%$)
 Ⓒ1, Ⓒ2 Screen height

On a horizontal surface

Suspended from the ceiling

Ⓐ Screen size (diagonal)		Ⓑ Projection distance		Ⓒ1 Screen height		Ⓒ2 Screen height	
type(inch)	m	m	inch	m	inch	m	inch
60	1.5	0.683	27	0.279	11	1.193	47
70	1.8	0.805	32	0.314	12	1.381	54
80	2.0	0.927	36	0.350	14	1.569	62
90	2.3	1.049	41	0.385	15	1.757	69
100	2.5	1.170	46	0.421	17	1.945	77

- Keep a space of 30 cm or more between the sides of the projector and other objects such as walls.
- For the case of installation in a special state such as ceiling mount, the specified mounting accessories ([64](#)) and service may be required. Before installing the projector, consult your dealer about your installation.
- The screen position may shift after installation if the projector is suspended from the ceiling or other location due to the flexibility of the plastic projector body. If readjustment is necessary, consult with your dealer or service personnel.
- The projected image position and/or focus may change during warm-up (approx. 30 minutes after the lamp is turned on) or when the ambient conditions change. Readjust the image position and/or focus as necessary.

Arrangement (continued)

⚠ WARNING ► Place the projector in a stable horizontal position. If the projector falls or is knocked over, it could cause injury and/or damage to the projector. Using a damaged projector could then result in fire and/or electric shock.

- Do not place the projector on an unstable, slanted or vibrational surface such as a wobbly or inclined stand.
- Do not place the projector on its side, front or rear position.
- Consult with your dealer before a special installation such as suspending from a ceiling or somewhere else.

► Place the projector in a cool place, and ensure that there is sufficient ventilation. The high temperature of the projector could cause fire, burns and/or malfunction of the projector.

- Do not stop-up, block or otherwise cover the projector's vents.
- Keep a space of 30 cm or more between the sides of the projector and other objects such as walls.
- Do not place the projector on metallic thing or anything weak in heat.
- Do not place the projector on carpet, cushions or bedding.
- Do not place the projector in direct sunlight or near hot objects such as heaters. Do not place the projector where the air from an air conditioner or similar unit will blow on it directly.
- Do not place anything near the projector lens or vents, or on top of the projector.
- Do not place anything that may be sucked into or stick to the vents on the bottom of the projector. This projector has some intake vents also on the bottom.
- Do not place the projector anyplace where it may get wet. Getting the projector wet or inserting liquid into the projector could cause fire, electric shock and/or malfunction of the projector.
- Do not place the projector in a bathroom or the outdoors.
- Do not place anything containing liquid near the projector.
- Use only the mounting accessories the manufacturer specified, and leave installing and removing the projector with the mounting accessories to the service personnel.
- Read and keep the user's manual of the mounting accessories used.

⚠ CAUTION ► Avoid placing the projector in smoky, humid or dusty place. Placing the projector in such places could cause fire, electric shock and/or malfunction of the projector.

- Do not place the projector near humidifiers, smoking spaces or a kitchen.
- Position the projector to prevent light from directly hitting the projector's remote sensor.

NOTE • The projector may make a rattling sound when tilted, moved or shaken, since a flap to control the air flow inside of the projector has moved. Be aware that this is not a failure or malfunction.

Connecting your devices

Be sure to read the manuals for devices before connecting them to the projector. Make sure that all the devices are suitable to be connected with this product, and prepare the cables required to connect. Please refer to the following illustrations to connect them.

⚠ WARNING ▶ Do not disassemble or modify the projector and accessories.

▶ Be careful not to damage the cables, and do not use damaged cables.

⚠ CAUTION ▶ Turn off all devices and unplug their power cords prior to connecting them to projector. Connecting a live device to the projector may generate extremely loud noises or other abnormalities that may result in malfunction or damage to the device and the projector.

▶ Use appropriate accessory or designated cables. Ask your dealer about non-accessory cables which may be required a specific length or a ferrite core by the regulations. For cables with a core only at one end, connect the end with the core to the projector.

▶ Make sure that devices are connected to the correct ports. An incorrect connection may result in malfunction or damage to the device and the projector.

NOTICE ▶ Use the cables with straight plugs, not L-shaped ones, as the input ports of the projector are recessed.

NOTE • The **COMPUTER IN1/2** port can support a component signal also. The specific adapter or the specific cable is required for a component video input to the projector.

Connecting your devices (continued)

NOTE • Be sure to read the manuals for devices before connecting them to the projector, and make sure that all the devices are suitable to be connected with this product. Before connecting to a PC, check the signal level, the signal timing, and the resolution.

- Some signal may need an adapter to input this projector.
- Some PCs have multiple screen display modes that may include some signals which are not supported by this projector.
- Although the projector can display signals with resolution up to UXGA (1600X1200), the signal will be converted to the projector's panel resolution before being displayed. The best display performance will be achieved if the resolutions of the input signal and the projector panel are identical.
- While connecting, make sure that the shape of the cable's connector fits the port to connect with. And be sure to tighten the screws on connectors with screws.
- When connecting a laptop PC to the projector, be sure to activate the PC's external RGB output. (Set the laptop PC to CRT display or to simultaneous LCD and CRT display.) For details on how this is done, please refer to the instruction manual of the corresponding laptop PC.
- When the picture resolution is changed on a PC depending on an input, automatic adjustment function may take some time and may not be completed. In this case, you may not be able to see a check box to select "Yes/No" for the new resolution on Windows. Then the resolution will go back to the original. It might be recommended to use other CRT or LCD monitors to change the resolution.
- In some cases, this projector may not display a proper picture or display any picture on screen. For example, automatic adjustment may not function correctly with some input signals. An input signal of composite sync or sync on G may confuse this projector, so the projector may not display a proper picture.

About Plug-and-Play capability

Plug-and-Play is a system composed of a PC, its operating system and peripheral equipment (i.e. display devices). This projector is VESA DDC 2B compatible. Plug-and-Play can be used by connecting this projector to a PC that is VESA DDC (display data channel) compatible.

- Take advantage of this feature by connecting a computer cable to the **COMPUTER IN1** port (DDC 2B compatible). Plug-and-Play may not work properly if any other type of connection is attempted.
- Please use the standard drivers in your PC as this projector is a Plug-and-Play monitor.

Connecting power supply

1. Put the connector of the power cord into the **AC IN** (AC inlet) of the projector.
2. Firmly plug the power cord's plug into the outlet. In a couple of seconds after the power supply connection, the **POWER** indicator will light up in steady orange.

Please remember that when the DIRECT POWER ON function activated (📖42), the connection of the power supply make the projector turn on.

⚠️ WARNING ► Please use extra caution when connecting the power cord, as incorrect or faulty connections may result in fire and/or electrical shock.

- Only use the power cord that came with the projector. If it is damaged, consult your dealer to get a new one.
- Only plug the power cord into an outlet whose voltage is matched to the power cord. The power outlet should be close to the projector and easily accessible. Remove the power cord for complete separation.
- Never modify the power cord.

Using the security bar and slot

A commercial anti-theft chain or wire up to 10 mm in diameter can be attached to the security bar on the projector. Also this product has the security slot for the Kensington lock. For details, see the manual of the security tool.

⚠️ WARNING ► Do not use the security bar and slot to prevent the projector from falling down, since it is not designed for it.

⚠️ CAUTION ► Do not place anti-theft chain or wire near the exhaust vent. It may become too hot.

NOTE • The security bar and slot is not comprehensive theft prevention measures. It is intended to be used as supplemental theft prevention measure.

Remote control

Installing the batteries

Please insert the batteries into the remote control before using it. If the remote control starts to malfunction, try to replace the batteries. If you will not use the remote control for long period, remove the batteries from the remote control and store them in a safe place.

1. Holding the hook part of the battery cover, remove it.
2. Align and insert the two AA batteries (**HITACHI MAXELL, Part No. LR6 or R6P**) according to their plus and minus terminals as indicated in the remote control.
3. Replace the battery cover in the direction of the arrow and snap it back into place.

⚠ WARNING ► Always handle the batteries with care and use them only as directed. Improper use may result in battery explosion, cracking or leakage, which could result in fire, injury and/or pollution of the surrounding environment.

- Be sure to use only the batteries specified. Do not use batteries of different types at the same time. Do not mix a new battery with used one.
- Make sure the plus and minus terminals are correctly aligned when loading a battery.
- Keep a battery away from children and pets.
- Do not recharge, short circuit, solder or disassemble a battery.
- Do not place a battery in a fire or water. Keep batteries in a dark, cool and dry place.
- If you observe battery leakage, wipe out the leakage and then replace a battery. If the leakage adheres to your body or clothes, rinse well with water immediately.
- Obey the local laws on disposing the battery.

About the remote control signal

The remote control works with the projector's remote sensor. This projector has a remote sensor on the front. The sensor senses the signal within the following range when the sensor is active:

60 degrees (30 degrees to the left and right of the sensor) within 3 meters about.

NOTE • The remote control signal reflected in the screen or the like may be available. If it is difficult to send the signal to the sensor directly, attempt to make the signal reflect.

- The remote control uses infrared light to send signals to the projector (Class 1 LED), so be sure to use the remote control in an area free from obstacles that could block the remote control's signal to the projector.
- The remote control may not work correctly if strong light (such as direct sun light) or light from an extremely close range (such as from an inverter fluorescent lamp) shines on the remote sensor of the projector. Adjust the position of projector avoiding those lights.

Changing the frequency of remote control signal

The accessory remote control has the two choices on signal frequency, Mode 1:NORMAL and Mode 2:HIGH. If the remote control does not function properly, attempt to change the signal frequency.

In order to set the Mode, please keep pressing the combination of the two buttons listed below simultaneously for about 3 seconds.

(1) Set to Mode 1:NORMAL... the **VOLUME -** and the **RESET** buttons

(2) Set to Mode 2:HIGH... the **MAGNIFY OFF** and the **ESC** buttons

Please remember that the REMOTE FREQ. in the SERVICE item of the OPTION menu (📖46) of the projector to be controlled should be set to the same mode as the remote control.

