The following projector manual has not been modified or altered in any way.
Multimedia Projector

MODEL **PDG-DWL2500**

Owner's Manual

Trademarks
- DLP is a registered trademark of Texas Instruments. BrilliantColor and DynamicBlack are trademarks of Texas Instruments.
- HDMI, the HDMI logo and High-Definition Multimedia Interface are the trademarks or registered trademarks of HDMI Licensing, LLC.
- Trademark PJLink is a trademark applied for trademark rights in Japan, the United States of America and other coun-tries and areas.
- Each name of corporations or products in this book is either a registered trademark or a trademark of its respective corporation.

Features and Design

This Multimedia Projector is designed with the most advanced technology for portability, durability, and ease of use.

◆ **Large Screen in Limited Space**

Short focus lens allows you to project large images from short distance. (p.15)

◆ **3D Display Function**

This projector is capable of displaying 3D video with the Frame Sequential Format*, and you can view the dynamic 3D contents by wearing 3D glasses (pp.28, 48-49, 52).

*The compatible 3D image signal is only **Frame Sequential** format. The **Frame Packing** and **Side-by-side** formats are not supported. **Active Shutter** format 3D glasses are required to view projected images in 3D. (**DLP Link** and **IR** formats are compatible.)*

◆ **Compact Design**

This projector is designed compact in size and weight, and it can be installed overhead without interfering with the view, or can be installed on the floor without much space.

◆ **Multilanguage Menu Display**

The Operation menu is available in 24 languages: English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Finnish, Norwegian, Danish, Polish, Hungarian, Romanian, Russian, Brazilian Portuguese, Turkish, Arabic, Kazakh, Simplified Chinese, Traditional Chinese, Korean, Japanese and Thai. (p.50)

◆ **Helpful Maintenance Functions**

Lamp and filter maintenance functions provide for better and proper maintenance of the projector.

◆ **Direct OFF Function**

With the Direct OFF function, you can disconnect the power cord from the wall outlet or turn off the breaker even during projection (p.22).

◆ **Auto Setup Function**

This function enables Input search and Auto PC adjustment by simply pressing the AUTO SET button (pp.26, 51).

◆ **Switchable Interface Terminal**

The projector provides a switchable interface terminal. You can use the terminal as computer input or monitor output conveniently. (p.56)

◆ **Digital Zoom (for Computer)**

The digital zoom function allows you to focus on crucial information during a presentation. You can expand the images approx. 16 times the screen size and compress them to approximately a quarter of the screen size. (p.39)

◆ **Colorboard Function**

At the time of simple projection on colored wall or school blackboard (The board color is limited to green.), you can get the close color image to the color image projected on a white screen by selecting the similar color to the wall color from the preset colors. (pp.40, 47)

◆ **Power Management**

The Power management function reduces power consumption and maintains lamp life. (p.57)

◆ **Security Features**

The Security function helps you to ensure security of the projector. With the Key lock function, you can lock the operation on the top control or remote control (p.59). PIN code lock function prevents unauthorized use of the projector (pp.21, 59–60).

◆ **Logo Function**

The Logo function allows you to customize the screen logo. The Logo page identifies the owner of the projector. (pp.53-55)

◆ **Simple Computer System Setting**

The projector has a Multi-scan system to conform to almost all computer output signals quickly. (p.32)

◆ **Closed caption**

Closed Caption is a function that displays the audio portion of a TV program as text on the screen. The closed captioning service is available mainly in the U.S. You can turn on the feature and switch the channels. (p.58)

◆ **LAN Network Function**

This projector is loaded with the Wired function. You can manage the projector via network. For details, refer to the owner's manual "Network Set-up and Operation."

✔**Note:**
- *The On-Screen Menu and figures in this manual may differ slightly from the product.*
- *The contents of this manual are subject to change without notice.*

Table of Contents

To the Owner

Before installing and operating this projector, read this manual thoroughly.

This projector provides many convenient features and functions. Operating the projector properly enables you to manage those features and maintains it in good condition for many years to come.

Improper operation may result in not only shortening the product-life, but also malfunctions, fire hazard, or other accidents.

If your projector seems to operate improperly, read this manual again, check operations and cable connections and try the solutions in the "Troubleshooting" section in the back of this manual. If the problem still persists, contact the dealer where you purchased the projector or the service center.

CAUTION
RISK OF ELECTRIC SHOCK **DO NOT OPEN**

CAUTION:	TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE EXCEPT LAMP REPLACEMENT. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.
	THIS SYMBOL INDICATES THAT DANGEROUS VOLTAGE CONSTITUTING A RISK OF ELECTRIC SHOCK IS PRESENT WITHIN THIS UNIT.
	THIS SYMBOL INDICATES THAT THERE ARE IMPORTANT OPERATING AND MAINTENANCE INSTRUCTIONS IN THE OWNER'S MANUAL WITH THIS UNIT.

FOR EU USERS

The symbol mark and recycling systems described below apply to EU countries and do not apply to countries in other areas of the world.

Your product is designed and manufactured with high quality materials and components which can be recycled and/or reused.

The symbol mark means that electrical and electronic equipment, batteries and accumulators, at their end-of-life, should be disposed of separately from your household waste.

Note:
If a chemical symbol is printed beneath the symbol mark, this chemical symbol means that the battery or accumulator contains a heavy metal at a certain concentration. This will be indicated as follows: *Hg: mercury, Cd: cadmium, Pb: lead*

In the European Union there are separate collection systems for used electrical and electronic equipment, batteries and accumulators.

Please, dispose of them correctly at your local community waste collection/recycling centre.

Please, help us to conserve the environment we live in!

⚠ Safety Precaution

WARNING: ● **THIS APPARATUS MUST BE EARTHED.**
● **TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.**

– This projector produces intense light from the projection lens. Do not stare directly into the lens, otherwise eye damage could result. Be especially careful that children do not stare directly into the beam.
– Install the projector in a proper position. Otherwise it may result in fire hazard.
– Allowing the proper amount of space on the top, sides, and rear of the projector cabinet is critical for proper air circulation and cooling of the unit. The dimension shown here indicate the minimum space required.
If the projector is to be built into a compartment or similarly enclosed, these minimum distances must be maintained.

1.5' (50 cm)   3' (1 m)
– Do not cover the ventilation slot on the projector. Heat build-up can reduce the service life of your projector, and can also be dangerous.
– If the projector is unused for an extended time, unplug the projector from the power outlet.

⚠ CAUTION

DO NOT SET THE PROJECTOR IN GREASY, WET, OR SMOKY CONDITIONS SUCH AS IN A KITCHEN TO PREVENT A BREAKDOWN OR A DISASTER. IF THE PROJECTOR COMES IN CONTACT WITH OIL OR CHEMICALS, IT MAY BECOME DETERIORATED.

CAUTION
Not for use in a computer room as defined in the Standard for the Protection of Electronic Computer/Data Processing Equipment, ANSI/NFPA 75.

READ AND KEEP THIS OWNER'S MANUAL FOR LATER USE.

Safety Instructions

All the safety and operating instructions should be read before the product is operated.

Read all of the instructions given here and retain them for later use. Unplug this projector from AC power supply before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.

Follow all warnings and instructions marked on the projector.

For added protection to the projector during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet. This will prevent damage due to lightning and power line surges.

Do not expose this unit to rain or use near water... for example, in a wet basement, near a swimming pool, etc...

Do not use attachments not recommended by the manufacturer as they may cause hazards.

Do not place this projector on an unstable cart, stand, or table. The projector may fall, causing serious injury to a child or adult, and serious damage to the projector. Use only with a cart or stand recommended by the manufacturer, or sold with the projector. Wall or shelf mounting should follow the manufacturer's instructions, and should use a mounting kit approved by the manufacturers.

An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

Slots and openings in the back and bottom of the cabinet are provided for ventilation, to ensure reliable operation of the equipment and to protect it from overheating.

The openings should never be covered with cloth or other materials, and the bottom opening should not be blocked by placing the projector on a bed, sofa, rug, or other similar surface. This projector should never be placed near or over a radiator or heat register.

This projector should not be placed in a built-in installation such as a book case unless proper ventilation is provided.

Never push objects of any kind into this projector through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the projector.

Do not install the projector near the ventilation duct of air-conditioning equipment.

This projector should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied, consult your authorized dealer or local power company.

Do not overload wall outlets and extension cords as this can result in fire or electric shock. Do not allow anything to rest on the power cord. Do not locate this projector where the cord may be damaged by persons walking on it.

Do not attempt to service this projector yourself as opening or removing Covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Unplug this projector from wall outlet and refer servicing to qualified service personnel under the following conditions:
a. When the power cord or plug is damaged or frayed.
b. If liquid has been spilled into the projector.
c. If the projector has been exposed to rain or water.
d. If the projector does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the projector to normal operation.
e. If the projector has been dropped or the cabinet has been damaged.
f. When the projector exhibits a distinct change in performance-this indicates a need for service.

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or injury to persons.

Upon completion of any service or repairs to this projector, ask the service technician to perform routine safety checks to determine that the projector is in safe operating condition.

NOTE FOR CUSTOMERS IN THE US
(Hg)LAMP(S) INSIDE THIS PRODUCT CONTAIN MERCURY AND MUST BE RECYCLED OR DISPOSED OF ACCORDING TO LOCAL, STATE OR FEDERAL LAWS.

Air Circulation

Openings in the cabinet are provided for ventilation. To ensure reliable operation of the product and to protect it from overheating, these openings must not be blocked or covered.

⚠ CAUTION

Hot air is exhausted from the exhaust vent. When using or installing the projector, the following precautions should be taken.

– Do not put any flammable object or spray can near the projector, hot air is exhausted from the air vents.
– Keep the exhaust vent at least 3' (1 m) away from any objects.
– Do not touch a peripheral part of the exhaust vent, especially screws and metallic parts. These areas will become hot while the projector is being used.
– Do not put anything on the cabinet. Objects put on the cabinet will not only get damaged but also may cause fire hazard by heat.

Cooling fans are provided to cool down the projector. The fans' running speed is changed according to the temperature inside the projector.

Air Flow

Exhaust Vent
(Hot air exhaust)
Filter Maintenance

The projector uses a lamp which generates significant heat. The cooling fans and air vents are provided to dissipate the heat by drawing air into the housing and the filter is located in the intake vents to prevent dust from getting inside of the projector.
In order to care for the projector appropriately, regular cleaning is required. Remove any dirt or dust that has accumulated on the projector.

If the projector reaches a time set in the timer setting, a Filter warning icon (Fig. 1) appears on the screen, indicating that the filter replacement is necessary. Blocking the air vents and leaving the projector uncleaned for a long time may not only damage the projector and may require costly repairs but may also cause accidents or fire.

For maintenance of the filter, refer to "Filter counter" on page 62 and "Maintenance and Care" on page 65.

Damages to the projector caused by using an uncleaned filter or improper maintenance will void the warranty on the projector.

Fig.1   Filter warning icon

Moving the Projector

When moving the projector, retract adjustable feet to prevent damage to the cabinet. When the projector is not in use for an extended period, put it into a suitable case.
Handle the projector carefully; do not drop, bump, subject it to strong forces, or put other things on the cabinet.

⚠ CAUTION IN CARRYING OR TRANSPORTING THE PROJECTOR

– Do not drop or bump the projector, otherwise damages or malfunctions may result.
– When carrying the projector, use a suitable case.
– Do not transport the projector by courier or any other transport service in an unsuitable transport case. This may cause damage to the projector. For information about transporting the projector by courier or any other transport service, consult your dealer.
– Do not put the projector in a case before it is cooled enough.

Installing the Projector in Proper Position

Install the projector properly. Improper installation may reduce the lamp life and cause fire hazard.

Do not roll the projector more than 10 degrees from side to side.

10°
10°
Do not roll the projector more than 5 degrees from side to side when front or rear is downward.

5°
5°
5°
5°
Do not put the projector on either side to project an image.

±10°
±10°
±10°
±10°
±10°
✔**Note:**
  • *Fix the projector when installing it so that the projector would not fall down.*

⚠ **CAUTION**

Choose the running speed of cooling fans in the fan control setting according to the altitude in which the projector is being used (p.61). Failure to do so may affect the projector life.

⚠ **CAUTION ON CEILING MOUNTING**

For ceiling mounting, you need the ceiling mount kit designed for this projector. When not mounted properly, the projector may fall, causing hazards or injury. For details, consult your dealer. The warranty on this projector does not cover any damage caused by use of any non-recommended ceiling mount kit or installation of the ceiling mount kit in an improper location.

⚠ **Cautious use of equipment with laser technology**

Do not radiate strong light such as laser light on the projection lens directly, as this may degrade the functionality of the projector, and will void any applicable warranties.

Compliance

Federal Communications Commission Notice

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

– Reorient or relocate the receiving antenna.
– Increase the separation between the equipment and receiver.
– Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
– Consult the dealer or an experienced radio/TV technician for help.

Use of shielded cable is required to comply with class B limits in Subpart B of Part 15 of FCC Rules.
Do not make any changes or modifications to the equipment unless otherwise specified in the instructions. If such changes or modifications should be made, you could be required to stop operation of the equipment.

Model Number   : PDG-DWL2500
Trade Name   : Sanyo
Responsible party   : SANYO NORTH AMERICA CORPORATION
Address   : 21605 Plummer Street, Chatsworth, California 91311
Telephone No.   : (818)998-7322

AC Power Cord Requirement

The AC Power Cord supplied with this projector meets the requirement for use in the country you purchased it.

AC Power Cord for the United States and Canada:

AC Power Cord used in the United States and Canada is listed by the Underwriters Laboratories (UL) and certified by the Canadian Standard Association (CSA).
AC Power Cord has a grounding-type AC line plug. This is a safety feature to be sure that the plug will fit into the power outlet. Do not try to defeat this safety feature. Should you be unable to insert the plug into the outlet, contact your electrician.

GROUND

AC Power Cord for the United Kingdom:

This cord is already fitted with a moulded plug incorporating a fuse, the value of which is indicated on the pin face of the plug. Should the fuse need to be replaced, an ASTA approved BS 1362 fuse must be used of the same rating, marked thus ⊛. If the fuse cover is detachable, never use the plug with the cover omitted. If a replacement fuse cover is required, ensure it is of the same colour as that visible on the pin face of the plug (i.e. red or orange). Fuse covers are available from the Parts Department indicated in your User Instructions.
If the plug supplied is not suitable for your socket outlet, it should be cut off and destroyed.
The end of the flexible cord should be suitably prepared and the correct plug fitted.
WARNING : A PLUG WITH BARED FLEXIBLE CORD IS HAZARDOUS IF ENGAGED IN A LIVE SOCKET OUTLET.
The Wires in this mains lead are coloured in accordance with the following code:
  Green-and-yellow . . Earth
  Blue . . . .   Neutral
  Brown . . . .   Live
As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug proceed as follows:
The wire which is coloured green-and-yellow must be connected to the terminal in the plug which is marked by the letter E or by the safety earth symbol ⏚ or coloured green or green-and-yellow.
The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black.
The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red.
WARNING: THIS APPARATUS MUST BE EARTHED.

  THE SOCKET-OUTLET SHOULD BE INSTALLED NEAR THE EQUIPMENT AND EASILY ACCESSIBLE.

Part Names and Functions

Front

Rear
① **Top Controls and Indicators**

② **Infrared Remote Receiver**

⚠ CAUTION

The infrared remote receiver sticks out of the cabinet surface. If the infrared remote receiver is put on the wall or floor directly, the infrared remote receiver may damage.

③ **Lamp Cover (Lamp and Air Filter)**

④ **Adjustable feet**

⑤ **Speaker**

⑥ **Exhaust vent**

⚠ CAUTION

Hot air is exhausted from the exhaust vent. Do not put heat-sensitive objects near this side.
⑦ **Air Intake vent**

⑧ **Projection Window**

⚠ WARNING

The projection window becomes very hot during use. Do not put your hand or objects on the projection window. High temperature from light beam may damage light-blocking objects and result in fire hazard.

✔Note:
Do not touch the projection window, otherwise, the window may be soiled and the image can be smudgy.

⑨ **Focus Lever**

⑩ **LAN Connection Terminal**

⑪ **Terminals and Connectors**

⑫ **Power Cord Connector**

⑬ **Security Bar**

✔Note:
⑩ *LAN Connection Terminal is for the Network function. Refer to the owner's manual of "Network Set-up and Operation".*

✳ **Kensington Security Slot**
This slot is for a Kensington lock used to deter theft of the projector.

  * *Kensington is a registered trademark of ACCO Brands Corporation.*

Side Terminal

① **S-VIDEO IN**
Connect the S-VIDEO output signal from video equipment to this jack (p.17).

② **VIDEO IN**
Connect the composite video output signal to this jack (p.17).

③ **AUDIO IN**
Connect the audio output signal from video equipment connected to ① or ② to this jack. For a monaural audio signal (a single audio jack), connect it to the L (MONO) jack (p.17).

④ **COMPUTER 1/COMPONENT AUDIO IN**
Connect the audio output (stereo) from a computer or video equipment connected to ⑩ or ⑫ to this jack (pp.16, 18).

⑤ **COMPUTER 2 AUDIO IN**
Connect the audio output (stereo) from a computer connected to ⑪ to this jack (pp.16, 18).

⑥ **AUDIO OUT (VARIABLE)**
Connect an external audio amplifier to this jack (pp.16-18).
This terminal outputs sound from AUDIO IN terminal (③, ④ or ⑤) or HDMI terminal ⑫ (digital audio).

⑦ **CONTROL PORT**
When controlling the projector with RS-232C, connect the control equipment to this connector with the serial control cable.

⑧ **3D SYNC OUT**
Connect a 3D sync. signal cable for an IR wireless emitter to this jack (p.48)

⑨ **LAN Connection Terminal**
Connect the LAN cable (refer to the owner's manual of "Network Set-up and Operation").

⑩ **COMPUTER IN 1/COMPONENT IN**
Connect output signal from a computer, RGB scart 21-pin video output or component video output to this terminal (pp.16, 18).

⑪ **COMPUTER IN 2/MONITOR OUT**
This terminal is switchable and can be used for input from a computer or output to the other monitor.

Set the terminal up as either Computer input or Monitor output properly. [Used for Monitor out, this terminal outputs only incoming signal from COMPUTER IN 1/COMPONENT IN terminal (pp. 16, 56)].

⑫ **HDMI**
Connect the HDMI signal from computer or video equipment to this terminal (pp.16, 18).

Top Controls and Indicators
① **POWER indicator**
– Turn red when the projector is in the stand-by mode.
– Turn green while the projector is under operation (pp.20, 74).
– Blink green in the Power management mode (pp.57, 74)

② **WARNING TEMP. indicator**
Emit a red light when the projector detects abnormal condition. This also blinks red when the internal temperature of the projector exceeds the operating range (pp. 64, 74).

③ **LAMP REPLACE indicator**
Turn yellow when the life of the projection lamp draws to an end (pp. 67, 74).

④ **3D indicator**
Turn blue when the projector is in 3D mode (pp. 48-49, 74).

⑤ **SELECT button**
– Execute the selected item (p.23).
– Zoom in and out the image in the Digital zoom mode (p.39).

⑥ **ON/STAND-BY button**
Turn the projector on or off (pp.20-22).

⑦ **AUTO SETUP button**
Execute the setting of Auto setup (includes Input search function and Auto PC adj. function). (pp.26, 51)

⑧ **KEYSTONE button**
Correct the keystone distortion (pp.26, 40, 47).

⑨ **MENU button**
Open or close the On-Screen Menu (p.23).

