Usage Notice

Precautions

Follow all warnings, precautions and maintenance as recommended in this user's guide to maximize the life of your unit.

⚠ **Warning**- Do not look into the projector's lens when the lamp is on. The bright light may hurt your eyes.

⚠ **Warning**- To reduce the risk of fire or electric shock, do not expose this product to rain or moisture.

⚠ **Warning**- Please do not open or disassemble the product as this may cause electric shock.

⚠ **Warning**- When changing the lamp, please allow unit to cool down, and follow all changing instructions.

⚠ **Warning**- This product will detect the life of the lamp itself. Please be sure to change the lamp when it shows warning messages.

⚠ **Warning**- Reset the "Lamp Reset" function from the On Screen Display "Management-->Lamp" menu after replacing the lamp module (refer to page 27).

⚠ **Warning**- When switching the projector off, please ensure the projector completes its cooling cycle before disconnecting power.

⚠ **Warning**- Turn on the projector first and then the signal sources.

⚠ **Warning**- Do not use lens cap when projector is in operation.

⚠ **Warning**- When the lamp reaches the end of its life, it will burn out and may make a loud popping sound. If this happens, the projector will not turn back on until the lamp module has been replaced. To replace the lamp, follow the procedures listed under "Replacing the Lamp".

Do:

- ❖ Turn off the product before cleaning.
- ❖ Use a soft cloth moistened with mild detergent to clean the display housing.
- ❖ Disconnect the power plug from AC outlet if the product is not being used for a long period of time.

Don't:

- ❖ Block the slots and openings on the unit provided for ventilation.
- ❖ Use abrasive cleaners, waxes or solvents to clean the unit.
- ❖ Use under the following conditions:
    - In extremely hot, cold or humid environments.
    - In areas susceptible to excessive dust and dirt.
    - Near any appliance that generates a strong magnetic field.
    - Place in direct sunlight.

Introduction

Product Features

This product is a 576p single chip 0.7" DLP™ projector. Outstanding features include:

- ◆ 1024 x 576 addressable pixels

- ◆ Single chip DLP™ technology

- ◆ NTSC/NTSC4.43/PAL/PAL-M/PAL-N/SECAM and HDTV compatible (480i/p, 576i/p, 720p, 1080i)

- ◆ HDCP compliant

- ◆ High-tech DVI-I connection for digital and analog video connectivity

- ◆ Wireless remote control

- ◆ User friendly multilingual on-screen display menu

- ◆ Advanced **digital** keystone correction and high quality full screen image re-scaling

- ◆ User friendly control panel

- ◆ **Picture-In-Picture dual image**

- ◆ UXGA, SXGA compression and VGA, SVGA, XGA

  re-sizing

- ◆ Mac compatible

Package Overview

This projector comes with all the items shown below. Check to make sure your unit is complete.

Projector with lens cap

Power Cord 1.8m

DVI to HDMI Adaptor

Composite Video Cable 1.8m

DVI to DVI Cable 1.8m

RCA Component Cable for YPbPr 1.8m

S-Video Cable 1.8m

SCART RGB/S-Video Adaptor
(For European Use Only)

2 x Battery

> ❖ Due to the difference in applications for each country, some regions may have different accessories.

Wireless Remote Controller

VGA to VGA
(For European Use Only)

Powering On/Off the Projector

Powering On the Projector

1. Remove the lens cap.
2. Ensure that the power cord and signal cable are securely connected. The Power LED will turn **red**.
3. Turn on the lamp by pressing "Power/Standby" button on the control panel. ❶

   The startup screen will display for 30 seconds and the Power LED will flash **green**.

   When the startup screen disappears, the Power LED will turn **green**.
4. Turn on your source (computer, notebook, video player, etc.). The projector will detect your source automatically.

❖ *If you connect multiple sources at the same time, use the "Source" button on the control panel to switch.*

❖Turn on the projector first and then the signal sources.

❶ Power/Standby

Installation

Powering Off the Projector

1. Press the "Power/Standby" button to turn off the projector lamp, you will see a message "**Wait 2 minutes before you can switch on again**" on the on-screen display.

2. Press the "Power/Standby" button again to confirm.

   Otherwise the message will disappear after **10** seconds.

3. The cooling fans continue to operate for about 120 seconds for cooling cycle and the Power LED will turn red. When the light **stops** flashing, the projector has entered standby mode.

   If you wish to turn the projector back on, you must wait until the projector has completed the cooling cycle and has entered standby mode. Once in standby mode, simply press "Power/Standby" button to restart the projector.