Power on/off

Turning on the power

1. Make sure that the power cord is firmly and correctly connected to the projector and the outlet.
2. Make sure that the **POWER** indicator is steady orange (📖59). Then remove the lens cover.
3. Press the **STANDBY/ON** button on the projector or the remote control.
The projection lamp will light up and the **POWER** indicator will begin blinking in green. When the power is completely on, the indicator will stop blinking and light in steady green (📖59).

To display the picture, select an input signal according to the section “Selecting an input signal” (📖15).

Turning off the power

1. Press the **STANDBY/ON** button on the projector or the remote control. The message “Power off?” will appear on the screen for about 5 seconds.
2. Press the **STANDBY/ON** button again while the message appears.
The projector lamp will go off, and the **POWER** indicator will begin blinking in orange. Then the **POWER** indicator will stop blinking and light in steady orange when the lamp cooling is complete (📖59).
3. Attach the lens cover, after the **POWER** indicator turns in steady orange.

Do not turn the projector on for about 10 minutes or more after turning it off. Turning the projector on again too soon could shorten the lifetime of some consumable parts of the projector.

⚠ WARNING ▶ A strong light is emitted when the projector’s power is on. Do not look into the lens of the projector or look inside of the projector through any of the projector’s openings.

▶ Do not touch around the lamp cover and the exhaust vent during use or just after use, since it is too hot.

NOTE • Turn the power on/off in right order. Please power on the projector prior to the connected devices.

- This projector has the function that can make the projector automatically turn on/off. Please refer to the DIRECT POWER ON (📖42) and the AUTO POWER OFF (📖43) items of the OPTION menu.
- Use the shutdown switch (📖61) only when the projector is not turned off by normal procedure.

Operating

Adjusting the volume

- Use the **VOLUME +/-** buttons to adjust the volume.
 - A dialog will appear on the screen to aid you in adjusting the volume. If you do not do anything, the dialog will automatically disappear after a few seconds.
 - When \times is selected for current picture input port, the volume adjustment is disabled. Please see the **AUDIO SOURCE** item of the **AUDIO** menu (📖36).
 - When the projector is in the standby state, the volume can be adjusted if \times is not selected for the **AUDIO OUT STANDBY** and the **NORMAL** is selected to the **STANDBY MODE** in the **SETUP** menu (📖35).

VOLUME +/- buttons

Temporarily muting the sound

- Press the **MUTE** button on the remote control.
 - A dialog will appear on the screen indicating that you have muted the sound. To restore the sound, press the **MUTE**, **VOLUME +** or **VOLUME -** button. Even if you do not do anything, the dialog will automatically disappear after a few seconds.
 - When \times is selected for current picture input port, the sound is always muted. Please see the **AUDIO SOURCE** item of the **AUDIO** menu (📖36).
 - The C.C. (Closed Caption) is automatically activated when sound is muted and an input signal containing C.C. is received. This function is available only when the signal is NTSC for the **VIDEO** or **S-VIDEO**, or 480i@60 for the **COMPUTER IN1** or **COMPUTER IN2**, and when the **AUTO** is selected for the **DISPLAY** in the C.C. menu under the **SCREEN** menu (📖41).

MUTE button

Selecting an input signal

- Press the **INPUT** button on the projector.
 - Each time you press the button, the projector switches its input port from the current port as below.

→ COMPUTER IN 1 → COMPUTER IN 2 →

VIDEO ← S-VIDEO ←
 - While the **ON** is selected for the **AUTO SEARCH** item in the **OPTION** menu (📖42), the projector will keep checking the ports in above order repeatedly till an input signal is detected.

INPUT button

(continued on next page)

Selecting an input signal (continued)

- 1 Press the **COMPUTER** button on the remote control.
 - Each time you press the button, the projector switches its input port from the current port as below.

- While the ON is selected for the AUTO SEARCH item in the OPTION menu, the projector will keep checking every port sequentially till an input signal is detected (📖42). If the **COMPUTER** button is pressed when the **VIDEO** or **S-VIDEO** port is selected, the projector will check the **COMPUTER IN1** port first.

COMPUTER button

- 1 Press the **VIDEO** button on the remote control.
 - Each time you press the button, the projector switches its input port from the current port as below.

- While ON is selected for AUTO SEARCH item in OPTION menu, the projector will keep checking every port sequentially till an input signal is detected (📖42). If the **VIDEO** button is pressed when the **COMPUTER IN1** or the **COMPUTER IN2** port is selected, the projector will check the **S-VIDEO** port first.

VIDEO button

- 1 Press the **MY SOURCE / DOC. CAMERA** button on the remote control. The input signal will be changed into the signal you set as the MY SOURCE (📖44).

- This function also can use for document camera. Select the input port that connected the document camera.

MY SOURCE / DOC. CAMERA button

Searching an input signal

1. Press the **SEARCH** button on the remote control.
 - The projector will start to check its input ports as below in order to find any input signals. When an input is found, the projector will stop searching and display the image. If no signal is found, the projector will return to the state selected before the operation.

SEARCH button

- While the ON is selected for the AUTO SEARCH item in the OPTION menu (42), the projector will keep checking the ports in above order repeatedly till an input signal is detected.

Selecting an aspect ratio

1. Press the **ASPECT** button on the remote control.
 - Each time you press the button, the projector switches the mode for aspect ratio in turn.

○ **For a computer signal**

NORMAL → 4:3 → 16:9 → 16:10 → NATIVE

○ **For a video signal, s-video signal or component video signal**

4:3 → 16:9 → 16:10 → 14:9 → NATIVE

○ **For no signal**

4:3 (fixed)

- The **ASPECT** button does not work when no proper signal is inputted.
- The NORMAL mode keeps the original aspect ratio setting.
- The on-screen menu might be displayed outside of the image display area depending on the adjustment value of the ASPECT, D-ZOOM and KEYSTONE. Changing the values of ASPECT, D-ZOOM and KEYSTONE may fix the symptom.

ASPECT button

Adjusting the projector's elevator

When the place to put the projector is slightly uneven to the left or right, use the elevator feet to place the projector horizontally.

Using the feet can also tilt the projector in order to project at a suitable angle to the screen, elevating the front side of the projector within 3 degrees.

This projector has 2 elevator feet and 2 elevator buttons. An elevator foot is adjustable while pushing the elevator button on the same side as it.

1. Holding the projector, push the elevator buttons to loose the elevator feet.
2. Position the front side of the projector to the desired height.
3. Release the elevator buttons in order to lock the elevator feet.
4. After making sure that the elevator feet are locked, put the projector down gently.
5. If necessary, the elevator feet can be manually twisted to make more precise adjustments. Hold the projector when twisting the feet.

To loose an elevator foot, push the elevator button on the same side as it.

To finely adjust, twist the foot.

⚠ CAUTION ► Do not handle the elevator buttons without holding the projector, since the projector may drop down.

► Do not tilt the projector other than elevating its front within 3 degrees using the adjuster feet. A tilt of the projector exceeding the restriction could cause malfunction or shortening the lifetime of consumables, or the projector itself.

Adjusting the focus

Use the focus ring to focus the picture.

Using the automatic adjustment feature

1. Press the **AUTO** button on the remote control.
 - Pressing this button performs the following.
 - **For a computer signal**

The vertical position, the horizontal position and the horizontal phase will be automatically adjusted. Make sure that the application window is set to its maximum size prior to attempting to use this feature. A dark picture may still be incorrectly adjusted. Use a bright picture when adjusting.

AUTO button

- **For a video signal and s-video signal**

The video format best suited for the respective input signal will be selected automatically. This function is available only when the AUTO is selected for the VIDEO FORMAT item in the INPUT menu (📖32). The vertical position and horizontal position will be automatically set to the default.
- **For a component video signal**

The vertical position and horizontal position will be automatically set to the default. The horizontal phase will be automatically adjusted.

 - The automatic adjustment operation requires approx. 10 seconds. Also please note that it may not function correctly with some input.
 - When this function is performed for a video signal, a certain extra such as a line may appear outside a picture.
 - When this function is performed for a computer signal, a black frame may be displayed on the edge of the screen, depending on the PC model.
 - The items adjusted by this function may vary when the FINE or DISABLE is selected for the AUTO ADJUST item of the SERVICE item in the OPTION menu (📖45).

Adjusting the position

1. Press the **POSITION** button on the remote control while no menu is on screen, to display the D-SHIFT dialog on screen.
2. Use the ▲, ▼, ◀ and ▶ buttons to adjust the picture position. Press the **POSITION** button again to finish this operation.

POSITION button

- This is a function to shift the position of the shrunken picture by the D-ZOOM function.
- When an OSD (On Screen Display) menu is displayed, this operation moves the position of the OSD menu, but the picture position is not (📖23).
- The D-SHIFT adjustment values are not valid when the D-ZOOM is set to 512 (full screen).

Correcting the keystone distortions

KEYSTONE button

1. Press the **KEYSTONE** button on the remote control.
 - A dialog will appear on the screen to aid you in correcting the distortion.
2. Use the ◀/▶ cursor buttons for adjustment.
 - To close the dialog and complete this operation, press the **KEYSTONE** button again. Even if you do not do anything, the dialog will automatically disappear after a few seconds.

- The adjustable range of this function will vary among inputs. For some input, this function may not work well.
- When the projector is inclined to near ± 6 degrees or over, this function may not work well.
- This function will be unavailable when the Transition Detector is on (50).
- The on-screen menu might be displayed outside of the image display area depending on the adjustment value of the ASPECT, D-ZOOM and KEYSTONE. Changing the values of ASPECT, D-ZOOM and KEYSTONE may fix the symptom.

Using the magnify feature

MAGNIFY ON/OFF buttons

1. Press the **MAGNIFY ON** button on the remote control. The picture will be magnified, and the MAGNIFY dialog will appear on the screen. When the **MAGNIFY ON** button is pressed for the first time after the projector is turned on, the picture will be zoomed by 1.5 times. On the dialog, triangle marks to show each direction will be displayed.
2. While the triangles are displayed on the dialog, use the ▲/▼/◀/▶ cursor buttons to shift the magnifying area.
3. A magnifying glass icon will be displayed on the dialog when the **MAGNIFY ON** button is pressed while the dialog with the triangles is displayed.
4. While the magnifying glass icon is displayed on the dialog, use the ▲/▼ cursor buttons to adjust the magnification ratio. The magnification ratio will be adjusted with fine steps. And changes in the ratio in single steps are subtle so they may be hard to recognize.
5. Press the **MAGNIFY OFF** button on the remote control to exit magnification.