⑩ **Point ▲▼◄► buttons**
– Select an item or adjust the value in the On-Screen Menu (p.23).
– Pan the image in Digital zoom + mode (p.39).
– Adjust the volume level (with Point ◄► buttons) (p.27).
– Adjust the screen size (with Point ▲▼ buttons) (p.25).

⑪ **Infrared Remote Receiver**
The protruding shape allows wide-angle remote control signal reception.

Remote Control

① **ON/STAND-BY button**
  Turn the projector on or off. (pp.20-22)

② **AUTO SET button**
  Execute the setting of Auto setup (includes Input search function and Auto PC adj. function). (pp.26, 51)

③ **COMPUTER 1/2 buttons**
  Select the COMPUTER 1 or COMPUTER 2 input source. (pp.30-31, 42)

④ **VIDEO button**
  Select the VIDEO input source. (p.41)

⑤ **S-VIDEO button**
  Select the S-VIDEO input source. (p.41)

⑥ **Point ▲▼◄► buttons**
  – Select an item or adjust the value in the On-Screen Menu. (p.23)
  – Pan the image in the Digital zoom + mode. (p.39)

⑦ **SCREEN button**
  Select a screen mode. (pp.29, 38-40, 46-47)

⑧ **MENU button**
  Open or close the On-Screen Menu. (p.23)

⑨ **FREEZE button**
  Freeze the picture on the screen. (p.28)

⑩ **NO SHOW button**
  Temporarily turn off the image on the screen. (p.29)

⑪ **D.ZOOM ▲▼ buttons**
  Zoom in and out the images. (pp.28, 39)

⑫ **VOLUME +/- buttons**
  Adjust the volume level. (p.27)

⑬ **MUTE button**
  Mute the sound. (p.27)

⑭ **IMAGE button**
  Select the image mode. (pp.29, 36)

⑮ **3D button**
  Operate the 3D function. (pp.48-49)

⑯ **LAMP button**
  Select a lamp mode. (pp.28, 58)

⑰ **P-TIMER button**
  Operate the P-timer function. (p.29)

⑱ **INFO. button**
  Operate the information function. (pp.28, 63)

⑲ **KEYSTONE button**
  Correct the keystone distortion. (pp.26, 40, 47)

⑳ **SELECT button**
  – Execute the selected item. (p.23)
  – Zoom in and out the image in Digital zoom mode. (p.39)

㉑ **COMPONENT button**
  Select the COMPONENT input source. (p.42)

㉒ **HDMI button**
 Select the HDMI input source. (p.42)
✔Note:
  To ensure safe operation, please observe the following precautions:
  • Do not bend, drop, or expose the remote control to moisture or heat.
  • For cleaning, use a soft dry cloth. Do not apply benzene, thinner, spray, or any chemical material.
Remote Control Battery Installation

1 Open the battery compartment lid.

2 Install new batteries into the compartment.

3 Replace the compartment lid.

Two AAA size batteries
For correct polarity (+ and –), be sure battery terminals are in contact with pins in compartment.

⚠ To ensure safe operation, please observe the following precautions :
● Use two (2) AAA or LR03 type alkaline batteries.
● Always replace batteries in sets.
● Do not use a new battery with a used battery.
● Avoid contact with water or liquid.
● Do not expose the remote control to moisture or heat.
● Do not drop the remote control.
● If the battery has leaked on the remote control, carefully wipe the case clean and install new batteries.
● Risk of an explosion if battery is replaced by an incorrect type.
● Dispose of used batteries according to the instructions or your local disposal rule or guidelines.

Remote Control Operating Range

Point the remote control toward the projector (Infrared Remote Receiver) when pressing the buttons. See the below figures indicating Maximum operating range for the remote control.

11.5' (3.5 m)   16.4' (5 m)

16.4' (5 m)
Remote Control Code

The two different remote control codes (**Code 1**-**Code 2**) are assigned to this projector. Switching the remote control codes prevents interference from other remote controls when several projectors or video equipment next to each other are operated at the same time. Change the remote control code for the projector first before changing that for the remote control. See "Remote control" in the Setting Menu on page 58.

Press and hold the MENU and IMAGE buttons for more than five seconds to switch between the **Code 1** and **Code 2**. The initial code is set to **Code 1**.

MENU button

IMAGE button
Installation

Positioning the Projector

For projector positioning, see the figures below. The projector should be set perpendicularly to the plane of the screen.
Screen

✔**Note:**
- *This projector is not equipped with an optical zoom. To adjust the screen size, change the throw distance.*
- *The brightness in the room has a great influence on picture quality. It is recommended to limit ambient lighting in order to obtain the best image.*
- *All measurements are approximate and may vary from the actual sizes. Make sure to check the position of images by projecting images on the screen before installing the projector and screen, since each projector shows slight variations.*
- *Make sure to project images on a flat screen.*
- *Even slight warpage or irregularities of the screen may have an effect on the quality of the projected images.*

Screen Size (W x H) mm 16:10 aspect ratio	60"	80"	110"
	1292 x 808	1723 x 1077	2369 x 1481
A	12.60" (32.0 cm)	16.14" (41.0 cm)	21.46" (54.5 cm)
B	9.06" (23.0 cm)	12.60" (32.0 cm)	17.91" (45.5 cm)
C	-2.60" (-6.6 cm)	0.95" (2.4 cm)	6.26" (15.9 cm)
D	8.86" (22.5 cm)	10.43" (26.5 cm)	12.80" (32.5 cm)
E	1.85" (4.7 cm)	3.43" (8.7 cm)	5.79" (14.7 cm)

Adjustable Feet

Projection angle can be adjusted within -1.0 to +1.0 degree with the adjustable feet.

Rotate the adjustable feet and tilt the projector to the proper height; to raise the projector, rotate the both feet clockwise.

To lower the projector or to retract the adjustable feet, rotate the both feet counterclockwise.

To correct keystone distortion, press the KEYSTONE button on the remote control or on the top control or select Keystone from the menu (See pages 26, 40, 47).

Adjustable Feet

Unplug the power cords of both the projector and external equipment from the AC outlet before connecting cables.
Connecting the AC Power Cord

This projector uses nominal input voltages of 100–240 V AC and it automatically selects the correct input voltage. It is designed to work with single-phase power systems having a grounded neutral conductor. To reduce the risk of electrical shock, do not plug into any other type of power system.
If you are not sure of the type of power being supplied, consult your authorized dealer or service center.
Connect the projector with all peripheral equipment before turning it on.

⚠ **CAUTION**

The AC outlet must be near this equipment and must be easily accessible.

✔**Note:**
Unplug the AC power cord when the projector is not in use. When this projector is connected to an outlet with the AC power cord, it is in Stand-by mode and consumes a little electric power.

Connect the AC power cord (supplied) to the projector.

NOTE ON THE POWER CORD
AC power cord must meet requirement of the country where you use the projector.
Confirm the AC plug type with the chart below and proper AC power cord must be used.
If supplied AC power cord does not match your AC outlet, contact your sales dealer.

Projector side	**AC outlet side**		
	For the U.S.A. and Canada	**For Continental Europe**	**For the U.K.**
	Ground		Ground

Basic Operation

Turning On the Projector

1 Complete peripheral connections (with a computer, VCR, etc.) before turning on the projector.

2 Connect the projector's AC power cord into an AC outlet. The POWER indicator lights red.

3 Press the ON/STAND-BY button on the remote control or on the top control. The POWER indicator lights green and the cooling fans start to operate. The preparation display appears on the screen and the countdown starts.

4 After the countdown, the input source that was selected the last time and the lamp control status icon (See page 58) appear on the screen.

5 If there is no signal input when start on the projector, or the current signal is missed while operating the projector, the Video / PC selection window will be displayed on the screen, please move the pointer to input source desired by pressing the Point ▲▼ buttons and press the SELECT button. And then follow the input signal guidance window to correct the signal and connection.

If the projector is locked with a PIN code, PIN code input dialog box will appear. Enter the PIN code as instructed on the next page.

Enter a PIN code

Use the Point ▲▼ buttons to enter a number. Press the Point ▶ button to fix the number and move the red frame pointer to the next box. The number changes to ✳. If you fixed an incorrect number, use the Point ◀ button to move the pointer to the number you want to correct, and then enter the correct number.

Repeat this step to complete entering a four-digit number.

After entering the four-digit number, move the pointer to "Set". Press the SELECT button so that you can start to operate the projector.

If you entered an incorrect PIN code, **PIN code** and the number (✳✳✳✳) will turn red for a moment. Enter the correct PIN code all over again.

What is PIN code?

PIN (Personal Identification Number) code is a security code that allows the person who knows it to operate the projector. Setting a PIN code prevents unauthorized use of the projector.

A PIN code consists of a four-digit number. Refer to the PIN code lock function in the Setting Menu on pages 59-60 for locking operation of the projector with your PIN code.

⚠ **CAUTION ON HANDLING PIN CODE**
If you forget your PIN code, the projector can no longer be started. Take a special care in setting a new PIN code; write down the number in a column on page 80 of this manual and keep it on hand. Should the PIN code be missing or forgotten, consult your dealer or service center.

PIN Code Input Dialog Box

After the OK icon disappears, you can operate the projector.

✔**Note:**
- *If the PIN code number is not entered within three minutes after the PIN code dialog box appeared, the projector will be turned off automatically.*
- *The "1234" is set as the initial PIN code at the factory.*

Turning Off the Projector

1 Press the ON/STAND-BY button on the remote control or on the top control, and **Power off?** appears on the screen.

**2** Press the ON/STAND-BY button again to turn off the projector. The POWER indicator starts to blink red, and the cooling fans keep running. (You can select the level of fans' quietness and speed. See "Fan" on page 61.) At this time, you can unplug the AC power cord even if the fans are still running.

3 When the projector has cooled down enough, the POWER indicator stops blinking and you can turn on the projector.
Power off ?

Power off? disappears after 4 seconds.

⚠ TO MAINTAIN THE LIFE OF THE LAMP, ONCE YOU TURN THE PROJECTOR ON, WAIT AT LEAST FIVE MINUTES BEFORE TURNING IT OFF.

⚠ DO NOT OPERATE THE PROJECTOR CONTINUOUSLY WITHOUT REST. CONTINUOUS USE MAY RESULT IN SHORTENING THE LAMP LIFE. TURN OFF THE PROJECTOR AND LET STAND FOR ABOUT AN HOUR IN EVERY 24 HOURS.

Direct OFF Function

You can disconnect the power cord from the wall outlet or turn off the breaker even during projection without pressing the on/stand-by button.

✔**Note:**

- *When the Direct on function is set to **On**, the projector will be turned on automatically by connecting the AC power cord to an AC outlet. (p. 57)*
- *The running speed of cooling fans is changed according to the temperature inside the projector.*
- *Do not put the projector in a case before the projector is cooled enough.*
- *If the WARNING TEMP. indicator blinks or lights red, see "WARNING TEMP. indicator" on page 64.*
- *While the POWER indicator is blinking, the lamp is being cooled down and the projector can not be turned on. Wait until the POWER indicator stops blinking to turn on the projector again.*
- *The fan rotation will terminate directly if the AC power cord is unplugged immediately after the projector is turned off.*
- *The projector can be turned on after the POWER indicator turns red. The waiting time to restart will be shortened when the normal power-off processing for fan cooling is completed, compared with the time the AC power cord is immediately unplugged after the power-off.*
✔**Note:**

- *When using the Direct OFF function, you can not restart the projector immediately after the power is disconnected. If the external power supply is suddenly cut off, the fans stop immediately. The lamp remains high temperature and needs to be cooled.*
How to Operate the On-Screen Menu

The projector can be adjusted or set via the On-Screen Menu. The menu has a hierarchical structure, with a main menu that is divided into submenus, which are further divided into other submenus. For each adjustment and setting procedure, refer to respective sections in this manual.

1 Press the MENU button on the remote control or on the top control to display the On-Screen Menu.

2 Use the Point ▲▼ buttons to highlight and select a main menu item. Press the Point ▶ or the SELECT button to access the submenu items. (The selected item is highlighted in orange.)

3 Use the Point ▲▼ buttons to select the desired submenu item and press the SELECT button to set or access the selected item.

4 Use the Point ▲▼◄► buttons to adjust the setting or switch between each option and press the SELECT button to activate it and return to the submenu.

5 Press the Point ◄ button to return to the main menu. Press the MENU button to exit the On-Screen Menu.

2 Use the Point ▲▼ buttons to select **Computer 2** and then press the SELECT button.

**3** When **Computer 2** is selected, analog RGB input source will be selected directly.
✔**Note:**
*When the Input Search function is set to **On 1** or **On 2** in the Auto setup function, the input signal will be searched automatically (p.51).*

Input Menu

Computer System Selection

This projector automatically tunes to various types of computers with its Multi-scan system and Auto PC adjustment. If a computer is selected as a signal source, this projector automatically detects the signal format and tunes to project a proper image without any additional settings. (Signal formats provided in this projector are shown on pages 75-76.)

One of the following messages may appear when:

PC System Menu

Auto

When the projector can not recognize the connected signal conforming to the provided PC Systems, **Auto** is displayed on the System Menu box and the Auto PC adjustment function works to display proper images. If the image is not projected properly, a manual adjustment is required. (pp.34-35)

There is no signal input from the computer. Check the connection between your computer and the projector. (See "Troubleshooting" on page 69.)

Mode 1

The preset system is manually adjusted in the PC adjust Menu. The adjusted data can be stored in **Mode 1-10**. (pp.34-35)

XGA 1

PC Systems provided in this projector is chosen. The projector chooses a proper system provided in the projector and displays it.

* **Mode 1** and **XGA 1** are examples.

Selected system in the PC System Menu is displayed.

Selecting Computer System Manually

PC system can also be selected manually.

1 Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select **Input** and then press the Point ▶ or the SELECT button.

2 Use the Point ▲▼ buttons to select **System** and then press the Point ▶ or the SELECT button.

3 Use the Point ▲▼ buttons to select the desired system and then press the SELECT button.

PC System Menu
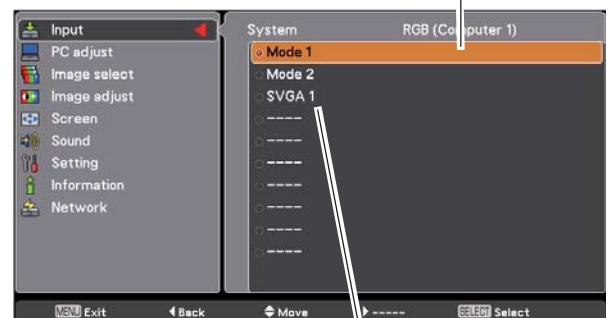

Customized **Mode (1–10)** set in the PC adjust Menu (pp.34-35).

Systems in this dialog box can be selected.

Auto PC adjustment

Auto PC adjustment function is provided to automatically adjust **Fine sync**, **Total dots**, **Horizontal** , **Vertical** and **Clamp** position to conform to your computer.

Menu Operation

Auto PC adj.

1 Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select **PC adjust** and then press the Point ▶ or the SELECT button.

2 Use the Point ▲▼ buttons to select **Auto PC adj.** and then press the SELECT button.

To store adjustment parameters
The adjusted parameters from the Auto PC adjustment can be stored in the projector. Once the parameters are stored, the setting can be done just by selecting a **Mode (1–10)** in the PC System Menu (See page 32). See also "Store" on page 35.

✔**Note:**
  • *Fine sync, Total dots, Horizontal and Vertical position of some computers can not be fully adjusted with the Auto PC adjustment function. When the image is not provided properly with this operation, manual adjustments are required (pp.34-35).*
  • *The Auto PC adjustment can not be operated when 480i, 575i, 480p, 575p, 720p or 1080i is selected in the PC System Menu (p.32) , or when the signal is coming from the HDMI terminal.*

PC adjust Menu

Use Point ▲▼ buttons to select **Auto PC adj.** and press the SELECT button. **Please wait...** appears while the Auto PC adjustment is in process.

Manual PC adjustment

Some computers employ special signal formats which may not be tuned by Multi-scan system of this projector. Manual PC adjustment enables you to precisely adjust several parameters to match those signal formats. The projector has five independent memory areas to store those parameters manually adjusted. It allows you to recall the setting for a specific computer.

1 Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select **PC adjust** and then press the Point ▶ or the SELECT button.

2 Use the Point ▲▼ buttons to select the desired item and then press the SELECT button to display the adjustment dialog box. Use the Point ◀▶ buttons to adjust the setting value.

Fine sync

Use the Point ◀▶ buttons to adjust the value, eliminating a flicker from the image displayed (from 0 to 31).

Total dots

Use the Point ◀▶ buttons to adjust the number of total dots in one horizontal period to match your PC image.

Horizontal

Use the Point ◀▶ buttons to adjust the horizontal picture position.

Vertical

Use the Point ◀▶ buttons to adjust the vertical picture position.

Current mode

Press the SELECT button to show **H-sync freq.** and **V-sync freq.** of the connected computer.

Clamp

Use the Point ◀▶ buttons to adjust the clamp level. When the image has dark bars, try this adjustment.

PC adjust Menu

✔**Note:**

Fine sync and *Total dots* cannot be selected when the input signal is *480i, 480p, 575i, 575p, 720p* or *1080i*.

Reset

To reset the adjusted data, select **Reset** and press the SELECT button. A confirmation box appears and then select **Yes**. All adjustments will return to their previous figures.

Mode free

To clear the stored data, select **Mode free** and then press the Point ▶ or the SELECT button. Move the highlight to the Mode that you want to clear and then press the SELECT button.

Store

To store the adjusted data, select **Store** and then press the Point ▶ or the SELECT button. Move the highlight to one of the Modes 1 to 10 in which you want to store, and then press the SELECT button.

✔**Note:**
• *When input computer signal to the projector, PC adjust will become available.*

Image Adjustment

1 Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select **Image adjust** and then press the Point ▶ or the SELECT button.

2 Use the Point ▲▼ buttons select the desired item and then press the SELECT button to display the adjustment dialog box. Use the Point ◀▶ buttons to adjust the setting value.

Contrast

Press the Point ◀ button to decrease the contrast; press the Point ▶ button to increase the contrast (from 0 to 63).

Brightness

Press the Point ◀ button to decrease the brightness; press the Point ▶ button to increase the brightness (from 0 to 63).

Color temp.

Use the Point ◀▶ buttons to select the desired Color temp. level (**XLow**, **Low**, **Mid**, or **High**).

White balance (Red / Green / Blue)

Press the Point ◀ button to lighten R/G/B tone; press the Point ▶ button to deepen R/G/B tone (from 0 to 63).

Sharpness

Press the Point ◀ button to decrease the sharpness of the image; press the Point ▶ button to increase the sharpness of the image (from 0 to 15).

Gamma

Use the Point ◀▶ buttons to adjust the gamma value to obtain a better balance of contrast (**Default**, **1.8**, **2.0**, **2.2**, **2.4**, or **2.6**).

Reset

To reset the adjusted data, select **Reset** and press the SELECT button. A confirmation box appears and then select **Yes**. All adjustments will return to their previous figures.

Store

To store the adjusted data, select **Store** and press the Point ▶ or the SELECT button. Use the Point ▲▼ buttons to select one from **Image 1** to **4** and press the SELECT button. A confirmation box appears and then select **Yes**. Stored data can be called up by selecting an **Image (1-4)** in the Image Mode Selection on page 36.