4. Disconnect the power cord from the electrical outlet and the projector.

5. Do not turn on the projector immediately following a power off procedure.

Warning Indicator

❖ *When the "TEMP" indicator turns red, it indicates the projector has overheated. The projector will automatically shut itself down. See page 31.*

❖ *When the "LAMP" indicator flashes **red (0.5 second intervals)**, it indicates a problem with the lamp. Turn off the projector and disconnect the power cord from the electrical outlet, then contact your local dealer or our service center. See page 31.*

❖ *When the "LAMP" indicator flashes **red (1 second intervals)**, it indicates **the fan failed**. Stop using the projector and disconnect the power cord from the electrical outlet, then contact your local dealer or our service center. See page 31.*

Installation

Adjusting the Projected Image

Adjusting the Projector Image Height

The projector is equipped with an elevator foot for adjusting the image height.

To raise the image:

1. Press the elevator button ❶.

2. Raise the image to the desired height angle ❷, then release the button to lock the elevator foot into position.

3. Use ❸ to fine-tune the display angle.

To lower the image:

1. Press the elevator button.

2. Lower the image, then release the button to lock the elevator foot into position.

3. Use ❸ to fine-tune the display angle.

Elevator Button

Elevator Foot

Tilt Adjusting Wheel
Installation

Adjusting the Projector Zoom / Focus

You may turn the zoom ring to zoom in or out. To focus the image, rotate the focus ring until the image is clear. The projector will focus at distances from 4.9 to 32.8 feet (1.5 to 10.0 meters).

Zoom Ring

Focus Ring
User Controls

Control Panel & Remote Control

There are two ways for you to control the functions: Remote Control and Control Panel.

Control Panel   *Remote Control*

Using the Control Panel

Power/Standby ⏻

▸ Refer to the "Power On/Off the Projector" section on pages 11-12.

Source ◀

▸ Press "Source" to choose RGB, Component-p, Component-i, S-Video, Composite Video and HDTV sources.

Menu 🗐

▸ Press "Menu" to launch the on screen display (OSD) menu. To exit OSD, press "Menu" again.

Keystone ▲ ◻ / ▼ ▽

▸ Adjusts image distortion caused by tilting the projector (±16 degrees).

Four Directional Select Keys

▸ Use ▲ ▼ ◀ ▶ to select items or make adjustments to your selection.

Enter ■

▸ Confirm your selection of items.

Re-Sync ▶ (Only Analog RGB signal valid)

▸ Automatically synchronizes the projector to the input source.

User Controls

English

Using the Remote Control

Power

▶ Refer to the "Power On/Off the Projector" section on pages 11-12.

Re-Sync

▶ Automatically synchronizes the projector to the input source.

Display Hide

▶ "Hide" immediately turns the screen gray. Press "Hide" a second time to restore the display.

Freeze

▶ Press "Freeze" to pause the screen image.

16 : 9

▶ Scale the image at a 16:9 aspect ratio.

Window

▶ Enable the viewing of a 4:3 PC output signal.

LTR-BOX (Letterbox)

▶ Enable the viewing of a 2.35:1 or 1.85:1 movie without black bars at the top and bottom of the screen. Some of the original image will be lost from the up and down edges of the screen.

Zoom In /Zoom Out

▶ Press "Zoom In" or "zoom Out" button to zoom in or zoom out of an image.

Keystone

▶ Adjusts image distortion caused by tilting the projector (±16 degrees).

Four Directional Select Keys

▶ Use ▲ ▼ ◀ ▶ to select items or make adjustments to your selection.

OK (Enter)

▶ Confirm your selection of items.

Menu

▶ Press "Menu" to launch the on screen display menu. To exit OSD, press "Menu" again.

BRIGHT (Brightness)

▶ Adjust the brightness of the image.

CONT (Contrast)

▶ Controls the degree of difference between the lightest and darkest parts of the picture.

MODE (Display Mode)

▶ Select the display mode from Cinema, Normal, Vivid, Dynamic and User.

COLOR (Colour)

▶ Adjust a video image from black and white to fully satu rated color.

RGB Adjustment

▶ Adjust the R (Red), G (Green), or B (Blue) for brightness and contrast.

Reset

▶ Reset the "Keystone" or "Zoom" to factory default settings.

LOCK (Source Lock)

▶ Select auto detection all connector ports or lock current connector port.

VGA

▶ Press "VGA" to change source to VGA connector. This connector supports Analog RGB, YPbPr (480p/576p/720p/1080i), YCbCr (480i/576i) and RGBsync.