NOTE • The MAGNIFY dialog will automatically disappear in several seconds with no operation. The dialog will appear again if the **MAGNIFY ON** button is pressed when the dialog has automatically disappeared.

- While the MAGNIFY dialog is displayed, press the **MAGNIFY ON** button to switch the dialog between magnifying area shifting (with the triangles) and magnification ratio adjustment (with the magnifying glass icon).
- The magnification is automatically disabled when the displaying signal or its display condition is changed.
- While the magnification is active, the keystone distortion condition may vary. It will be restored when the magnification is disabled.
- Some horizontal stripes might be visible on the image while magnification is active.

Temporarily freezing the screen

1. Press the **FREEZE** button on the remote control.
 - The “FREEZE” indication will appear on the screen (however, the indication will not appear when the OFF is selected for the MESSAGE item in the SCREEN menu (📖39)), and the projector will go into the FREEZE mode, which the picture is frozen.

To exit the FREEZE mode and restore the screen to normal, press the **FREEZE** button again.

FREEZE button

- The projector automatically exits from the FREEZE mode when some control buttons are pressed.
- If the projector continues projecting a still image for a long time, the LCD panel might possibly be burned in. Do not leave the projector in the FREEZE mode for too long.
- Images might appear degraded when this function is operated, but it is not a malfunction.

Temporarily blanking the screen

1. Press the **BLANK** button on the remote control.
 - The BLANK screen will be displayed instead of the screen of input signal. Please refer to the BLANK item in the SCREEN menu (📖37).

To exit from the BLANK screen and return to the input signal screen, press the **BLANK** button again.

BLANK button

- The projector automatically exits from the BLANK mode when some control buttons are pressed.

⚠ CAUTION ► If you wish to have a blank screen while the projector's lamp is on, take one of items below.

- Use the BLANK function above.

Taking any other action may cause the damage on the projector.

NOTE • The sound is not connected with the BLANK screen function. If necessary, set the volume or mute first. To display the BLANK screen and mute the sound at one time, use the AV MUTE function (📖44).

Using the menu function

This projector has the following menus:

PICTURE, IMAGE, INPUT, SETUP, AUDIO, SCREEN, OPTION, SECURITY and EASY MENU.

The EASY MENU consists of functions often used, and the other menus are classified into each purpose and brought together as the ADVANCED MENU. Each of these menus is operated using the same methods. While the projector is displaying any menu, the **MENU** button on the projector works as the cursor buttons. The basic operations of these menus are as follows.

1. To start the MENU, press the **MENU** button. The MENU you last used (EASY or ADVANCED) will appear. The EASY MENU has priority to appear just after powered on.

2. In the **EASY MENU**

- (1) Use the ▲/▼ cursor buttons to select an item to operate. If you want to change it to the ADVANCED MENU, select the ADVANCED MENU.
- (2) Use the ◀/▶ cursor buttons to operate the item.

In the **ADVANCED MENU**

- (1) Use the ▲/▼ cursor buttons to select a menu. The items in the menu appear on the right side. If you want to change it to the EASY MENU, select the EASY MENU.
- (2) Press the ▶ cursor (or the **ENTER**) button to move the cursor to the right side. Then use the ▲/▼ cursor buttons to select an item to operate and press the ▶ cursor (or the **ENTER**) button to progress. The operation menu or dialog of the selected item will appear.
- (3) Use the buttons as instructed in the OSD to operate the item.

(continued on next page)

Using the menu function (continued)

3. To close the MENU, press the **MENU** button again or select the EXIT and press the ◀ cursor (or the **ENTER**) button. Even if you do not do anything, the dialog will automatically disappear after about 30 seconds.
- If you want to move the menu position, use the cursor buttons after pressing the **POSITION** button.
 - Some functions cannot be performed when a certain input port is selected, or when a certain input signal is displayed.
 - When you want to reset the operation, press the **RESET** button on the remote control during the operation. Note that some items (ex. LANGUAGE, VOLUME) cannot be reset.
 - In the ADVANCED MENU, when you want to return to the previous display, press the ◀ cursor (or the **ESC**) button on the remote control.

Indication in OSD (On Screen Display)

The meanings of the general words on the OSD are as follows.

Indication	Meaning
EXIT	Selecting this word finishes the OSD menu. It's the same as pressing the MENU button on the remote control.
RETURN	Selecting this word returns the menu to the previous menu.
CANCEL or NO	Selecting this word cancels the operation in the present menu and returns to the previous menu.
OK or YES	Selecting this word executes the prepared function or shifts the menu to the next menu.

EASY MENU

From the EASY MENU, items shown in the table below can be performed.

Select an item using the ▲/▼ cursor buttons. Then perform it according to the following table.

Item	Description																								
ASPECT	<p>Using the ◀/▶ cursor buttons switches the mode for aspect ratio. See the ASPECT item in the IMAGE menu (📖29).</p> <ul style="list-style-type: none"> The on-screen menu might be displayed outside of the image display area depending on the adjustment value of the ASPECT, D-ZOOM and KEYSTONE. Changing the values of ASPECT, D-ZOOM and KEYSTONE may fix the symptom. 																								
D-ZOOM	<p>Using the ◀/▶ cursor buttons adjusts the magnification ratio. Small ↔ Large</p> <p>See the D-ZOOM item in the SETUP menu (📖34).</p> <ul style="list-style-type: none"> The on-screen menu might be displayed outside of the image display area depending on the adjustment value of the ASPECT, D-ZOOM and KEYSTONE. Changing the values of ASPECT, D-ZOOM and KEYSTONE may fix the symptom. 																								
KEYSTONE	<p>Using the ◀/▶ cursor buttons corrects the vertical keystone distortion. See the KEYSTONE item in the SETUP menu (📖34).</p> <ul style="list-style-type: none"> The on-screen menu might be displayed outside of the image display area depending on the adjustment value of the ASPECT, D-ZOOM and KEYSTONE. Changing the values of ASPECT, D-ZOOM and KEYSTONE may fix the symptom. 																								
PICTURE MODE	<p>Using the ◀/▶ cursor buttons switches the picture mode. The picture modes are combinations of the GAMMA and the COLOR TEMP settings. Choose a suitable mode according to the projected source.</p> <p> </p> <table border="1"> <thead> <tr> <th></th> <th>GAMMA</th> <th>COLOR TEMP</th> </tr> </thead> <tbody> <tr> <td>NORMAL</td> <td>1 DEFAULT</td> <td>2 MID</td> </tr> <tr> <td>CINEMA</td> <td>2 DEFAULT</td> <td>3 LOW</td> </tr> <tr> <td>DYNAMIC</td> <td>3 DEFAULT</td> <td>1 HIGH</td> </tr> <tr> <td>BOARD(BLACK)</td> <td>4 DEFAULT</td> <td>4 Hi-BRIGHT-1</td> </tr> <tr> <td>BOARD(GREEN)</td> <td>4 DEFAULT</td> <td>5 Hi-BRIGHT-2</td> </tr> <tr> <td>WHITEBOARD</td> <td>5 DEFAULT</td> <td>2 MID</td> </tr> <tr> <td>DAYTIME</td> <td>6 DEFAULT</td> <td>6 Hi-BRIGHT-3</td> </tr> </tbody> </table> <ul style="list-style-type: none"> When the combination of the GAMMA and the COLOR TEMP differs from pre-assigned modes above, the display on the menu for the PICTURE MODE is “CUSTOM”. Please refer to the GAMMA and the COLOR TEMP (📖26, 27) items in the PICTURE menu. Lines or other noise might appear on the screen when this function is operated, but it is not a malfunction. 		GAMMA	COLOR TEMP	NORMAL	1 DEFAULT	2 MID	CINEMA	2 DEFAULT	3 LOW	DYNAMIC	3 DEFAULT	1 HIGH	BOARD(BLACK)	4 DEFAULT	4 Hi-BRIGHT-1	BOARD(GREEN)	4 DEFAULT	5 Hi-BRIGHT-2	WHITEBOARD	5 DEFAULT	2 MID	DAYTIME	6 DEFAULT	6 Hi-BRIGHT-3
	GAMMA	COLOR TEMP																							
NORMAL	1 DEFAULT	2 MID																							
CINEMA	2 DEFAULT	3 LOW																							
DYNAMIC	3 DEFAULT	1 HIGH																							
BOARD(BLACK)	4 DEFAULT	4 Hi-BRIGHT-1																							
BOARD(GREEN)	4 DEFAULT	5 Hi-BRIGHT-2																							
WHITEBOARD	5 DEFAULT	2 MID

Item	Description
ECO MODE	Using the ◀/▶ cursor buttons turns off/on the eco mode. See the ECO MODE item in the SETUP menu (📖34).
MIRROR	Using the ◀/▶ cursor buttons switches the mode for mirror status. See the MIRROR item in the SETUP menu (📖35).
RESET	Performing this item resets all of the EASY MENU items except the FILTER TIME and the LANGUAGE. A dialog is displayed for confirmation. Selecting the OK using the ▶ cursor button performs resetting.
FILTER TIME	The usage time of the air filter is shown in the menu. Performing this item resets the filter time which counts usage time of the air filter. A dialog is displayed for confirmation. Selecting the OK using the ▶ cursor button performs resetting. See the FILTER TIME item in the OPTION menu (📖43).
LANGUAGE	Using the ◀/▶ cursor buttons changes the display language. See the LANGUAGE item in the SCREEN menu (📖37).
ADVANCED MENU	Press the ▶ cursor (or the ENTER) button to use the ADVANCED MENU.
EXIT	Press the ◀ cursor (or the ENTER) button to finish the OSD menu.

PICTURE menu

From the PICTURE menu, items shown in the table below can be performed.

Select an item using the ▲/▼ cursor buttons, and press the ► cursor (or the **ENTER**) button to execute the item. Then perform it according to the following table.