Image adjust Menu
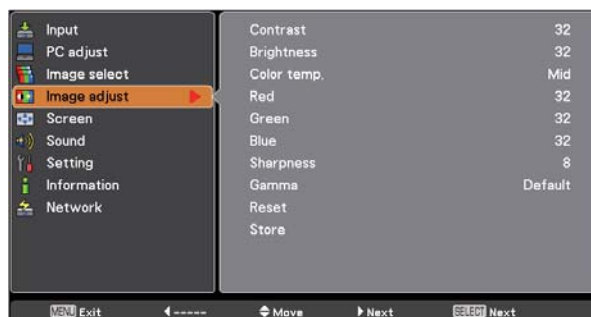

Selected Image mode
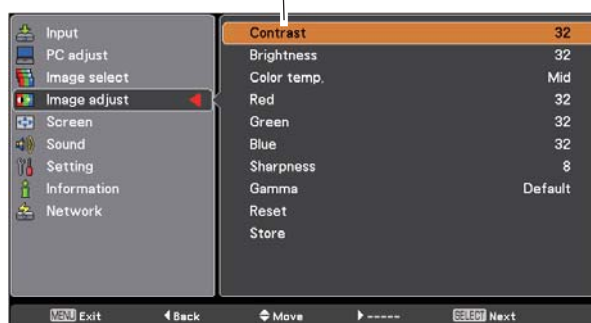

Use the Point ◀▶ buttons to adjust the setting value.

✔**Note:**
 • *When White balance **Red**, **Green** or **Blue** is adjusted, **Color temp.** will change to **User**.*

Store Menu
A confirmation box appears and then select **Yes.**

Screen Size Adjustment

This projector has the picture screen resize function, which enables you to customize the image size.

1 Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select **Screen** and then press the Point ▶ or the SELECT button.

2 Use the Point ▲▼ buttons select the desired item and then press the SELECT button .

Normal

Provide the image to fit the screen size while maintaining the aspect ratio of input signal.

Full

Provide the full screen image.

Wide (16:9)

Provide the image at the 16:9 wide screen ratio.

Zoom

Scale the image proportionally to fit the entire screen. Either side of image may go over the screen.

True

Provide the image in its original size. When the original image size is larger than the screen size (1280 x 800), the projector automatically switches to the panning mode. Use the Point ▲▼◀▶ buttons to pan the image. When adjusted, the arrows turn red. When reached to the correction limit, the arrows disappear.

Custom

Provide the last stored aspect screen image.

Screen Menu
✔**Note:**
- *This projector can not display any resolution higher than 1920 x 1200. If your computer's resolution is higher than that, lower the resolution before connecting to the projector.*
- *The image data other than 1280 x 800 is modified to fit the screen size in initial mode.*
- *True and Digital zoom +/– can not be selected when 480i, 575i, 480p, or 575p is selected in the PC System Menu (p.32).*
- *Zoom and Image Position Adjustment (p.25) will be canceled when Custom is selected in the Screen menu.*

Custom adj.

Adjust the screen scale and position manually with this function.
Press the Point ▶ button at **Custom adj.** and the Custom adjustment menu is displayed on the screen, you can use the Point ▲▼ buttons to choose the item you want to adjust.

Scale H/V .... Adjust the Horizontal/Vertical screen scale.

H&V .... When set to **On**, the aspect ratio is fixed. **Scale V** appears dimmed and becomes unavailable. Adjust **Scale H**, then the screen scale is automatically modified based on the aspect ratio.

Position H/V ..... Adjust the Horizontal/Vertical screen position.

Common .... Save the adjusted scale or position to all the inputs. Press the SELECT button at **Common** to display a confirmation box. To save the scale or position, press the SELECT button at "Yes". When **Custom** is selected, the saved scale or position is used.

Reset .... Reset the all adjusted values. Press the SELECT button at **Reset** to display a confirmation box. To reset, press the SELECT button at "Yes".

Digital zoom +

Select **Digital zoom +**. The On-Screen Menu disappears and **D. zoom +** appears. Press the SELECT button to expand the image size. Use the Point ▲▼◀▶ buttons to pan the image. The Panning function can work only when the image is larger than the screen size.
A projected image can be also expanded by pressing the D.ZOOM ▲ or the SELECT button on the remote control.

Digital zoom –

Select **Digital zoom -**. The On-Screen Menu disappears and **D. zoom -** appears. Press the SELECT button to compress image size.
The projected image can be also compressed by pressing the D.ZOOM ▼ or the SELECT button on the remote control.

To exit the Digital zoom +/– mode, press any button except the D.ZOOM ▲▼ and the SELECT buttons.

To return to the previous screen size, select a screen size from the Screen Size Adjustment Menu or select an input source from the Input Source Selection Menu (See pages 30-31) again, or adjust the screen size with the D.ZOOM ▲▼ buttons.

Custom adj. Menu
✔Note:
 • *When no signal is detected, **Normal** is set automatically and **Custom adj.** cannot be selected and the Aspect dialog box disappears.*
 • *The adjustable range for **Scale H/V** and **Position H/V** is limited depending on the input signal.*

✔Note:
 • *The panning function may not operate properly if the stored Mode in the PC adjust Menu is used (p.35).*
 • *The minimum compression ratio is limited depending on the input signal, when the Keystone function is working or when Custom is selected for the screen size.*
 • ***True** and **Digital zoom +/-** can not be selected when **480i, 575i, 480p,** or **575p** is selected in the PC System Menu (p.32).*
 • ***Digital zoom +/-** can not be selected when **True** is selected in the Screen menu. (p.38)*

Keystone

This function is used to adjust keystone distortion of the projected image. Use the Point ▲▼ buttons to choose the item you want to adjust.

Keystone
　To correct keystone distortion, press the SELECT button. Keystone appears on the screen. Use the Point ▲▼ buttons to correct keystone distortion (p.26).

Store or Reset
　To store or reset the keystone correction, press the Point ▶ button.
　Store ..... Keep the keystone correction even when the AC power cord is unplugged.
　Reset ..... Release the keystone correction when the AC power cord is unplugged.

Ceiling

When this function is set to **On**, the picture will be top/bottom and left/right reversed. This function is used to project the image from a ceiling-mounted projector.

Rear

When this function is set to **On**, the picture will be left/right reversed. This function is used to project the image from rear of the screen.

Screen aspect

This function is used to project the image to a 4:3 or 16:9 projection screen.
　4:3 .... Set to a 4:3 projection screen.
　16:9 .... Set to a 16:9 projection screen.
　Default(16:10) .... 16:10 is the aspect of the DLP chip. The original Screen Menu is available.

Colorboard

Press the Point ▶ button at **Colorboard**, and then use the Point ▲▼ buttons to switch the desired item [**Red**, **Blue**, **Yellow**, **Green, Blackboard(Green)**] and then press the SELECT button.

At the time of simple projection on the colored wall, you can get the close color image to the color image projected on a white screen by selecting the similar color to the wall color from the preset colors.

Reset

To reset the adjusted data, select **Reset** and press the SELECT button. A confirmation box appears and then select **Yes**. All adjustments will return to their previous figures.

1 Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select the **Image adjust** and then press the Point ▶ or the SELECT button.

Image adjust Menu

2 Use the Point ▲▼ buttons select the desired item and then press the SELECT button to display the adjustment dialog box. Use the Point ◄► buttons to adjust the setting value.

Selected Image mode

Contrast

Press the Point ◄ button to decrease the contrast; press the Point ▶ button to increase the contrast (from 0 to 63).

Brightness

Press the Point ◄ button to decrease the brightness; press the Point ▶ button to increase the brightness (from 0 to 63).

Color

Press the Point ◄ button decrease the intensity of the color; press the Point ▶ button increase the intensity of the color (from 0 to 63).

Tint

Press the Point ◄► buttons to adjust the tint value to get a proper color balance (from 0 to 63).

Use the Point ◄► buttons to adjust the setting value.

Color temp.

Use the Point ◄► buttons to select the desired Color temp. level (Xlow, Low, Mid, or High).

White balance (Red)

Press the Point ◄ button to lighten red tone; press the Point ▶ button to deepen red tone (from 0 to 63).

White balance (Green)

Press the Point ◄ button to lighten green tone; press the Point ▶ button to deepen green tone (from 0 to 63).

White balance (Blue)

Press the Point ◄ button to lighten blue tone; press the Point ▶ button to deepen blue tone (from 0 to 63).

✔**Note:**
  • *When the **White balance Red, Green**, or **Blue** is adjusted, the Color temp. level will change to **User**.*
  • ***Tint** can not be selected when the video system is **PAL, SECAM, PAL-M**, or **PAL-N** (p.43).*
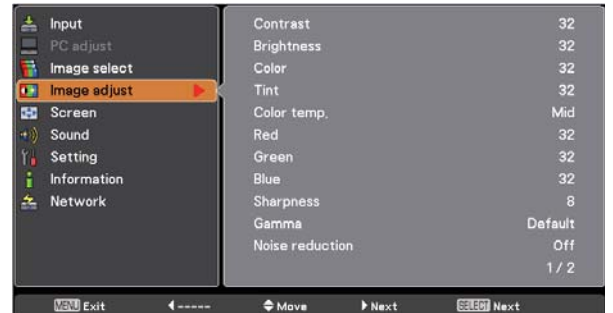

Sharpness

Press the Point ◄ button to decrease the sharpness of the image; press the Point ► button to increase the sharpness of the image (from 0 to 15).

Gamma

Use the Point ◄► buttons to adjust the gamma value to obtain a better balance of contrast (**Default**, **1.8**, **2.0**, **2.2**, **2.4**, or **2.6**).

Noise reduction

Noise interference on the screen can be reduced. Select one of the following options to get smoother images.
Off .... Disabled.
L 1 .... Lower reduction.
L 2 .... Higher reduction.

Progressive

An interlaced video signal can be displayed in progressive mode. Select one of the following options.
Off .... Disabled.
L 1 .... For an active picture.
L 2 .... For a still picture.
Film .... For watching a film. With this function, the projector reproduces pictures faithful to the original film quality.

Reset

To reset the adjusted data, select **Reset** and press the SELECT button. A confirmation box appears and then select **Yes**. All adjustments will return to their previous figures.

Store

To store the adjusted data, select **Store** and press the Point ► button or the SELECT button. Use the Point ▲▼ buttons to select one from Image 1 to 4 and press the SELECT button.
A confirmation box appears and then select **Yes**. Stored data can be called up by selecting an Image (1-4) in the Image Mode Selection on page 43.

Store Menu

A confirmation box appears and then select **Yes.**

✔**Note:**
   • *Noise reduction and Progressive can not be selected when the input signal is **480p, 575p, 720p** or **3D** mode is set to **On**.*
   • ***Film** of Progressive cannot be selected when the input signal is **1080i**.*
   • *When **480i, 575i**, **480p, 575p,720p** or **1080i** is selected in computer source, the items of Image adjustment are the same as the items in video source, except for **Color** and **Tint**.*

Screen Size Adjustment
This projector has the picture screen resize function, which enables you to customize the image size.

1 Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select **Screen** and then press the Point ▶ or the SELECT button.

2 Use the Point ▲▼ buttons select the desired item and then press the SELECT button.

Normal

Provide the image to fit the screen size while maintaining the aspect ratio of input signal.

Full

Provide the full screen image.

Zoom

Pan the horizontal direction of the image and cut the vertical direction of the image to fit the screen size (16:9). Only for 4:3 video aspect ratio signals.

Wide(16:9)

Provide the image at the 16:9 wide screen ratio.

Natural wide

Modify the 4:3 aspect ratio image to fit the screen size (16:9 aspect ratio) by stretching the image to make it look natural.

Custom

Provide the last stored aspect screen image.

Custom adj.

Adjust the screen scale and position manually with this function.
Press the Point ▶ button at **Custom adj.** and the Custom adjustment menu is displayed on the screen, you can use the Point ▲▼ buttons to choose the item you want to adjust.

Scale H/V ....Adjust the Horizontal/Vertical screen scale.
H&V................When set to **On**, the aspect ratio is fixed. **Scale V** appears dimmed and becomes unavailable. Adjust **Scale H**, then the screen scale is automatically modified based on the aspect ratio.
Position H/V ...Adjust the Horizontal/Vertical screen position.
Common.........Save the adjusted scale or position to all the inputs. Press the SELECT button at Common to display a confirmation box. To save the scale or position, press the SELECT button at "Yes", When Custom is selected, the saved scale or position is used.
Reset...............Reset the all adjusted values. Press the SELECT button at **Reset** to display a confirmation box. To reset, press the SELECT button at "Yes".

Screen Menu
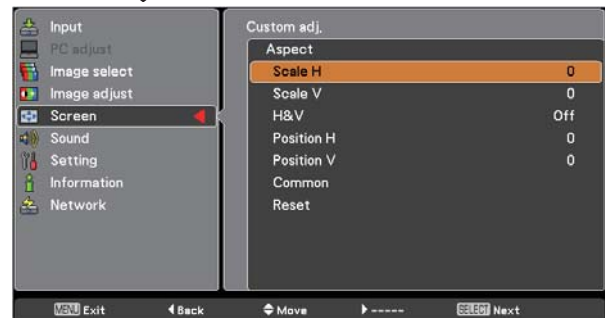

✔**Note:**
- *When no signal is detected, **Normal** is set automatically and the Aspect adjustment menu disappears.*
- *The adjustable range for **Scale H/V** and **Position H/V** is limited depending on the input signal.*
- ***Natural wide** and **Wide(16:9)** can not be operated when **720p** or **1080i** is selected in the AV System Menu (p.43).*
- ***Natural wide** and **Wide(16:9)** are not available when the **4:3** or **16:9** is selected in the Screen aspect (p.47).*

3D Display

For Viewing 3D Contents

To view 3D images, you need to prepare at least the 3D active shutter glasses, 3D content and 3D reproducing equipment. For example, as for computer, when transmitting 3D signals from a computer to the projector, you also need to install the graphic card which has the capability to sequentially output the 3D frames at 120Hz and software in the computer. The 3D signal type which the projector can accept is frame sequential only. Other 3D signal types such as frame packing and side-by-side are not supported.
As for 3D glasses, DLP Link format and IR emitter format are compatible with this projector. Compatibility with any other 3D glasses than the 2 types 3D glasses is not guaranteed.

Using 3D Glasses with DLP Link compatible

When using DLP Link compatible glasses, follow these steps:

1. Turn on the projector and the 3D glasses.
2. Wear the 3D glasses and press the 3D button on the remote control to activate 3D Display function.
   When 3D mode is in On, 3D indicator turns blue.
3. If you see a discrete or overlapping image, 3D Sync Invert function enables you to get the correct image. Press the 3D button to switch 3D Sync signal from among "3D Off", "3D (Sync 1)" or "3D (Sync 2)".

3D setting can also be selected from the menu (p.52).

Using 3D Glasses with IR wireless emitter

When using IR emitter system, follow these steps:

1. Turn off the projector.
2. Connect the sync cable for the IR emitter to 3D SYNC OUT terminal of the projector.
3. Turn on the projector, the IR emitter and the stereoscopic wireless LCD glasses.
4. Wear the 3D glasses and press the 3D button on the remote control to activate 3D Display function.
5. If you see a discrete or overlapping image, press the 3D button to switch 3D Sync signal from among 3D Off, 3D (Sync 1) or 3D (Sync 2).
   You can also invert the sync signal by using the switch on the IR emitter.

3D SYNC OUT
⚠ Unplug the power cords of both the projector and external equipment from the AC outlet before connecting cables.

CAUTION FOR PROPERLY VIEWING 3D PICTURES

- The optimum 3D viewing distance from the screen is about 3 m or more and your eyes should be level with the screen.
- Viewing 3D images for an extended period of time or viewing them from an oblique angle can cause eye strain.
- Take breaks when viewing 3D images for an extended period of time. As this may cause eye fatigue.
- Some image sources can cause pseudoscopic image problem. Check the 3D settings to get the 3D effect.
- If the right-eye image and left-eye image are switched, you may not get the 3D effect, resulting in eye strain or nausea.

- There are differences in 3D visual perception between individuals.
- If you get double vision or don't get the 3D effect, discontinue using the projector.
- If you experience fatigue or nausea, stop using the projector.
- After viewing the rotating, swinging, or jumping 3D images, you may experience 3D motion sickness.
- If you experience such symptom, immediately stop viewing the 3D images and take a break until the symptom has subsided.

- If you view 3D images in bright ambient light environment, you may not able to see them clearly. Or if you use the 3D glasses in a room which fluorescent lighting (50Hz), flickering may occur. If these happen, change the room lighting condition by making the room dark or turning off the light.

RESTRICTIONS ON VIEWING 3D IMAGES

- Children who are six year of age or younger should not view 3D images.
- Parents should accompany and monitor their children as children cannot properly express discomfort with 3D image viewing.

- Photosensitive patients, patients with heart disease, pregnant women, elderly people, and people with serious illness and/or with a history of epilepsy should not view 3D images
- We advise that you should refrain from viewing 3D images if you are in bad physical condition
- We do not recommend viewing 3D images if you need sleep or have been drinking alcohol.

TROUBLESHOOTING FOR 3D DISPLAY

Symptoms	Possible problems	Solution
3D contents appear as 2D.	The glasses or the projector are set to 2D mode.	Change the setting of the glasses.
3D image is inverted. (3D image is not correct.)	3D mode is out of phase. (The data for right/left eyes is inverted.)	Reverse the 3D sync phase of the projector by using 3D button on the remote control or through the Setting menu of the projector.
Image of glasses has flicker.	Outside of the recommended viewing zone of the glasses.	Move your position closer to the emitter.
Glasses does not turn on.	- The battery of the glasses is exhausted. - The projector is not set to 3D mode.	- Recharge the battery. - Change the setting of the projector.

Setting

Setting

This projector has a Setting Menu that allows you to set up the other various functions described below.

1 Press the MENU button to display the On-Screen Menu. Press the Point ▲▼ buttons to select the **Setting** and press the Point ▶ or the SELECT button to access the submenu items.

2 Use the Point ▲▼ buttons to select the desired item and then press the Point ▶ or the SELECT buttons to access the selected item.

3 Use the Point ▲▼ buttons select the desired item and then press the SELECT button.

Setting Menu
Language

The language used in the On-Screen Menu is available in English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Finnish, Norwegian, Danish, Polish, Hungarian, Romanian, Russian, Brazilian Portuguese, Turkish, Arabic, Kazakh, Simplified Chinese, Traditional Chinese, Korean, Japanese and Thai.

Language Menu

Menu position

This function is used to change the position of the On-Screen Menu. Select **Menu position** and press the SELECT button.

The Menu position changes each time you press the SELECT button as follows.
the center ➡ the bottom left ➡ the bottom right ➡ the top left ➡ the top left ➡ the top right ➡ .....
This function enables Input search and Auto PC adjustment by pressing the AUTO SET button on the remote control. Settings for those functions can be altered as follows:

Auto setup

Input search
This function detects the input signal automatically. When a signal is found, the search will stop. Use the Point ▲▼ buttons to select one of the following options.

Off .... Input search dose not work.

On 1....... Input search works under the following situation.
– When pressing the AUTO SET button on the remote control.

On 2....... Input search works under the following situation.
– When turning on the projector by pressing the ON/STAND-BY button.
– When pressing the AUTO SET button on the remote control.
– When the current input signal is cut off.*

* If the No show or Freeze function is active, cancel it to activate the Input search. It is also unavailable when On-Screen Menu is displayed.

Auto PC adj.
On. . . . . . . Enables Auto PC adjustment when pressing the AUTO SET button on the remote control.