DVI-I

▶ Press "DVI-I" to change source to DVI-I connector. This connector supports Digital RGB, Analog RGB, YPbPr (480p/576p/720p/1080i), YCbCr (480i/576i) and HDCP signal.

YPbPr (Component Source)

▶ Press "YPbPr" to change source to component connector. This connector supports YPbPr (480p/576p/720p/1080i) and YCbCr (480i/576i).

S-Video

▶ Press "S-Video" to change source to S-Video source.

Video (Composite Source)

▶ Press "Video" to change source to Composite Video source.

User Controls

On Screen Display Menus

The Projector has multilingual On Screen Display menus that allow you to make image adjustments and change a variety of settings. The projector will automatically detect the source.

How to operate

1. To open the OSD menu, press "Menu " on the Remote Control or Control Panel.

2. When OSD is displayed, use ◀ ▶ keys to select any item in the main menu. While making a selection on a particular page, press ▼ key to enter sub menu.

3. Use ▲ ▼ keys to select the desired item and adjust the settings by ◀ ▶ key.

4. Select the next item to be adjusted in the sub menu and adjust as described above.

5. Press "Menu" to confirm, and the screen will return to the main menu.

6. To exit, press "Menu"again. If you don't press any key, the projector will automatically disappear after 30 seconds. The OSD menu will close and the projector will automatically save the new settings.

Image-I

Display Mode

There are five factory presets optimized for various types of pictures: Cinema, Normal, Vivid ,Dynamic and User. You can customize contrast, brightness, color, tint, sharpness, and gamma for each preset mode.

Contrast

The contrast controls the degree of difference between the lightest and darkest parts of the picture. Adjusting the contrast changes the amount of black and white in the image.

▶ Press the ◀ to decrease the contrast.

▶ Press the ▶ to increase the contrast.

Brightness

Adjust the brightness of the image.

▶ Press the ◀ to darken image.

▶ Press the ▶ to lighten the image.

Colour (saturation)

Adjusts a video image from black and white to fully saturated color.

▶ Press the ◀ to decrease the amount of color in the image.

▶ Press the ▶ to increase the amount of color in the image.

Tint

Adjusts the color balance of red and green.

▶ Press the ◀ to increase the amount of green in the image.

▶ Press the ▶ to increase the amount of red in the image.

❖ "Colour" function is not supported under YPbPr source.

Colour temp.	Mid
DLP gamma	TV
DLP white peaking	5
Reset	Press OK to reset
Image-II

RGB

Press OK to adjust the R (Red), G (Green), or B (Blue) for brightness and contrast.

Color Temp.

The color temp control adjusts the color temperature of the image. At a higher temperature, the screen looks colder; at a lower temperature, the screen looks warmer.

DLP Gamma

Gamma affects how dark scenery is displayed. With a greater gamma value, dark scenery will look brighter. Use ◀ ▶ to adjust gamma values.

DLP White Peaking

The white peaking control adjusts the white segment of the DMD chip. "0" stands for minimal peaking, and "10" stands for maximum peaking. If you prefer a stronger image, adjust toward the maximum setting. For a smoother, more natural image, adjust towards the minimum setting.

Reset

Press OK to return the display parameters on all menus to their factory default settings.

Troubleshooting

If you experience trouble with the projector, refer to the following information. If the problem persists, please contact your local reseller or service center.

Problem: No image appears on screen.

▸ Ensure all the cables and power connections are correctly and securely connected as described in the "Installation" section.
▸ Ensure the pins of connectors are not crooked or broken.
▸ Check if the projection lamp has been securely installed. Please refer to the "Replacing the lamp" section.
▸ Make sure you have removed the lens cap and the projector is switched on.
▸ Ensure that the "Hide" feature is not enabled.

Problem: Partial, scrolling or incorrectly displayed image.

▸ Press the "Re-Sync" button on the Remote Control or Control Panel.
▸ If you use a PC:
  If the resolution of your computer is higher than 1024 x 768. Follow the steps outlined below to reset the resolution.

  For Windows 3.x:
  1. In the Windows Program Manager, click the "Windows Setup" icon in the Main group.
  2. Verify that your display resolution setting is less than or equal to 1024 x 768.

  For Windows 95,98,2000,XP:
  1. Open "My Computer" icon, the "Control Panel" folder, and then double click on the "Display" icon.
  2. Select the "Setting" tab.
  3. In the "Desktop Area" you will find the resolution setting. Verify that the resolution setting is less than or equal to 1024 x 768 resolution.