Item	Description
BRIGHTNESS	Using the ◀/▶ cursor buttons adjusts the brightness. Dark ⇔ Light
CONTRAST	Using the ◀/▶ cursor buttons adjusts the contrast. Weak ⇔ Strong
GAMMA	<p>Using the ▲/▼ cursor buttons switches the gamma mode.</p> <p>1 DEFAULT ⇔ 1 CUSTOM ⇔ 2 DEFAULT ⇔ 2 CUSTOM ⇔ 3 DEFAULT ⇔ 3 CUSTOM ⇔ 6 CUSTOM ⇔ 6 DEFAULT ⇔ 5 CUSTOM ⇔ 5 DEFAULT ⇔ 4 CUSTOM ⇔ 4 DEFAULT</p> <p>To adjust CUSTOM</p> <p>Selecting a mode whose name includes the CUSTOM and then pressing the ► cursor (or the ENTER) button displays a dialog to aid you in adjusting the mode. This function is useful when you want to change the brightness of particular tones.</p> <p>Choose an item using the ◀/▶ cursor buttons, and adjust the level using the ▲/▼ cursor buttons. You can display a test pattern for checking the effect of your adjustment by pressing the ENTER (or the INPUT) button. Each time you press the ENTER (or the INPUT) button, the pattern changes as below.</p> <p>No pattern ⇔ Gray scale of 9 steps ⇔ Ramp ⇔ Gray scale of 15 steps</p> <p>The eight equalizing bars correspond to eight tone levels of the test pattern (Gray scale of 9 steps) except the darkest in the left end. If you want to adjust the 2nd tone from left end on the test pattern, use the equalizing adjustment bar "1". The darkest tone at the left end of the test pattern cannot be controlled with any of equalizing adjustment bar.</p> <ul style="list-style-type: none"> • Lines or other noise might appear on the screen when this function is operated, but it is not a malfunction.

(continued on next page)

Item	Description
<p>COLOR TEMP</p>	<p>Using the ▲/▼ cursor buttons switches the color temperature mode.</p> <p style="text-align: center;"> 1 HIGH ⇔ 1 CUSTOM ⇔ 2 MID ⇔ 2 CUSTOM ⇕ 6 CUSTOM ⇕ 6 Hi-BRIGHT-3 ⇕ 5 CUSTOM ⇔ 5 Hi-BRIGHT-2 ⇔ 4 CUSTOM ⇔ 4 Hi-BRIGHT-1 ⇕ 3 LOW ⇕ 3 CUSTOM ⇕ </p> <p>To adjust CUSTOM</p> <p>Selecting a mode whose name includes the CUSTOM and then pressing the ► cursor (or the ENTER) button displays a dialog to aid you in adjusting the OFFSET and GAIN of the selected mode.</p>  <p>The OFFSET adjustments change the color intensity on the whole tones of the test pattern. GAIN adjustments mainly affect color intensity on the brighter tones of the test pattern. Choose an item using the ◀/▶ cursor buttons, and adjust the level using the ▲/▼ cursor buttons. You can display a test pattern for checking the effect of your adjustment by pressing the ENTER (or the INPUT) button. Each time you press the ENTER (or the INPUT) button, the pattern changes as below.</p> <p style="text-align: center;"> No pattern ⇔ Gray scale of 9 steps ↘ ↙ Ramp ⇔ Gray scale of 15 steps </p> <ul style="list-style-type: none"> • Lines or other noise might appear on the screen when this function is operated, but it is not a malfunction. 
<p>COLOR</p>	<p>Using the ◀/▶ cursor buttons adjusts the strength of whole color.</p> <p style="text-align: center;">Weak ⇔ Strong</p> <ul style="list-style-type: none"> • This item can be selected only for a video, s-video and component video signal.
<p>TINT</p>	<p>Using the ◀/▶ cursor buttons adjusts the tint.</p> <p style="text-align: center;">Reddish ⇔ Greenish</p> <ul style="list-style-type: none"> • This item can be selected only for a video, s-video and component video signal.
<p>SHARPNESS</p>	<p>Using the ◀/▶ cursor buttons adjusts the sharpness.</p> <p style="text-align: center;">Weak ⇔ Strong</p> <ul style="list-style-type: none"> • There may be some noise and/or the screen may flicker for a moment when an adjustment is made. This is not a malfunction.

(continued on next page)

Item	Description
<p>MY MEMORY</p>	<p>This projector has 4 memories for adjustment data (for all the items of the PICTURE menu). Selecting a function using the ▲/▼ cursor buttons and pressing the ► cursor (or the ENTER) button performs each function.</p> <p style="text-align: center;"> ↪ SAVE-1 ⇔ SAVE-2 ⇔ SAVE-3 ⇔ SAVE-4 ↩ ↪ LOAD-4 ⇔ LOAD-3 ⇔ LOAD-2 ⇔ LOAD-1 ↩ </p> <p><u>SAVE-1, SAVE-2, SAVE-3, SAVE-4</u> Performing a SAVE function saves the current adjustment data into the memory linked in the number included in the function's name.</p> <ul style="list-style-type: none"> • Remember that the current data being stored of a memory will be lost by saving new data into the memory. <p><u>LOAD-1, LOAD-2, LOAD-3, LOAD-4</u> Performing a LOAD function loads the data from the memory linked in the number included in the function's name, and adjusts the picture automatically depending on the data.</p> <ul style="list-style-type: none"> • The LOAD functions whose linked memory has no data are skipped. • Remember that the current adjusted condition will be lost by loading data. If you want to keep the current adjustment, please save it before performing a LOAD function. • There may be some noise and the screen may flicker for a moment when loading data. This is not malfunction. • You can perform the LOAD function using the MY BUTTONS. Please see the MY BUTTON item in the OPTION menu (📖44).

IMAGE menu

From the IMAGE menu, items shown in the table below can be performed.

Select an item using the ▲/▼ cursor buttons, and press the ► cursor (or the **ENTER**) button to execute the item. Then perform it according to the following table.

Item	Description
<p>ASPECT</p>	<p>Using the ▲/▼ cursor buttons switches the mode for aspect ratio.</p> <p>For a computer signal NORMAL ⇔ 4:3 ⇔ 16:9 ⇔ 16:10 ⇔ NATIVE </p> <p>For a video signal, s-video signal or component video signal 4:3 ⇔ 16:9 ⇔ 16:10 ⇔ 14:9 ⇔ NATIVE </p> <p>For no signal 4:3 (fixed)</p> <ul style="list-style-type: none"> • The NORMAL mode keeps the original aspect ratio of the signal. • The on-screen menu might be displayed outside of the image display area depending on the adjustment value of the ASPECT, D-ZOOM and KEYSTONE. Changing the values of ASPECT, D-ZOOM and KEYSTONE may fix the symptom.
<p>OVER SCAN</p>	<p>Using the ◀/▶ cursor buttons adjusts the over-scan ratio. Small (It magnifies picture) ⇔ Large (It reduces picture)</p> <ul style="list-style-type: none"> • This item can be selected only for a video, s-video and component video signal. • When this adjustment is too large, certain degradation may appear at the frame area of the picture. In such a case, please adjust small.
<p>V POSITION</p>	<p>Using the ◀/▶ cursor buttons adjusts the vertical position. Down ⇔ Up</p> <ul style="list-style-type: none"> • Over-adjusting the vertical position may cause noise to appear on the screen. If this occurs, please reset the vertical position to the default setting. Pressing the RESET button on the remote control when the V POSITION is selected will reset the V POSITION to the default setting. • When this function is performed on a video signal or s-video signal, the range of this adjustment depends on the OVER SCAN () setting. It is not possible to adjust when the OVER SCAN is set to 10.
<p>H POSITION</p>	<p>Using the ◀/▶ cursor buttons adjusts the horizontal position. Right ⇔ Left</p> <ul style="list-style-type: none"> • Over-adjusting the horizontal position may cause noise to appear on the screen. If this occurs, please reset the horizontal position to the default setting. Pressing the RESET button on the remote control when the H POSITION is selected will reset the H POSITION to the default setting. • When this function is performed on a video signal or s-video signal, the range of this adjustment depends on the OVER SCAN () setting. It is not possible to adjust when the OVER SCAN is set to 10.

(continued on next page)

Item	Description
<p>H PHASE</p>	<p>Using the ◀/▶ cursor buttons adjusts the horizontal phase to eliminate flicker.</p> <p>Right ⇔ Left</p> <ul style="list-style-type: none"> • This item can be selected only for a computer signal or a component video signal.
<p>H SIZE</p>	<p>Using the ◀/▶ cursor buttons adjusts the horizontal size.</p> <p>Small ⇔ Large</p> <ul style="list-style-type: none"> • This item can be selected only for a computer signal. • When this adjustment is excessive, the picture may not be displayed correctly. In such a case, please reset the adjustment by pressing the RESET button on the remote control during this operation. • Images might appear degraded when this function is operated, but it is not a malfunction.
<p>AUTO ADJUST EXECUTE</p>	<p>Selecting this item performs the automatic adjustment feature.</p> <p>For a computer signal The vertical position, the horizontal position and the horizontal phase will be automatically adjusted. Make sure that the application window is set to its maximum size prior to attempting to use this feature. A dark picture may still be incorrectly adjusted. Use a bright picture when adjusting.</p> <p>For a video signal and s-video signal The video format best suited for the respective input signal will be selected automatically. This function is available only when the AUTO is selected for the VIDEO FORMAT item in the INPUT menu (📖32). The vertical position and horizontal position will be automatically set to the default.</p> <p>For a component video signal The vertical position and horizontal position will be automatically set to the default. The horizontal phase will be automatically adjusted.</p> <ul style="list-style-type: none"> • The automatic adjustment operation requires approx. 10 seconds. Also please note that it may not function correctly with some input. • When this function is performed for a video signal, a certain extra such as a line may appear outside a picture. • When this function is performed for a computer signal, a black frame may be displayed on the edge of the screen, depending on the PC model. • The items adjusted by this function may vary when the FINE or the DISABLE is selected for the AUTO ADJUST item of the SERVICE item in the OPTION menu (📖45).

INPUT menu

From the INPUT menu, items shown in the table below can be performed.

Select an item using the ▲/▼ cursor buttons, and press the ► cursor (or the **ENTER**) button to execute the item. Then perform it according to the following table.