Off . . . . . . Disables Auto PC adjustment.
✔**Note:**
• *While Input search function is set to On 1 or On 2, the status of Input and Lamp are displayed every time the signal is switched.*
• *Only the last selected input source can be detected.*
• *If the COMPUTER 1/2 button, VIDEO, S-VIDEO, COMPONENT or HDMI button on the remote control, or ON/STAND-BY or MENU button on the top control is pressed during Input search is in progress, Input search will stop and go back to the previous input signal.*
• *Auto PC adj. and Input search functions can not be set Off at the same time.*
• *Fine sync, Total dots, Horizontal and Vertical positions of some computers can not be fully adjusted with the Auto PC adjustment function. When the image is not provided properly with this operation, manual adjustments are required (pp.34-35).*

3D setting

This function is used to set the 3D display function. (pp.48-49) Press the Point ▲▼ buttons to switch between each option.

3D ....Set to "On" to activate the 3D display function and the 3D indicator turns blue.

3D sync....If you see a discrete or overlapping image, 3D Sync Invert function* enables you to get the correct image. Switch the 3D sync signal to **1** or **2**.

3D->2D .....When viewing the 3D contents without wearing the 3D glasses, set to "On" to convert 3D display format to 2D display format.

3D phase...Adjust the phase of the 3D sync signal when the 3D SYNC OUT terminal is used. (0 - 31)

* The Frame Sequential Format is a technology that rapidly alternates between left-eye and right-eye images. When right-eye image and left-eye image are switched or you feel like you cannot get 3D effect due to out-of-synchronization state, first try to synchronize the projector with the 3D glasses by using 3D SYNC function.

3D setting
Zoom

This function is used to memorize the Zoom adjustment with the ZOOM +/- buttons on the top control (p.25).
Press the Point ▲▼ buttons to select Reset, Store1 or Store2.

Reset . . .Reset the Zoom adjustment when the projector is turned off or the AC power cord is unplugged.

Store1 . .Store the Zoom setting even when the projector is turned off. Zoom setting is cleared when the AC power cord is unplugged.

Store2 . .Store the Zoom setting even when the AC power cord is unplugged.

Background

Select the background screen for when no input signal is detected. Press the Point ▲▼ buttons to switch between each option.

Blue . . . Project a blue background.
User . . . Project an image captured in the Logo setting.
Black . . Project a black background.

Display

This function decides whether to display On-Screen Displays.

On .... Show all the On-Screen displays. Use this function when you want to project images after the lamp becomes bright enough. The factory default setting is this option.
Countdown off .... Show the input image instead of the countdown when turning on the projector. Use this function when you want to project the image as early as possible even when the lamp is not bright enough.
Off .... Hide the On-Screen Displays except;
   ● On-Screen Menu
   ● **Power off?** (p.22)
   ● **No signal** for Power management. (p.57)
   ● **Please wait ...**
   ● Arrows for the True mode in the Screen Menu (p.38)
   ● **P-Timer**

Logo (Logo and Logo PIN code lock settings)

This function allows you to customize the screen logo with Logo select, Capture, Logo PIN code lock and Logo PIN code change functions.

✔**Note:**
*When **On** is selected in the Logo PIN code lock function, Logo select and Capture functions can not be selected.*

Logo select

This function decides on the starting-up display from among following options.
   Off .... Show the countdown display only.
   Default .... Show the factory-set logo.
   User .... Show the image you captured.

Logo select
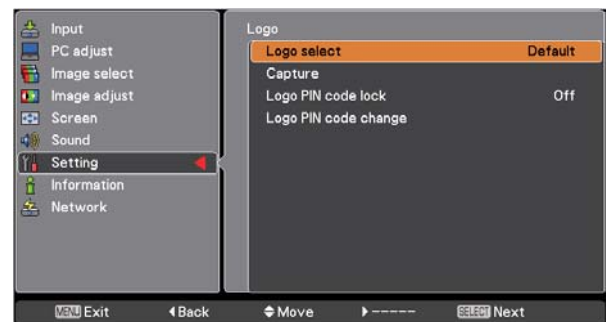

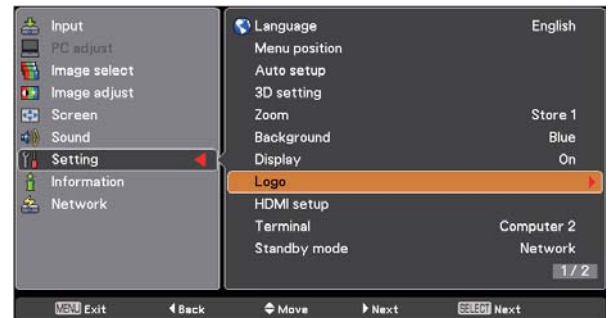

Capture

This function enables you to capture an image being projected to use it for a starting-up display or interval of presentations.

Select **Capture** and press the SELECT button.
A confirmation box appears and select **Yes** to capture the projected image.

After capturing the projected image, go to the Logo select function and set it to **User**. Then the captured image will be displayed the next time you turn on the projector.

To cancel the capture function, select **Yes** in the "Quit?" confirmation box.

✔**Note:**
  - *Before capturing an image, select **Standard** in the Image select Menu to capture a proper image (p.36).*
  - *A signal from a computer can be captured up to WXGA (1280 x 800). A signal from video equipment can be captured except for 720p and 1080i.*
  - *When capturing the image that has been adjusted by the Keystone function, the adjusted data is automatically reset and the projector captures an image without keystone correction.*
  - *When Logo PIN code lock function is set to **On**, **Logo select** and **Capture** can not be selected.*
  - *When starting to capture a new image, the previously stored image is cleared even if you cancel the capturing.*
  - *When there is no captured image or it is interrupted while capturing an image, **User** is not included in Logo Select Menu, you can only switch between **Default** and **Off**.*

Capture

Logo PIN code lock

This function prevents an unauthorized person from changing the screen logo.

  Off .... The screen logo can be changed freely from the Logo Menu (p.53).
  On .... The screen logo can not be changed without a Logo PIN code.

If you want to change the Logo PIN code lock setting, press the SELECT button and the Logo PIN code dialog box appears. Enter a Logo PIN code by following the steps below. The initial Logo PIN code is set to "4321" at the factory.

✔**Note:**
  *When Logo PIN code lock function is set to **On**, **Logo select** and **Capture** can not be selected.*
Logo PIN code lock

Enter a Logo PIN code

Use the Point ▲▼ buttons to enter a number. Press the Point ▶ button to fix the number and move the red frame pointer to the next box. The number changes to ✳. If you fixed an incorrect number, use the Point ◀ button to move the pointer to the number you want to correct, and then enter the correct number.

Repeat this step to complete entering a four-digit number.

After entering the four-digit number, move the pointer to **Set** and press the SELECT button.

If you entered an incorrect Logo PIN code, **Logo PIN code** and the number (✳✳✳✳) will turn red for a moment. Enter the correct Logo PIN code all over again.
Change the Logo PIN code lock setting

Use the Point ▲▼ buttons to switch **On** or **Off**, and then press the SELECT button to make a choice.

Logo PIN code change

Logo PIN code can be changed to your desired four-digit number. Press the SELECT button to select **Logo PIN code change**. Current logo PIN code dialog box appears, use the Point ▲▼ buttons to enter the correct code. The New Logo PIN code input dialog box appears. Set a new Logo PIN code, confirmation box appears, choose **Yes** to set the new Logo PIN code.

Be sure to note the new Logo PIN code and keep it on hand. If you lost the number, you could no longer change the Logo PIN code setting.
CAUTION:
WHEN YOU HAVE CHANGED THE LOGO PIN CODE, WRITE DOWN THE NEW PIN CODE IN COLUMN OF THE LOGO PIN CODE NO. MEMO ON PAGE 80, AND KEEP IT SECURELY. SHOULD THE LOGO PIN CODE BE LOST OR FORGOTTEN, THE LOGO PIN CODE SETTING CAN NO LONGER BE CHANGED.

Enter a Logo PIN code

Logo PIN code change

Setting

This function is only used for HDMI input source.

Image

Select **Normal** or **Enhanced** to match the video range setting of your HDMI Digital RGB equipment.

Sound

HDMI .... When using the HDMI cable, select **HDMI**. Both video and audio* are transferred and you need not to connect any additional cables for audio.

* This HDMI terminal supports Linear PCM (32kHz/44.1kHz/48kHz).

Computer .. When using the DVI-HDMI cable, select **Computer** and connect the audio cable to COMPUTER/COMPONENT AUDIO IN terminal.

The names for the output setting of Digital RGB vary from equipment to equipment. For details, refer to the owner's manual of your Digital RGB equipment.

When the black parts of the image are destroyed or stand out, please switch to **Normal** or **Enhanced**, and then switch the output type of the HDMI Digital RGB output equipment.

Terminal

The COMPUTER IN 2/MONITOR OUT terminal on the back of the projector is switchable for computer input or monitor output (p.11).

Computer 2……Computer input
Monitor out……Monitor output

Terminal function is not available when **Computer 2** to the input source is selected. Change the input source to the others (**Computer 1**, **Video, S-video** or **HDMI**) so that the Terminal function is available (pp.30-31, 41-42).

Standby mode

This function is available when operating the projector via network.

Network .... Supply the power to the network function even after turning off the projector. You can turn on/off the projector via network, modify network environment, and receive an e-mail about projector status while the projector is powered off.

Eco .... Select **Eco** when you do not use the projector via network. The projector's network function will stop when turning off the projector.

Refer to the owner's manual of "Network Set-up and Operation".

HDMI setup

✔**Note:**

• *Factory default is **Network**.*

• *When **Eco** is selected and the projector is in Stand-by, the communication of RS-232C serial port is not available.*

Power management

For reducing power consumption as well as maintaining the lamp life, the Power management function turns off the projection lamp when the projector is not operated for a certain period.

Select one of the following options:

Ready.................. When the lamp has been fully cooled down, the POWER indicator changes to green blinking. In this condition, the projection lamp will be turned on if the input signal is reconnected or any button on the remote control is pressed.

Shut down .... When the lamp has been fully cooled down, the power will be turned off.

Off .... Power management function is off.

Timer................... If the input signal is interrupted and no button is pressed for more than 30 seconds, the timer display with **No signal** appears. It starts the countdown until the lamp is turned off. Use the Point ▲▼ buttons to set the Timer(1~30Min).

✔**Note:**
*Factory default is **Ready: 5 Min**.*

Direct on

When this function is set to **On**, the projector will be automatically turned on just by connecting the AC power cord to a wall outlet.

✔**Note:**
Be sure to turn off the projector properly (see "Turning Off the Projector" on page 22). If the projector is turned off in the incorrect sequence, the Direct on function does not work properly.

Power management

Timer left before Lamp is **off**.

<u>**Closed caption**</u>

Closed Caption is a function that displays the audio portion of a TV program as text on the screen. If the input signal contains Closed captions, you can turn on the feature and switch the channels. Press the Point ▲▼ buttons to select **Off**, **CC1**, **CC2**, **CC3** or **CC4**.
If the Closed caption is not clear, you can change the text from **Color** to **White**.

✔**Note:**
   The Closed caption is available only under the situation below.
    • *The input signal is* **NTSC** *of composite video or S-video.*
    • *The item of Closed caption is displayed in gray while it is not available.*
    • *The Closed caption is unavailable when On-Screen Menu or P-Timer is displayed.*

<u>**Lamp control**</u>

This function allows you to change brightness of the screen.

   💡 **Normal** ...... Normal brightness.
   💡 **Eco** .... Lower brightness reduces the lamp power consumption and extends the lamp life.

<u>**Remote control**</u>

This projector provides two different remote control codes: the factory-set initial code (**Code 1**) and the secondary code (**Code 2**). This switching function prevents remote control interference when operating several projectors or video equipment at the same time.
When operating the projector in **Code 2**, both the projector and the remote control must be switched to **Code 2**.

To change the code for the projector:
   Select either **Code 1** or **Code 2** in this Setting Menu.

To change the code for the remote control:
   Press and hold both the MENU and IMAGE buttons together for 5 seconds or more. After changing the code, make sure the remote control operates properly.

✔**Note:**
   • *When different codes are set on the projector and on the remote control, any operation cannot be made. In that case, switch the code on the remote control to fit the code on the projector.*
   • *If the batteries are removed from the remote control for a long period of time, the remote control code will be reset.*

Closed caption
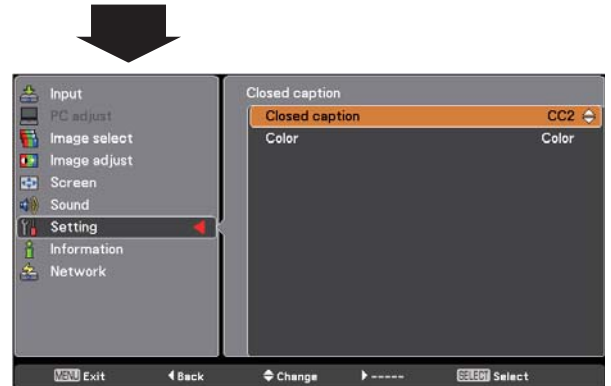

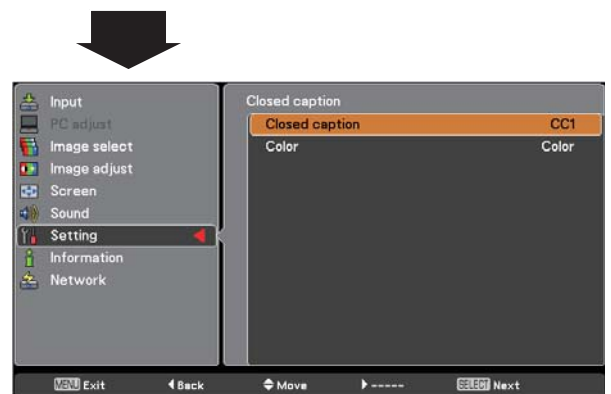

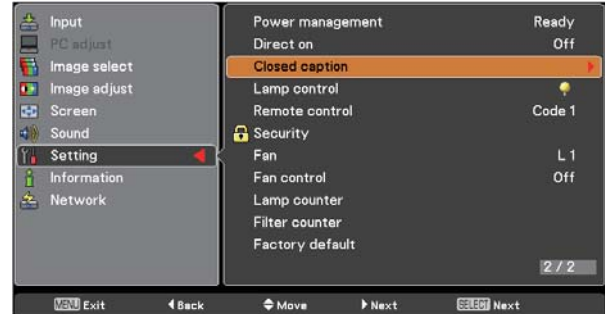

Press the Point ▲▼ buttons to select **Off**, **CC1**, **CC2**, **CC3** or **CC4**, and then Press Select button.

Remote control
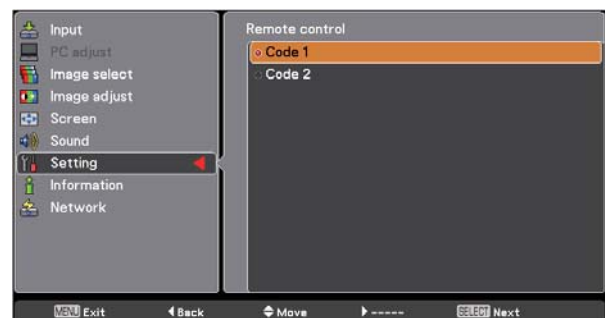

Security (Key lock and PIN code lock)

This function allows you to use the Key lock and the PIN code lock function to set the security for the projector operation.

Key lock

This function locks the top control and remote control buttons to prevent operation by unauthorized persons.

. . . . . Unlocked.

. . . . . Lock the operation of the top control. To unlock, use the remote control.

. . . . . Lock the operation of the remote control. To unlock, use the top control.

If the top control accidentally becomes locked and you do not have the remote control nearby or there is something wrong with your remote control, contact the dealer where you purchased the projector or the service center.

PIN code lock

This function prevents the projector from being operated by unauthorized persons and provides the following setting options for security.

  Off   . . . . . Unlocked.
  On 1 . . . . . Enter the PIN code every time turning on the projector.
  On 2 . . . . . Enter the PIN code to operate the projector once the power cord is disconnected; as long as the AC power cord is connected, the projector can be operated without a PIN code.

Whenever you change the PIN code lock setting or the PIN code (the four-digit number), you are required to enter the PIN code. The "1234" is set as the initial PIN code at the factory.

If you want to change the PIN code lock setting, Press the SELECT button and the PIN code dialog box appears.

Key lock
PIN code lock

When the projector is locked with the PIN code, the Security icon appears on the guide.

Setting

Enter a PIN code

Use the Point ▲▼ buttons to enter a number. Press the Point ▶ button to fix the number and move the red frame pointer to the next box. The number changes to ✳. If you fixed an incorrect number, use the Point ◀ button to move the pointer to the number you want to correct, and then enter the correct number.

Repeat this step to complete entering a four-digit number.

After entering the four-digit number, move the pointer to **Set**. Press the SELECT button so that you can start to operate the projector.

If you entered an incorrect PIN code, **PIN code** and the number (✳✳✳✳) will turn red for a moment. Enter the correct PIN code all over again.

Change the PIN code lock setting

Use the Point ▲▼ buttons to select **Off**, **On 1** or **On 2**. Press the SELECT button to close the dialog box.

PIN code change

The PIN code can be changed to your desired four-digit number.
Press the Point ▼ button to select **PIN code change** and press the SELECT button. The Current PIN code dialog box appears.
Use the Point ▲▼ buttons to set the current PIN code. The New PIN code dialog box appears. Set a new PIN code, the confirmation box appears, and choose **Yes** to set the new PIN code.

CAUTION:
WHEN YOU HAVE CHANGED THE PIN CODE, WRITE DOWN THE NEW PIN CODE IN COLUMN OF THE PIN CODE NO. MEMO ON PAGE 80, AND KEEP IT SECURELY. IF YOU FORGET YOUR PIN CODE, THE PROJECTOR CAN NO LONGER BE STARTED.

Enter a PIN code
Change the PIN code
Fan

This function provides the following options in the cooling
fans' operation when the projector is turned off (p.22).
 L 1 ..... Normal operation
 L 2 ..... Slower, lower-sound and longish-time than the
   normal operation (**L1**).

Fan control

Choose the running speed of cooling fans from the following
options according to the ground elevation under which you
use the projector.
 Off .... Normal speed. Set this function to **Off** when
   using the projector in non-high altitude
   environment.
 On 1 .... Faster than Off mode. Select this mode when
   using the projector in high altitudes (about
   1,000 meters or more above the sea level)
   where the fans have less cooling effect.
 On 2 .... Faster than On 1 mode. Select this mode
   when using the projector in higher altitudes
   than above where the fans have lesser cooling
   effect.

✔**Note:**
 • *Fan noise becomes louder in On 1 and On 2.*
 • *Failure to set the running speed of cooling
   fans properly may affect the projector life.*

Lamp counter

This function is used to display the cumulative lamp
operating time and reset the lamp counter.
When the total lighting time of a lamp exceeds the
recommended total hours of use, the Lamp replacement
icon (Fig.1) will appear on the screen, indicating that the end
of lamp life is reached.
When replacing the projection lamp, reset lamp counter.
See "Resetting the Lamp Counter" on page 68.

✔**Note:**
 *The Lamp replacement icon (Fig.1) will not appear when
 the Display function is set to **Off** (p.51), or **Freeze** (p.28),
 or **No show** (p.29).*

Fig.1 Lamp replacement icon

This icon appears on the screen when the end of
lamp life is reached.

✔**Note:**
 At turning on, the icon (Fig.1) will appear.

Filter counter

This function is used to set a frequency for the filter replacement.

Use the Point ▲▼ buttons to select Filter counter and then press the Point ▶ or the SELECT button to access the submenu items.

Filter counter......... Show the total accumulated time of the filter use timer setting.