  If the projector is still not projecting the whole image, you will also need to change the monitor display you are using. Refer to the following steps.

Appendices

  4. Follow the above steps 1-2. Click on the "Advanced Properties" button.
  5. Select the "Change" button under the "Monitor" tab.
  6. Click on "Show all devices". Then select "Standard monitor types" under the "Manufacturers" box; choose the resolution mode you need under the "Models" box.
  7. Verify that the resolution setting of the monitor display is less than or equal to 1024 x 768.

▸ If you are using a Notebook PC:
  1. You are required to implement the above steps of resolution setting of the computer first.
  2. Switch the Notebook PC display to the "external display only" or "CRT only" mode.

▸ If you experience difficulty in changing resolutions or your monitor freezes, restart all the equipment and the projector.

Problem: The screen of the Notebook or PowerBook computer is not displaying your presentation.

▸ If you are using a Notebook PC:
  Some Notebook PCs may deactivate their screens when a second display device is in use. Refer to your computer's documentation for information on how to reactivate the monitor display.

▸ If you are using an Apple PowerBook:
  In Control Panels, open the PowerBook Display to select Video Mirroring "On".

Problem: Image is unstable or flickering
▸ Use "Phase" to correct it. Refer to page 24.
▸ Change the monitor color setting from your computer.

Problem: Image has vertical flickering bar
▸ Use "Frequency" to make an adjustment. Refer to page 24.
▸ Check and reconfigure the display mode of your graphic card to make it compatible with the product.

Problem: Image is out of focus
▸ Adjusts the Focus Ring on the projector lens. Refer to page 14.
▸ Make sure the projection screen is between the required distance 4.9 to 32.8 feet (1.5 to 10.0 meters) from the projector.

Appendices

English

Problem: The image is stretched when displaying 16:9 DVD.
The projector automatically detects 16:9 DVD and adjusts the aspect ratio by digitizing to full screen with 4:3 default setting.

If the image is still stretched, you will also need to adjust the aspect ratio by referring to the following:
- ▶ Please select 4:3 aspect ratio type on your DVD player if you are playing a 16:9 DVD.
- ▶ If you can't select 4:3 aspect ratio type on your DVD player, please select 4:3 aspect ratio in the on screen menu.

Problem: Image is reversed.
- ▶ Select "Management" from the OSD and adjust the projection direction. See page 26.

Problem: Lamp burns out or makes a popping sound
- ▶ When the lamp reaches its end of life, it will burn out and may make a loud popping sound. If this happens, the projector will not turn on until the lamp module has been replaced. To replace the lamp, follow the procedures in the "Replacing the Lamp". See page 33.

Problem: Message Reminders

▸ Standby :

> Wait 2 minutes before you can switch on again
> Press Power key again to confirm
> Press OK key to move this warning

▸ Over Temperature :

> The projector will switch off automatically.
> Please:
> 1 Allow cool down for 3 minutes
> 2 Make sure air in and outlets are no blocked
> 3 Clean the dust filter
> If the problem persists in spite of the above,
> please contact a service centre for repair.

▸ Fan Failed :

> The projector will switch off automatically.
> Please contact a service centre for repair.

▸ Replacing the lamp :

> Lamp life exceed

*E*nglish

Replacing the lamp

The projector will detect the lamp life itself. It will show you a warning message "Lamp life exceed" When you see this message, change the lamp as soon as possible.

Make sure the projector has been cooled down for at least 30 minutes before changing the lamp.

⚠ Warning: Lamp compartment is hot! Allow it to cool down before changing lamp!
⚠ Warning: To reduce the risk of personal injury, do not drop the lamp module or touch the lamp bulb. The bulb may shatter and cause injury if it is dropped.

Lamp Changing Procedure:

1. Switch off the power to the projector by pressing the Power button.
2. Allow the projector to cool down at least 30 minutes.
3. Disconnect the power cord.
4. Push up and Remove the cover.❶
5. Remove the 3 screws from the lamp module.❷
6. Pull out the lamp module.❸

To replace the lamp module, reverse the previous steps.

Appendices

Ceiling Mount Installation

1. To prevent damaging your projector, please use the ceiling mount package for installation.

2. If you wish to use a third party ceiling mount kit please ensure the screws used to attached a mount to the projector met the following specifications:

   ▸ **Screw type: M3**

   ▸ **Maximum screw length: 6mm**

❖ Please note that damage resulting from incorrect installation will invalidate the warranty.