Item	Description
<p>PROGRESSIVE</p>	<p>Using the ▲/▼ cursor buttons switches the progress mode. TV ⇄ FILM ⇄ OFF ↑—————↑</p> <ul style="list-style-type: none"> • This function is performed only for a video signal, s-video signal or component video signal of 480i@60 or 576i@50. • When the TV or the FILM is selected, the screen image will be sharp. The FILM adapts to the 2-3 Pull-Down conversion system. But these may cause a certain defect (for example, jagged line) of the picture for a quick moving object. In such a case, please select the OFF, even though the screen image may lose sharpness.
<p>VIDEO NR</p>	<p>Using the ▲/▼ cursor buttons switches the noise reduction mode. HIGH ⇄ MID ⇄ LOW ↑—————↑</p> <ul style="list-style-type: none"> • This function is performed only for a video signal, s-video signal or component video signal of 480i@60 or 576i@50. • When this function is excessive, it may cause a certain degradation of the picture.
<p>COLOR SPACE</p>	<p>Using the ▲/▼ cursor buttons switches the mode for color space. AUTO ⇄ RGB ⇄ SMPTE240 ⇄ REC709 ⇄ REC601 ↑—————↑</p> <ul style="list-style-type: none"> • This item can be selected only for a computer signal or a component video signal. • The AUTO mode automatically selects the optimum mode. • The AUTO operation may not work well at some signals. In such a case, it might be good to select a suitable mode except the AUTO.

(continued on next page)

Item	Description
<p>VIDEO FORMAT</p>	<p>The video format for the S-VIDEO port and the VIDEO port can be set.</p> <p>(1) Use the ▲/▼ cursor buttons to select the input port. S-VIDEO ⇔ VIDEO</p> <p>(2) Using the ◀/▶ cursor buttons switches the mode for video format. AUTO ⇔ NTSC ⇔ PAL ⇔ SECAM ↶ N-PAL ⇔ M-PAL ⇔ NTSC4.43 ↷</p>  <p>• This item is performed only for a video signal from the VIDEO port or the S-VIDEO port.</p> <p>• The AUTO mode automatically selects the optimum mode.</p> <p>• The AUTO operation may not work well for some signals. If the picture becomes unstable (e.g. an irregular picture, lack of color), please select the mode according to the input signal.</p>
<p>COMPUTER IN</p>	<p>The computer input signal type for the COMPUTER IN1 and IN2 ports can be set.</p> <p>(1) Use the ▲/▼ cursor buttons to select the COMPUTER IN port to be set. COMPUTER IN1 ⇔ COMPUTER IN2</p> <p>(2) Use the ◀/▶ cursor buttons to select the computer input signal type. AUTO ⇔ SYNC ON G OFF</p>  <p>• Selecting the AUTO mode allows you to input a sync on G signal or component video from the port.</p> <p>• In the AUTO mode, the picture may be distorted with certain input signals. In such a case, remove the signal connector so that no signal is received and select the SYNC ON G OFF, and then reconnect the signal.</p> <p>• The COMPUTER IN1/2 port can support a component signal also (9).</p>
<p>FRAME LOCK</p>	<p>Set the frame lock function on/off for each port.</p> <p>(1) Use the ▲/▼ cursor buttons to select the input ports. COMPUTER IN1 ⇔ COMPUTER IN2</p> <p>(2) Use the ◀/▶ cursor buttons to turn the frame lock function on/off. ON ⇔ OFF</p>  <p>• This item can be performed only on a signal with a vertical frequency of 50 to 60 Hz.</p> <p>• When the ON is selected, moving pictures are displayed more smoothly.</p> <p>• This function may cause a certain degradation of the picture. In such a case, please select the OFF.</p>

(continued on next page)

Item	Description
<p>RESOLUTION</p>	<p>The resolution for the COMPUTER IN1 and the COMPUTER IN2 input signals can be set on this projector.</p> <p>In the RESOLUTION menu select the resolution you wish to display using the ▲/▼ cursor buttons.</p> <p>■ AUTO Selecting AUTO will set a resolution appropriate to the input signal.</p> <p>■ STANDARD Pressing the ► cursor (or the ENTER) button when selecting a STANDARD resolution will automatically adjust the horizontal and vertical positions, clock phase and horizontal size. The INPUT_INFORMATION dialog will be displayed.</p> <p>■ CUSTOM (1) To set a custom resolution use the ▲/▼ cursor buttons to select the CUSTOM and the RESOLUTION_CUSTOM box will be displayed. Set the horizontal (HORZ) and vertical (VERT) resolutions using the ▲/▼/◀/▶ cursor buttons. This function is may not support all resolutions.</p> <p>(2) Move the cursor to the OK on screen and press the ► cursor (or the ENTER) button. The message "ARE YOU SURE YOU WISH TO CHANGE RESOLUTION?" appears. To save the setting, press the ► cursor button. The horizontal and vertical positions, clock phase and horizontal size will be automatically adjusted.</p> <p>To revert back to the previous resolution without saving changes, move the cursor to the CANCEL on screen and press the ◀ cursor (or the ENTER) button. The screen will then return to the RESOLUTION menu displaying the previous resolution.</p> <ul style="list-style-type: none"> • For some pictures, this function may not work well.

SETUP menu

From the SETUP menu, items shown in the table below can be performed.

Select an item using the ▲/▼ cursor buttons, and press the ► cursor (or the **ENTER**) button to execute the item. Then perform it according to the following table.

Item	Description
D-ZOOM	Using the ◀/▶ cursor buttons adjusts the magnification ratio. Small ⇔ Large <ul style="list-style-type: none"> The on-screen menu might be displayed outside of the image display area depending on the adjustment value of the ASPECT, D-ZOOM and KEYSTONE. Changing the values of ASPECT, D-ZOOM and KEYSTONE may fix the symptom.
D-SHIFT V	Using the ◀/▶ cursor buttons adjusts the vertical picture position. Down ⇔ Up <ul style="list-style-type: none"> The D-SHIFT adjustment values are not valid when the D-ZOOM is set to 512 (full screen).
D-SHIFT H	Using the ◀/▶ cursor buttons adjusts the horizontal picture position. Left ⇔ Right <ul style="list-style-type: none"> The D-SHIFT adjustment values are not valid when the D-ZOOM is set to 512 (full screen).
PICTURE POSITION	Using the ◀/▶ cursor buttons adjusts the vertical picture position. TOP ⇔ MID ⇔ BOTTOM The PICTURE POSITION is not changed if any of the following cases apply. <ul style="list-style-type: none"> The ASPECT is set to 4:3. The input signal has an aspect ratio of 4:3 or vertically larger than 4:3, while the ASPECT is set to NORMAL. Vertical size of the displayed image is full on the effective display area, while the ASPECT is set to NATIVE. One of the following messages is displayed on the screen: "NO INPUT IS DETECTED" "SYNC IS OUT OF RANGE" "INVALID SCAN FREQ." The BLANK or TEMPLATE function is selected.
KEYSTONE	Using the ◀/▶ cursor buttons corrects the vertical keystone distortion. Shrink the bottom of the image ⇔ Shrink the top of the image <ul style="list-style-type: none"> The adjustable range of this function will vary among inputs. For some input, this function may not work well. This function will be unavailable when the Transition Detector is on (50). The on-screen menu might be displayed outside of the image display area depending on the adjustment value of the ASPECT, D-ZOOM and KEYSTONE. Changing the values of ASPECT, D-ZOOM and KEYSTONE may fix the symptom.
ECO MODE	Using the ▲/▼ cursor buttons turns off/on the eco mode. NORMAL ⇔ ECO <ul style="list-style-type: none"> When the ECO is selected, acoustic noise and screen brightness are reduced.

(continued on next page)

Item	Description
<p>MIRROR</p>	<p>Using the ▲/▼ cursor buttons switches the mode for mirror status.</p>  <p>NORMAL ⇔ H:INVERT ⇔ V:INVERT ⇔ H&V:INVERT</p>  <p>If the Transition Detector is on and the MIRROR status is changed, the TRANSITION DETECTOR ON alarm (📖50) will be displayed when projector is restarted after the AC power is turned off.</p>
<p>STANDBY MODE</p>	<p>Using ▲/▼ cursor buttons switches the standby mode setting between the NORMAL and the SAVING.</p> <p>NORMAL ⇔ SAVING</p> <p>When the SAVING is selected, the power consumption in the standby state is lowered with some functional restriction as below:</p> <ul style="list-style-type: none"> • When the SAVING is selected, the RS-232C communication control is disabled except to turn the projector on while the projector is in the standby state. • When the SAVING is selected, the STANDBY setting of MONITOR OUT (📖below) is invalid, and no signal is output from the MONITOR OUT port in the standby state. • When the SAVING is selected, the AUDIO OUT STANDBY setting of the AUDIO SOURCE (📖36) is invalid, and no signal is output from the AUDIO OUT ports in the standby state.
<p>MONITOR OUT</p>	<p>The combination of a picture shown on screen and output from the MONITOR OUT port can be arranged in the menu.</p> <p>The picture coming into the port selected in the (2) is output to the MONITOR OUT port while an image from the port chosen in the (1) is on screen.</p> <p>(1) Choose a picture input port using ▲/▼ cursor buttons.</p> <p>COMPUTER IN1 ⇔ COMPUTER IN2  STANDBY ⇔ VIDEO ⇔ S-VIDEO</p>  <ul style="list-style-type: none"> • Choose the STANDBY, to select the output signal from the MONITOR OUT port in the standby state. <p>(2) Select one of the COMPUTER IN ports using the ◀/▶ cursor buttons.</p> <p>Choosing the COMPUTER IN1 allows the following choice. COMPUTER IN1 ⇔ OFF</p> <p>Choosing the COMPUTER IN2 allows the following choice. COMPUTER IN2 ⇔ OFF</p> <p>Choosing other input or the STANDBY allows the following choice. COMPUTER IN1 ⇔ COMPUTER IN2 ⇔ OFF</p>  <ul style="list-style-type: none"> • The OFF disables the MONITOR OUT port.

AUDIO menu

From the AUDIO menu, items shown in the table below can be performed. Select an item using the ▲/▼ cursor buttons, and press the ► cursor (or the ENTER) button to execute the item. Then perform it according to the following table.