Timer .... To set a timer, when the projector reaches the time, the Filter warning icon (Fig.1) appears on the screen and the total accumulated time turns red, indicating that the filter replacement is necessary.

Filter counter reset... After replacing the filter, be sure to reset the timer. The Filter warning icon will not turn off until the filter counter is reset. For details about resetting the timer, refer to "Resetting the Filter Counter" on page 65.

Fig.1 Filter warning icon

Filter warning icon appears on the screen at a set time (Off/2000H/ 3000H/4000H).

✔**Note:**
  • *The Filter warning icon (Fig.1) will not appear when the Display function is set to Off (p.53), or Freeze (p.28), or No show (p.29).*
  • *This icon also appears at turning on.*

Factory default

This function returns all setting values except for the **User logo**, **PIN code lock**, **Logo PIN code lock**, **Lamp counter** and **Filter counter** to the factory default settings.

Filter counter

Press the SELECT button to select Timer, and then use the Point ▲▼ buttons to set the timer. Select from (**Off/ 2000H/ 3000H/ 4000H**) depending on the use environment.

Factory default
Information

Input Source Information Display

The Information Menu is used for checking the status of the image signal being projected and the operation of the projector.

Direct Operation

The information menu changes each time you press the INFO. button on the remote control as follows.
 page 1/2 ➡ page 2/2 ➡ hide ➡ page 1/2 ➡ ·····

While the information menu is displayed, press the Point ◄ ► buttons to display the previous or next page.

Menu Operation

Press the Point ▲▼ buttons to select the Information. The Information Menu is displayed.

See below for displayed information.

Remote Control

INFO. button
Information Menu
Input	The selected input source is displayed.
H-sync freq.	The horizontal frequency of the input signal is displayed in **KHz**, or **- - - -KHz** when no signal.
V-sync freq.	The vertical frequency of the input signal is displayed in **Hz**, or **- - - - Hz** when no signal. Numbers of Hz doubles when during Interlace.
Screen	The selected screen size is displayed.
Language	The selected language is displayed.
Lamp status	The selected lamp mode is displayed.
Lamp counter	The cumulative lamp operating time is displayed.
Power management	**Off**, **Ready**, **Shut down** or **Timer** is displayed.
Key lock	The selected Key lock icon is displayed.
PIN code lock	**Off** or **On 1** or **On 2** is displayed.
Remote control	The selected remote code is displayed.
SERIAL NO.	The serial number of the projector is displayed. The serial number is used to service the projector.

Maintenance and Cleaning

WARNING TEMP. indicator

The WARNING TEMP. indicator shows the state of the function which protects the projector. Check the state of the WARNING TEMP. indicator and the POWER indicator to take proper maintenance.

The projector is shut down and the WARNIN TEMP. indicator is blinking red.

When the temperature inside the projector reaches a certain level, the projector will be automatically shut down to protect the inside of the projector. The POWER indicator is blinking while the projector is being cooled down. When the projector has cooled down enough (to its normal operating temperature), it can be turned on again by pressing the ON/STAND-BY button.

Top Panel

Blinking red

POWER   WARNING TEMP.   LAMP REPLACE   3D

ON / STAND-BY   AUTO SETUP   KEYSTONE   MENU

✔**Note:**

The WARNING TEMP. indicator continues to blink even after the temperature inside the projector returns to normal. When the projector is turned on again, the WARNING TEMP. indicator stops blinking.

Then check the matters below:

– Did you provide appropriate space for the projector to be ventilated? Check the installing condition to see if the air vents of the projector are not blocked.
– Has the projector been installed near an Air-Conditioning/Heating Duct or Vent? Move the installation of the projector away from the duct or vent.
– Is the filter clean? Replace the filter with a new one.

The projector is shut down and the WARNING TEMP. indicator lights red.

When the projector detects an abnormal condition, it is automatically shut down to protect the inside of the projector and the WARNING TEMP. indicator lights red. In this case, unplug the AC power cord and reconnect it, and then turn the projector on once again to verify operation. If the projector can not be turned on and the WARNING TEMP. indicator still lights red, unplug the AC power cord and contact the service center.

Top Panel

Emit a red light

POWER   WARNING TEMP.   LAMP REPLACE   3D

ON / STAND-BY   AUTO SETUP   KEYSTONE   MENU

⚠ **CAUTION**

DO NOT LEAVE THE PROJECTOR WITH THE AC POWER CORD CONNECTED UNDER AN ABNORMAL CONDITION. IT MAY RESULT IN FIRE OR ELECTRIC SHOCK.
Replacing the Filter

Filter prevents dust from accumulating on the optical elements inside the projector. Should the Filter become clogged with dust particles, it will reduce cooling fans' effectiveness and may result in internal heat buildup and adversely affect the life of the projector. If a "Filter warning" icon appears on the screen, replace the Filter immediately. Replace the filter by following the steps below.

1 Turn off the projector, and unplug the AC power cord from the AC outlet.

2 First, clean up the dust on the projector and around the air vents.

3 Loosen the screw and open the lamp cover and lift the filter out of the projector.

4 Put the new one back into the position, and close the lamp cover and secure the screw.

5 Connect the AC power cord to the projector and turn on the projector.

6 Reset the filter counter.

Lamp Cover

Screw
Filter

⚠ **CAUTION**
- Do not operate the projector with the filter removed.
  Dust may accumulate on the optical elements
  degrading picture quality.
- Do not put anything into the air vents. Doing so may
  result in malfunction of the projector.
- Do not wash the filter with water or any other liquid
  matter. Otherwise the filter may be damaged.

RECOMMENDATION
We recommend avoiding dusty/smoky environments when you operate the projector. Usage in these environments may cause poor image quality.
When using the projector under dusty or smoky conditions, dust may accumulate on a lens or optical elements inside the projector degrading the quality of a projected image. When the symptoms above are noticed, contact your authorized dealer or service center for proper cleaning.

Filter counter
Resetting the Filter Counter

Be sure to reset the Filter counter after replacing the Filter .

1 Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select **Setting** and then press the Point ▶ or the SELECT button.

2 Use the Point ▲▼ buttons to select **Filter counter** and then press the SELECT button. Use the Point ▲▼ buttons to select **Filter counter reset** and then press the SELECT button. **Filter counter Reset?** appears. Select **Yes** to continue.

3 Another confirmation dialog box appears, select **Yes** to reset the Filter counter.

Filter counter Reset? appears. Select **Yes**, then another confirmation box appears.

Select **Yes** again to reset the Filter counter.

Cleaning the Projection Window

⚠ **CAUTION**

This projector is equipped with a projection window.
- Do not rub the projection window with a hard fiber cloth or hit it with a something hard to prevent the projection window from scratching.
- Do not use a chemical cleaner (liquid and solid) to avoid deteriorating the projection window.

Unplug the AC power cord before cleaning.

First, remove the dust with a commercially available air blower. Then gently wipe the projection window surface. Use a cleaning paper moistened with methyl alcohol (methanol). Avoid using an excessive amount of cleaner.

Do not use abrasive cleaners, solvents, or other harsh chemical cleaners to avoid damaging the projection window.
Cleaning the Projector Cabinet

Unplug the AC power cord before cleaning.

Gently wipe the projector body with a soft dry cleaning cloth. When the cabinet is heavily soiled, use a small amount of mild detergent and finish with a soft dry cleaning cloth. Avoid using an excessive amount of cleaner. Abrasive cleaners, solvents, or other harsh chemicals might scratch the surface of the cabinet.

When the projector is not in use, put the projector in an appropriate carrying case to protect it from dust and scratches.
⚠ **CAUTION**

Do not use any flammable solvents or air sprays on the projector and in its vicinity. The explosion or fire hazard may occur even after the AC power cord is unplugged because the temperature inside the projector is extremely high due to the lamps. In addition, there is a risk that the internal parts may be damaged not only by the flammable air spray but also by the cold air.

Lamp Replacement

When the projection lamp of the projector reaches its end of life, the Lamp replacement icon appears on the screen and LAMP REPLACE indicator lights yellow. Replace the lamp with a new one promptly. The timing when the LAMP REPLACE indicator should light is depending on the lamp mode.

Top Panel

POWER   WARNING TEMP.   LAMP REPLACE

This indicator turns yellow when the projection lamp reaches the end of its life.

Lamp replacement icon

✔**Note:**
The Lamp replacement icon will not appear when the Display function is set to Off (p.53), during Freeze (p.28), or No show (p.29).

WARNING:
TURN OFF THE UV LAMP BEFORE OPENING THE LAMP COVER

CAUTION

Allow a projector to cool for at least 45 minutes before you open the Lamp Cover. The inside of the projector can become very hot.

CAUTION

For continued safety, replace with a lamp of the same type. Do not drop a lamp or touch a glass bulb! The glass can shatter and may cause injury.

CAUTION

When replacing the lamp because it has stopped illuminating, there is a possibility that the lamp may be broken. If replacing the lamp of a projector which has been installed on the ceiling, you should always assume that the lamp is broken, and you should stand to the side of the lamp cover, not underneath it. Remove the lamp cover gently. Small pieces of glass may fall out when the lamp cover is opened. If pieces of glass get into your eyes or mouth, seek medical advice immediately.

Follow these steps to replace the lamp.

1 Turn off the projector and unplug the AC power cord. Let the projector cool for at least 45 minutes.

2 Loosen the screw and open the lamp cover.

3 Loosen the two (2) screws that secure the lamp. Lift the lamp out of the projector by using the handle.

4 Replace the lamp with a new one and secure the two (2) screws. Make sure that the lamp is set properly. Close the lamp cover and secure the screw.

5 Connect the AC power cord to the projector and turn on the projector.

6 **Reset the lamp counter.**
See "Resetting the Lamp Counter" on the next page.

Lamp Cover

Screw

Screws   Lamp

Handle
ORDER REPLACEMENT LAMP

Replacement lamp can be ordered through your dealer. When ordering a projection lamp, give the following information to the dealer.

● **Model No. of your projector**   : **PDG-DWL2500**

● **Replacement Lamp Type No.**   : **POA-LMP143**
(Service Parts No. 610 351 3744)

Resetting the Lamp Counter

Be sure to reset the Lamp counter after the lamp is replaced. When the Lamp counter is reset, the LAMP REPLACE indicator stops lighting and the Lamp replacement icon disappears.

1 Press the MENU button to display the On-Screen Menu. Use the Point ▲▼ buttons to select **Setting** and then press the Point ▶ or the SELECT button.

2 Use the Point ▲▼ buttons to select **Lamp counter** and then press the SELECT button. Use the Point ▲▼ buttons to select **Lamp counter reset** and then press SELECT button. **Lamp replacement counter Reset?** appears. Select **Yes** to continue.

3 Another confirmation dialog box appears, select **Yes** to reset the Lamp counter.
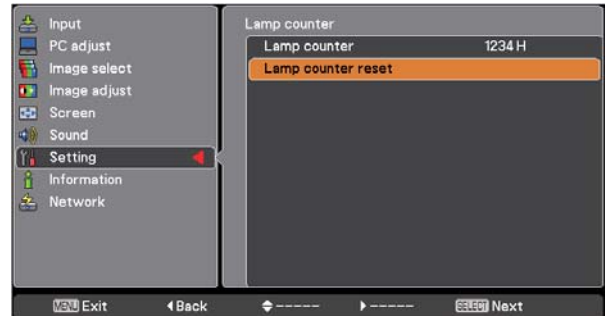

✔**Note:**

Do not reset the Lamp counter without implementing lamp replacement. Be sure to reset the Lamp counter only after replacing the lamp.

Lamp replacement counter Reset? appears.
Select **Yes**, then another confirmation box appears.

Select **Yes** again to reset the Lamp counter.

⚠ LAMP HANDLING PRECAUTIONS

This projector uses a high-pressure lamp which must be handled carefully and properly.
Improper handling may result in accidents, injury, or create a fire hazard.

● Lamp life may differ from lamp to lamp and according to the environment of use. There is no guarantee of the same life for each lamp. Some lamps may fail or terminate their life in a shorter period of time than other similar lamps.

● If the projector indicates that the lamp should be replaced, i.e., if the LAMP REPLACE indicator lights up, replace the lamp with a new one IMMEDIATELY after the projector has cooled down. (Follow carefully the instructions in the Lamp Replacement section of this manual.) Continuous use of the lamp with the LAMP REPLACE indicator lighted may increase the risk of lamp explosion.

● A Lamp may explode as a result of vibration, shock or degradation as a result of hours of use as its lifetime draws to an end. Risk of explosion may differ according to the environment or conditions in which the projector and lamp are being used.

IF A LAMP EXPLODES, THE FOLLOWING SAFETY PRECAUTIONS SHOULD BE TAKEN.

If a lamp explodes, disconnect the projector's AC plug from the AC outlet immediately. Contact an authorized service center for a checkup of the unit and replacement of the lamp. Additionally, check carefully to ensure that there are no broken shards or pieces of glass around the projector or coming out from the cooling air circulation holes. Any broken shards found should be cleaned up carefully. No one should check the inside of the projector except those who are authorized trained technicians and who are familiar with projector service. Inappropriate attempts to service the unit by anyone, especially those who are not appropriately trained to do so, may result in an accident or injury caused by pieces of broken glass.

Appendix

Troubleshooting

Before calling your dealer or service center for assistance, check the items below once again.

– Make sure you have properly connected the projector to peripheral equipment as described on pages 16-18.
– Make sure all equipment is connected to AC outlet and the power is turned on.
– When the projector does not project an image from the connected computer, restart the computer.

	Problem	Solutions	Pages
Power	No power	❏ Plug the power cord of the projector into the AC outlet.	
		❏ See if the POWER indicator lights red.	
		❏ Wait until the POWER indicator stops blinking to turn on the projector again. The projector can be turned on after the POWER indicator turns red.	20
		❏ Check the WARNING indicator. If the WARNING TEMP. indicator lights red, projector can not be turned on.	64
		❏ Check the projection lamp.	67
		❏ Unlock the Key lock function for the projector.	59
	PIN code dialog box appears at start-up.	❏ PIN code lock is being set. Enter a PIN code (the "1234" or numbers you have set.)	21, 59-60
Opening display	The initial display is not shown.	❏ Make sure **Off** or **Countdown off** are not chosen at display function.	53
	The initial display is not same as the default set.	❏ Make sure **User** or **Off** are not chosen at Logo (select) function.	53
	Input signal switches automatically. (or does not switch automatically)	❏ Make sure Input search function is adjusted properly.	51
	An icon other than Input mode or Lamp mode icon appears	❏ That is the Filter warning icon or the Lamp replacement icon.	62, 67
Image	No image	❏ Check the connection between your computer or video equipment and the projector.	16-18
		❏ See if the input signal is correctly output from your computer. Some laptop computers may need to change the setting for monitor output when connecting to a projector. See your computer's instruction manual for the setting.	
		❏ It takes about 30 seconds to display an image after turning on the projector.	20
		❏ Check the Input signal, color system, video system or computer system mode.	
		❏ Make sure the temperature is not out of the specified Operating Temperature (41˚F–95˚F [5˚C–40˚C]).	
		❏ When **No Show** is operating, the image can not be displayed. Press the NO SHOW button or any other button on the remote control.	
	Image is Left/Right reversed.	❏ Check the Ceiling/Rear function.	40, 47
	Image is Top/Bottom reversed.	❏ Check the Ceiling function.	40, 47

	Problem	Solutions	Pages
Image	Image is out of focus.	❏ Adjust focus of the projector.	25
		❏ Provide proper distance between the projector and the projection screen.	15
		❏ Check the projection window to see if it needs cleaning.	66
		❏ Moving the projector from a cool to warm place may result in moisture condensation on the projection lens. In such cases, leave the projector off and wait until condensation evaporates.	
	Picture is not bright enough.	❏ Check if the **Contrast** or **Brightness** is adjusted properly.	37, 44
		❏ Check if Image mode is selected properly.	36
		❏ Check the lamp control function.	28, 58
		❏ Check the LAMP REPLACE indicator. If it lights, the end of lamp life is approaching. Replace the lamp with a new one promptly.	67
	The color is strange.	❏ Check the Input signal, color system, video system or computer system mode.	
		❏ Make sure the **Colorboard** is not selected on Screen Menu.	40, 47
	The image is distorted or runs off.	❏ Check **PC adjustment** Menu or **Screen** and adjust them.	34-35, 38-40
Setting and adjustment	Auto PC adjustment function does not work.	❏ Check the Input signal. Auto PC function can not work when **480p**, **575p**, **720p**, **480i**, **575i** or **1080i** is selected, or when the digital signal is input into HDMI terminal.	32, 33
	Some displays are not seen during the operation.	❏ Check the Display function.	53
	The setting does not remain after turning off power.	❏ Make sure you selected **Store** after adjusting setting. Some settings can not be stored if not registered with "Store".	37, 45
	Power management does not work.	❏ Power management function can not work while **Freeze** or **No Show** is running.	57
	Capture function does not work.	❏ Check the connection and the input signal to see if there is signal	54
	Auto setup does not work properly.	❏ Make sure **Off** is not selected at any function of **Auto setup**	51
	Top control does not work.	❏ The top control is not available if the top control is locked at Key lock under Security of SETTING section.	59
Remote control	The remote control does not work.	❏ Check the batteries.	
		❏ Make sure no obstruction is between the projector and remote control.	
		❏ Make sure you are not too far from the projector when using the remote control. Maximum operating range is 16.4'(5 m).	
		❏ Make sure the code of the remote control is conformed to the projector's code.	58
		❏ Unlock the Key lock function for the remote control function.	59

	Problem	Solutions	Pages
Sound	No sound	❏ Check the audio cable connection from audio input source.	
		❏ Adjust the audio source.	
		❏ Press the Volume + button.	27
		❏ Press the Mute button.	27
		❏ When the AUDIO OUT is plugged-in, the projector's built-in speaker is not available.	
		❏ Is the image projected? You will hear the sound only when the image is projected.	
Others	Indicator blinks or lights.	❏ Check the status of the projector with referring to "Indicators and projector Condition".	74
	Computer 2 can not be selected	❏ Select Computer 2 in the Terminal function.	56
	The terminal function can not be selected.	❏ The Terminal function cannot be selected after Computer 2 is selected. Select other input source such as Computer 1, HDMI, S-video or Video so that the Terminal function can be selected.	30, 40-41, 56
	The exclamation mark appears on the screen.	❏ Your operation is invalid. Operate correctly.	
	Unable to unlock the Logo PIN code lock or Security PIN code lock.	❏ Contact the dealer where you purchased the projector or the service center.	
3D	There are some trouble about 3D display function.	❏ The troubleshooting about 3D display function is described on page 49.	48, 49

WARNING :
High voltages are used to operate this projector. Do not attempt to open the cabinet.

If problems still persist after following all operating instructions, contact the dealer where you purchased the projector or the service center. Specify the model number and explain about the problem. We will advise you how to obtain service.

C E   The CE Mark is a Directive conformity mark of the European Community (EC).

c (UL) US LISTED   This symbol on the nameplate means the product is Listed by Underwriters Laboratories Inc. It is designed and manufactured to meet rigid U.L. safety standards against risk of fire, casualty and electrical hazards.

Indicators and Projector Condition

Check the indicators for projector condition.

Indicators				Projector Condition
POWER Red/Green	WARNING TEMP. Red	LAMP REPLACE Yellow	3D Blue	
●	●	●	●	The projector is off. (The AC power cord is unplugged.)
○ red	●	✽	❖	The projector is in stand-by mode. Press the ON/STAND-BY button to turn on the projector.
○ green	●	✽	❖	The projector is operating normally.
blinking red	●	✽	❖	The projector is preparing for stand-by or the projection lamp is being cooled down. The projector can not be turned on until cooling is completed and the POWER indicator stops blinking.
blinking green	●	✽	❖	The projector is in the Power management mode.
○ green	●	✽	○	The projector is in 3D display mode.
blinking red	blinking	✽	❖	The temperature inside the projector is abnormally high. The projector can not be turned on. When the projector is cooled down enough and the temperature returns to normal, the POWER indicator stops blinking and the projector can be turned on. (The WARNING TEMP. indicator keeps blinking.)
○ red	blinking	✽	❖	The projector has been cooled down enough and the temperature returns to normal. When turning on the projector, the WARNING TEMP. indicator stops blinking.
●	○	✽	❖	The projector detects an abnormal condition and can not be turned on. Unplug the AC power cord and plug it again to turn on the projector. If the projector is turned off again, unplug the AC power cord and contact the dealer or the service center for service and checkup. Do not leave the projector on. It may cause an electric shock or a fire hazard.
○ green	●	○	❖	The lamp has been used overtime. Replace the lamp immediately and then reset the lamp counter. The indicator will be turned off after resetting the counter.

(Rows 2–6 are grouped under **Normal Condition**; rows 7–10 are grouped under **Abnormal Condition**.)

○ • • • on.   blinking • • • blinking.   ● • • • off

✽ / ❖ • • • Differs according to conditions.

Compatible Computer Specifications

Basically this projector can accept the signal from all computers with the V-, H- Frequency mentioned below and less than 150 MHz of Dot Clock.

When selecting these modes, PC adjustment can be limited.

ON-SCREEN DISPLAY	RESOLUTION	H-FREQ. [kHz]	V-FREQ. [Hz]	3D DIPLAY	ON-SCREEN DISPLAY	RESOLUTION	H-FREQ. [kHz]	V-FREQ. [Hz]	3D DIPLAY

✔Note:

• The mark "✔" indicates that the 3D image can be projected.
• Alphabet letter "i" placed beside some of the resolutions represents interlace signal.
• The specifications are subject to change without notice.
• Depending on your PC settings, the digital signals of your PC may not be projected correctly. In such a case, confirm your PC settings.
• When you project a DVI signal, connect the cables, turn the projector on, then select the input. Finally, turn on your PC. Be sure to follow this procedure, otherwise an image may not be projected on the screen. If an image is not projected correctly, restart your PC.
• Do not disconnect the cable while the projector is running. If the cable has been disconnected and then reconnected, an image may not be correctly projected.

Technical Specifications

Mechanical Information

Projector Type	Multi-media Projector
Dimensions (W x H x D)	12.6" x 6.7" x 15.2" (321.0 mm x 170.0 mm x 385.0 mm) (Not including protrusions)
Net Weight	13.7 lbs (6.2 kg)
Feet Adjustment	±1.0˚

DLP Chip

Projection System	0.65" Single DLP chip, 6 segment Color Wheel
Number of Pixels	1,024,000 pixels (1,280 x 800 dots)

Signal Compatibility

Color System	PAL, SECAM, NTSC, NTSC4.43, PAL-M, and PAL-N
SD/HDTV Signal	Component: 480i, 480p, 575i, 575p, 720p and 1080i
	HDMI; 480p, 575p, 720p and 1080i
Input Scanning Frequency	H-sync. 15 kHz-93 kHz, V-sync. 50-120 Hz

Optical Information

Projection Image Size (Diagonal)	Adjustable from 60" to 110"
Throw Distance	0.75' - 1.49' (23.0 cm - 45.5 cm)
Projection Lens	F 2.5 lens with f 4.83 mm with manual focus
Projection Lamp	275 W

Interface

Video Input Jack	RCA Type x 1
S-Video Input Jack	Mini DIN 4 pin x 1
Audio Input Jacks	RCA Type x 2
Computer Input 1 / Component Input Terminal	Analog RGB (Mini D-sub 15 pin) Terminal x 1
Computer Input 2 / Monitor Output Terminal	Analog RGB (Mini D-sub 15 pin) Terminal x 1 (In/Out switchable)
Computer 1/ Component Audio Input Jack	Mini Jack (stereo) x 1
Computer 2 Audio Input Jack	Mini Jack (stereo) x 1
Audio Output Jack	Mini Jack (stereo) x 1 (Variable)
HDMI	HDMI (V.1.3 with Deep Color) x 1
Control port	D-sub 9 pin x 1
LAN Connection Terminal	RJ-45 x 1
3D Sync Output	Mini DIN 3 pin x 1

Audio

Internal Audio Amp	10 W RMS
Built-in Speaker	1 speaker, φ 1.46" (37 mm)

Power

Voltage and Power Consumption	AC 100–120 V (4.4 A Max. Ampere), 50/60 Hz (The U.S.A and Canada)
	AC 100–240 V (4.4 - 2.3 A Max. Ampere), 50/60 Hz (For other countries)

Operating Environment

Operating Temperature	41˚F–104˚F (5 ˚C–40 ˚C)
Storage Temperature	14˚F–140˚F (-10˚C–60 ˚C)

Remote Control

Battery	AAA or LR03 1.5V ALKALINE TYPE x 2
Operating Range	11.5' (3.5 m)/±90˚
Dimensions	2.0" (W) x 0.7" (H) x 4.3" (D) (52 mm x 18 mm x 110 mm)
Net Weight	2.37 oz (67 g) (including batteries)

Accessories

❏ Owner's Manual(CD-ROM)
❏ Quick Reference Guide
❏ AC Power Cord
❏ Remote Control and Batteries
❏ VGA Cable
❏ PIN Code Label

● The specifications are subject to change without notice.
● DLP chips are manufactured to the highest possible standards. A tiny fraction of pixels may be ineffective or always lit, but this is not a malfunction.

Optional Parts

The parts listed below are optionally available. When ordering those parts, specify the item name and Model No. to the sales dealer.

	Model No.
SCART-VGA Cable	: POA-CA-SCART
COMPONENT-VGA Cable	: POA-CA-COMPVGA
VGA Cable (10 m)	: KA-MC-DB10
Ceiling Hanger	: POA-CHS-PS02 (for low ceiling)
	: POA-CHL-PL02 (for high ceiling)
	: POA-CHB-DWL2500

PJ Link Notice

This projector is compliant with PJLink Standard Class 1 of JBMIA (Japan Business Machine and Information System Industries Association). The projector supports all commands defined by PJLink Class 1 and is verified
Projector Input		PJLink Input	Parameter
Computer 1	RGB (PC analog)	RGB 1	11

Owner's Manual
Network Set-up and Operation

Wired Setting
Projector Set-up and Operation

This is the manual for the Network function.
Read this manual thoroughly to operate the Network function.
First, read the owner's manual of the projector to understand the basic operation of the projector and the safety instructions.
The safety instructions in the owner's manuals should be followed strictly.

Compliance

Federal Communications Commission Notice

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment causes harmful interference to radio or television reception which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use of shielded cable is required to comply with class B limits in Subpart B of Part 15 of FCC Rules.

Do not make any changes or modifications to the equipment unless otherwise specified in the instructions. If such changes or modifications should be made, you could be required to stop operation of the equipment.

Model Numbers	: PDG-DWL2500

Responsible party	: SANYO NORTH AMERICA CORPORATION
Address	: 21605 Plummer Street, Chatsworth, California 91311
Telephone No.	: (818)998-7322

Safety instructions

⚠ **CAUTION IN USING THE PROJECTOR VIA NETWORKS**

● When you find a problem with the projector, remove the power cable immediately and inspect the unit. Using the projector with failure may cause fire or other accidents.

● If you remotely use the projector via networks, carry out a safety check regularly and take particular care to its environment. Incorrect installation may cause fire or other accidents.

⚠ **CAUTION IN USING NETWORK FUNCTION**

● We assume no responsibility for the loss or damage of data, or damage of the computer caused by using this projector. Making back-up copies of valuable data in your computer is recommended.

Table of contents

1

Chapter 1
Preparation

Describes features and operating environment of this projector.

Features

Web Management function (☞p.31)

With this function, you can monitor projector functions such as power status, lamp status, input mode, signal condition, lamp-use time, etc. through the network by using the web browser installed on your computer.
E-Mail Alert function (☞p.25)

The projector sends messages to the registered e-mail addresses when a lamp abnormality or power failure occurs with the projector. This message describes how to solve the cause of the problems. You can take efficient action for quick recovery.
Required operating environment for computers

When operating the projector via networks, computers should meet the operating environment below.

Operating System		Windows 2000, Windows XP (32bit version), Windows Vista (32bit version), Windows 7 (32bit version) Mac OS X v 10.4 or 10.5
Computer environment	**Recommended CPU**	Windows: Pentium III 900MHz or more Macintosh : 800 MHz PowerPC G4 or faster,or 1.8 GHz Intel Core Processor or faster
	Memory	Windows : 64MB (Minimum)/ 128MB or more (Recommended) 128MB or more for Windows XP 1GB or more for Windows Vista or Windows 7 Macintosh : 256MB or more (512MB is recommended)
	Free disk space	100MB or more
	Drive equipment	CD-ROM drive
	Display settings	Support one of following resolutions; VGA (640 x 480), SVGA(800 x 600), XGA(1,024 x 768) Number of colors: Either of 16 bit (65,536 color 24/32 bit (16.77 million colors))
	Network card	The computer must provide a 10Base-T or 100Base-TX network card.
Web Browser*		Internet Explorer version 6.0 or 7.0 Netscape Navigator version 7.1 or 9.0 Safari 3.1 * Used to control and set up the projector. The layout of pages in the browser may slightly differ from each type of application or operating system you use.
Recommended Internet Mailer*		- Microsoft Outlook - Microsoft Outlook Express - Netscape Mail * Required the internet e-mail application software to receive an e-mail alert sent from this projector. If you do not use the function E-mail Alert, this application is not required.

Network specifications of the projector

LAN Terminal

Data communication standards	100Base-TX (100Mbps)/10Base-T (10Mbps)
Protocol	TCP/IP

Cabling Between the Projector and a Hub or computer[*1]

Use an appropriate cable when connecting the projector and a hub or computer.

Connection	Ethernet cable type	Max. cable length
Projector - Hub	STP straight-through category 5 [*2] cable	100m (328feet)
Projector - Computer	STP crossover category 5[*2] cable	100m (328feet)

*1 There may be other limitations depending on your network environment or LAN specification. Please consult your network administrator for further details.
*2 Cable category indicates cable quality.

Notice

Expression/Abbreviation

The OS of the computer and the Web browser described in this manual are Windows XP Professional and Internet Explorer 6.0. In case of another OS or Web browser, some instruction procedures may differ from the actual operation depending on your computer environment.

Use of this manual

This manual does not provide the detailed description of basic operation and functions for computer, web browser, projector and network. For instructions about each piece of equipment or application software, please refer to the respective manual.

Flow of installation

To use the projector via the networks, follow the setup procedures below.

| STEP 1 | **Connect the LAN and set the configuration.** |

Decide depending on the LAN environment.

➜ "2. Setup Procedures" (pp.11–16).

Detailed LAN configurations need to be done with a browser later.
First, complete the Wired LAN connection between computers and projectors, then start browser configurations.

➜ "3. Basic setting and operation" (pp.17–30).

| STEP 2 | **Network Configuration has completed.** |

Follow each chapter to operate the projector.

■ Operate and manage the projector ➜ "4. Controlling the projector" (pp.31-44)

➜ "Power Control and status check" (pp.32-33)

➜ "Control" (pp.34-37)

➜ "PC adjustment" (p.38)

➜ "Setting up the projector" (p.39-41)

➜ "Projector information" (pp.42-43)

ENGLISH

Chapter 2
Setup Procedures

2
Describes how to configure the network.

Setting procedures and contents differ depending on the LAN installation location. When installing, consult your system administrator to set up the LAN appropriately.

Connecting to the LAN line

Connect the LAN cable to the LAN connection terminal of the projector.

LAN Connection Terminal

LAN Cable

ACT Lamp (Orange)
Blink orange when the projector is sending or receiving the data.

LINK Lamp (Green)
Light green when the projector is connected to the network correctly.

* Please use a shielded LAN cable.

Network configuration

Set the Wired LAN network through the projector menu. Detailed network settings will be made with browser. Refer to "3. Basic setting and operation" (p.17-30). First, complete the settings described in this chapter before performing steps in "3. Basic setting and operation."

Setting Procedure

1. Select "LAN mode select" in the Network menu, and press Point ▶ or **SELECT** button.
2. Select similar LAN environment among LAN1, LAN2 and LAN3 with the Point ▲▼ buttons. Then the Menu will disappear, the "Please wait..." message will appear, and switching operation will start. Switching will take a while and the projector's LINK/ACT Lamp will be on or blink, and after completing the operation, the "Please wait..." message will disappear.
3. Select "Network setting" in the Network menu and press **SELECT** button, and then the LAN setting screen will appear and selected LAN settings will be displayed. Adjust each item to the setting environment. Consult your system administrator about the detailed settings.

    Press **SELECT** button in a row where you want to adjust, and adjust the figures with the Point ▲▼ buttons and move among the items with the Point ◀▶ buttons, and then press **SELECT** button to fix. Move to the next row with the Point ▲▼ buttons to adjust.

4. After completing all the settings, select "Set" and press **SELECT** button. Now, all procedures have been done. To cancel the adjusted settings, select "Cancel" and press **SELECT** button.
    You can confirm the LAN settings you have made from "Network information" (p.14). In such cases that the LAN cannot be connected, see this screen.

Network setting

DHCP: On

DHCP: Off

* The numerical value is a setting example.

Item	Description
DHCP	Sets DHCP function On or Off. When you setup the network setting manually, select "Off". When it is set On, IP address, Subnet, Gateway and DNS are automatically set according to your network environment *[1].
IP address	Sets IP address of the projector
Subnet	Sets Subnet mask. Normally sets 255.255.255.0
Gateway*[2]	Sets IP address of the default gateway (Router)
DNS*[3]	Sets IP address of the DNS server.

*1 Set "On" only when the DHCP server is available on your network environment.
*2 Set [255.255.255.255] if the network does not provide the gateway (router).
*3 Set [255.255.255.255] if you do not use the function E-mail alert.

13

Network PIN code

· ·

The Network PIN code is to restrict the access to the projector through the network.
After setting the Network PIN code, you need to enter it to operate the projector via the networks.
1. Select "Network PIN code" in the Network menu, and press **SELECT** button.
   The Network PIN code screen will appear.
2. Set the Network PIN code.

Set the figures with the Point ▲▼ buttons and move to the next items with the Point ◀
▶ buttons. Select "Set" and press **SELECT** button to set. To cancel the preset Network PIN code, select "Cancel". When you do not want to set the Network PIN code, set "0000".
It is recommended to set the Network PIN code if you use the projector via the networks.
The Network PIN code can be set also through the networks. See "3. Basic setting and operation" ➜ "Initial setting" ➜ "Network PIN code setting" (p.23).

Network PIN code

Network PIN code screen
Network information

· ·

Select "Network information" in the Network menu and press Point ▶ or **SELECT** button to show LAN setting environment of the currently selected projector. (The description below is an example and different from what will be shown.)

* The numerical value is a setting example.

Network factory default

1. Select "Network factory default" in the Network menu and press **SELECT** button.
2. A confirmation box appears and select "Yes" and then press **SELECT** button.
3. Another confirmation box appears and select "Yes" and then press **SELECT** button.
4. All the wired LAN settings will go back to the factory default settings. For details, refer to "Wired LAN factory default settings" (p.16).
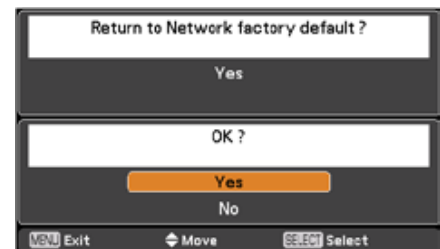

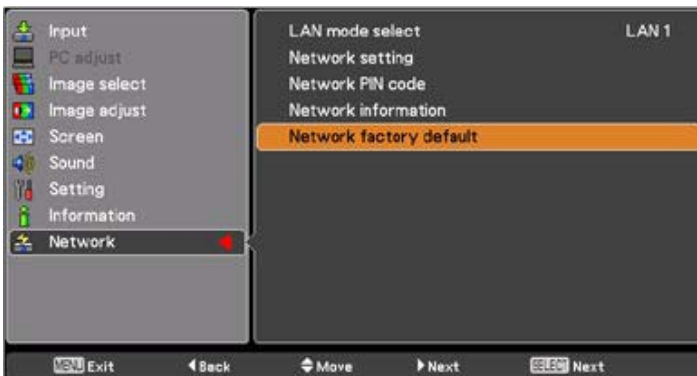

Wired LAN factory default settings

Parameter	SELECTED LAN		
	LAN 1	LAN 2	LAN 3
DHCP	OFF	ON	OFF
IP ADDRESS	169.254.100.100	192.168.100.100	192.168.100.100
SUBNET MASK	255.255.0.0	255.255.255.0	255.255.255.0
GATEWAY ADDRESS	255.255.255.255	255.255.255.255	255.255.255.255
DNS ADDRESS	255.255.255.255	255.255.255.255	255.255.255.255

3

Chapter 3
Basic Setting and Operation

Describes basic operations and settings for controlling the projector by using the web browser. It is required that computer and projector is connected to the network and the network address is properly configured.

Login the setting page of the projector

[1] Enter the IP address

Launch the web browser installed in your computer, enter the IP address into the "Address" on the browser and then press "Enter" key.

Enter the address that you configured in item "Network configuration" (☞ p.12).
* The numerical value is a setting example.

[2] Login

If the setting page has set the password, the authentication window will appear. In this case type "user" onto the **User Name** text area and the login Network PIN code onto the **Password** text area and then click **OK (Log in)** button.

    * The entering User Name must be "user" and it can not be changed.

[Note]
When accessing the projector for the first time or the Network PIN code "0000" is set, the auto-login will be performed and the following main setting page is displayed.

[3] Display of main setting page

The following main setting page will be displayed according to your display mode selection. Perform various kinds of settings through this page. Click on the menus to display the control and setting pages.

Main setting page in the display

Sub menu tab
Switches the sub menu tab.

Main menu
For selection of control and setting items of the projector.

Setting page
Displays the control and setting items according to the selected menu.

How to use the setting page

To control and set up the projector, use the setting menus on the web browser. The basic operation and procedures commonly used on this manual are described below.

Example of the setting page

The setting menu appears when clicking the sub menu tab.

* Each item has a valid setting range respectively.

Types of setting

Text box setting

Enter a number or text and then click **Set** button.

or

Change a value with **–** or **+** button.
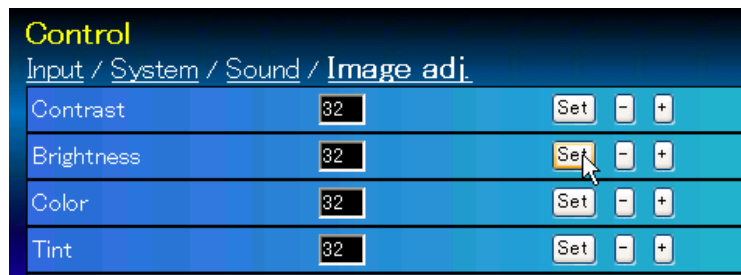

Pull-down menu setting

Select an item with pull-down menu button and then click **Set** button.
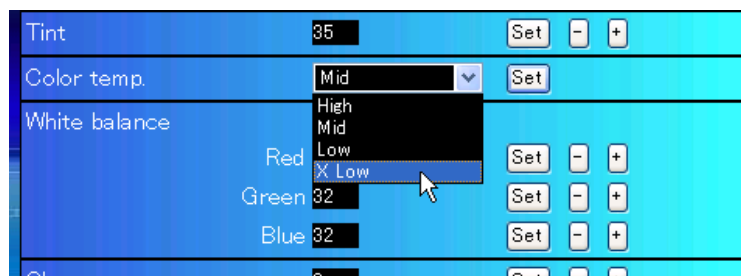

✐ The value in the text box indicates current value.