Item	Description
<p>VOLUME</p>	<p>Using the ◀/▶ cursor buttons adjusts the volume. High ⇔ Low</p>
<p>SPEAKER</p>	<p>Using the ▲/▼ cursor buttons turns on/off the built-in speaker. ON ⇔ OFF When the OFF is selected, the built-in speaker does not work.</p>
<p>AUDIO SOURCE</p>	<p>The combination of a picture and audio input port can be arranged in the menu. The audio coming into the port selected in the (2) is output while an image from the port chosen in the (1) is on screen.</p> <p>(1) Choose a picture input port using the ▲/▼ cursor buttons.</p> <div style="display: flex; align-items: center; justify-content: center;"> <div style="text-align: center; margin-right: 20px;"> <p>COMPUTER IN1 ⇔ COMPUTER IN2</p> <p>⇕</p> <p>AUDIO OUT STANDBY</p> <p>⇕</p> <p>VIDEO</p> </div> <div style="text-align: center; margin-right: 20px;"> <p>⇕</p> <p>S-VIDEO</p> </div> <div style="text-align: center;"> <p>⇕</p> </div> </div>  <ul style="list-style-type: none"> • Choose the AUDIO OUT STANDBY, to select the audio output to the AUDIO OUT ports in the standby state. The built-in speaker does not work in the standby state. • While the RETURN is selected, pressing the ◀ cursor (or the ENTER) button returns to the previous menu. <p>(2) Select one of the AUDIO IN ports using the ◀/▶ cursor buttons.</p> <div style="display: flex; align-items: center; justify-content: center;"> <div style="text-align: center; margin-right: 20px;"> <p>AUDIO IN1 ⇔ AUDIO IN2 ⇔ AUDIO IN3 ⇔ ❌</p> <p>↑</p> </div> </div> <ul style="list-style-type: none"> • ❌ disables the audio output. • The C.C. (Closed Caption) is automatically activated when ❌ is selected and an input signal containing C.C. is received. This function is available only when the signal is NTSC for the VIDEO or the S-VIDEO, or 480i@60 for the COMPUTER IN1 or the COMPUTER IN2, and when the AUTO is selected for the DISPLAY in the C.C. menu under the SCREEN menu (📖41).

SCREEN menu

From the SCREEN menu, items shown in the table below can be performed.

Select an item using the ▲/▼ cursor buttons, and press the ► cursor (or the **ENTER**) button to execute the item. Then perform it according to the following table.

Item	Description
<p>LANGUAGE</p>	<p>Using the ▲/▼/◀/▶ cursor buttons switches the OSD (On Screen Display) language. ENGLISH, FRANÇAIS, DEUTSCH, ESPAÑOL... (shown in the LANGUAGE dialog) Press the ENTER (or the INPUT) button to save the language setting.</p>
<p>MENU POSITION</p>	<p>Using the ▲/▼/◀/▶ cursor buttons adjusts the menu position. To quit the operation, press the MENU button on the remote control or keep no operation for about 10 seconds.</p>
<p>BLANK</p>	<p>Using the ▲/▼ cursor buttons switches the mode for the blank screen. The blank screen is a screen for the temporarily blanking feature (📖21). It is displayed by pressing the BLANK button on the remote control.</p> <p style="text-align: center;">MyScreen ⇔ ORIGINAL ⇔ BLUE ⇔ WHITE ⇔ BLACK ↑ ↑ </p> <p><u>MyScreen</u> : Screen can be registered by the MyScreen item (📖38). <u>ORIGINAL</u> : Screen preset as the standard screen. <u>BLUE, WHITE, BLACK</u> : Plain screens in each color.</p> <ul style="list-style-type: none"> • To avoid remaining as an afterimage, the MyScreen or the ORIGINAL screen will change to the plain black screen after several minutes.
<p>START UP</p>	<p>Using the ▲/▼ cursor buttons switches the mode for the start-up screen. The start-up screen is a screen displayed when no signal or an unsuitable signal is detected.</p> <p style="text-align: center;">MyScreen ⇔ ORIGINAL ⇔ OFF ↑ ↑ </p> <p><u>MyScreen</u> : The screen can be registered by the MyScreen item (📖38). <u>ORIGINAL</u> : The screen preset as the standard screen. <u>OFF</u> : Plain black screen.</p> <ul style="list-style-type: none"> • To avoid remaining as an afterimage, the MyScreen or the ORIGINAL screen will change to the BLANK screen (📖21) after several minutes. If also the BLANK screen is the MyScreen or the ORIGINAL, the plain black screen is instead used. • When the ON is selected to the MyScreen PASSWORD item in the SECURITY menu (📖48), the START UP is fixed to the MyScreen.

Item	Description
SERVICE	<p>Selecting this item displays the SERVICE menu. Select an item using the ▲/▼ cursor buttons, and press the ► cursor (or the ENTER) button on the remote control to execute the item.</p> 
	<p>FAN SPEED Using the ▲/▼ cursor buttons switches the rotation speed of the cooling fans. The HIGH is the mode for use at highlands etc. Note that the projector is noisier when the HIGH is selected. HIGH ⇔ NORMAL</p>
	<p>AUTO ADJUST Using the ▲/▼ cursor buttons to select one of the mode. When the DISABLE is selected, the automatic adjustment feature is disabled. FINE ⇔ FAST ⇔ DISABLE ↑—————↑ <u>FINE</u>: Finer tuning including the H.SIZE adjustment. <u>FAST</u>: Faster tuning, setting the H.SIZE to prearranged data for the input signal.</p> <ul style="list-style-type: none"> • Depending on conditions, such as input image, signal cable to the projector, environment around the projector, etc., the automatic adjustment may not work correctly. In such a case, please choose the DISABLE to disable the automatic adjustment, and make adjustment manually.
	<p>GHOST</p> <ol style="list-style-type: none"> 1. Select a color element of ghost using the ◀/▶ cursor buttons. 2. Adjust the selected element using the ▲/▼ cursor buttons to disappear ghost. 
	<p>FILTER MESSAGE Use the ▲/▼ cursor button to set the timer for notifying by the message when to replace the filter unit 500h ⇔ 1000h ⇔ 2000h ⇔ 3000h ⇔ 4000h ⇔ 5000h ⇔ OFF After choosing an item except the OFF, the message the “REMINDER ***HRS PASSED” will appear after the timer reaches the interval time set by this feature (📖58). When the OFF is chosen, the message will not appear. Utilize this feature to keep the air filter clean, setting the suitable time according to your environment of this projector.</p> <ul style="list-style-type: none"> • Please take care of the filter unit periodically, even if there is no message. If the air filter becomes to be blocked by dust or other matter, the internal temperature will rise, which could cause malfunction, or reduce the lifetime of the projector. • Please be careful with the operating environment of the projector and the condition of the filter unit.

(continued on next page)

Item	Description
<p>SERVICE (continued)</p>	<p>KEY LOCK Using the ▲/▼ cursor buttons turns on/off the key lock feature. When the ON is selected, the buttons on the projector except the STANDBY/ON button are locked.</p> <p>ON ⇔ OFF</p> <ul style="list-style-type: none"> • Please use this function to prevent tampering or accidental operation. This function does not have any effect on the remote control.
	<p>REMOTE FREQ. (1) Use the ▲/▼ cursor button to change the projector's remote sensor frequency setting (📖4). 1:NORMAL ⇔ 2:HIGH</p> <p>(2) Use the ◀/▶ cursor button to change the projector's remote sensor on or off. ON ⇔ OFF</p> <p>The factory default setting is for both 1:NORMAL and 2:HIGH to be on. If the remote control does not function correctly, disable either of them (📖13). It's not possible to disable both options at the same time.</p>
	<p>INFORMATION Selecting this item displays a dialog titled "INPUT_INFORMATION". It shows the information about the current input.</p> <div style="display: flex; justify-content: space-around; align-items: flex-start;">    </div> <ul style="list-style-type: none"> • The "FRAME LOCK" message on the dialog means the frame lock function is working. • This item can't be selected for no signal and sync out. • When the MY TEXT DISPLAY is set to ON, the MY TEXT is displayed together with the input information in the INPUT_INFORMATION box (📖52).
	<p>FACTORY RESET Selecting the OK using the ▶ cursor button performs this function. By this function, all the items in all of menus will collectively return to the initial setting. Note that the items LAMP TIME, FILTER TIME, LANGUAGE, FILTER MESSAGE and SECURITY settings are not reset.</p> <p>CANCEL ⇔ OK</p>

SECURITY menu

This projector is equipped with security functions.

From the SECURITY menu, items shown in the table below can be performed.

To use SECURITY menu: User registration is required before using the security functions.

Enter the SECURITY menu

- Use the ▲/▼ cursor buttons on the SECURITY menu to select ENTER PASSWORD and press the ► cursor (or the **ENTER**) button. The ENTER PASSWORD box will be displayed.
- Use the ▲/▼/◀/▶ cursor buttons to enter the registered password. The factory default password is **5010**. This password can be changed ([below](#)). Move the cursor to the right side of the ENTER PASSWORD box and press the ► cursor (or the **ENTER**) button to display the SECURITY menu.
 - It is strongly recommended the factory default password to be changed as soon as possible.
 - If an incorrect password is input, the ENTER PASSWORD box will be displayed again. If incorrect password is input 3 times, the projector will turn off. Afterwards the projector will turn off every time an incorrect password is input.
- Items shown in the table below can be performed.

If you have forgotten your password

- While the ENTER PASSWORD box is displayed, press and hold the **RESET** (or press the ◀ cursor and the **INPUT** buttons at the same time) button for about 3 seconds.
 - The 10 digit Inquiring Code will be displayed. Contact your dealer with the 10 digit Inquiring Code. Your password will be sent after your user registration information is confirmed.
- If there is no key input for about 55 seconds while the Inquiring Code is displayed, the menu will close. If necessary, repeat the process from (1).

Item	Description
<p>SECURITY PASSWORD CHANGE</p>	<ol style="list-style-type: none"> Use the ▲/▼ cursor buttons on the SECURITY menu to select SECURITY PASSWORD CHANGE and press the ► cursor (or the ENTER) button to display the ENTER NEW PASSWORD box. Use the ▲/▼/◀/▶ cursor buttons to enter the new password. Move the cursor to the right side of the ENTER NEW PASSWORD box and press the ► cursor (or the ENTER) button to display the NEW PASSWORD AGAIN box, enter the same password again. Move the cursor to the right side of the NEW PASSWORD AGAIN box and press the ► cursor (or the ENTER) button and the NOTE NEW PASSWORD box will be displayed for about 30 seconds, please make note of the password during this time. Maintenance

Replacing the lamp

A lamp has finite product life. Using the lamp for long periods of time could cause the pictures darker or the color tone poor. Note that each lamp has a different lifetime, and some may burst or burn out soon after you start using them. Preparation of a new lamp and early replacement are recommended. To prepare a new lamp, make contact with your dealer and tell the lamp type number.