✐ Each item has a valid setting range. The setting value exceeding this becomes invalid. Some control items can not be used depending on the selecting input mode or functions of the projector you use. In this case, the values of those items are indicated with "---".

Radio button setting

Select an item by selecting a radio button.

Check box setting

Select items by ticking on check boxes.
Initial setting

After installing the projector, perform the following basic initial setting. Click **Initial Setting** on the main menu to display the initial setting page.

* The serial number in the figure is used for an example.

Item	Description
Language	Switches display language on the setting page. (Japanese, English)
Model name	Indicates the model name of the projector
SERIAL NO.	Indicates the serial number of the projector
Network PIN code	Sets the Network PIN code to login the setting page (☞p.23)
PJLink	Switches PJLink password authentication. (ON, OFF) (☞p.23)
Password	Password for PJLink function (☞p.23)

Network PIN code setting

This is to set the Network PIN code to restrict the access from an unauthorized person through the network.

Enter a 4-digit number as the Network PIN code onto the text box and click **Set** button. The projector begins restarting and it takes about 10 seconds. Close (Quit) the web browser and access to the login page again in 10 seconds. This is to perform the login authentication firmly.

The default Network PIN code [0000] means no Network PIN code is set.

✐ When you connect the projector to the network, it is recommended to set a new Network PIN code. Only a four-digit number is valid for the Network PIN code.

PJLink and password setting

This is to set the PJLink password authentication on or off. If set "ON" with the PJLink pull-down menu, the password must be required. Enter a **password*** onto the text box and click **Set** button.
✐ 1 to 32 alphanumeric characters can be used for the password.

What's PJLink?

The projectors equipped with PJLink function can be used together on the same network, regardless of model or brand, for centralized control and monitoring. This standard was established by the Japan Business Machine and Information System Industries Association (JBMIA). Please visit the Website at http://pjlink.jbmia.or.jp/english/.

PJLink Notice

The projector is compliant with PJLink Standard Class 1 of JBMIA, and it supports all commands defined by PJLink Class 1 and is verified conformance with PJLink Standard Class 1.

Projector Input		PJLink Input	Parameter
Computer 1	RGB (PC analog)	RGB 1	11
	Component	VIDEO 2	22
	RGB (Scart)	RGB 2	12
Computer 2	RGB	RGB 3	13
HDMI (Digital)		DIGITAL 3	33
Video		VIDEO 1	21
S-video		VIDEO 5	25

Network configuration

Click **Network** on the main menu. The following setting page is displayed. The IP Address, Subnet Mask, Default Gateway, DNS (Domain Name Server) and projector name are set up on this menu.

The IP address and Subnet Mask have been configured already in chapter "Installation". If you want to change them or configure default gateway or DNS, perform them in this page. If you change them, the projector begins restarting and it takes about 10 seconds. Close (Quit) the web browser and access to the login page again in 10 seconds.

* The numerical value is a setting example.

Item	Description
LAN mode	Displays the selected LAN mode
DHCP	Sets DHCP configuration (ON/OFF).
IP address	Sets IP address of the projector
Subnet mask	Sets Subnet mask. Normally sets 255.255.255.0
Default gateway*¹	Sets IP address of the default gateway (Router)
DNS*²	Sets IP address of the DNS server. Must be set when using the e-mail function
Projector name*³	Sets name of the projector. (64 characters maximum)

✐ You must use the number specified by your administrator. The address must be entered as a group with four numbers split by a dot like [192.168.001.101].

---

*1 Set [0.0.0.0] if the network does not provide the gateway (router).

*2 Set [0.0.0.0] if you do not use the function E-Mail alert.

*3 If you use the DNS server, register the host name registered to the DNS server as a projector name. You can access with this projector name from any computers in your network. If you do not use the DNS server, access with the assigned IP address to the projector.

* All the network setting will reset to the default when setting [0.0.0.0] of the IP Address.

* If you make incorrect settings, you cannot find out the new network settings. Be careful to set up them correctly, otherwise you cannot connect to the projector. It is recommended to make a note of them.

E-mail setting

This projector has an E-mail function which can send an alert message to users or an administrator if it detects an abnormality on the projector or run out of the life span of the lamp. Click **E-mail Setting** on the main menu and follow the below steps.

Item	Description
SMTP server	Enter server name or IP address of the SMTP server. (up to 60 characters)
SMTP server port	Enter Port number of the SMTP server. (from 1 to 65535)
Administrator address	Enter e-mail address of administrator.
Add address	Enter e-mail address of the user to send mail when the projector has an abnormality.

SMTP Authentication setting

Item	Description
Auth	Sets authentication setting option. (OFF, SMTP Auth, POP before SMTP)
SMTP Auth	Sets user authentication setting option when selecting "SMTP Auth" in above column. (CRAM-MD5, LOGIN, PLAIN)
User ID	Enter SMTP user ID. (up to 63 characters)
Password	Enter SMTP password. (up to 63 characters)
POP server	Enter server name or IP address of the POP server. (up to 60 characters)
POP server port	Enter Port number of the POP server. (from 1 to 65535)

ENGLISH

## 1 *Setting SMTP server and administrator address*

Enter the server name or IP address of the SMTP server*[1], the port number of the SMTP server and administrator address and click **Set** button. The administrator address is set to "Reply-To" address of the message sent from the projector.
*[1] The SMTP server is a server for sending e-mail. Please contact your network administrator to have this SMTP server address.

2 *Registering and deleting E-mail addresses*

Enter the e-mail address onto "Add e-mail address" and click **Set** button.
To check the registered addresses, click **Check/Delete** sub menu tab. The addresses are listed as the figure on the right.

✐ Up to 10 E-mail addresses can be registered.

To delete the registered addresses, check the address you want to delete and click **Delete** button.

3 *Setting SMTP authentication*

Set the SMTP authentication concerned and click **Set** button. Please contact your network administrator in details.
✐ If the projector sends an alert message due to the abnormality on the projector but the SMTP server is down in some other reason, the message will not be sent. In this case, the message "Unable to connect to server." will be displayed on the setting page. To clear this message, set up SMTP server address again.

✐ To use the E-Mail function, it must be set the DNS address on the Network setting page correctly.

✐ You cannot use this E-mail function if the DNS server and SMTP server cannot be used in your network environment.

✐ The projector does not send message to the address set in "Administrator address" text box. If you want to send e-mails to the administrator address, enter the administrator address into "Add address" text box.

4 Setting POP server

When "POP before SMTP" is selected at "Auth" of "SMTP Authentication setting", enter "POP server*2" and "POP server port" and click **Set** button.
*2 The POP server is a server for receiving e-mail. Please contact your network administrator to have this POP server address.

Error message for sending alert mail

When the projector has an abnormality, an alert message will be sent to the registered E-mail address.

If the SMTP server is missing or the authentication is not completed because of input error in E-mail address setting or SMTP authentication setting when sending alert e-mail, the error message will be displayed. Please check the respective settings.

Error message for missing SMTP server

Error information

Error message for authentication problem

Error information
Option selection for sending alert mail

Click **Option** sub menu tab. Check the condition items under which alert mail will be sent and click **Set** button.

Please refer to item "Examples :Type and contents of alert mail" described on the next page.
Option

✒ "When PJ lamp is off" signifies the lamp goes out without user operation. "When PJ is turned into Standby in proper user operation" signifies that the projector is turned on by using the web browser and then it is turned into standby with ON/STANDBY button on the top control or the remote control.

✒ Up to 99,999 hours can be set for use time.

Examples: Type and contents of alert mail

When the projector has an abnormality, the following alert messages are sent to the registered E-mail address according to your selected condition. Administrator or user can take an efficient action quickly by receiving this message. This is very useful to maintain and service the projector.

The following are examples of received messages.

● *When internal PJ temperature is too high:*

TITLE: Message from projector
Projector Model Name: *model name*
TCP/IP: 192.168.1.201 Projector Name: Proj05

It sends you following message.

*The Projector lamp is turned off, because internal projector temperature is too high.
 Wait for the completion of the cooling process and make sure the projector has been
 turned into Standby. Then turn the projector on again.
 If the Indicator continues flashing, check the air filter for dust accumulation.

● *When PJ needs service:*

TITLE: Message from projector
Projector Model Name: *model name*
TCP/IP: 192.168.1.201 Projector Name: Proj05

It sends you following message.

*Maintenance requirement from Projector is detected.
 Check up LED status of projector and consult with the dealer.

MCI   3.3V   OK   ⟵ Error information
MAIN   ALL   NG

✐ The projector lamp was turned off, because the projector power circuit failed.
  Unplug the AC power cord and plug it, and then turn on the projector once again to verify operation. If the problem still persists, unplug the AC power cord and ask servicing to a qualified service personnel with the error information.

● *When PJ lamp replacement time is reached:*

TITLE: Message from projector
Projector Model Name: *model name*
TCP/IP: 192.168.1.201 Projector Name: Proj05

It sends you following message.

*The projector lamp has reached replacement time.
 Lamp ON 3000 h

✐ Replace it with a new lamp immediately and reset the lamp counter. If the projector is used without resetting the lamp counter, the alert mail is sent to users in every power-on of the projector. This alert mail will not be sent when unchecking the mail sending condition "When PJ lamp replacement time is reached".

SNMP setting

This projector provides a SNMP (Simple Network Management Protocol) agent function. The SNMP consists of a manager and agents. The group which communicates information each other with SNMP is called "Community". There are two access modes in a community, Refer (read only) and Set (read-write). This projector allows to use Refer (read only) only. The SNMP message informs the projector status called "Trap" to an administrator. Click **SNMP Setting** on the main menu and set up each item.

PJ information

Item	Description
Contact	Enter user name of the projector etc. (optional)
Place	Enter place of the projector (optional)
Community name(refer)	Enter community name (read only). Default name is "public".

Trap

Item	Description
Community name	Enter community name to send "Trap". Default name is "public".
Trap address	Enter IP address of the SNMP manager computer to receive "Trap".

Trap check/delete

Check and delete the trap address

Checking the registered trap address and deleting the address.

To delete the address, tick check box in front of the IP address and click **Delete** button.
✏ Up to 10 trap addresses can be registered.

Trap option

Trap option setting

Tick check boxes in front of the condition item to send the trap.

✏ Click **Set** button if you tick or un-tick the check box on a page.
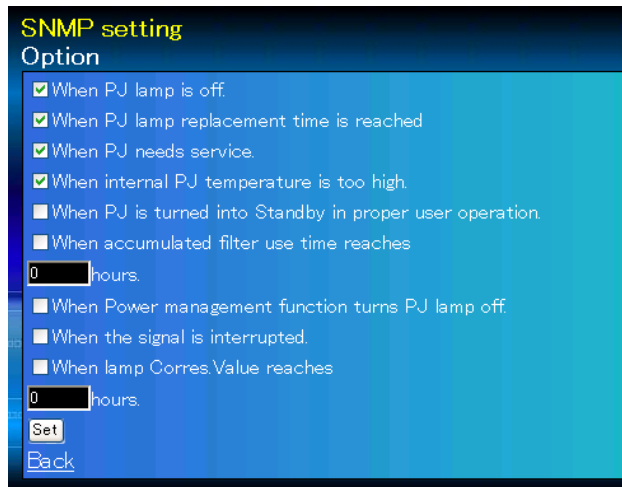

✏ "When PJ lamp is off" signifies the lamp goes out without user operation. "When PJ is turned into Standby in proper user operation" signifies that the projector is turned on by using the web browser and then it is turned into standby with ON/STANDBY button on the top control or the remote control.

✏ Up to 99,999 hours can be set for the time setting.

Chapter 4

Controlling the Projector

4

Describes controlling and setting of the projector by using the web browser.

Power control and status check

Click **Power & Status** on the main menu. The control page will be displayed.

By clicking **ON** or **Standby** button on the page, the power of the projector can be controlled.

Confirmation window as shown in the below appears when the **Standby** button is pressed.
Popup confirmation window

Item	Description
PJ status	
Power	Displays the status of the lamp. (ON, OFF, On starting up, On cooling down, Service in need)
Status	Displays the status of the projector's power. (Refer to next page.)
Power control	Controls the projector power by clicking the "ON" or "Standby" button.

✐ The projector cannot be turned on while the projector is on cooling down.
✐ The web browser checks and updates the projector's condition every 30 seconds automatically.

About projector condition

Status	Description
Normal	Projector is operating normally.
Power management in operation	Power management is operating
Lamp failure	Lamp failure is occurring
Abnormal temperature	The temperature of the projector became too high
Standby after Abnormal Temp.	Projector detects abnormal temp. and sets into standby mode.
Power failure	Power failure has occurred inside the projector. Projector is turned off. Unplug the AC cord and ask servicing to a qualified service personnel.

When a security (PIN code lock) has been set on the projector, you also cannot control it through the network. To control the projector through the network, unlock the security on the projector using with the projector's menu control.

 Caution about turning on/off the projector via the networks
 When turning on/off the projector via the networks, preset the projector as follows:
1. Select "Setting" from the Projector menu.
2. Select "Standby mode" from the Setting menu and set it as "Network".
If you set this function as "Network", the network part of the projector is constantly provided with power even if the projector is turned off. If you set this as Eco, then the network part will be turned off when you turn off the projector. Consequently, you cannot turn on/off the projector via the networks.

ENGLISH

33

Control

Click **Control** on the main menu. The setting method differs depending on the contents of the page. Click on the page number to change pages and select desired setting items.

✐ **Please see the owner's manual of the projector to have the further information of each control item.**

Input

This function is to select the input mode and source mode of the projector. Click **Set** button after selecting the input and source mode.

Item	Description
Input...................Selects input mode of the projector.	
Source..................Selects signal source of the input.	

Computer1 : RGB
             Component
             RGB(Scart)
Computer2 : RGB
HDMI
Video
S-video

✐ The control page displays valid control items depending on the selected input mode, signal or functions of the projector you use, therefore, there may be different controls between the described items and actual control items on the page display. For further information , refer to the projector's owner's manual.

✐ When the projector is in standby, all the controlling items are inactive.

System

This function is to select the system of signal input to the projector. The available system mode are listed on the pull-down menu button according to the input signal. Select a system and then click **Set** button.
** When the input signal is any of Video, S-video, Scart, Component or HDMI, it only displays the current system of signal input but no suggested system.

Available system at the RGB input

Item	Description
XGA1	It automatically switches to the proper computer system of the input signal. * The computer system modes (VGA, SVGA, XGA. SXGA, UXGA, WXGA...) which meet the input signal are listed.

Available system at the Video/S-video/Scart input

Item	Description
NTSC	It automatically switches to the proper color system of the input signal. * The selectable color systems are PAL, SECAM, NTSC, NTSC4.43, PAL-M and PAL-N. * Auto is fixed at the Scart input.

Available system at the Component input

Item	Description
480p	It automatically switches to the proper scanning system of the input signal. * The selectable scanning systems are 480i, 575i, 480p, 575p, 720p and 1080i.

Available system at the HDMI input

Item	Description
D-XGA	It automatically switches to the proper computer system of the input signal. * The computer system modes (D-VGA, D-SVGA, D-XGA. D-SXGA1...) which meet the input signal are listed.
D-480p	It automatically switches to the proper scanning system of the input signal. * The selectable scanning systems are D-480p, D-575p, D-720p and D-1080i.

✐ If the mode (Mode1 to Mode10) which is stored in the item "PC Adjustment" (☞ p.38) is available, they are also listed together with the above mode.

ENGLISH

35

Sound

This function is to adjust the sound of the projector. The values in the text box represent the current control value or status.

Item	Description
Volume	Adjusts the sound volume from the speaker. (0 ~ 63)
Mute	Suppresses the sound. (ON, OFF)

Image adjustment

This function is to adjust the projected picture image and save the image mode. To store the adjusted value, click **Store** button, and to load the adjusted value, click **Load** button.

Item	Description
Contrast	Adjusts picture contrast (0~ 63)
Brightness	Adjusts picture brightness (0~ 63)
Color	Adjusts picture color saturation (0~ 63)
Tint	Adjusts picture hue (0~ 63)
Color temp.	Sets a color temperature mode. (High, Mid, Low, X Low,, User.)
White Balance	
Red, Green, Blue	Adjusts each white balance respectively. (0~ 63)
	* When changing the value of the white balance, the color temp. indicates "User".
Sharpness	Adjusts picture sharpness. (0~ 15)

Gamma .... Switches brightness of darker part of the picture. (Default, 1.8, 2.0, 2.2, 2.4, 2.6)

Noise reduction .... Switches noise reduction mode (OFF, L1, L2)

Progressive .... Switches progressive mode (OFF, L1, L2, Film)

Reset .... Resets the Image adjustment to previous levels.

Store .... Stores the Image adjustment values. Select an item [Image1 - Image4] from the pull-down menu and click **Store** button.
Load image mode .... Loads the Image mode. Select an image mode from the pull-down menu and click **Load** button. (Dynamic, Standard, Real, Cinema, Image1-4)

PC adjustment

Click **PC Adj.** on the main menu. This function is to adjust the signal from the computer connected to the projector to obtain the proper picture image on the screen.

| Item	Description
Current mode	Displays a current mode like VGA, SVGA, XGA. SXGA, UXGA, WXGA, etc. or Mode1 - Mode10 which are the customized mode created by using the "Mode Store" function described below.
Auto PC adj.	Performs automatic adjustment.
Fine sync	Performs Fine Sync adjustment. (0 ~ 31)
Total dots	Adjust the number of total dots in the horizontal period.
Clamp	Adjusts the phase of the clamp.
Position	
Horizontal	Adjusts the horizontal position of the screen.
Vertical	Adjusts the vertical position of the screen.
Reset	Resets the PC adjustments to the previous levels.
Mode Store	Stores the PC adjustment values. Select a mode no. [Mode1 - Mode10] from the pull-down menu.
Mode Free	Clear the PC adjustment values. Select a mode no. [Mode1 - Mode10] from the pull-down menu.

Setting up the projector

Click **Setting** on the main menu. This function is to set up the projector. Select the sub menu [Screen setting] or [Setting] and then set up each setting.

Screen setting

This function is to adjust the screen mode of the projector. The values in the text box represent the current screen status.

Item	Description
Screen	Switches the screen mode. (Normal, Full, Wide(16:9), Zoom, Natural wide, True, Custom) There may not be available mode depending on the input source and the setting of Screen aspect (☞ p.40) as shown in the table below.

* See the next page for the description of other functions.

| Screen Aspect	Default(16:10)		16:9		4:3	
	Input source		Input source		Input source	
Screen mode	Video	PC	Video	PC	Video	PC
Normal	✔	✔	✔	✔	✔	✔
Full	✔	✔	✔	✔	✔	✔
Wide(16:9)	✔	✔	*1	*1	✔	✔
Zoom	✔	✔	✔	✔	✔	✔
Natural wide	*2	*1	*2	*1	*1	*1
True	*1	✔	*1	✔	*1	*1
Custom	✔	✔	✔	✔	✔	✔

✍ The mark "✔" means that the available screen mode in the selected input source system.