Type number : DT01091

Replacing the lamp

1. Turn the projector off, and unplug the power cord.
 - Allow the projector to cool for at least 45 minutes.
2. Prepare a new lamp. If the projector is mounted on a ceiling, or if the lamp has broken, also ask the dealer to replace the lamp.

In case of replacement by yourself, follow the following procedure.

3. Loosen the screw (marked by arrow) of the lamp cover and then slide and lift the lamp cover to the side to remove it.
4. Loosen the 2 screws (marked by arrow) of the lamp, and slowly pick up the lamp by the handles. **Never** loosen any other screws.
5. Insert the new lamp, and retighten firmly the 2 screws of the lamp that are loosened in the previous process to lock it in place.
6. While putting the interlocking parts of the lamp cover and the projector together, slide the lamp cover back in place. Then firmly fasten the screw of the lamp cover.
7. Turn the projector on and reset the lamp time using the LAMP TIME item in the OPTION menu.
 - (1) Press the **MENU** button to display a menu.
 - (2) Point at the ADVANCED MENU in the menu using the ▲/▼ cursor buttons, then press the ► cursor (or the **ENTER**) button.
 - (3) Point at the OPTION in the left column of the menu using the ▲/▼ cursor buttons, then press the ► cursor (or the **ENTER**) button.
 - (4) Point at the LAMP TIME using the ▲/▼ cursor buttons, then press the ► cursor (or the **ENTER** / the **RESET**) button. A dialog will appear.
 - (5) Press the ► cursor button to select the "OK" on the dialog. It performs resetting the lamp time.

lamp cover

Handles

⚠ CAUTION ► Do not touch any inner space of the projector, while the lamp is taken out.

NOTE • Please reset the lamp time only when you have replaced the lamp, for a suitable indication about the lamp.

Replacing the lamp (continued)

Lamp warning

HIGH VOLTAGE

HIGH TEMPERATURE

HIGH PRESSURE

⚠ WARNING ► The projector uses a high-pressure mercury glass lamp. The lamp can break with a loud bang, or burn out, if jolted or scratched, handled while hot, or worn over time. Note that each lamp has a different lifetime, and some may burst or burn out soon after you start using them. In addition, when the bulb bursts, it is possible for shards of glass to fly into the lamp housing, and for gas containing mercury to escape from the projector's vent holes.

► **About disposal of a lamp:** This product contains a mercury lamp; do not put it in a trash. Dispose of it in accordance with environmental laws.

- For lamp recycling, go to www.lamprecycle.org (in the US).
- For product disposal, consult your local government agency or www.eiae.org (in the US) or www.epsc.ca (in Canada).

For more information, call your dealer.

Disconnect the plug from the power outlet

- If the lamp should break (it will make a loud bang when it does), unplug the power cord from the outlet, and make sure to request a replacement lamp from your local dealer. Note that shards of glass could damage the projector's internals, or cause injury during handling, so please do not try to clean the projector or replace the lamp yourself.
- If the lamp should break (it will make a loud bang when it does), ventilate the room well, and make sure not to breathe the gas that comes out of the projector vents, or get it in your eyes or mouth.
- Before replacing the lamp, turn the projector off and unplug the power cord, then wait at least 45 minutes for the lamp to cool sufficiently. Handling the lamp while hot can cause burns, as well as damaging the lamp.

- Never unscrew except the appointed (marked by an arrow) screws.
- Do not open the lamp cover while the projector is suspended from a ceiling. This is dangerous, since if the lamp's bulb has broken, the shards will fall out when the cover is opened. In addition, working in high places is dangerous, so ask your local dealer to have the lamp replaced even if the bulb is not broken.
- Do not use the projector with the lamp cover removed. At the lamp replacing, make sure that the screws are screwed in firmly. Loose screws could result in damage or injury.

- Use only the lamp of the specified type.
- If the lamp breaks soon after the first time it is used, it is possible that there are electrical problems elsewhere besides the lamp. If this happens, consult your local dealer or a service representative.
- Handle with care: jolting or scratching could cause the lamp bulb to burst during use.
- Using the lamp for long periods of time, could cause it dark, not to light up or to burst. When the pictures appear dark, or when the color tone is poor, please replace the lamp as soon as possible. Do not use old (used) lamps; this is a cause of breakage.

Cleaning and replacing the air filter

The air filter has two kinds of filters inside. Please check and clean the air filter periodically. When the indicators or a message prompts you to clean the air filter, comply with it as soon as possible. If the filters are damaged or heavily soiled, replace them with the new ones. To prepare the new filters, make contact with your dealer and tell the following type number.

Type number : UX35971 (Filter unit)

When you replace the lamp, please replace the air filter. An air filter of specified type will come together with a replacement lamp for this projector.

1. Turn the projector off, and unplug the power cord.
Allow the projector to sufficiently cool down.
2. Use a vacuum cleaner on and around the filter cover.
3. Pick and pull up the filter cover knobs to take it off.
4. Use a vacuum cleaner for the filter vent of the projector.
5. Take the fine meshed filter out while holding the filter cover. It is recommended to leave the coarse meshed filter in the filter cover as it is.
6. Use a vacuum cleaner on both sides of the fine meshed filter while holding it so it will not be sucked in. Use a vacuum cleaner for the inside of the filter cover to clean up the coarse meshed filter. If the filters are damaged or heavily soiled, replace them with new ones.
7. Put the fine meshed filter on the coarse meshed one, turning its stitched side up.
8. Put the filter unit back into the projector.
9. Turn the projector on and reset the filter time using the FILTER TIME item in the EASY MENU.
 - (1) Press the **MENU** button to display a menu.
 - (2) Point at the FILTER TIME using the ▲/▼ cursor buttons, then press the ► cursor (or the **ENTER** / the **RESET**) button. A dialog will appear.
 - (3) Press the ► cursor button to select the “OK” on the dialog. It performs resetting the filter time.

Filter cover knobs

Filter unit

Filter cover
Filter (coarse meshed)
Filter (fine meshed)

Stitched side

⚠ WARNING ► Before taking care of the air filter, make sure the power cable is not plugged in, then allow the projector to cool sufficiently.

► Use only the air filter of the specified type. Do not use the projector without the air filter or the filter cover. It could result in a fire or malfunction to the projector.

► Clean the air filter periodically. If the air filter becomes clogged by dust or the like, internal temperatures rise and could cause a fire, a burn or malfunction to the projector.

NOTE • Please reset the filter time only when you have cleaned or replaced the air filter, for a suitable indication about the air filter.

• The projector may display the message such as the “CHECK THE AIR FLOW” or turn off the projector, to prevent the internal heat level rising.

Other care

Inside of the projector

In order to ensure the safe use of your projector, please have it cleaned and inspected by your dealer about once every year.

Caring for the lens

- If the lens is flawed, soiled or fogged, it can cause deterioration in display quality. Handle the projector carefully to prevent the lens from being scratched or soiled.
- If the lens is soiled or fogged, please take care of the lens by following steps below.

1. Turn the projector off, and unplug the power cord. Allow the projector to cool sufficiently.
2. After making sure that the projector is cool adequately, lightly wipe the lens with a commercially available lens-cleaning wipe. Do not touch the lens directly with your hand.

Caring for the cabinet and remote control

Incorrect care could have adverse influence such as discoloration, peeling paint, etc.

1. Turn the projector off, and unplug the power cord. Allow the projector to cool sufficiently.
2. After making sure that the projector is cool adequately, lightly wipe with gauze or a soft cloth.
If the projector is extremely dirty, dip soft cloth in water or a neutral cleaner diluted in water, and wipe lightly after wringing well. Then, wipe lightly with a soft, dry cloth.

⚠ WARNING ▶ Before caring, make sure the power cord is not plugged in, and then allow the projector to cool sufficiently. The care in a high temperature state of the projector could cause a burn and/or malfunction to the projector.

▶ Never try to care for the inside of the projector personally. Doing is so dangerous.

▶ Avoid wetting the projector or inserting liquids in the projector. It could result in a fire, an electric shock, and/or malfunction to the projector.

- Do not put anything containing water, cleaners or chemicals near the projector.
- Do not use aerosols or sprays.

⚠ CAUTION ▶ Please take right care of the projector according to the following. Incorrect care could cause not only an injury but adverse influence such as discoloration, peeling paint, etc.

▶ Do not use cleaners or chemicals other than those specified in this manual.

▶ Do not polish or wipe with hard objects.

Troubleshooting

If an abnormal operation should occur, stop using the projector immediately.

⚠ WARNING ► Never use the projector if abnormal operations such as smoke, strange odor, excessive sound, damaged casing or elements or cables, penetration of liquids or foreign matter, etc. should occur. In such cases, immediately disconnect the power plug from the power outlet. After making sure that the smoke or odor has stopped, contact to your dealer or service company.

Otherwise if a problem occurs with the projector, the following checks and measures are recommended before requesting repair.

If this does not resolve the problem, please contact your dealer or service company. They will tell you what warranty condition is applied.

(continued on next page)

Related messages

When some message appears, check and cope with it according to the following table. Although these messages will be automatically disappeared around several minutes, it will be reappeared every time the power is turned on.

Message	Description
	<p>There is no input signal. Please confirm the signal input connection, and the status of the signal source.</p>
	<p>The horizontal or vertical frequency of the input signal is not within the specified range. Please confirm the specs for your projector or the signal source specs.</p>
	<p>An improper signal is input. Please confirm the specs for your projector or the signal source specs.</p>
	<p>The interior temperature is too high, or has increased or decreased in a short term. Please turn the power off, and allow the projector to cool down at least 20 minutes. After having confirmed the following items, please turn the power on again.</p> <ul style="list-style-type: none"> • Is there blockage of the air passage aperture? • Is the air filter dirty? • Does the peripheral temperature exceed 35°C? • Does warm or cool air from an air conditioner or similar unit blow on the projector directly? <p>If the same indication is displayed after the remedy, please set FAN SPEED of the SERVICE item in the OPTION menu to HIGH.</p>
	<p>A note of precaution when cleaning the air filter. Please immediately turn the power off, and clean or change the air filter referring to the “Cleaning and replacing the air filter” section of this manual. After you have cleaned or changed the air filter, please be sure to reset the filter time (43).</p>
	<p>The button operation is not available (6).</p>

Regarding the indicator lamps

When operation of the **POWER**, **TEMP** and **LAMP** indicators differs from usual, check and cope with it according to the following table.

POWER	TEMP	LAMP	Description
Lighting In Orange	Turned off	Turned off	The projector is in a standby state. Please refer to the section “Power on/off”.
<i>Blinking</i> In Green	Turned off	Turned off	The projector is warming up. Please wait.
Lighting In Green	Turned off	Turned off	The projector is in an on state. Ordinary operations may be performed.
<i>Blinking</i> In Orange	Turned off	Turned off	The projector is cooling down. Please wait.
<i>Blinking</i> In Red	(discre- tionary)	(discre- tionary)	The projector is cooling down. A certain error has been detected. Please wait until POWER indicator finishes blinking, and then perform the proper measure using the item descriptions below.
<i>Blinking</i> In Red or Lighting In Red	Turned off	Lighting In Red	The lamp does not light, and there is a possibility that interior portion has become heated. Please turn the power off, and allow the projector to cool down at least 20 minutes. After the projector has sufficiently cooled down, please make confirmation of the following items, and then turn the power on again. <ul style="list-style-type: none"> • Is there blockage of the air passage aperture? • Is the air filter dirty? • Does the peripheral temperature exceed 35°C? If the same indication is displayed after the remedy, please change the lamp referring to the section “Replacing the lamp”.
<i>Blinking</i> In Red or Lighting In Red	Turned off	<i>Blinking</i> In Red	The lamp cover has not been properly fixed. Please turn the power off, and allow the projector to cool down at least 45 minutes. After the projector has sufficiently cooled down, please make confirmation of the attachment state of the lamp cover. After performing any needed maintenance, turn the power on again. If the same indication is displayed after the remedy, please contact your dealer or service company.

(Continued on next page)

Regarding the indicator lamps (continued)

POWER	TEMP	LAMP	Description
Blinking In Red or Lighting In Red	Blinking In Red	Turned off	The cooling fan is not operating. Please turn the power off, and allow the projector to cool down at least 20 minutes. After the projector has sufficiently cooled down, please make confirmation that no foreign matter has become caught in the fan, etc., and then turn the power on again. If the same indication is displayed after the remedy, please contact your dealer or service company.
Blinking In Red or Lighting In Red	Lighting In Red	Turned off	There is a possibility that the interior portion has become heated. Please turn the power off, and allow the projector to cool down at least 20 minutes. After the projector has sufficiently cooled down, please make confirmation of the following items, and then turn the power on again. <ul style="list-style-type: none"> • Is there blockage of the air passage aperture? • Is the air filter dirty? • Does the peripheral temperature exceed 35°C? • Does air from an air conditioner or similar unit blow on the projector directly? If the same indication is displayed after the remedy, please set FAN SPEED of SERVICE item in OPTION menu to HIGH (45).
Lighting In Green	Simultaneous <i>blinking in Red</i>		It is time to clean the air filter. Please immediately turn the power off, and clean or change the air filter referring to the section “Cleaning and replacing the air filter”. After cleaning or changing the air filter, please be sure to reset the filter timer. After the remedy, reset the power to ON.
Lighting In Green	Alternative <i>blinking in Red</i>		There is a possibility that the interior portion has become overcooled. Please use the unit within the usage temperature parameters (5°C to 35°C). After the treatment, reset the power to ON.

NOTE • When the interior portion has become overheated, for safety purposes, the projector is automatically shut down, and the indicator lamps may also be turned off. In such a case, disconnect the power cord, and wait at least 45 minutes. After the projector has sufficiently cooled down, please make confirmation of the attachment state of the lamp and lamp cover, and then turn the power on again.

Shutting the projector down

Only when the projector can not be turned off by usual procedure (📖14), please push the shutdown switch using a pin or similar, and disconnect the power plug from the power outlet. Before turning it on again, wait at least 10 minutes to make the projector cool down enough.

Shutdown switch

Resetting all settings

When it is hard to correct some wrong settings, the FACTORY RESET function of SERVICE item in OPTION menu (📖46) can reset all settings(except LANGUAGE, FILTER TIME, LAMP TIME, FILTER MESSAGE and SECURITY settings and etc.) to the factory default.

Phenomena that may be easy to be mistaken for machine defects

About the phenomenon confused with a machine defect, check and cope with it according to the following table.

Phenomenon	Cases not involving a machine defect	Reference page
Power does not come on.	The electrical power cord is not plugged in. Correctly connect the power cord.	11
	The main power source has been interrupted during operation such as by a power outage (blackout), etc. Please disconnect the power plug from the power outlet, and allow the projector to cool down at least 10 minutes, then turn the power on again.	11, 14
	Either there is no lamp and/or lamp cover, or either of these has not been properly fixed. Please turn the power off and disconnect the power plug from the power outlet, and allow the projector to cool down at least 45 minutes. After the projector has sufficiently cooled down, please make confirmation of the attachment state of the lamp and lamp cover, and then turn the power on again.	53, 54
Neither sounds nor pictures are outputted.	The signal cables are not correctly connected. Correctly connect the connection cables.	9
	Signal source does not correctly work. Correctly set up the signal source device by referring to the manual of the source device.	—
	The input changeover settings are mismatched. Select the input signal, and correct the settings.	15, 16
	The BLANK function for pictures and the MUTE function for sounds are working. AV MUTE may be active. Refer to the item “Sound does not come out” and “No pictures are displayed” on the next page to turn off the MUTE and BLANK functions.	15, 21, 44

(Continued on next page)

Phenomena that may be easy to be mistaken for machine defects (continued)

Phenomenon	Cases not involving a machine defect	Reference page
Sound does not come out.	The signal cables are not correctly connected. Correctly connect the audio cables.	9
	The MUTE function is working. Restore the sound pressing MUTE or VOLUME +/- button on the remote control.	15
	The volume is adjusted to an extremely low level. Adjust the volume to a higher level using the menu function or the remote control.	15
	The AUDIO SOURCE/SPEAKER setting is not correct. Correctly set the AUDIO SOURCE/SPEAKER in AUDIO menu.	36
No pictures are displayed.	The lens cover is attached. Remove the lens cover.	3
	The signal cables are not correctly connected. Correctly connect the connection cables.	9
	The brightness is adjusted to an extremely low level. Adjust BRIGHTNESS to a higher level using the menu function.	26
	The computer cannot detect the projector as a plug and play monitor. Make sure that the computer can detect a plug and play monitor using another plug and play monitor.	10
	The BLANK screen is displayed. Press the BLANK button on the remote control.	21
Video screen display freezes.	The FREEZE function is working. Press the FREEZE button to restore the screen to normal.	21
Colors have a faded- out appearance, or Color tone is poor.	Color settings are not correctly adjusted. Perform picture adjustments by changing the COLOR TEMP, COLOR, TINT and/or COLOR SPACE settings, using the menu functions.	27, 31
	COLOR SPACE setting is not suitable. Change the COLOR SPACE setting to AUTO, RGB, SMPTE240, REC709 or REC601.	31

(Continued on next page)

Phenomena that may be easy to be mistaken for machine defects (continued)

Phenomenon	Cases not involving a machine defect	Reference page
Pictures appear dark.	The brightness and/or contrast are adjusted to an extremely low level. Adjust the BRIGHTNESS and/or the CONTRAST settings to a higher level using the menu function.	26
	The ECO MODE function is working. Select the NORMAL for the ECO MODE item in the SETUP menu.	34
	The lamp is approaching the end of its product lifetime. Replace the lamp.	53, 54
Pictures appear blurry.	Either the focus and/or horizontal phase settings are not properly adjusted. Adjust the focus using the focus ring, and/or the H PHASE using the menu function.	18, 30
	The lens is dirty or misty. Clean the lens referring to the section “Caring for the lens”.	56
When the ASPECT is set to NATIVE, PICTURE POSITION does not work even if the vertical size of the displayed image does not fit visually on the effective display area.	Vertical resolution of the input signal is equal to or more than the vertical resolution of display area that is determined by 1.5 x D-ZOOM adjustment value. Change input signal resolution or/and D-ZOOM adjustment value so that vertical resolution of the input signal is less than 1.5 x D-ZOOM adjustment value (📖34).	34
RS-232C does not work.	The SAVING function is working. Select NORMAL for STANDBY MODE item in the SETUP menu.	35

NOTE • Although bright spots or dark spots may appear on the screen, this is a unique characteristic of liquid crystal displays, and it does not constitute or imply a machine defect.

Specifications

Specifications

Specifications

Item	Specification
Product name	Liquid crystal projector
Liquid Crystal Panel	786,432 pixels (1024 horizontal x 768 vertical)
Lens	F2.14 f=6.8mm
Lamp	180 W UHB
Speaker	1 W
Power supply	AC 100-120V/2.8A, AC220-240V/1.4A
Power consumption	250 W
Temperature range	5 ~ 35°C (Operating)
Size	333 (W) x 103 (H) x 303 (D) mm * Not including protruding parts. Please refer to the following figure.
Weight (mass)	approx. 3.5 kg
Ports	Computer input port COMPUTER IN1D-sub 15 pin mini x1 COMPUTER IN2D-sub 15 pin mini x1 Computer output port MONITOR OUTD-sub 15 pin mini x1 Video input port S-VIDEO mini DIN 4 pin x1 VIDEO RCA x1 Audio input/output port AUDIO IN1 Stereo mini x1 AUDIO IN2 Stereo mini x1 AUDIO IN3 (R, L) RCA x2 AUDIO OUT (R, L) RCA x2 Others CONTROL D-sub 9 pin x1
Optional parts	Lamp: DT01091 Filter set: UX35971 Mounting accessory: HAS-AW100 (Bracket for ceiling mount) HAS-204L (Fixing adaptor for low ceilings) HAS-304H (Fixing adaptor for high ceilings) Laser remote control: RC-R008 Cable cover: CCAW100 * For more information, please consult your dealer.