*1 The error message appears when selecting the disabled screen mode indicated with "*1".

*2 Natural wide cannot be selected when 720p, 1080i or 1080p is selected in AV system menu.

Continue from the previous page.

Item	Description
Ceiling	Sets the image top/bottom and left/right reversed. (ON, OFF)
Rear	Sets the image left/right reversed. (ON, OFF)
Screen aspect	Sets the aspect. {Default(16:10), 16:9, 4:3} *When 4:3 or 16:9 is selected, some Screen modes are limited. (☞ p.39)
Colorboard	Sets the similar color of the wall or the school blackboard. {OFF, Red, Yellow, Blue, Green, Blackboard(Green)}
Reset	Resets the Screen settings.
Setting 1

| Item	Description
Language	Sets the language display of projector's on-screen display menu.
Auto setup	Executes the Auto PC Adj. and Input Search function below according to the each setting after clicking **Start** button.
Auto PC adj.	Sets Auto PC Adjustment mode. (ON, OFF)
Input search	Sets the auto-input signal detection mode. (ON1, ON2, OFF)
3D setting	Sets 3D display functions.
3D.	Starts 3D projection. (ON, OFF)
3D sync	Switches the 3D sync signal when not getting correct 3D image. {1(=default), 2(=inverted)}
3D-->2D	Sets the 2D mode when the player is not compatible with 3D video. (ON, OFF)
3D phase	Adjusts the 3D sync output signal from the projector to external emitter system. (0-31)
Zoom	Sets reset or store the adjustment value with ZOOM+/− buttons on the projector. (Reset, Store1, Store2)
Background	Sets the screen background when no signal input. (Blue, User, Black)
Display	Switches on or off the on-screen menu display on the screen. (OFF, Countdown Off, ON)
Countdown off	Displays input image instead the countdown during the startup.
Logo	Sets on or off the logo display on the screen during the startup. (OFF, Default, User)
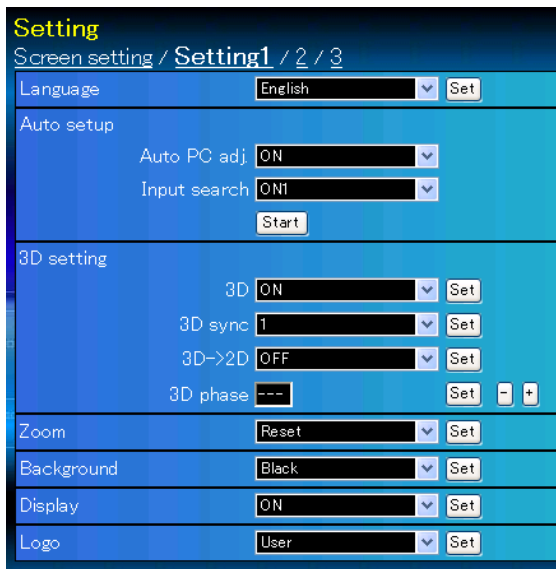

Setting 2

| Item	Description
Terminal	Sets the COMPUTER IN 2/MONITOR OUT terminal. (Computer2, Monitor out)
Power management	Sets into the selected power management mode (Ready, Shutdown, OFF) if the input signal is interrupted and no control key is pressed for the specified period of time. *The specified time can be set 1 to 30 min.
Direct on	Sets the power-on mode when the AC cord is connected to the outlet. (ON. OFF)
Lamp control	Selects lamp control mode. (Normal, Eco)
Key lock	Sets the prohibition of controls either Projector or Remote control. (OFF, Projector keys, Remote control)
Fan control	Sets the fan control speed. OFF Normal mode ON1 Highland mode 1 ON2 Highland mode 2
Lamp Corres. Value(h)	Displays the lamp use time (Corresponding value) . Reset the time after lamp replacement. Click "Reset", a confirmation display appears, and then click "OK", the time will be reset.

Setting 3

Item	Description
Filter counter	Displays the filter counter. Reset the time after filter replacement. Click "Reset", a confirmation display appears, and then click "OK", the time will be reset.
Filter warning	Sets the time to indicate the filter warning message on the screen. (OFF, 2000H, 3000H, 4000H)
Factory default	Sets all of the projector control items to the factory default setting except the following items. User Logo, Log PIN code lock, PIN code lock, Lamp Corres. Value, Filter counter, PJ time * This function is effective for all the Network settings.
No show	Sets the black out image temporarily. (ON, OFF)
Freeze	Sets the image to freeze mode. (ON, OFF)
Closed caption	Sets the closed caption function.
Closed caption	Sets the closed caption mode. (OFF, CC1, CC2, CC3, CC4)
Color	Sets the color of the contents. (Color, White)

Use of telnet

You can control the projector by using the telnet application[*1] installed on your computer. Normally, the telnet application is available on your computer.
* The telnet 10000 port is used to control the projector.

Control

(For example, in case of using the telnet application of **Windows XP Professional**.)

1. Select **Run...** submenu from **Start** menu on the computer. Type "telnet" onto the **Open** text area on the displayed window and press **OK** button.
(For example, in case of using the telnet application of **Mac OS X v 10.4**)

1. Select **Terminal** from **Applications** -->**Utilities**.
Type as below on the displayed window.
> telnet [return]

2. The telnet application will start and the following window will be displayed. Type as below to connect the projector.
> open 192.168.1.201 10000 [return]

* Use the IP address assigned to the projector.

3. When communication is established correctly, the word "PASSWORD:" appears on the window. Type the login password (Network PIN code[*2]) for the projector and then press "Enter" key on the keyboard. If you do not set up the Network PIN code, just press "Enter" key.
   When the word "Hello" is replied, login has been succeeded.
   * The password "1234" is used for the example.

4. Type the commands, refer to below table, to control the projector and then press "Enter" key for termination. For example, type "C00" which is a command to turn on the projector, and press "Enter" key. Confirm the projector is turning on.
   * Enter with ASCII 64-byte capital characters and one-byte characters.

To disconnect the communication, press "Ctrl" key and "]" key at the same time, type "close" and then press "Enter" key on the Keyboard.

> close [return]

The table below shows the typical command lists for controlling this projector and please consult your local dealer for further information of another commands.

Command list table

Command	Function
C00	Power on
C02	Power off
C09	Volume up
C0A	Volume down
C0B	Audio Mute on
C0C	Audio Mute off
C1C	Menu display on
C1D	Menu display off

*1 Further instructions about the telnet application, please see the on-line guide on your computer.

*2 The password is a Network PIN code decided item "Network PIN code setting" (☞pp.14, 23). If the authentication of the entered password is failed 4 times continuously, the communication will be disconnected automatically. Please try again for the connection.

✐ If the password or any command is not entered for more than 30 seconds, the communication will be disconnected automatically. Please try again for the connection.

Web browser setting

This projector is designed to be set up and controlled from an Internet web browser. Depending on the preference settings of the web browser, some control functions may not be available. Please make sure that the following functions are set up properly in the web browser.

Active Script/JavaScript enable

There are some control items used with the JavaScript function in the setting pages. If the web browser is set not to use this JavaScript function, it may not control the projector properly. In this case, the warning message "Make sure JavaScript is ON." will be displayed on the top of the page. To enable the JavaScript, please see further instructions on the next page.

Proxy setting

In some cases, your web browser is set up to use the proxy server for the internet or intranet connection. In this case, when you install this projector into the local network, you should set up the proxy setting of web browser preference correctly. Especially when connecting the projector and computer with a STP crossover cable directly, or when the network does not provide the proxy server, make sure that "not use proxy server" is set up in your web browser preference. Please see item "Examples: OS/Browsers" in the next page for further setting up procedure.

✐ There are various ways to change your browser preferences depending on the version or applications. Please see the setting instructions on next page for example and also refer to on-line help of your web browser.
Examples: OS/Browsers

Windows XP Professional

Internet Explorer v.6.0

ActiveScript setting

Select **Internet Options** from **Tools** menu on the web browser and then select **Security** tab and click **Customize Level…** button. On the security setting window, scroll down and find the **Scripting** item, make sure that "Enable" is selected in item **Active Scripting**.

Proxy setting

Select **Internet Options** from **Tools** menu on the web browser and then select **Connection** tab and click **LAN Settings** button. Properly set up your web browser's the proxy server settings according to the local area network environment to which the projector is connected.
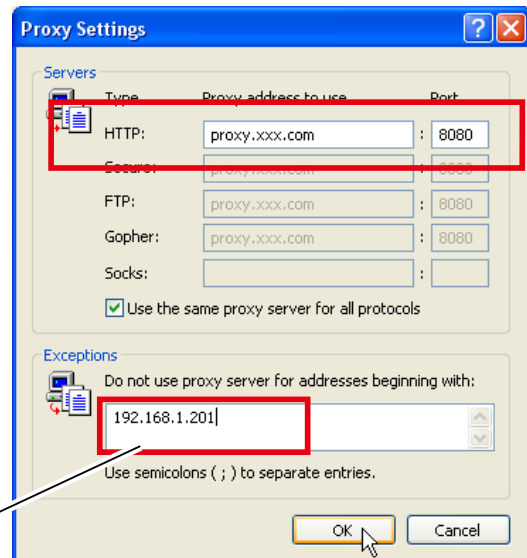

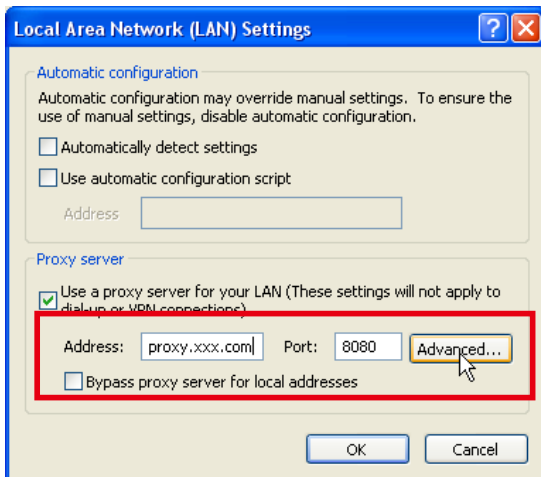

- Using proxy server

To use an external internet connection from the local area network, check the item **Use a proxy server** and enter the proxy server address and port correctly in the proxy settings window. For further instruction please consult your network administrator.

- Not using proxy server

Uncheck the item **Use a proxy server**.
If you connect the projector to the computer directly with STP crossover cable, this must be unchecked.

To designate proxy settings that will not use the proxy server when accessing the projector installed in the local area network, enter the IP address or domain name here.

Netscape Navigator v.7.1

JavaScript Setting

Select **Preference** from **Edit** menu on the web browser and then select the item **Advanced/Scripts & Plugins** in the **Category** column. Make sure that the **Enable JavaScript for Navigator** is checked.
Proxy setting

Select **Preference** from **Edit** menu on the web browser and then select the item **Advanced/Proxies** in the **Category** column. Properly set up your web browser's the proxy server settings according to the local area network environment to which the projector is connected.

- Using proxy server

When you use an external internet connection from the local area network, select the item **Manual proxy configuration**. Enter the proxy server address and port number correctly on **HTTP Proxy** item. For further instruction please consult your network administrator.

- Not using proxy server

Select the item **Direct connection to the Internet** in the proxy setting window.
If you connect the projector to the computer directly with STP crossover cable, this must be selected.

To designate proxy settings that will not use the proxy server when accessing the projector installed in the local area network, enter the IP address or domain name here.

ENGLISH
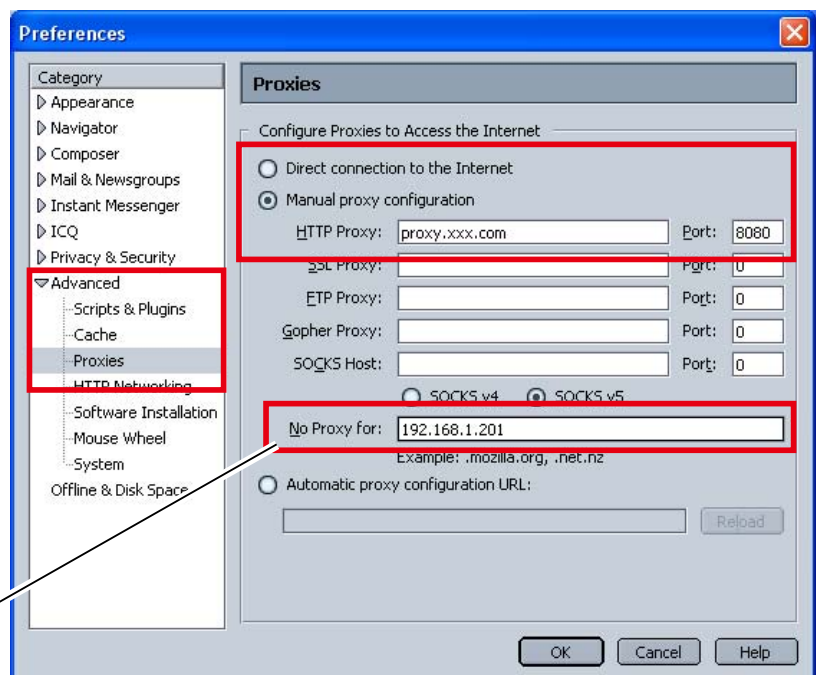

MAC OS X v 10.4

Safari v.3.2.1

JavaScript enable setting

Select **Preferences...** from **Safari** on the web browser and then select **Security** tab and check **Enable JavaScript**.
Proxy setting

1 Open **Preferences...** from **Safari** menu on the web browser **Safari**. The preference menu appears.

2 Select **Advanced** icon and then click **Proxies: Change Settings ...**.

3 Select **Proxies** tab and properly set up your web browser **Safari**'s the proxy server settings according to the local area network environment to which the projector is connected.

- Using proxy server

To use an external internet connection from the local area network, check the items **Web Proxy (HTTP)** and **Secure Web Proxy (HTTPS)** of **Select a proxy server to configure** window and enter the proxy server address and port correctly in **Web Proxy Server** window. For further instruction please consult your network administrator.

- Not using proxy server

Uncheck the items **Web Proxy (HTTP)** and **Secure Web Proxy (HTTPS)** of **Select a proxy server to configure**.
If you connect the projector to the computer directly with STP crossover cable, they must be unchecked.

To designate proxy settings that will not use the proxy server when accessing the projector installed in the local area network, enter the IP address or domain name here.
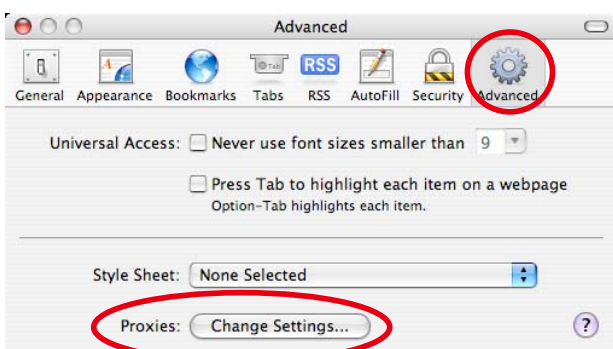

Q&A

Installation/Access

Q *Why doesn't the setting page appear in my web browser?*

A Following causes are possible. Please check them.
1. The projector does not connect to the network.
   Check LED indicators status (☞ p.12).
   - Check the connection of LAN cable if the LINK Lamp does not light green.
   - Check the network configuration of the projector if the ACT Lamp does not blink orange.
2. Wrong network configuration of the computer.
   Check the network configuration of the computer.
3. The proxy setting of the web browser is not set correctly (☞ p.52).
4. The computer does not provide TCP/IP protocol.

Q *How can I restrict access from the computer.*

A
1. Please use the password authentication function on the login page (☞ p.23).
2. Please use the IP filtering function provided with the gateway (router) to restrict the accessing from the computer. For further information please consult your network administrator.

Q *Can I access the projector installed on the company's local area network from a remote location?*

A There are some ways to access to the projector in the LAN, but you must consult your network administrator for security reason.
☛ Use of modem
   (Connect to the company's network from your home or some other places by using modem.)
☛ Use of private line
   (Connect to the company's network from the branch office or maintenance office by using private line.)
☛ Use of internet
   (Connect to the company's network from your home, branch office or some other places by using the internet.)

Q *We use the DHCP/BOOTP server to assign the IP address. Is it possible to use the projector in this network environment?*

A Possible. This projector supports the DHCP/BOOTP server. To use this projector in this network environment, set it up so that the DHCP/BOOTP server does not assign the IP address configured to this projector for another device on the network. Please consult your network administrator (☞ pp.13, 24).

Q *How can I install several projectors?*

A Install and configure network one by one to avoid the IP address collision each other. To configure the IP address please see item "Network configuration" (☞ pp.12-13, 24).

Password/Login

Q *What should I do when I forget the IP address of the projector?*

A You can check the IP address in the "Network information" menu.

Q *What should I do when I forget the password (Network PIN code)?*

A Please set the new network PIN code in the "Network PIN code" menu.

Q *Can I register the setting page as a web browser "Favorites" or "Bookmarks"?*

A Please add "Login" page to your "Favorites" or "Bookmarks". Do not add the specified setting page because it will not be able to perform the password authentication correctly.

Operation

Q *Why can't be turned on/off with web browser?*

A Please make sure the settings of the projector are correct to use the projector. Please set the **Standby mode** of the projector's **Setting menu** to "**Network**". Refer to "4. Controlling the Projector" ➜ "Power control and status check" (☞ pp.32 - 33).

Q *Why can't I change the controls in the setting page with web browser?*

A Please make sure the projector is turned on. If it is in the standby mode, the setting is not effective to the projector. To control the projector with a web browser, the projector must be in the powered-on condition.

Q *Why does it sometimes take a lot of time to complete the page display?*

A The display speed of the page depends on the network environment in which both the projector and computer are placed. It may take much time to complete the page display if network traffic is heavy. Please consult your network administrator.

Q *How many numbers of the E-mail address can I register in the E-mail setting page.*

A You can register up to 10 addresses.

Q *Why am I not receiving E-mail alert messages?*

A Make sure that the registered E-mail address and SMTP server address are correct. If the SMTP server is located in your LAN (Local Area Network), the address should be set to the SMTP server in your LAN. The SMTP server located outside of your LAN may not be available for security reason. For further information please contact your network administrator (☞ p.25).

Q *What are the rules for IP address assignment?*

A If the network is constructed with TCP/IP protocol, a unique IP address is required for each piece of network equipment. The following are basic rules of the assignment.

Rule1

Do not configure the same IP address to the network equipment in the same network group. Each piece of equipment must be assigned a unique IP address.

If the IP address is set [192.168.x.x], the Subnet Mask should be set [255.255.255.0] for example.

Rule2

The start address [xxx.xxx.xxx.0] and the last address [xxx.xxx.xxx.255] of the IP address must not be assigned to any other equipment. These address numbers are reserved.

Rule3

The IP address must correlate to a network number. If network numbers are different between the equipment, they cannot establish communications each other. In this case, the router is placed in the networks to make the routing.

Q *Can I control the projector by using the telnet application?*

A Possible. Please refer to the item "Use of telnet" (☞ p.48 - 49).

Q *What is the MAC address assigned to the projector?*

A The MAC address is displayed in "Network information" menu of the projector (☞ p.14) and in "Information" menu through the web browser (☞ p.42).

Q *Can I update the firmware of the projector.*

A It is possible to update the firmware through the network. It is required to have a special tool for the updating. For further information please consult your local dealer. The version number of the firmware is indicated on the lower part of the "Initial setting" page.

Version of the firmware
